NEW YORK (MARCH 21) BUSINESS WIRE - Greyhound Lines expanded its New York service by 28 percent Wednesday, David Batchelor, president of New York-based Eastern Greyhound, said.

''Starting today, we are running 59 schedules a day out of the city, or 58 percent of our pre-strike number of schedules,'' Batchelor said.

Greyhound has added 13 daily round trips (see attached chart).

Nationwide, Greyhound now provides 46 percent of its pre-strike schedule miles, Wednesday expanding its service by 35,617 schedule miles, or 14 percent. The expansion brought bus service to 70 locations that had been without service since a March 2 strike against Greyhound was called by the Amalgamated Transit Union.

MIAMI BEACH, FL (MARCH 21) BUSINESS WIRE - Non-Invasive Monitoring Systems Inc. (NIMS)(NASDAQ:NIMU) Wednesday announced unaudited results for the quarter and for the six months ended Jan. 31.

Revenues for the second quarter of fiscal 1990 were $312,520 as compared to $429,027 for the second quarter of last year. For the three months ended Jan. 31, the company reported a loss of $153,435 as compared to a loss of $120,158 for the like period in 1989.

Revenues for the first six months of fiscal 1990 were $613,340 as compared to $927,522 in the first six months of fiscal 1989. For the six months ended Jan. 31, the company had a loss of $300,469 as compared to a loss of $142,386 for 1989.

The decline in revenue and income in 1990 as compared to 1989 is attributable to the sales of three 10-bed Respicentral systems to Mount Sinai Medical Center, Miami Beach, Fla. (an affiliated party) in the six months ended Jan. 31, 1989.

NIMS recently announced that it has commenced solicitation of the exercise of its outstanding Common Stock Purchase Warrants by reducing the exercise price of its Class A Warrants from 90 cents to 50 cents through April 6, which period may be extended for up to an additional 30 days.

The company also reduced the exercise price of the Class B Warrants underlying the Class A Warrants through Feb. 28, 1991.

NIMS is a Florida corporation which is engaged in developing, manufacturing and marketing computer assisted, non-invasive monitoring devices designed to detect abnormal respiratory and other medical conditions from sensors plaed on the body's surface.

CLEVELAND, OH (MARCH 21) BUSINESS WIRE - Ferro Corporation (NYSE-FOE) announced that the occurrence of several unrelated events in recent months will cause first quarter earnings to be less than 50 percent of the comparable period last year.

''In Latin America, which contributed 25 percent of 1989 earnings, we are seeing deteriorating economic conditions, particularly in Brazil. The newly elected Brazilian government has implemented radical economic measures to control inflation. Our operations in Brazil had already been negatively impacted by inflationary pressures on costs and weakening consumer demand. Additionally, there was an immediate effect on our business when these government controls were put in place. The full effect of these programs is yet to be determined,'' said Adolph Posnick, Chairman and Chief Executive Officer.

''In the United States, while most operations were performing well, sluggish demand in the automotive and appliance sectors continues to affect key business units. This is particularly evident in our compounded plastics and powder coatings businesses where volume and profits are below forecast,'' Posnick commented.

The Company also indicated that in France an accelerated program to install new equipment to provide capability for significant new business in its recently acquired chemical plant has necessitated a three-month shut down in production at that facility.

Posnick noted, however, that the factors contributing to weak first quarter performance are not permanent and that prospects for the rest of the year remain positive.

Ferro Corporation is a major international producer of industrial specialty materials including coatings, colors, ceramics, chemicals and plastics. The Company reported sales of $1.08 billion in 1989.

SACRAMENTO, CA (MARCH 21) BUSINESS WIRE - Northern Telecom (NYSE:NT) Wednesday dedicated a new 75,000 sq. ft. Sacramento Technical Education Center, which significantly expands the corporation's ability to offer its customers advanced training and hands-on experience with leading telecommunications technologies.

The $30 million center will serve telephone company customers from the United States, Canada and Pacific Rim countries.

The new facility, located on 6.2 acres in the Metro Center Office Park at 2800 Gateway Oaks Drive, replaces an existing 31,200 sq. ft. facility that opened in 1984. Currently, about 60 Northern Telecom employees work at the new center, which serves up to 400 students a day. The direct economic impact of the training center on the hotel, restaurant and transportation industries of Sacramento is approximately $7 million per year.

''The new trading center will ensure that our educational programs keep pace with the evolution of our products and technology. Technical training is an important component of meeting our customers' needs,'' said Alan Lutz, group vice president for Northern Telecom's Integrated Network Systems (INS) group.

The Sacramento Technical Education Center joins a second facility, located in Raleigh, N.C., to serve customers of Northern Telecom's INS, Transmission and Data Networks groups.

With its headquarters in Research Triangle Park, N.C., the INS group develops, manufactures and markets digital switching systems and related test and maintenance equipment for the public telephone network. In August 1989, Northern Telecom celebrated the graduation of the 100,000th student from its technical training centers.

In 1988, about 5,200 people attended Northern Telecom training classes in Sacramento. In 1990, the first full year of operation for the new Sacramento Technical Education Center, the company expects more than 8,000 students to attend classes at the facility.

''We are pleased to have Northern Telecom's new Technical Education Center here in Sacramento,'' said Sacramento Mayor Anne Rudin. ''This is another indication of Sacramento's emergence as a major national business

and commercial hub.''

The Sacramento Technical Education Center has 30 classrooms, 17 laboratories equipped with Northern Telecom's switching, data, and transmission systems, administrative offices, and a full-service dining area. Students are trained in the maintenance and operation of Northern Telecom's latest technologies, including Integrated Services Digital Network (ISDN) and Signaling System 7 (SS7) networks.

A computer-based training curriculum, as well as hands-on experience in fully equipped labs, provides students with information on all aspects of telecommunications switching systems.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employes more than 22,000 people across the United States.

PARIS (MARCH 21) BUSINESS WIRE - Sara Lee Corp., based in Chicago, and one

of the world's largest manufacturers and distributors of high quality food and consumer packaged products, Wednesday reinforced its major presence in European markets through an introduction to the Paris Bourse sponsored by Banque Paribas and broker Courceux-Bouvet.

The company's stock will begin trading on March 28.

Continuing the corporation's strategy to expand its financial presence in countries where its name, products and activities are already well known, this follows January's listings on the Zurich, Geneva and Basel Stock Exchanges and complements its other European listings in London and Amsterdam.

With total revenues of approximately $1 billion in France, the group's best known consumer products brands include Dim Hosiery, Kiwi and Tana shoe care products, and the popular analgesic, Aspro.

Sara Lee Corp. is especially well known for its ownership of the major food brand, Maison du Cafe. Additionally, Sara Lee markets popular lines of snack foods, including Benenuts and is now introducing a line of frozen desserts and pastries under the Sara Lee brand names.

Sara Lee Corp. has over 100,000 employees and operates in more than 30 countries including France, the United Kingdom, and the Netherlands. of the corporation's US$11.7 billion of sales in fiscal 1989, food products accounted for 66 percent of revenues while non-food operations comprised the remaining 34 percent. The increase in net income per share amounted to 23.7 percent. In fiscal 1989, 73 percent of sales were generated in the United States while 25 percent came from Europe and 2 percent from Africa and Asia.

Saral Lee Corp. is organized along product lines, with four core businesses operating in Europe. Sara Lee Coffee and Grocery, and Sara Lee Household and Personal Care have been combined into a new corporate identity called Sara Lee/DE (Douwe Egberts), which is headquartered in Utrecht, the Netherlands.

Major brands in the Coffee and Grocery line of business include Douwe Egberts, Van Nelle, Maison du Cafe, Jacqmotte, Pickwick, Benenuts and Duyvis. Major brands in the household and personal care line of businesses include Kiwi, Tana, Radox, Sanex, Catch, Rennie and Aspro.

The other two businesses - Personal Products, based in France, and Sara Lee Bakery, based in the UK - are directed from the United States. Brands in the personal products line of business include Dim, Hanes and Champion. Sara Lee is the major brand in the bakery line of business.

RALEIGH, NC (MARCH 21) BUSINESS WIRE - The directors of Carolina Power & Light Co. (NYSE: CPL) Wednesday declared quarterly dividends on common and preferred stock during a meeting in Raleigh.

The quarterly common stock dividend of 73 cents per share is payable May 1 1990 to shareholders of record as of April 10, 1990.

The directors also passed a resolution honoring board member Karl G. Hudson Jr. who will retire in May after 23 years of service on the board. Hudson retired in January as executive vice president and supervising partner of the Belk-Hudson-Leggett department store chain in the Triangle area. A nominee to succeed Hudson will be recommended by CP&L's board of directors prior to the company's annual shareholders' meeting in May.

Dividends at the prescribed rate for preferred stock are $1.25 per share on the $5 series; $1.05 per share on the $4.20 series; $1.36 on the $5.44 series; $1.93 on the $7.72 series; $1.9875 on the $7.95 series; $2.12 on the $8.48 series; and $2.275 on the $9.10 series.

The preferred dividends are payable July 2, 1990 to shareholders of record as of June 20, 1990.

GREAT NECK, NY (MARCH 21) BUSINESS WIRE - EXOVIR Inc. (NASDAQ:XOVR) announced Wednesday that it completed a private placement for $308,500. The company sold 308,500 ''units'' at $1.00 each to a group of accredited investors which included some of the company's directors. Each unit included one share of the company's common stock and a three year warrant to purchase one share of common stock at an exercise price of $2.00.

Commenting on this private placement, Jeffrey Powell, executive vice president, stated, ''These funds were urgently needed to help launch our first product, EXOLIFT. After being a development stage company for so long, this is a most exciting time for us and our shareholders.''

EXOLIFT, which was invented by Dr. Albert Kligman, who also invented Retin-A, is a deep pore cleaner that removes dirt, grease, makeup and other debris that clog pores. ''We are very excited about this innovative product and the response it has already received,'' Powell continued.

EXOVIR Inc. is a medical research and development company specializing in topically administered products for the treatment of skin diseases, and cosmetic products.

CONCORD, NH (MARCH 21) BUSINESS WIRE - Community Bankshares Inc. (NASDAQ: CBNH), holding company for Concord Savings Bank, Wednesday announced the appointment of Douglas Crichfield as president and chief executive officer of the holding company and of Concord Savings Bank.

Crichfield was also elected as a director of the holding company and of the bank.

Crichfield joined the company in August 1988 as executive vice president and chief operating officer of Concord Savings Bank and also as chief financial officer and treasurer of Community Bankshares Inc. He has served as acting president of both organizations since January 1990.

In making today's announcement, Thomas Hardiman, chairman of the board of directors, stated, ''Doug has over 25 years of experience in all aspects of banking, and we believe that he is highly qualified to lead the company as we face the challenges that lie ahead.''

Crichfield began his banking career at the Quincy Trust Company, a predecessor of Hancock Bank and Trust Co., and thereafter as vice president of corporate finance at the Bank of New England Corp. in Boston.

Crichfield holds a masters and a bachelor of arts degree in economics from Northeastern University in Boston. He has attended the Graduate School of Bank Investments at the University of Illinois and the Institute of Financial Management at the Harvard University Graduate School of Business Administration.

KINGSTON, NY (MARCH 21) BUSINESS WIRE - Leading energy project developer Besicorp Group Inc. together with its joint venture development partner Kamine Development Corp., a New Jersey based firm, announce Wednesday the signing of a loan agreement and development agreement with Ansaldo North America Inc., a subsidiary of Ansaldo SpA, Genoa, Italy.

Ansaldo has provided $3 million in limited recourse development capital which financing will ultimately be converted into a minority equity interest in projects being developed by Besicorp and Kamine.

Under the development agreement, Ansaldo will provide specific development and financial services including environmental permitting, engineering, and utility letters of credit for a number of Besicorp/Kamine projects.

The aggregate value of these services is projected to be $10 million. In addition, Ansaldo is expected to be the engineering, procurement and construction contractor for each of the projects with a projected aggregate value of $200 to $300 million.

According to BESI President, Michael F. Zinn, ''The Ansaldo affiliation represents an important milestone in our project development activities. Ansaldo's commitment of capital and development services significantly enhances the value of the projects and accelerates their completion.''

Besicorp and Kamine are jointly developing over 500 MW of gas fired cogeneration power production. The company is also a manufacturer and distributor of proprietary heat exchange technologies.

Besicorp stock trades under the symbol ''BESI''' on the over-the-counter market.

#90080b0832 03/21/1990 ~Business Wire

CLEVELAND (MARCH 21) BUSINESS WIRE - March 21, 1990 - Agency Rent-A-Car, Inc. (NASDAQ:AGNC), the nation's leading automobile insurance replacement company, today reported record revenue for the fourth quarter and the fiscal year ended January 31, 1990. Automobile rental revenue increased by $8.4 million or 13 percent to $73.8 million for the fourth quarter of fiscal year 1990 compared to the same period last year. For the fiscal year, revenue reached a record $274.3 million, which was an increase of 21 percent from last year's $227.3 million. Fleet size at January 31, 1990 was 42,000 units.

The fourth quarter net income of $6.2 million or $.25 per share is the fiscal year's strongest quarter, demonstrating that the Company has made significant inroads in overcoming the slow used car market and reducing borrowing costs. Net income for the fiscal year was $17.1 million or $.69 per share compared to $22.4 million last year, excluding a non-recurring gain on the sale of real estate of $1.1 million. (Earnings per share reflect adjustments for the 5 percent stock dividend paid in May 1989.)

Mr. Sam J. Frankino, Chairman of the Board, commented that the Company's recently implemented field office used car sales program is proving extremely successful for the timely disposal of retired fleet vehicles. It is expected that this new program will positively influence the Company's recent experience of losses in the disposition of its fleet vehicles.

Mr. Frankino also indicated that the Company, through aggressive cash management and timing of fleet purchases, has reduced debt 20 percent during the year from $151.8 million to $121.8 million. This will enable the Company to reduce interest costs in the next fiscal year.

The Company continued to maintain tight controls over operating expenses into the fourth quarter. Total operating expenses as a percent of revenue were reduced by a full 4 percent compared to the third quarter. The Company's management will continue to monitor these expenses closely and is expecting further reductions into the next fiscal year.

In its fiscal year ending January 31, 1991, the Company plans to increase its rental fleet to 47,000 units and rental locations from the present 710 to 775.

BALA CYNWYD, PA. (MARCH 21) BUSINESS WIRE - EQK Realty Investors I (NYSE symbol EKR) Wednesday (Mar. 21, 1990) reported results of operations for the calendar year ended Dec. 31, 1989. Net funds generated (cash flow) for the year 1989 was $11,340,000, or $1.49 per share.

Net funds generated (cash flow) for the three months ended Dec. 31, 1989, was $2,570,000, or 33 cents per share.

For the three and twelve month periods ended Dec. 31, 1989, the net loss before an extraordinary gain from the forgiveness of deferred portfolio management fees (in the amount of $1,160,000, or 15 cents per share) was

$900,000, or 13 cents per share loss, and $2,650,000, or a 35 cent per share loss, respectively.

The net loss for the year 1989 was $1,490,000, or 20 per share, after net income of $260,000, or 2 cents per share for the fourth quarter.

The company also announced that the aggregate appraised value of its real estate portfolio at year-end was $187.5 million, as determined by Landauer Associates, a nationally recognized independent real estate appraisal firm.

The net liquidation value of the company, based on the appraised values, and taking into consideration the company's liquid assets, all of its liabilities, and the present value of costs that would be associated with a liquidating sale, was $12.89 per share at year-end.

The company's real estate portfolio consists of three properties: Harrisburg East Mall in Harrisburg, Pa.; Castleton Commercial Park in Indianapolis, Ind.; and Peachtree-Dunwoody Pavillion in Atlanta, Ga.

STAMFORD, CT (MARCH 21) COMTEX - The owners of Security Federal Savings and Loan Association of Albuquerque, NM, citing applicable principals of law and equity, have rescinded the 1985 acquisition of Security Federal,

which was recently taken over by the Office of Thrift Supervision.

The basis for the rescission includes material failure of consideration and other breaches that go to the essence of the federal assistance agreement under which the thrift was purchased, according to a filing with the Securities and Exchange Commission.

Also, the owners have filed suit in U.S. District Court for the District of New Mexico for restitution, damages, injunction and claims of breach of contract, frustration of purpose, failure of consideration and unlawful taking without just compensation.

The owners have indicated a willingness to continue operating Security Federal on behalf of the Office of Thrift Supervision, the Federal Deposit Insurance Corporation and the Resolution Trust Corp. until formal restitution can be accomplished.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 20, 1990

#90080c0047 03/21/1990 ~Comtex

STAMFORD, CT (MARCH 21) COMTEX - Pittsburgh-based Trilos Corp. and its wholly owned Standun Inc. unit have filed suit against former Standun shareholders and the accounting firm Arthur Andersen & Co., asking that the 1988 acquisition of Standun be rescinded because of violations of federal securities laws in connection with the deal.

The suit, filed in U.S. District Court for the Central District of California, asks the court to either rescind the 1988 $10.7 million acquisition of Standun or award Trilos $18 million in damages, according to a Securities and Exchange Commission filing.

The suit charges Arthur Andersen, which was Standun's accounting firm, with malpractice; it also charges that certain financial information provided to Trilos by the accounting firm did not accurately present Standun's financial position at the time of the acquisition.

Trilos also claims that the balance sheets that it was given before the purchase failed to disclose that Standun was exposed to liability for federal taxes, together with penalties and interest charges, of more than $6 million, and liability for California state taxes of more than $1 million.

The selling shareholders are charged with failing to disclose material

adverse changes in Standun's financial position between Oct. 31, 1987, and the Feb. 11, 1988, purchase date, as required under the acquisition documents.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 20, 1990

#90080c0048 03/21/1990 ~Comtex
STAMFORD, CT (MARCH 21) COMTEX - Pinnacel West Capital Corp., the financially troubled Phoenix holding company, has rejected a proposed acquisition offer from PacifiCorp, because the offer was valued by Pinnacle West's investment advisers as below the company's current book value.

Under the Feb. 27 acquisition proposal, PacifiCorp would acquire Pinnacle West in a stock swap in which each Pinnacle West common share would be exchanged for .88 of a share of PacifiCorp common stock following a 2-for-1 PacifiCorp stock split, according to a filing with the Securities and Exchange Commission.

The proposal was studied by The First Boston Corp. and Salomon Brothers Inc. on behalf of Pinnacle West, and the two firms concluded that the offer was inadequate from a financial point of view.

Based on the investment bankers' recommendation, the Pinnacle West board of directors voted to reject the offer.

Pinnacle West is a holding company that owns Arizona Public Service Co. Portland, OR-based PacifiCorp is a financial services, telecommunications and utility holding company.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 20, 1990

GROUP LED BY TRINITY CAPITAL CORP OF STAMFORD, CT OWNS 6,750,750 SHARES (47.40%) OF MEMRY CORP (TICKER: MRMT) OF NORWALK, CT.

ANNOUNCEMENT:

Pursuant to a letter dated Mar. 6, 1990, Trinity waived its right to have up to 2 million common shares that Memry might have to sell prior to Mar. 31, 1990 included in the "number of shares (base amount) outstanding on a diluted basis after giving effect to such conversion," as such phrase is used in Memry's certificate of designations, preferences, and rights of series A preferred stock.

The inclusion of those shares might possibly decrease the number of common shares that Trinity would receive upon a future conversion of the series A preferred stock.

Pursuant to an agreement dated Mar. 12, 1990, Trinity waived its right to have 408,650 shares issued in June of 1989 to certain foreign investors included in the base amount and to have 250,000 shares issuable upon the exercise of to purchase 250,000 shares issued to Trinity Trading Co., J.W. Johnston, and J. Morgan included in the base amount.

In the letter dated Mar. 7, 1990, Trinity agreed that it would not purchase shares that would give it in excess of 50 percent of Menry and would not

sell, transfer or assign any stock acquired upon the conversion of series B preferred stock to a single investor without at least 20 days notification to Memry.

WASHINGTON (MARCH 21) COMTEX - The 8-K report filed at the SEC shows on March 15, 1990, Spinnaker Software Corp. and Phemus Corp., an affiliate of Aeneas Venture Corp. (a Spinnaker shareholder), entered into a subordinated debt credit facility. Under the arrangement, Phemus has promised to loan Spinnaker up to $3.0 million on a revolving basis for three years, and thereafter unsecured for three more years.

Any loans made to Spinnaker via the credit facility will be payable at a rate of 14% per annum, with 9% payable currently, on outstanding balances. For a nominal fee, Spinnaker sold Phemus warrants to purchase 2.22 million shares of Spinnaker common stock, as a consideration for the granted credit facility. The warrant price per share is $1.35, and those warrant purchases may be made for a period of five years from the March 15, 1990 date of the warrant purchase agreement.

Spinnaker expects to use funds made available through the credit facility to develop and market its new PLUS software product.

#90080c0078 03/21/1990 ~Comtex

WASHINGTON (MARCH 21) COMTEX - The 8-K report filed at the SEC shows in a press release dated March 12, 1990, Accugraph Corp. announced that it was notified of the severe financial difficulty of its controlling shareholder Kinburn Technology Corp. These difficulties are expected to cause Kinburn Technologies' loss of control of Accugraph to BCE Inc.

Kinburn Technology is also the parent company of Kinburn Corp., and has guaranteed Kinburn's loans, approximately $415 million of which are owed to BCE Inc. Since Kinburn Technology had pledged its controlling interest in Accugraphics as collateral for these loans, and expects to be called to pay these loans for Kinburn Corp. but does not possess sufficient capital to fulfill its guarantees, it expects to have to reliquish its control of

Accugraph to BCE.

For the previous two years, Accugraph has been dependent upon Kinburn Technology for support. Though it has improved its financial standing, its dependence remains. Accugraph, however, expects to be able to remain at the leading edge of the CAD/CAM/CAE business despite the expected change in control.

-30- 444

#90080c0082 03/21/1990 ~Comtex

WASHINGTON (MARCH 21) COMTEX - The Comptroller of the Currency is calling for an easing of existing banking laws in order to make domestic banks more competitive with their foreign counterparts both at home and abroad.

Robert Clarke, the chief of the Office of the Comptroller of the Currency (OCC), said he is concerned that some U.S. banking laws and regulations may unnecessarily raise the cost to U.S. banks of participating in overseas markets. "This may discourage banks from making investments necessary to compete effectively for business overseas," he said.

Clarke said he is particularly concerned that the Glass-Steagall Act and the Federal Reserve Board's Regulation K impose needless restrictions on securities activities and other expanded powers of commerical banks.

In 1933, Congress passed the Glass-Steagall Act which separated commercial banking from investment banking and prohibits member banks of the Federal Reserve System from engaging directly in securities underwriting. The

Federal Reserve's Regulation K governs the overseas activities of U.S. banking firms. Regulation K stipulates that no single underwriting commitment may exceed $2 million or represent 20 percent or more of the issuer's capital and surplus or voting shares.

"U.S. banks can expect stiffer international competition in the 1990s," Clarke told a House banking subcommittee. "But the U.S. banking system is entrenched in a system developed 65 years ago."

Clarke added that restrictions imposed by Regulation K and Glass-Steagall place U.S. financial institutions at a direct disadvantage in competing for customers who seek both commercial and investment banking services.

"Glass-Steagall restricts the ability of U.S. banks to market European securities in the United States, where their principal customer base is located," Clarke said. "Many of the foreign banks that compete for this same business are not similarly restricted."

The OCC, which is responsible for supervising national banks and federally licensed branches and agencies of foreign banks, has long supported initiatives to increase capital market market efficiency by authorizing U.S. banks to offer a broader range of financial services. Others have argued that such expanded competitive opportunities would pose unacceptable risks to the banking system and the deposit insurance fund.

Clarke believes that new powers would not lead to greater risks. "The point is that expanding competitive opportunities for banks makes them safer and sounder because it increases diversification," he said.

Clarke noted that West German banks are allowed to hold equity securities and that Japanese banks have similar authority. Consequently, the OCC is urging the elimination of some Glass-Steagall restrictions to enable domestic banks to offer a wider array of financial services.

"In the absence of reform, U.S. banks will find it increasingly difficult to be active players in worldwide markets," Clarke said. "If we impose restrictions on our banks that hinder their ability to compete effectively in international markets, and those banks withdraw from foreign banks as a result, U.S. commercial firms are likely to turn elsewhere for credit to finance overseas investments or trade transactions."

GOULD INC OF ROLLING MEADOWS, IL OWNS 11,300,000 SHARES (32.30%) OF ENCORE COMPUTER CORP (TICKER: ENCC) OF FORT LAUDERDALE, FL.

ANNOUNCEMENT:

On Aug. 1, 1989 Encore (ENCC), Gould and Kenneth G. Fisher entered into an agreement whereby Gould exchanged 6,664,100 shares of Encore's common stock for 66,641 shares of Encore's series A convertible participating preferred shares.

The exchange took place in order to decrease the voting power of Gould to less than that of Mr. Fisher, Encore's chairman, president and CEO.

If Gould had maintained its current level of voting power, it would have had difficulty retaining facility security clearances from the U.S. Department of Investigative Service relating to facilities acquired by Encore from a subsidiary of Gould.

On Nov. 20, 1989 and Dec. 28, 1989 Encore issued to Gould a total of 7,000 convertible preferred shares in connection with Gould's reimbursement to Encore of certain costs relating to the discontinuance of the former General Systems Division of Gould.

BEIJING (MARCH 21) - Economic figures for the first two months of the year indicated continuing stagnation from China's 18-month-old austerity drive, according to official statistics.

The State Statistical Bureau released figures Tuesday showing inflation in 35 major cities rising 3.3 percent during January and February on a year-on-year basis, far lower than 1989.

It said growth in money supply was also reduced, according to the figures carried by the official New China News Agency. Banks withdrew 16.1 percent more money from circulation during the two-month period on a year-on-year basis while the supply of new money grew by only 8.3 percent.

By the end of February, stockpiles of goods in state-run industry, where production was brought to a grinding halt by austerity, were up 15.4 per cent from the same month in 1989.

Bank deposits meanwhile rose by 46.1 billion yuan (9.7 billion dollars) in the two months, nearly double the figure for the same period of 1989.

The sluggish market led to total retail sales volume of 133.9 billion yuan (28.3 billion dollars), 2.1 percent lower on a year-on-year basis.

But despite a 6.9 percent decrease in fixed asset investment in the two-month period over 1989 to 7.4 billion yuan (1.5 billion dollars), capital construction rose 0.6 percent to 5.7 billion yuan (1.2 billion dollars).

Economists have warned that inflationary effects from the easing of tight credit restrictions in the last third of 1989 will not be felt until mid-year and could once again overheat China's economy.

#90080d0170 03/21/1990 ~French/German News Agency

FRANKFURT, West Germany (MARCH 21) - West Germany's M3 money supply rose 5.8 percent in February over its level at the end of 1989, according to seasonally-adjusted provisional figures released Wednesday by the central bank.

M3 had risen 5.9 percent in January.

The February increase was at the top end of the Bundesbank's target of four percent to six percent M3 growth this year.

On a year on year basis, the February level was up 4.5 percent.

M3 includes cash in circulation, deposits and fixed term accounts of less than four years.

The February rise was largely due to a rise in short-term accounts.

The Bundesbank also said that loans to industry and private individuals were 14 billion Deutsche marks (8.2 billion dollars) in February against 10.5 billion in the same month last year.

Jakarta (MARCH 21) - Taiwan became the third major buyer of Indonesian liquified natural gas (Lng) after Japan and South Korea when the first 135,000 metric tons Lng shipment left Bontang plant in East Kalimantan on Wednesday.

Chinese Petroleum Corporation (Cpc) of Taiwan signed a 20-year contract with Indonesia's oil firm Pertamina last year to buy 1.5 million tons of Lng per year at a price of about 150 U.S. dollars per ton, said Pt badak Lng co. general manager H.J.C. Mochtar.

Bontang's fifth Lng production unit was specially developed in 1987 to cater to orders from Cpc.

The voyage by the Lng tanker to its destination terminal at Yung An Hsiang in Taiwan will take about four days, officials said.

Each of the five production units in Bontang has an annual capacity of 2.3 million tons of Lng, Mochtar said. He said three more units of similar capacity would be developed by the year 2000.

The Bontang plant also produces liquified petroleum gas (Lpg) with an annual production of 350,000 tons to supply Japanese consumers on a 10-year contract purchase basis.

Pertamina president Faisal Abda'oe said Indonesia's Lng exports this year were expected to reach 22.1 million tons.

He said Japan, Indonesia's largest gas customer, was scheduled to sign an agreement soon with Pertamina for an additional purchase of 700,000 tonnes of Lng this year.

Indonesia last year exported 16.5 million tons of Lng to Japan and two million tons to South Korea, both on a 20-year contract basis.

JOHANNESBURG (MARCH 21) - Diamond giant De Beers announced here Wednesday that its London-based marketing arm the Central Selling Organisation (CSO) would raise its prices for rough gem diamonds by 5.5 percent overall as from Monday.

"This increase is concentrated in areas of the CSO rough assortment where demand and prices for the corresponding polished are strong and where premiums on CSO rough prices are high," a De Beers statement said.

"This is reflected in record exports, particularly from the manufacturing centres of Israel and India, and imports into the consuming countries of polished (diamonds) of one carat and below."

The CSO had raised prices of rough diamonds of all qualities by 13.5 per cent in May 1988, and raised prices of all qualities except two of industrial diamonds in March last year.

The latest rise, like the others, followed a firming of the market.

#90080d0320 03/21/1990 ~French/German News Agency

PARIS (MARCH 21) - Renault Vehicules Industriels (RVI), the goods vehicle

division of France's state-owned auto maker, said Wednesday its consolidated net profit fell nine percent last year to 930 million francs (163 million dollars).

Turnover was up 1.27 percent at 34.3 billion francs (six billion dollars), RVI chairman Jean-Pierre Capron said.

The fall in profit was largely due to losses of more than a billion francs (185 million dollars) in RVI's U.S. operation, but pre-tax profit in Europe rose 51 percent to 1.7 billion francs.

Turnover in the European division was up seven percent at 23.2 billion francs.

The European division had an operating profit equivalent to 10 percent of turnover and was "among the European and world leaders in this sector," Mr. Capron said.

Commenting on a recent tie-up between Renault and Volvo of Sweden, Mr. Capron said that Volvo Trucks and RVI would be able to share labour and research costs, and jointly develop new components.

But he stressed that the "vital domains" of the two companies, such as the brand name, marketing network and product range "will not be shared and will remain strongly differentiated."

"We must invest massively and quickly in research and development, in speeding up the launching of trucks, coaches and buses adapted to the new demands faced by road transport, and it is there that the accord between RVI and Volvo Trucks is most important," he added.

Hanover (MARCH 21) - Nixdorf Computer Ag said Wednesday it was starting to recvoer following the severe turmoil of 1989 and would be cutting its losses as it headed into its takeover by Siemens.

Nixdorf board member Horst Nasko, meeting the press here at the office equipment exhibition ''CeBit'', made no disclosures about the company's final loss figures for 1989. But he said the firm expected to cut its operating losses by half this year.

He said that amid last year's plunge, overall turnover slipped by 100 million marks to 5.25 billion marks (3.1 billion dollars), while order volume dropped 15 per cent to 4.4 billion marks.

In the first two months of 1990, Nixdorf's turnover slipped a further six

per cent, but new orders had risen by four per cent, Nasko reported.

He called the proposed 51 per cent takeover of Nixdorf by Siemens the best solution to the firm's situation. Both Nixdorf and Siemens were too large to try to meet the needs of tiny niches in the market, but were too small to operate on the world computer market, he said.

The proposed ''Siemens-Nixdorf Informationssysteme Ag'', which pending West German Cartel Office approval would start up next October 1, would combine for total turnover of some 12 billion marks to be Europe's largest data processing systems firm, Nasko added.

STOCKHOLM (MARCH 21) - Anders Scharp, managing director of Swedish electrical appliances group Electrolux, is to become chairman of the board of auto group Saab-Scania, the economic press said here Wednesday.

Mr. Scharp, 55, will replace Sten Gustafsson, 67, but will retain his post with Electrolux, the reports said.

The Dagens Nyheter quoted him as saying that a recent cooperation accord between Saab-Scania and U.S. auto giant General Motors was "altogether positive".

Mr. Scharp's appointment has to be approved by a Saab-Scania board meeting on April 27.

NEW DELHI (MARCH 21) - An animal welfare group will start sterilising dogs in a bid to clear the streets of Bombay of some 100,000 strays without killing them, the evening paper the Daily reported Wednesday.

The All India Animal Welfare Association (AIAWA) won permission from the Bombay Municipal Council to carry out the mass sterilisation campaign using council resources, it said.

Deputy Municipal Commissioner G. R. Khairnar, however, had expressed scepticism about the project as killing a dog costs less than trying to sterilise one, the newspaper said.

HELSINKI (MARCH 21) - The United States and the Soviet Union began talks

here Wednesday on the Afghan situation, a U.S. embassy official said.

The discussions between the two three-member teams of experts are headed by U.S. Undersecretary of State John Kelly and Yuri Alexeyev, chief of the Central Asian Affairs office at the Soviet Foreign Ministry.

The official would not disclose details of the talks, part of the regular consultations at expert level between Washington and Moscow.

The talks come two weeks after an attempted coup against Afghan President Najibullah.

It was not yet known if the two sides would make a joint public statement on Thursday, when the meeting is scheduled to end, the official said.

Talks at foreign minister level between the two sides are timetabled for early next month.

Najibullah's government receives massive support from Moscow while Washington has channelled arms to the mujahedeen guerrillas fighting the Afghan regime.

TUNIS (MARCH 21) - PLO Chairman Yasser Arafat Wednesday said the Palestinian uprising in the occupied territories brought down the Israeli government and his Fatah movement pledged to intensify the 27-month-old rebellion.

The fall of the Israeli administration, through a no-confidence motion, points "to the end of Israeli occupation (of the West Bank and Gaza Strip) and the inevitable recognition of the rights of the Palestinian people to self-determination and an independent state," Mr. Arafat said in remarks published here Wednesday.

He was speaking during a meeting of the governing body of Fatah, the principal component within the Palestine Liberation Organization.

A statement after the session hailed the intifada, or uprising in Arabic, and vowed to "continue on all fronts to intensify" the campaign against Israel's occupation of the West Bank and Gaza.

But the communique also reaffirmed support for a Palestinian peace initiative adopted in November 1989 by the the Palestine National Coouncil (PNC), the Palestinian parliament-in-exile.

The PNC then called for negotiations with Israel at an international Middle

East peace conference on the basis of United Nations resolutions recognizing Israel's right to exist.

Mr. Arafat, whose remarks were carried by the Palestinian news agency WAFA, said the intifada had "established the Palestinian cause on the international scene and inflicted successive political defeats on the Israeli enemy.

"These defeats," he added, "caused the fall of the government of (Israeli Prime Minister) Yitzhak Shamir."

Mr. Shamir of the right-wing Likud bloc was defeated in a no-confidence motion last Thursday after he and Labour leader Shimon Peres fell out over U.S. proposals for an Israeli-Palestinian dialogue in Cairo.

Likud opposed the plan, fearing it could lead to PLO participation in peace efforts, while Labour supported it. Mr. Peres was Tuesday asked to try to form a new Israeli coalition cabinet.

Both Likud and Labour have rejected PLO demands that the organization alone select the Palestinian delegates who will attend the proposed Cairo dialogue.

The Fatah communique re-stated its insistence that the PLO is the only body entitled to speak in the name of Palestinians living both inside and outside the territories and in all international gatherings.

BONN (MARCH 21) - West German tyre maker Continental said Wednesday its net consolidated profit was slightly higher last year than 1988's 195 million Deutsche marks (114.7 million dollars).

It did not give a figure, but turnover was up six percent to 8.4 billion Deutsche marks (4.9 billion dollars), largely due to increased sales of tyres for utility vehicles.

Continental said its results had been affected by a general fall in tyre prices and a 67-day strike at U.S. subsidiary General Tire.

But it said that restructuring and widening the product range had proved positive.

#90080d1220 03/21/1990 ~French/German News Agency

LEVERKUSEN, West Germany (MARCH 21) - West German chemicals group Bayer

said Wednesday its sales in Japan rose 13.6 percent last year over the 1988 level to 198 billion yen (1.29 billion dollars).

After-tax profit in Japan was up 5.7 percent at 8.2 billion yen (53.5 million dollars).

Some 40 percent of the Japanese sales were in the pharmaceuticals sector, 21 percent industrial products and 13 percent in agricultural products.

Bayer controls 14 companies in Japan, employing a total of 3,300 people.

The group said it was expecting Japanese sales this year to total 220 billion yen (1.43 billion dollars).

PRAGUE (MARCH 21) - Czechoslovakia and South Korea, about to establish diplomatic ties for the first time, discussed expanding exchanges in trade, culture and education Wednesday, the second day of a visit by South Korean Foreign Minister Choi Ho-Jong.

Mr. Choi flew in Tuesday for a three-day visit, the high point of which will be the signature on Thursday of a protocol establishing diplomatic relations between the two erstwhile ideological enemies.

Mr. Choi and his his Czechoslovak counterpart Jiri Diestbier agreed on the need for a treaty to safeguard foreign investments in Czechoslovakia and ensure that they were not subject to double taxation, CTK news agency reported.

An agreement covering economic and commercial cooperation was expected to be negotiated shortly, the agency said.

South Korea asked Czechoslovakia to support Seoul's application to join the United Nations.

CTK said Czechoslovak officials told Mr. Choi that Prague believed the United Nations should be a "universal" body to which all countries should belong regardless of their political system.

Mr. Choi was scheduled to have meetings Wednesday with Alexander Dubcek, the leader of the "Prague Spring" who is now speaker of the Federal Assembly and with Andrej Barcac, the minister of external trade.

#90080d1290 03/21/1990 ~French/German News Agency

PARIS (MARCH 21) - U.S.-Swedish group Lexmar wants to build three or four supertankers a year at the La Ciotat shipyard in southern France, Lexmar president Adam Backstrom said in an interview published here Wednesday.

Lexmar, backed by the regional authorities, wants to revive La Ciotat, near Marseilles, as a major shipyard, but the municipal authorities and the French government favour an alternative plan for developing the site as a yachtbuilding yard and marina with other leisure facilities.

Mr. Backstrom said that Lexmar wanted to invest hundreds of millions of francs in the shipyard, and to build 30 Very Large Crude Carriers (VLCC's) of around 200,000 tons each over 10 years.

If the various obstacles were lifted and Lexmar were able to go ahead, the shipyard would certainly show an operating profit, he said.

"World shipyard production capacity has fallen by two-thirds since 1975," he said, and remaining yards could not now cope with demand. Japanese and South Korean yards' order books were full up until 1993 and prices were rising.

"We are not afraid of the French government," Mr. Backstrom said in the interview with the economic newspaper Tribune de l'Expansion.

Lexmar was ready to invest "several hundred million francs" in the site "even before starting to build any ships," he added.

But he said that Lexmar would need land on the site currently held by state-owned Worms bank and an area which the municipal authorities say they have bought.

The regional authorities have however said the purchase was illegal as the land was in their jurisdiction.

A Swedish ship laden with equipment arrived at La Ciotat on Tuesday but could not be unloaded as the courts have ruled that Lexmar cannot use plant and tools at the yard which has been acquired by the Worms bank.

The Tribune also ran a critical commentary on the Lexmar plan Wednesday, noting the problems that could arise due to France's pledge to the European Economic Community not to construct any ships at La Ciotat for five years.

It also accused Lexmar of not having "given full details of its plan," as it had pledged to do last month.

#90080d1390 03/21/1990 ~French/German News Agency

Frankfurt (MARCH 21) - The West German airline Lufthansa said here Wednesday its net surplus for 1989 exceeded 100 million marks (58.8 million dollars), well above the previous year's 82 million marks.

Presenting preliminary figures, the airline said its operating profits reached 260 million marks, a good 25 percent above the 1988 operating result of 206 million marks.

The airline said it planned to pay the same eight percent share dividend as it did last year.

Lufthansa said its profits would have been better except for the greater burdens posed by flight delays and higher fuel prices. Fuel expenses were 190 million marks higher than in 1988, while flight delays cost the company 200 million marks.

But sales of some of its fleet of airplanes helped to balance out the extra costs, the airline said.

East Berlin (MARCH 21) - Allianz Ag, Europe's largest insurance concern, and East Berlin's Staatliche Versicherung announced plans here Wednesday for a joint venture in East Germany which would break the existing state monopoly on insurance activity in that country.

Under plans announced by Allianz Holding board member Uwe Haasen and by Guenter Ullrich, deputy general director of Staatliche Versicherung, a new East German stock company, Deutsche Versicherung Ag, will be created May 1 with Allianz holding a 49 percent share.

The majority 51 percent share in Deutsche Versicherung would ''initially'' be held by the East German state insurance side, Ullrich said.

He said that Staatliche Versicherung saw its conversion into a stock corporation and a linking of forces with a strong partner as the only possibility of remaining competitive as the two Germanys grew together.

Ullrich said that negotiations were held with several West German and French insurance companies, but that Allianz was eventually chosen because of its financial strength and its international orientation.

Haasen said the Allianz investment would cost billions of marks, but he did not disclose a specific figure.

Allianz' premium income amounts to some 18 billion marks (10.5 billion dollars), including eight billion marks in life insurance policies.

Staatliche Versicherung's premium income is put at some 7.5 billion East German marks.

CIZRE, Turkey, March 21 (AFP) - Turkish police seized ammunition including hand grenades and detained more than 125 people after violent clashes between ethnic Kurdish protestors and the police here, an official said Wednesday.

A curfew imposed in this southeastern village Tuesday when four civilians died and nine others were injured was still in force a day later despite spring festivities, widely celebrated in the Middle East.

Cizre's deputy police chief said that in Tuesday's unrest "security forces were fired upon when they tried to foil the demonstration."

The Kurds were apparently protesting a police crackdown on demonstrators in nearby Nusaybin last Thursday, which left one person dead and five injured.

Tanks and armoured vehicles have sealed off Cizre village and access roads were being closely monitored.

On Wednesday more than 20 journalists were unable to leave their hotel here but police allowed photographers to take pictures of youths loitering in the streets.

Several children making the V sign for victory said they were "little commanders of the Kurds' passive resistance".

The interior minister was expected in the village later in the day.

WARSAW (MARCH 21) - Several hundred Middle Eastern and African refugees are blocked in the Polish port of Swinoujscie in a dispute between Poland and Sweden over which country will accept them, the Warsaw press reported Wednesday.

The refugees are from Lebanon, Libya, Iran, Iraq, Syria and Ethiopia, and include entire families who arrived to settle in Sweden, the press reports said.

Many have been blocked in Swinoujscie for several weeks, some of whom were turned back after trying to enter Sweden at the port of Ystad, according to the reports.

Swedish police charged that many of the refugees were carrying fake entry visa supplied by a ring of forgers in Swinoujscie, the Polish press reports said.

They threatened to close down the ferry service between the two ports if the trafficking was not put to a stop. But the Swinoujscie regional prosecutor's office has denied knowledge of any such trade.

Swedish officials have also argued that under the Geneva Convention of 1951,

Poland, as the port of entry, must give asylum to the refugees. The reports said the Swedish Red Cross said it would help Poland set up shelters for the refugees.

But Polish officials insist that the refugees do not want to stay in Poland and that Warsaw has no means to accept them anyway.

Though the next moves were uncertain, Polish officials pledged that anyone facing political charges in their home country would not be deported.

In the last 10 days, 670 of the refugees have left Swinoujscie for Ystad and the same number were still left behind in Poland.

So many of the refugees have been sent back that the Polish PZB ferry is requiring refugees heading for Sweden to buy round-trip tickets, with one way reimbursed once they are accepted by Sweden.

GENEVA (MARCH 21) - Nigeria and India have signed the Basel convention controlling the disposal of dangerous waste and its movement across borders, a spokesman for the United Nations environmental program said here Wednesday.

Although 46 countries have now signed the pact, only four have ratified it -- Switzerland, Austria, Saudi Arabia and Jordan -- 16 short of the number needed for the agreement to take effect.

Nigeria is the first African country to sign the convention, which bans the export of dangerous waste without consent by importing countries and those through which it is to be transported.

Some 300 million tons of such waste is produced in the world annually. Most of it comes from Europe and the United States.

#90080d2460 03/21/1990 ~French/German News Agency
PARIS (MARCH 21) - BP France said Wednesday it wanted to pull out of hydrocarbon exploration and production and concentrate on refining and fuel retailing.

President Raymond Bloch, announcing that profit almost quadrupled last year to 1.2 billion francs (210.5 million dollars) from 324 million (56.8 million dollars) in 1988, said that refining and distribution did not generate enough cash flow to pursue exploration.

He said that the group would be paying a dividend for the first time in nine years, of five francs.

BP France would take a definite decision on its exploration and production activities before the end of June, and had engaged James Capel of Britain to evaluate its assets in this sector.

It would then put these activities out to tender to selected prospective bidders.

BP will in future focus its efforts on fuel retailing, where its market share has fallen from 6.5 per cent four or five years ago to 4.5 to five per cent last year.

Its lead-free Supergreen petrol accounted for 12 per cent of sales in service stations where it was available last year, but this is expected to rise to 20 per cent by the end of this year.

BP has also started installing Truckstop service stations for trucks, open 24 hours a day, seven days a week and offering a range of services for truck drivers.

#90080d3130 03/21/1990 ~French/German News Agency
RIYADH (MARCH 21) - King Fahd of Saudi Arabia and Sultan Qaboos of Oman Wednesday penned an agreement to mark the boundaries of their two countries, official Omani sources said.

The accord was signed at Hafr al-Baten northeast of Saudi Arabia during a visit there by Sultan Qaboos, the sources added.

Saudi Interior Minister Prince Nayef ibn Abd al-Aziz and his Omani counterpart Badr bin Hareb meanwhile signed annexes to the agreement defining the modalities of movement across the border.

The Saudi-Omani borders that run through the Rub al-Khali (Empty Quarter) -- one of the world's harshest desert areas -- had never been marked.

Sultan Qaboos, who arrived Tuesday in Saudi Arabia for a three-day visit to discuss regional affairs, said the agreement would strengthen ties between Riyadh and Muscat.

OMIYA, Japan (MARCH 21) - Japan's Kofuku Sangyo Co., which operates 30 restaurants in the Kanto area of Tokyo, said it would set up a joint venture to open a restaurant in the Hungarian capital of Budapest in August.

The President of the Omiya-based Kofuku Sangyo, Ryom Tae-Yong, said the company will sign an agreement to that effect with Orient Catering Co. of Hungary here Thursday.

The joint venture, to be called Senara Co., will be capitalized at 37.5 million yen (245,000 dollars), with Kofuku holding 49 percent of the stake.

Senara, literally new country in Korean, will open a grilled beef restaurant August 1990 with initial annual sales expected to reach 25.3 million yen (165,000 dollars), Mr. Ryom, who is of Korean origin, said.

Kofuku Sangyo has been operating a similar restaurant in Vienna, Austria, since 1984.

#90080d9370 03/21/1990 ~French/German News Agency

SYDNEY (MARCH 21) - Australia's economic growth fell below zero during the December quarter, the Bureau of Statistics reported Wednesday.

Economists immediately predicted a fall in interest rates amid speculation that Australia had entered a recession.

The bureau said that seasonally adjusted gross domestic product (GDP) contracted 0.2 percent during the December quarter, compared with a revised jump of 0.9 percent in the previous quarter.

Economists said the slowing down in domestic demand and the one percentage point boost to GDP from exports could allow an easing of monetary policy by the government which faces general elections on Saturday.

Treasurer Paul Keating said the small decline in GDP "has no significance" because quarterly figures were volatile and subject to revision.

But opposition treasury spokesman John Hewson said the figures showed the government's high interest rate, "scorched earth" policy had caused a recession.

David Clark, economics lecturer at the University of New South Wales, also pointed out that the figures were two or three months "behind the actual picture."

"Anecdotal evidence suggests that the economy is really slowing and many small businesses are really in trouble," he said.

The Commonwealth Bank of Australia said the slowing shown in the national figures "supports the case for some easing in monetary policy."

The government boosted interest rates last year in an effort to curb import demand but loosened its grip on monetary policy earlier this year.

Phil O'Sullivan, chief economist at Barclays de Zoete Wedd Australia Ltd., said the figures pointed to "a soft landing" or mild economic recession because domestic consumption was still buoyant even though it had tapered off.

Private consumption, which makes up a large part of the GDP aggregate, grew 0.6 percent last quarter.

Exports of goods and services rose 3.7 percent while imports dropped 1.8 percent over the September quarter.

#90080d9500 03/21/1990 ~French/German News Agency

SEOUL (MARCH 21) - South Korea suffered a 600 million-dollar trade deficit in February amid sluggish exports and swelling imports, officials said here Wednesday.

Exports increased by 7.7 percent from a year ago to 4.67 billion dollars in February on a customs clearance basis, while imports soared 23.1 percent to 5.28 billion dollars, leaving a 0.61 billion dollar deficit.

In January, South Korea suffered a 0.66 billion dollar deficit on a customs clearance basis.

Compared to current account trade figures, those on a customs clearance basis tend to exaggerate imports and underestimate exports, as import figures included insurance and freight costs.

Exports of some important items increased considerably, with electronic products and machinery gaining 15.7 percent and 13.1 percent respectively. But exports of automobiles continued to slump, falling by 26.2 percent.

Meanwhile, Deputy Premier and Economic Planning Minister Lee Sung-Yun said the government would soon annnounce a package of measures to boost sagging exports and stimulate investment.

The government was reportedly considering to lower bank loan interest rates for firms by one per cent.

The central Bank of Korea in November lowered the lending rate for business firms from a range of 11 to 13 percent to 10 to 12.5 percent.

#90080d9940 03/21/1990 ~French/German News Agency

Bonn (MARCH 21) - The recovery in West German-Arab trade since 1987 continued last year with a sharp double-digit rise that slightly reduced Germany's surplus, the Economics Ministry said Wednesday.

The ministry said West German exports to 21 Mideast and North African Arab nations rose by 14.2 percent to almost 15.8 billion marks (9.29 billion dollars) last year. Imports - with oil making up seven-tenths - surged 24.1 per cent to 10.7 billion marks.

The resulting 5.1 billion mark edge in West Germany's favour was slightly below the 5.22 billion mark surplus of 1988, Bonn noted.

The top market in the Arab world was Saudi Arabia, where West German exports totalled 2.8 billion marks, followed by Iraq (2.2 billion) and Egypt (2 billion marks), Bonn said.

On the import side, Libya was the top Arab supplier to West Germany, with deliveries rising 17.4 percent to almost 3.15 billion marks, the ministry said. Saudi Arabia came next, with exports to West Germany of 1.51 billion marks, up 29.8 percent, followed by Algeria, whose exports fell by 9.6

percent to about 1.47 billion marks.

Meanwhile in trade with Iran, West German exports to that country dropped 12.8 percent to 2.52 billion marks. Imports from Iran increased 6.2 percent to 1.19 billion marks, the ministry said.

#90080e0003 03/21/1990 ~Latin America New Agency

HAVANA (MARCH 21) - Cuban President Fidel Castro has sent a message congratulating Soviet leader Mikhail Gorbachev on his election as president and voicing Cuban support for the unity of the Soviet Union and the principles of the Russian Revolution.

In the message, published Tuesday in the Communist Party daily Granma, Castro said the Soviet people had handed great responsibilities to Gorbachev, including efforts to maintain unity.

"You are to lead the Soviet Union at a time of change in which it is decisive to preserve the spirit that has moved Soviet combatants for over 70 years," Castro added.

"You can count on the support and the solidarity of the Cuban people to achieve these high goals," the message said.

Castro has recently distanced himself from Gorbachev's democratic reforms in the Soviet Union and has pledged Cuba would not renounce its orthodox Communist system.

#90080e0005 03/21/1990 ~Latin America New Agency

MONTEVIDEO (MARCH 21) - Thousands of Brazilians have been crossing the border into Uruguay over the past few days to fill their cars up with petrol, following economic austerity measures announced by new Brazilian President Fernando Collor de Mello.

Uruguayan petrol station owners reported that supplies were running very low after car and truck owners flocked across Brazil's southern border to buy petrol at up to 40 percent less than in their own country.

Brazilians are likewise stocking up on basic foodstuffs as many shops in their own country remain closed following a temporary price freeze ordered by the new government.

Uruguayan banks have said they are receiving deposits from Brazilians reportedly concerned about their country's economic stability.

Center-right Collor de Mello announced a drastic economic package Friday, a day after taking office, aimed at halting hyperinflation and slashing public spending.

The package included hikes in public service costs, cutbacks in administrative spending, an end to all public subsidies and sharp limits on cash withdrawals from bank accounts.

It also included a month-long price freeze backdated to March 12. After the freeze ends, wages and prices will be adjusted according to the envisaged inflation figures for each month.

Inflation in Brazil is running at some 90 percent a month while the country is also crippled by a dlrs 112 billion foreign debt, the largest in the developing world.

Over the past years, it has been Uruguayans who have crossed into Brazil to shop, finding prices much cheaper than in their own country.

In the eastern, northern and northwestern Uruguayan border towns of Chuy, Rivera-Livramento and Artigas-Quarai, thousands of people who work in neighboring Brazil are reportedly worried they will loose their jobs as a result of the new austerity measures.

Meanwhile, shops and banks on Uruguay's southern border have been reporting that thousands of Argentines have also been arriving to stock up on food and deposit money in banks due to that country's economic crisis.

#90080e0006 03/21/1990 ~Latin America New Agency

LIMA (MARCH 21) - Peruvian President Alan Garcia has handed over 14 Soviet-made helicopters to the Army to back up security measures in two violence-torn departments during next month's elections.

Garcia handed the MI-17 helicopters over during a ceremony Tuesday at Lima's international airport attended by Defense Minister Jose Velazquez Giacarini, Army Chief Jorge Zegarra Delgado and Interior Minister Agustin Mantilla.

The aircraft are to be used in Ayacucho, the Andean stronghold of the Maoist "Shining Path" rebel group, and in the northern jungle department of San Martin, where Shining Path, Tupac Amaru Revolutionary Movement (MRTA) rebels and drug traffickers operate.

Both Shining Path and the MRTA have stepped-up attacks over the last weeks in the runup to April 8 polling.

During last year's municipal polls, Shining Path killed some 300 people and forced the same number of candidates to resign.

Police and security forces are to launch a massive security operation over the next weeks and during the polling to protect voters and candidates.

The 24-seat MI-17 helicopters can fly at altitudes of up to 3,000 meters and are equipped with heat-seeking missiles.

April's elections are expected to be won by conservative candidate Mario Vargas Llosa, although recent opinion polls show he may not secure sufficient ballots for a first round victory for his FREDEMO coalition.

Garcia's center-left APRA party has seen its popularity shrink as it has failed to halt inflation or reduce leftist rebel violence.

Some 18,000 people have been killed in political violence since the brutal Shining Path took up arms ten years ago.

#90080e0007 03/21/1990 ~Latin America New Agency

KONSTANZ, WEST GERMANY (MARCH 21) - Spanish Prime Minister Felipe Gonzalez Wednesday offered West German Chancellor Helmut Kohl his country's support for the future unification of Germany at the end of a two-day summit between the two leaders.

"German unity is a desirable and irreversible process and it is up to the Germans to make decisions and put it into action, although it is necessary that it fits in with the process of European unity," Gonzalez told reporters at a press conference.

In his remarks, Kohl thanked the Spanish leader for his "loyal friendship and decisive support" for the unification plans.

At the summit, the sixth the two have held since 1983, Gonzalez and Kohl stressed the importance of pushing ahead with the European Community's goal of a single European Market as well as with regional political unity.

The meeting in the city of Konstanz came two days after a conservative coalition linked to Kohl's party won elections in East Germany. The party is in favor of a rapid unification of the two countries.

At the summit, Spanish Industry Minister Claudio Aranzadi and his West German counterpart Helmut Haussmann discussed obstacles blocking a deal between the Spanish state truck company Enasa and the West German consortium MAN and Mercedes, part of Daimler-Benz.

Haussmann told reporters that he was optimistic that the obstacles, which have arisen through an objection lodged by a West German state organization which controls monopolies, could be overcome.

West German representatives also assured the Spanish team at the summit that their firms would continue to invest in Spain.

According to observers the Spanish government had been concerned that given the changes in Eastern Europe, West German firms would be attracted away from investing in Spain.

Outside the hotel where the summit was being held, some 20 people gathered Wednesday to demonstrate on behalf of jailed members of the Spanish armed left-wing October First Anti-Fascist Group (GRAPO).

The protesters, who were calling on Gonzalez's government to meet the GRAPO's request to be grouped together in one jail, were dispersed by police.

LIMA (MARCH 21) EFE - Leftist Peruvian rebels last week killed 50 members of an Indian tribe in a remote area of the central jungle, bringing to 150 the number of natives murdered over the past month in guerrilla attacks, a Lima newspaper reported Wednesday.

The daily Expreso said Maoist +Shining Path+ rebels last Thursday killed 50 members of the Ashaninka tribe, who live in the jungles of the central department of Junin, 280 km east of the capital.

Some 100 other Ashaninka Indians have died in guerrilla attacks over the last three weeks.

Expreso said tribe leaders had asked for police protection from Shining Path but that their request had been ignored.

+We want to clear our region of terrorists, but arrows aren't any use against guns,+ the paper cited one Ashaninka as saying.

According to the Indians, Shining Path is attempting to group tribe members together in one area to indoctrinate them and control their activities.

The Ashaninkas have managed to fend off attacks by Peru's other rebel group, the smaller and less extreme Tupac Amaru Revolutionary Movement, but have been unable to keep at bay the more brutal Shining Path guerrillas, said the paper.

Some 18,000 people have been killed since Shining Path took up arms against the government in 1980.

SANTIAGO (MARCH 21) EFE - Unidentified gunmen shot and wounded a former member of the military junta led by ex-dictator Gen. Augusto Pinochet in the center of the capital Wednesday, police said.

The attack on former Air Force chief Gustavo Leigh took place at an office he owned in the residential district of Providencia, police said.

Leigh was taken to hospital, but it was not immediately clear how serious his injuries were.

The former Air Force chief helped Pinochet overthrow the leftist government of Salvador Allende in a bloody coup in 1973 but broke with the former president and current Armed Forces chief in 1978.

Leigh backed the opposition in the 1988 referendum on extending Pinochet's presidential mandate for another six years.

Pinochet handed over power earlier this month to President Patricio Aylwin elected in the country's first democratic ballot in 16 years, after voters said no to the former president in the referendum.

#90080e0018 03/21/1990 ~Latin America New Agency

LIMA (MARCH 21) EFE - Scientists remained mystified Wednesday as thousands of tonnes of dead fish continued to wash up along Peru's northern coast.

During the last three days, some 500,000 tonnes of fish have been swept up onto a 7-km stretch of beach at La Caleta and San Jose in the northern department of Lambayaque.

The phenomenon, which began Monday, Saint Joseph's Day, has been hailed by local villagers as a miracle, while marine biologists are lost for an explanation.

Warnings from scientists that the fish should not be eaten until their cause of death has been determined have been largely ignored.

Three years ago vast quantities of dead shellfish appeared on Peru's southern coast, a phenomenon which scientists said could have been caused

by sudden hot currents along the sea bed.

NEW DELHI (MARCH 21) XINHUA - CHINESE FOREIGN MINISTER QIAN QICHEN ARRIVED HERE THIS EVENING ON A VISIT TO INDIA AT THE INVITATION OF INDIAN EXTERNAL AFFAIRS MINISTER INDER KUMAR GUJRAL.

HE WAS WARMLY GREETED AT THE DELHI AIRPORT BY HIS INDIAN COUNTERPART.

AT THE AIRPORT, QIAN TOLD REPORTERS THAT THE MAIN PURPOSE OF HIS VISIT TO INDIA IS TO CONTINUE IMPROVE THE FRIENDLY RELATIONS BETWEEN CHINA AND INDIA.

GUJRAL SAID HE WAS VERY GLAD FOR QIAN'S COMING AND WAS SURE THAT COOPERATION BETWEEN INDIA AND CHINA WOULD BE ENHANCED AFTER THEIR TALKS.

QIAN ARRIVED IN BOMBAY YESTERDAY MORNING FROM BAHRAIN AND VISITED AGRA IN THE NORTHERN INDIAN STATE OF UTTAR PRADESH TODAY.

DURING HIS STAY IN THE CAPITAL, THE CHINESE FOREIGN MINISTER IS SCHEDULED TO CALL ON INDIAN VICE-PRESIDENT SHANKER DAYAL SHARMA AND PRIME MINISTER V.P. SINGH ON THURSDAY AND FRIDAY (MARCH 22 AND 23). HE WILL ALSO HOLD TALKS WITH HIS INDIAN COUNTERPART INDER KUMAR GUJRAL ON BILATERAL RELATIONS AND INTERNATIONAL MATTERS OF MUTUAL CONCERN.

QIAN'S VISIT COINCIDES WITH THE 40TH ANNIVERSARY OF THE ESTABLISHMENT OF DIPLOMATIC RELATIONS BETWEEN CHINA AND INDIA. INDIA WAS THE FIRST COUNTRY TO RECOGNIZE THE PEOPLE'S REPUBLIC OF CHINA OUTSIDE THE SOCIALIST COUNTRIES ON APRIL FIRST, 1950.

QIAN'S VISIT IS THE FIRST HIGH-LEVEL CONTACT BETWEEN THE TWO COUNTRIES SINCE THE INDIA NATIONAL FRONT GOVERNMENT CAME TO POWER LAST DECEMBER.

CHINA AND INDIA RESUMED HIGH-LEVEL OFFICIALS' VISIT BETWEEN THEM AFTER A LAPSE OF ABOUT 20 YEARS WHEN FORMER CHINESE FOREIGN MINISTER HUANG HUA VISITED INDIA IN 1981.

FORMER INDIAN MINISTER RAJIV GANDHI VISITED BEIJING IN DECEMBER 1988, FOLLOWED BY CHINESE VICE-PREMIER WU XUEQIAN'S VISIT TO INDIA IN OCTOBER 1989.

CHINESE PREMIER LI PENG SAID IN HIS REPORT ON GOVERNMENT WORK TO THE NATIONAL PEOPLE'S CONGRESS YESTERDAY THAT "SINO-INDIAN RELATIONS ARE IMPROVING."

INDIAN PRESIDENT R. VENKATARAMAN ALSO SAID TO PARLIAMENT ON MARCH 12 THAT "THE PACE OF DIPLOMATIC CHANGES BETWEEN INDIA AND CHINA IS BEING ACCELERATED, CONTRIBUTING TO THE DEVELOPMENT OF MUTUALLY BENEFICIAL COOPERATION ON THE BASIS OF PANCHSHEEL (THE FIVE PRINCIPALS OF PEACEFUL CO-EXISTANCE)."

UNITED NATIONS (MARCH 21) XINHUA - U.N. SECRETARY-GENERAL JAVIER PEREZ DE CUELLAR TODAY EXPRESSED THE HOPE THAT SOUTH AFRICA WOULD QUICKLY NORMALIZE THE POLITICAL PROCESS TO ENSURE A NATIONAL DIALOGUE ON THE COUNTRY'S POLITICAL FUTURE WITH FULL PARTICIPATION OF REPRESENTATIVES OF ALL SOUTH AFRICAN PEOPLE.

"TO THIS END," THE U.N. CHIEF SAID IN HIS MESSAGE READ OUT AT A MEETING HELD HERE TODAY IN OBSERVANCE OF THE INTERNATIONAL DAY FOR THE ELIMINATION OF RACIAL DISCRIMINATION, "I AGAIN URGE THE GOVERNMENT OF SOUTH AFRICA NOT

TO DELAY LIFTING THE STATE OF EMERGENCY AND TO RELEASE ALL REMAINING POLITICAL PRISONERS."

HE ALSO WELCOMED THE RELEASE OF SOUTH AFRICAN NATIONALIST LEADERS, WHO SERVED LONG TERMS OF IMPRISONMENT FOR THEIR OPPOSITION TO APARTHEID, AND THE LIFTING OF RESTRICTIONS ON ANTI-APARTHEID ACTIVITIES.

BUT, "MORE REMAINS TO BE DONE TO ENABLE SOUTH AFRICA TO MOVE TOWARDS THE ESTABLISHMENT OF A NON-RACIAL SOCIETY WHERE PEOPLE OF ALL RACES CAN BE ASSURED OF EQUAL RIGHTS UNDER THE LAW."

THE U.N. CHIEF ALSO URGED THE INTERNATIONAL COMMUNITY TO LEND ITS FULLEST SUPPORT TO ALL THOSE WHO ARE ENGAGED IN BUILDING A NEW SOUTH AFRICA IN LINE WITH THE WILL OF ITS PEOPLE.

AMMAN (MARCH 21) XINHUA - A FOMERLY INFERTILE JORDANIAN WOMAN HAS GIVEN BIRTH TO FOUR TEST-TUBE BABIES, THE JORDANIAN NEWSPAPER "AL-DUSTOUR" REPORTED TODAY.

ZAID AL-KILANI, DIRECTOR OF THE JORDANIAN CENTER FOR THE TREATMENT OF INFERTILITY, SAID THAT THE MOTHER, AGED 30, WAS MARRIED EIGHT YEARS AGO BUT HAD NO CHILDREN BECAUSE SHE WAS COMPLETELY INFERTILE.

ABOUT A YEAR AGO SHE CAME TO THE CENTER WHERE SHE WAS FERTILIZED WITH FIVE IMPREGNATED OVULES AND THUS BECAME THE MOTHER OF THE QUADRUPLET.

KILANI SAID ALTHOUGH TWO MONTHS PREMATURE THE BABIES CAME THROUGH NATURAL LABOR.

PAEDIATRICIAN ABDUL-KARIM AL-ZAKKAH SAID THAT ONE OF THE BABIES WEIGHED 1 KILOGRAM, THE SECOND 1.05 KILOGRAMS AND THE OTHER TWO 1.15 KILOGRANS EACH. BUT HE SAID THEY ARE ALL IN GOOD HEALTH DESPITE THEIR LIGHT WEIGHT.

AL-ZAKKAH SAID AN EXCLUSIVE FUND HAS BEEN SET UP TO PROVIDE THE NEWBORN BABIES WITH FOOD AND CLOTHING SINCE THEIR FATHER'S INCOME IS VERY LIMITED.

THERE ARE MORE THAN 100 TEST-TUBE CHILDREN IN JORDAN, ALL IN GOOD HEALTH AND THE OLDEST OF THEM IS NOW AGED FOUR.

ISTANBUL (MARCH 21) XINHUA - POLICE TODAY SEIZED 3.5 KILOGRAMS OF PURE HEROIN WORTH ABOUT HALF A MILLION U.S. DOLLARS AND ARRESTED SIX PEOPLE SUSPECTED OF DRUG TRAFFICKING IN ISTANBUL, THE CITY POLICE AUTHORITIES

SAID.

DISGUISED AS BUYERS, POLICEMEN ESTABLISHED CONTACT WITH A GROUP OF DRUG DISTRIBUTORS IN THE BAKIRKOY DISTRICT OF ISTANBUL, THE LARGEST CITY OF TURKEY, AND CAUGHT THE GROUP HEAD MEHMET HAYRI MARANGOZ AND THREE OTHERS RED-HANDED.

ACCORDING TO THEIR INITIAL CONFESSIONS, TWO OTHER SUSPECTS WERE ALSO DETAINED BY THE POLICE.

RECENTLY, TURKISH POLICE HAVE ALSO SEIZED 56 KILOGRAMS OF HEROIN AND FOUR KILOGRAMS OF MORPHINE AND ARRESTED TWO DRUG-SMUGGLING SUSPECTS IN TWO SOUTHEASTERN PROVINCES.

A TOTAL OF 5,836 KILOS OF DRUGS, INCLUDING 600 KILOS OF HEROIN, WERE SEIZED AND NEARLY 500 SUSPECTS WERE DETAINED IN 1989, ACCORDING TO OFFICIAL STATISTICS.

ACCORDING TO OFFICIAL ESTIMATES, ABOUT HALF OF THE HEROIN PRODUCED IN THE "GOLDEN TRIANGLE" AREA BORDERING THAILAND, BURMA (MYANMAR) AND LAOS AND THE "GOLDEN CRESCENT" AREA BORDERING PAKISTAN, AFGHANISTAN AND IRAN IS TRANSFERRED TO ITALY OR AUSTRIA VIA TURKEY.

#90080p0007 03/21/1990 ~PR Newswire

BEVERLY HILLS, CA (MARCH 21) PR Newswire - Pittsburgh Steeler running back Tim Worley, a.k.a. "Worleybird," has inked a three-year agreement with Pro Sports & Entertainment (PSE), a sports marketing firm based in Beverly Hills, for exclusive representation with regard to commercial endorsements, personal appearances and all phases of publicity.

Worley was the Steelers' number-one pick and the seventh player chosen overall in the 1989 NFL draft. On his selection of Worley, Head Coach Chuck Noll said, "I like the fact that he's big, strong, fast, runs the ball well, breaks tackles, is a good blocker, all of those things, and has done them very well."

The "Worleybird" enjoyed quite an impressive rookie season, despite averaging only 12 carries per game. He was the third leading rusher among rookies in the NFL, and the first rookie to lead the Steelers in rushing since Hall of Famer Franco Harris in 1972.

Says PSE Executive Vice President Larry Magen: "We feel Tim is a very marketable player. He has a bubbling personality, and is a 'natural' in front of the camera. At 6'3", 230 pounds, Tim is probably the fastest 'big man' in pro football. Last year, he ran a 4.23 in the 40. When "Worleybird" was 18 years old he was the Jr. Olympic Champion in the 100

meter sprint with a time of 10.27."

Adds Magen, "With the great finish and showing in the playoffs the Steelers had in '89, the anticipation for '90 is already brewing among Steeler fans, not only in Pittsburgh, but across the country. And Tim should be a big part of the offense in '90, now that he understands the Steeler offensive scheme."

Add Worley: "Last year, in the first six games or so I was definitely going through a period of adjustment. The offense was very different than what I was used to at the University of Georgia. It was frustrating, then I talked with Franco Harris, and he told me to 'just relax and be patient and things will start clicking.' That really helped me, to hear that from a legend like Franco."

And, of course after that, things really did start "clicking" for not only Tim but the club, too. That was just about when the Steelers made their incredible turnaround and drive into the playoffs.

The future indeed looks bright for "Worleybird(exclam)".

#90080p0022 03/21/1990 ~PR Newswire

PITTSBURGH (MARCH 21) PR NEWSWIRE - Researchers from the Pittsburgh Cancer Institute (PCI) have embarked on the second phase of testing a Japanese-manufactured drug called Picibanil to determine the effectiveness of the drug as a treatment for persons with advanced melanoma, it was announced today.

Melanoma is a serious form of skin cancer that may develop in an unusual mole or a mole that changes.

This phase of the study follows initial testing in which PCI investigators determined the appropriate dose and method for administering Picibinal to produce the best immune stimulation for use in patients with cancer. Currently, PCI is the only cancer center in the United States with access

to this drug.

This portion of the study will last approximately two years and about 80 patients with melanoma will be treated with Picibanil. Individual inquiries about enrollment in this project should be made through the patient's primary physician or medical oncologist or through the Pittsburgh Cancer Institute's toll-free information and referral service at 800-537-4063.

Studies in Japan and other countries have shown Picibanil, which is a product of CHUGAI Pharmaceutical Co., in Tokyo, affects the body's immune system in a variety of ways:

-- it activates effector cells, which include natural killer cells, macrophages, T-cells and others that directly attack tumors; and

-- it stimulates the release of interferons and other substances that are the body's natural means to activate effector cells.

PCI's goal is to strengthen and expand available cancer care resources in the western Pennsylvania region by developing new, more effective approaches to the prevention, diagnosis and treatment of cancer. In 1988, PCI was designated a National Cancer Institute Clinical Cancer Research Center. Only 21 other such centers exist nationwide, and PCI is the only one in the western Pennsylvania region. This designation establishes the institute as an important national center for cancer research and treatment, and affirms PCI's potential to make significant international contributions to the fight against cancer.

PCI was formed in 1984 by a consortium including the University of Pittsburgh, Carnegie Mellon University and the six hospitals affiliated with the medical and health care division of the University of Pittsburgh -- Children's Hospital of Pittsburgh, Eye and Ear Hospital of Pittsburgh, Magee-Womens Hospital, Montefiore Hospital, Presbyterian-University Hospital, and Western Psychiatric Institute and Clinic.

BRISTOL, UK (MARCH 21) PR NEWSWIRE - In a move to further strengthen its international presence, Manville Corporation (NYSE: MVL) announced today that its subsidiary, Manville Forest Products Corporation (MFPC), has entered into an agreement with Pembridge Investments Limited to acquire 100 percent of DRG Cartons Limited, the third largest folding carton company in the United Kingdom.

Conclusion of the agreement is subject to approval by Manville Corporation's board of directors and receipt of all necessary consents and regulatory approvals. Terms of the agreement were not disclosed. The transaction is expected to be completed in early April, 1990.

DRG Cartons is one of the leading manufacturers of paperboard packaging in the U.K. with annual sales of $60 million. DRG employs 620 people at its Bristol, England, headquarters and a 400,000-square- foot manufacturing facility, one of the largest paperboard packaging plants in Europe. The company has a leading position in the frozen food, confectionery and detergent markets.

"The existing strength and market situation of DRG Cartons Limited provides us with a tremendous opportunity in our continuing effort to expand our international marketing position," said Thomas H. Johnson, president, Manville Forest Products Corporation. "We will retain and develop skills under existing management and intend to continue with present employment conditions."

Headquartered in West Monroe, La., Manville Forest Products Corporation is a diversified manufacturing company with major business segments in paperboard, packaging and wood products. MFPC currently operates eight folding carton plants throughout the U.S. and employs 5,800 people worldwide. In 1989, MFPC's consolidated sales were $777 million with operating earnings of $180 million, representing approximately 49 percent of Manville Corporation's consolidated operating earnings.

Manville Corporation is an international manufacturing and natural resources company with two subsidiaries, MFP and Manville Sales Corporation, the latter headquartered in Denver. In addition to paper and wood products and packaging, the company's primary businesses include fiber glass and industrial insulation products, roofing systems and filtration and minerals. Founded in 1858, Manville has more than 17,000 people at more than 50 plants and four mines worldwide. The corporation's world headquarters is in Denver, Colo. Manville and its subsidiaries have more than $2 billion in assets as of Dec. 31, 1989.

#90080p0034 03/21/1990 ~PR Newswire

INDIANAPOLIS (MARCH 21) PR NEWSWIRE - Union Carbide Coatings Service Corporation has announced a new thermal coating spray process which it says, "takes wear resistance where it's never been before."

For more than three decades Union Carbide has supplied metal and ceramic coatings on a service basis to users in almost any industry imaginable-from downhole oil drilling parts to space shuttle heat shields. The company's new process, called the Super D-Gun(TM) combines features of its currently successful detonation gun process with improved gas combustion dynamics leading to coatings with "super" microstructures. The new coatings, the SDG(TM) 2000 series, will provide better abrasive and erosive wear properties, increased coating-to-substrate bond strength, and improved finishing characteristics for those applications that require ultra-smooth finishes that stay smooth for longer periods.

Fourteen new coating compositions are already available in the new coatings series, primarily from tungsten carbide and chromium carbide bases. Additional structures will be provided as applications dictate.

One area where the new coatings are expected to be extremely beneficial is in those applications requiring better fatigue performance, particularly in the helicopter and stationary-wing airframe markets. Thermal spray coatings on parts used in these areas have sometimes been restricted because of limitations on fatigue life of the substrates used. Independent laboratory tests on some of the new SDG(TM) 2000 Series coatings, however, show they cause little or no fatigue debit, and major manufacturers have already shown considerable interest in testing the new compositions.

Industries such as paper, plastics, textiles and oil processing are expected to have applications for these new materials also; and, at this introductory stage, the company is not sure where performance limitations will be set. General Manager B.H. Heise says, "We know these coatings are good-we just don't know at this point how good. We're looking for trial applications so we can define the market for these super coatings."

Inquiries should be directed to Union Carbide Coatings Service Corporation, 1500 Polco Street, Indianapolis, Ind. 46224. Phone: 800-822-7284 or 317-240-2400.

CONTACT: Dave Armstrong of Union Carbide, 317-240-2401.

HAMILTON, Ontario, Canada (MARCH 21) PR NEWSWIRE - Biopool International, a developer and manufacturer of in vitro diagnostic kits related to fibrinolysis has closed on the purchase of Inter-Haematol Inc. of Hamilton Canada, a profitable diagnostics business of nearly equal size.

The acquisition of Inter-Haematol augments Biopool's current products by the addition of a complementary line of blood coagulation diagnostics. This is consistent with Biopool's overriding mission of becoming a market-leading supplier of in vitro diagnostics for vascular thrombotic risk factors -- a market it expects to grow significantly through the 1990s.

Consummation of the deal essentially completes the basic corporate restructuring plan implemented by chairman and CEO, Dr. Arnold B. Pollard. He observed that: "Biopool now has a leaner organizational structure and a more market-driven stance. Perhaps most important, in the person of Dr. Andrew Cerskus, it has a proven industry professional chief operating officer who has demonstrated the ability to manage for positive cash flow."

"Biopool is now poised to capitalize on the solid product base provided by our world-class R&D team, headed by chief scientist and founder, Dr. Mats Ranby and augmented by the new coagulation products. I am confident that this year's plan, which projects break-even prior to year-end, will be achieved," commented Cerskus, who has been president of Biopool since November 1989, anticipating the merger's consummation.

The terms of the agreement are essentially the same as described in an Oct. 23, 1989, press release announcing an agreement in principle to acquire Inter-Haematol. Biopool purchased Inter-Haematol for $200,000 in cash, 735,000 unregistered shares of Biopool common stock and a five year earn-out equal to 5 percent of Inter-Haematol's gross profit on sales of existing products. Inter-Haematol stockholders will have an option to repurchase Inter-Haematol if Biopool has not achieved break-even operations over a six-month period prior to Dec. 31, 1992. In addition, if Biopool's stockholders' equity decreases by more than $500,000 from Jan. 1 (without taking into account decreases resulting from non-cash expenses and losses of Inter-Haematol), or if any person or group of related persons becomes

the owner of 30 percent or more of Biopool's common stock prior to six months of break-even, the Inter-Haematol stockholders will also have the option to repurchase Inter-Haematol.

ATLANTA (MARCH 21) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) announced it is reorganizing its pulp and paper business into six major business units: tissue, paper distribution and converting, white paper, pulp and bleached board, containerboard and packaging, and groundwood-containing papers.

The company's tissue operations, which include facilities at Bellingham, Wash.; Brattleboro, Vt.; Gary, Ind.; LaGrange, Ga.; Plattsburgh, N.Y.; and Warwick, N.Y., will be headed by Maurice W. Kring, presently Georgia-Pacific's group vice president - packaged products.

Paper distribution and converting, made up of the Butler Paper Company's 83 distribution locations and Mail-Well Envelope's 17 manufacturing locations, will continue to be managed from Denver, Colo. The unit will be headed by Francis G. Walker, currently president of Great Northern's Butler Paper distribution unit.

The white paper unit will be headed by James G. Crump Jr., currently chief operating officer for Great Northern Nekoosa. This group will include Georgia-Pacific's mills at Kalamazoo, Mich.; Port Hudson, La.; Reading, Pa.; Taylorville, Ill.; and Woodland, Maine, as well as Great Northern Nekoosa's mills at Ashdown, Ark., and Port Edwards and Nekoosa, Wis. The unit also includes Georgia-Pacific's Inveresk subsidiary in the United Kingdom.

The pulp and bleached board organization will be headed by Daniel A. Martinez, presently Georgia-Pacific's senior vice president - pulp and paper manufacturing. This unit will be the company's most complex, encompassing pulp, bleached board and kraft paper sales as well as the major multi-product facilities at Brunswick, Ga.; Crossett, Ark.; and Palatka, Fla. It also will include Great Northern Nekoosa's Leaf River operation at New Augusta, Miss.

The containerboard and packaging group, reporting to W.E. "Ed" Babin, Georgia-Pacific's group vice president - containerboard and packaging, will include Nekoosa Packaging, Great Southern Paper and Georgia-Pacific's existing containerboard and packaging operations. This will be the largest of Georgia-Pacific's pulp and paper business units, and will include 56 box plants along with mills at Big Island, Va.; Cedar Springs and Valdosta

Ga.; Monticello, Miss.; Toledo, Ore.; Tomahawk, Wis.; and Georgia-Pacific's joint venture with Sonoco at Hartsville, S.C.

The Great Northern Nekoosa mills at Millinocket and East Millinocket, Maine, will operate as a separate business unit producing groundwood-containing products, and will be headed by Raymond H. Taylor, currently president - Great Northern Paper.

#90080p0050 03/21/1990 ~PR Newswire

HARTFORD, CT and BOSTON (MARCH 21) PR NEWSWIRE - Shawmut National Corporation (NYSE: SNC) today said that it is revising its previously announced preliminary financial results for the year and fourth quarter 1989. This revision is based on the company's on-going assessment of the risk inherent in its loan portfolio in view of continuing uncertainties in the New England economy. In reaching this assessment, the company has considered the views expressed during an examination of the company and all of its subsidiary banks now being concluded by federal regulatory authorities.

Shawmut Chairman and Chief Executive Officer Joel B. Alvord stated, "The actions we are announcing today should ensure that Shawmut remains strong and well capitalized and prepared to respond to economic developments in New England as we move forward into the 1990s."

The financial results for the year 1989 will now reflect a loss of $128.9 million, or $1.77 per common share, and a loss of $326.7 million, or $4.48 per common share, for the fourth quarter. This compares with the previously reported earnings of $201.7 million, or $2.68 per common share, for the full year, and $3.9 million, or $.05 per common share, for the fourth quarter.

The corporation stated that nonperforming loans and foreclosed properties

for year-end 1989 are $1,045 million, or 5.4 percent of total loans and foreclosed properties, compared with the previous estimate of $535.6 million, or 2.7 percent. It is estimated that a significant portion of the $509.4 million increase was composed of loans current as to principal and interest.

The revised fourth quarter provision for loan losses is $572.3 million, versus the previous figure of $139.4 million. In addition, the corporation provided an additional $22 million for other real estate owned (OREO). The revised year-end reserve for possible loan losses is $739 million, or 3.85 percent of total loans and 87 percent of nonperforming loans, compared with the previous estimate of $383.0 million, or 1.98 percent of total loans and 87 percent of nonperforming loans. Total reserves for nonperforming assets are 73 percent of total nonperforming assets. Revised net charge offs for the fourth quarter are $123.4 million compared with the previous figure of $46.4 million.

Shawmut National Corporation is a superregional bank holding company with headquarters in Hartford, Conn., and Boston. The corporation has a branch network of nearly 400 offices in New England. Its principal subsidiaries are Connecticut National Bank in Hartford and Shawmut Bank in Boston.

TOWSON, MD (MARCH 21) PR NEWSWIRE - The Black & Decker Corp. (NYSE: BDK) announced today that it has issued 2,593,103 shares of its common stock to the Company Account in Emhart Corp.'s 401(k) plan for $47 million in cash.

The Company Account, consisting of Emhart's matching contributions to its 401(k) employees' savings plan, held approximately 1.5 million shares of Emhart common stock when Emhart was acquired by Black & Decker in 1989. As a result of the acquisition, the Emhart stock was converted into cash. The investment of the cash in Black & Decker stock gives effect to the original intent of the plan that the Company Account be invested primarily in employer stock. After the issuance of these shares, Black & Decker has approximately 61.5 million shares outstanding.

Black & Decker is the world's leading marketer and manufacturer of power tools and other quality products used in and around the home and for commercial applications.

CONTACT: Barbara B. Lucas, vp of public affairs of Black & Decker, 301-583-2980.

NEW YORK (MARCH 21) PR NEWSWIRE - The appointment is announced of James Fifield as an executive director of THORN EMI plc. Fifield is president and chief executive officer of EMI Music Worldwide.

Commenting on his appointment, Colin Southgate, chairman and chief executive of THORN EMI said:

"Jim Fifield has made an important contribution to the Group's progress since he joined THORN EMI in 1988, achieving a most impressive improvement in the overall performance of our global music business. He became a member of the Chairman's Committee, the team of key executives which coordinates the Group's strategic development, in November last year. His wide business experience gained in senior positions in leading U.S. corporations has already added significantly to the team's role.

"My board colleagues and I are delighted to welcome him to the board and congratulate him on his appointment."

Fifield is based at the New York headquarters of EMI Music Worldwide, where he is responsible for THORN EMI's recorded music and music publishing operations in 37 countries.

Born in St. Louis, Fifield attended Southern Methodist University gaining a master's degree in business administration. In 1965, Fifield joined General Mills, one of America's largest food and consumer product groups, where he held a number of executive positions during a career spanning 20 years.

In 1973 he was named Divisional General Manager and Corporate Officer, and in 1976 Fifield was appointed vice president, general manager, New Business Division of General Mills. In 1978 he became Group vice president, Consumer Foods Group and he was appointed executive vice president, Toy Group in 1980. Four years later he took up the post of executive vice president of specialty retailing, fashion and toy operations.

In 1985, Fifield was appointed president and chief executive officer, CBS/Fox Video, the leading worldwide home video company. He remained in this position until joining EMI Music in 1988.

Fifield lives in New York City with his wife Betsy.

SAN JOSE, CA (MARCH 21) PR NEWSWIRE - Keegan Management Co. (NASDAQ: KMCI) today announced the signing of letters of intent to acquire a total of 21 Nutri/System Weight Loss Centers in the states of California, Indiana and Michigan. The agreements provide, subject to conditions, the rights to acquire the existing 21 centers and develop the territories. Terms for the agreements were not disclosed. Management expects the acquisitions to close in April and May.

The addition of these 21 centers would bring to 86 the total aggregate number of centers owned and operated by Keegan Management Co. Total annual revenues represented by these 21 centers is in excess of $7 million.

Commenting on these letters of intent, Ken Keegan, president and chief executive office said: "We anticipate that the acquisition of these centers will enhance Keegan Management's profitability in 1990. The potential purchase of these 21 centers in on track with our strategic plan

for the acquisition of 35 centers during the next two years. In addition, it emphasizes our commitment to enhancing stockholder value through the continued improvement of merchandising and client services to the weight loss program industry."

The company recently announce record year-end results for the year ended Dec. 31, 1989. Net income was $1.8 million, or 59 cents per share on revenues of $49.4 million, compared with net income of $990,000, or 34 cents per share, on revenues of $30.4 million for the year ended Dec. 31, 1988.

Keegan Management Co. is the largest franchisee of Nutri/Systems Weight Loss Centers based on revenues. According to information published by the franchisor, Nutri/System Inc., the Nutri/System Weight Loss Program is one of the weight loss industry's largest personally and professionally supervised complete weight loss and weight control programs in North America. Keegan Management owns and operates an aggregate of 65 centers in five counties of the metropolitan San Francisco Bay Area and in certain areas of Iowa, Kansas, Kentucky, Nebraska and Ohio.

SOUDERTON, PA (MARCH 21) PR NEWSWIRE - Univest Corporation of Pennsylvania and Pennview Savings Bank PaSA (NASDAQ-NMS: PSPA), both of Souderton, have jointly announced the execution of a definitive agreement on March 16, 1990, providing for the acquisition of Pennview by Univest.

Merrill S. Moyer, chairman of Univest, said that under the terms of the agreement, Pennview shareholders will receive $25.50 in cash for each share of Pennview common stock outstanding.

Univest is a one-bank holding company whose principal subsidiary is Union National Bank and Trust Company of Souderton. Univest had total assets of $561 million on Dec. 31, 1989, and an equity-to-assets ratio of 8.5 percent. Pennview reported total assets of $152 million on Dec. 31, 1989, and an equity-to-assets ratio of 6.2 percent.

Pennview converted from a Pennsylvania-chartered mutual association to a Pennsylvania-chartered permanent reserve fund stock association in September 1987 at a price of $9 per share. Norman L. Keller, president of Pennview, said that Pennview is able to be acquired by a bank holding company such as Univest as a result of the passage of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 passed in August 1989 which first authorized bank holding companies to acquire

healthy thrift institutions. Pennview, upon completion of the acquisition, will become a wholly owned subsidiary of Univest Corporation. Pennview will retain its name, its board of directors and its management.

Consummation of the acquisition requires the approval of Pennview's shareholders and certain federal and state regulatory agencies.

#90080p0061 03/21/1990 ~PR Newswire

ROCKVILLE, MD (MARCH 21) PR NEWSWIRE - Biotech Research Laboratories, Inc. (NASDAQ-NMS: BTRL) today reported record revenue, record operating income, and record income before taxes for the year ended Dec. 31, 1989. The record for net income, however, was not broken because of the significantly reduced income tax benefit provided by the company's dwindling net operating loss carryforward, according to J. Bryan Dowling, vice president, finance.

For the year ended Dec. 31, 1989, revenue increased 4 percent to $17,112,157 from $16,466,913 in 1988; operating income increased 12 percent to $1,581,542 from $1,418,168; income before taxes increased 17 percent to $1,799,294 from $1,536,563; however, net income decreased 1 percent to $1,485,294 or $.24 per common share from $1,506,563 or $.24 per common share in 1988.

"An unexpected drop in product sales, down 15 percent from the first two quarters, was responsible for both the overall drop in revenue and profit for the fourth quarter despite improved operational efficiencies. This decrease was the direct result of DuPont's sale (as previously reported) of its virology blood screening business to Ortho Diagnostic Systems Inc., a Johnson & Johnson subsidiary, with a resultant drop in DuPont's inventory requirement." Dowling concluded, "unfortunately, first quarter product revenue will be down 33 percent in part because of a shortage in a key raw material and in part because of the time that it is taking Ortho to get 'up to speed' after its Feb. 5, 1990 purchase. While the inventory problem has been solved, we are working as closely as possible with both DuPont and Ortho to have as smooth a transition as possible."

Biotech Research Laboratories, Inc. is a leader in the development of monoclonal antibodies and a major producer of viral diagnostic products, as well as joint developer and manufacturer of the Biotech/DuPont Elisa screening and the Western Blot Validation tests for HIV-I and HTLV-1 antibodies.

DALLAS (MARCH 21) PR NEWSWIRE -- Commercial Metals Company (NYSE: CMC) today reported net earnings of $5.4 million or 47 cents per share on sales of $274 million for the second quarter ended Feb. 28, 1990. This compares with earnings of $6.9 million or 60 cents per share, on sales of $316 million for the same period last year.

Net earnings for the second quarter were $1.5 million (13 cents per share) higher because of the LIFO effect on inventory valuation. Profits were reduced by startup costs associated with several steel fabrication and secondary metals processing plants.

Net earnings for the six months ended Feb. 28, 1990 were $12.5 million or $1.08 per share on sales of $551 million. For the same period last year earnings were $15.2 million or $1.32 per share on sales of $642 million. Cash flow provided from operations for the six month period was $23 million compared to $25 million last year. Stockholders' equity increased to $202 million.

Commercial Metals Company and subsidiaries manufacture, recycle and market metal products, related materials and services through a network of over 40 locations including steel minimills, steel fabrication plants, a copper tube mill, recycling facilities and trading offices in the United States plus over 10 trading and representative offices in strategic overseas markets.

#90080p0064 03/21/1990 ~PR Newswire

CALHOUN, GA (MARCH 21) PR NEWSWIRE - Crown Crafts Inc. (AMEX: CRW) today announced that net earnings for the company's current fiscal year which

ends April 1, are expected to be essentially flat compared to fiscal 1989 net earnings of $6,377,000 ($0.94 per share, adjusted for a recent two-for-one stock split), due to an estimated 15 to 25 percent decline in fourth quarter net earnings from last year's $1,722,000 ($0.25 per share, as adjusted for the split).

In making the announcement, Michael H. Bernstein, president and chief executive officer, stated: "We expect that net sales for the fourth quarter will be about the same as prior year fourth quarter net sales of $24.9 million. Last-second deferrals of large orders by major customers and efforts by many retailers to lower their inventories have adversely affected fourth quarter results.

"Even with the fourth quarter's sales showing no growth over last year's fourth quarter, our outlook for the upcoming fiscal year is quite positive " Berstein added. "Customers have responded enthusiastically to two recent product introductions: decorative jacquard woven cotton rugs, and comforters filled with a new proprietary man-made fiber which has performance characteristics similar to down. Additionally, we will continue the expansion of our bed sheet business when we introduce a new line of 200 thread count coordinated comforters and sheets in April.

"In addition to sales of these new products, we anticipate continued expansion of our existing product lines based largely on known commitments from our customers. As a result, we presently expect to achieve at least 25 percent growth in both sales and earnings during our 1991 fiscal year which begins April 2, 1990. Substantially improved operating results should be evident starting in the second quarter of the fiscal year," Berstein concluded.

Crown Crafts Inc., located in Calhoun, Ga., manufactures and distributes bed covering products and related fashion accessories.

AKRON, OH (MARCH 21) PR NEWSWIRE - Carl Mattia has been elected vice president, environmental, health, and safety management systems at BFGoodrich (NYSE: GR).

In this new position, Mattia will be responsible for directing the company's toxicology, medical surveillance, health monitoring, environmental audit and Responsible Care programs. He will also provide leadership and assistance to BFG's business units in matters relating to the environment, health, safety and regulatory affairs.

"Carl Mattia has an extensive international background and a record of accomplishment in directing and managing environmental, health and safety programs," said BFG executive vice president John Lauer. "His appointment to this newly created position further illustrates BFGoodrich's commitment to achieving and maintaining the highest possible standards in environmental, health and safety matters."

Mattia joins Goodrich from NL Chemicals in Hightstown, N.J., where he was director of environmental affairs.

Previously, he was manager of environmental, health and safety at PQ Corporation, Valley Forge, Pa.; environmental engineer at Gilbert Associates, Reading, Pa.; process engineer at Pennwalt Corporation, Philadelphia, Pa.; and project engineer at Research Cottrell, Somerville, N.J.

Mattia has a juris doctorate degree from Weidner University Law School, a master of science degree in water resources engineering from Villanova University and a bachelor of science degree in meteorology and oceanography from the State University of New York.

#90080p0072 03/21/1990 ~PR Newswire

NEW YORK (MARCH 21) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today announced a major investment to modernize and expand its refinery in Beaumont, Texas, upgrading the facility's capacity to process various grades of crude oil into premium fuels and other high-value products.

The expansion of what is already Mobil's largest refinery, at a cost of more than $300 million, represents a major increase in efficiency and reliability. The facility will be able to process low-cost, lower-quality crude oils into high-quality products, while enhancing the environment. There will be fewer emissions of sulfur and nitrogen dioxides.

"This investment is part of Mobil's long-term strategy to keep our manufacturing network at the leading edge of competitiveness," Allen E. Murray, Mobil chairman and chief executive, said. "With the new Beaumont our total U.S. refining system will be among the best in the industry."

Murray added that "the overall outlook for the refining and marketing business in the United States has improved a lot in recent years and we think it will improve further. This project is one more step towards our goal of improving the rate of return on investment earned by the

corporation."

The project will expand the largest of Mobil's five U.S. refineries from its present capacity to process 285,000 barrels a day of crude to 325,000 barrels a day. It will increase substantially its production of super unleaded gasoline and distillate fuels.

The project will include expansion of the distillation unit, which will increase crude capacity; expansion of a coker unit for greater flexibility to run heavy crude oils; installation of a new sulfur recovery plant; and expansion of the hydrocracking unit plus addition of a new continuous catalytic reformer to increase super unleaded gasoline production. By shutting down older processing units and employing new technology in existing units, the refinery will improve its overall competitiveness through greater reliability and octane capacity.

Construction is scheduled to begin in the third quarter of this year and be completed by the third quarter of 1992.

AUSTIN, TX (MARCH 21) PR NEWSWIRE - George R. Melton has been named vice president of Business Development for Westmark Systems, Inc., and Tracor Holdings, Inc.

James B. Skaggs, president and chief executive officer of Westmark and chairman of Tracor, said, Melton has 20 years of general management and financial administration experience with several leading corporations in the information management and defense electronics industries. He most recently was executive vice president of The MAXIMA Corporation and president and chief executive officer of MAXIMA Government Systems in Rockville, Md.

In this newly created position, Melton will assist top management in formulating and implementing the fundamental business strategy of Westmark and Tracor. Specific responsibilities include strategic planning, acquisitions and divestitures, and other corporate development activities.

"George brings to Westmark and Tracor his strong background in assessing an organization's performance against established goals and objectives and in managing the strategic planning process," Skaggs said. "He will become a significant member of the management team as we move forward."

Before joining MAXIMA in 1988, Melton was director of Business Development for the Electronic Systems Company, a $1 billion unit of Bendix Aerospace.

During his 12-year career at System Development Corporation (SDC) from 1972 to 1984, he served in a number of management positions, including general manager, Commercial Software Services; controller, Commercial Services; and director of business operations, SDC Government Systems.

Melton received a Bachelor of Science degree in statistics from the University of Tennessee in 1968 and served in the U.S. Army from 1968 to 1972.

Westmark Systems, Inc., is an Austin, Texas-based holding company created in 1986 to acquire and operate electronics companies. In 1987, Westmark acquired Tracor, Inc., an international technological products and services company also headquartered in Austin.

PHILADELPHIA (MARCH 21) PR NEWSWIRE - Consolidated Rail Corp. (Conrail) (NYSE: CRR)and CSX Transportation (CSXT), a business unit of CSX Corp. (NYSE: CSX), have reached an agreement in principle for Conrail to acquire CSXT's one-third interest in the Monongahela Railway Co.

The Monongahela Railway Co. includes rail lines between Millsboro, Pa., and Waynesburg, Pa., and between Brownsville, Pa., and Fairmont, W. Va.

The transaction is subject to approval by the Interstate Commerce Commission (ICC). Terms of the transaction were not announced.

On Dec. 26, 1989, Conrail announced that it had completed the purchase of the Pittsburgh & Lake Erie Railroad Co.'s one-third ownership interest in the Monongahela, subject to ICC approval.

With CSXT's one-third interest, as well, Conrail will own all shares of the Monongahela.

Conrail, a major railroad in the Northeast/Midwest part of the country, operates in 14 states, the District of Columbia and Quebec.

NEW ORLEANS (MARCH 21) PR NEWSWIRE - The Louisiana Land and Exploration Co. (NYSE: LLX) ("LL&E") today announced a recent discovery on its fee acreage in the Drakes Bay Field in Plaquemines Parish, La.

The LL&E No. 1, an exploratory test operated by CXY Energy Inc., encountered over 110 net feet of oil and gas-condensate sands over a 500 foot gross interval.

Two zones in the well were tested. Perforations from 10,469 - 10,494 feet flowed 548 barrels of oil and 419,000 cubic feet of gas per day. A shallower interval, from 10,071 - 10,085 feet tested at a daily rate of 8.8 million cubic feet of gas and 263 barrels of condensate.

LL&E has a net revenue interest of approximately 25 percent in this well as a consequence of its royalty and farmout acreage. CXY Energy Inc. has a 50 percent working interest in the well before payout. Other working interest owners and their before payout interests are: North Central Oil Corp. (25 percent); M.B. Rudman (12.5 percent); and Great Western Drilling Co. (12.5 percent). The development potential of this discovery is currently being evaluated.

DETROIT (MARCH 21) PR NEWSWIRE - The Michigan Railroads Association (MRA) today announced the appointment of Robert J. Chaprnka as executive director.

Chaprnka, who has more than 18 years of experience in legislative

relations, was most recently administrative assistant to Michigan Sen. Harry Gast. Prior to joining Sen. Gast's staff, Chaprnka was administrative assistant to Sen. Richard Allen.

"We are both pleased and fortunate to have Bob Chaprnka join the MRA and lead it into the 1990s," said Gerald L. Maas, president of the Grand Trunk Western Railroad and chairman of the MRA. "His experience and in- depth knowledge of state government will be invaluable assets to this organization and its members."

As the MRA's executive director, Chaprnka will be responsible for keeping state legislators and officials informed of the rail industry's legislative and state policy priorities; initiating and responding to state government policies which affect MRA members; and representing the MRA in meetings with state legislators and other government officials.

Chaprnka, a graduate of Western Michigan University, lives in Bath, Mich. He succeeds Thomas G. Drake, who joined CSX Transportation, Inc., as regional vice president last November.

The Michigan Railroads Association represents 11 railroads with operations in Michigan, including the Ann Arbor Railroad, Conrail, CSX Transportation D.M. Central Transportation, Escanaba & Lake Superior Railroad, Grand Trunk Western, Lake Superior & Ishpeming Railroad, Michigan-Wisconsin Transportation Company, Norfolk Southern Corporation, Soo Line Railroad and Wisconsin Central.

#90080p0088 03/21/1990 ~PR Newswire

ORLANDO, FL (MARCH 21) PR NEWSWIRE - RE/MAX International, Inc., the nation's second largest residential real estate firm will be the largest by the end of 1991, announced Dave Liniger, chairman and chief executive officer, at the company's 17th annual convention here.

"We are unstoppable," he said. "In only 17 years, we have succeeded in beating out virtually all of our competition, including Coldwell Banker, which we have relegated to third place. Century 21 is still king of the hill, but not for much longer. We will be number one in 1991 -- that is both our faith and our goal."

According to RE/MAX's figures, Liniger may very well realize his ambition.

In a statistical study examining the company's progress from beginning of January 1984 to end of December 1989, RE/MAX's number of sales associates jumped from 6,848 to 26,575; from 650 offices to 1,632; from 139,000 real estate transactions to 589,834; from a closed volume of $11.4 billion to $60.9 billion; and from $342 million in paid commissions to $1.9 billion.

RE/MAX is particularly strong in Southern California, the Atlantic states and all of Canada, Liniger notes. In the south of California, for instance, RE/MAX's number of sales associates increased by 47 percent in 1989; by 29 percent along the Atlantic coast; and by 18 percent in Ontario and 21 percent in Western Canada.

Liniger attributes RE/MAX's success to the openhandedness of his commission structure. As a result, "the best and the brightest" real estate agents flock to RE/MAX. The company's average sales associate closes more than 24 transactions each year, a figure that has remained constant since 1984. The average real estate agent completes only seven transactions in a given year, according to the National Association of Realtors.

"It is not merely money that compels RE/MAX's sales associates, it also is pride," said Liniger. "We are number one in Canada; in little more than a year, we fully expect to be number one in the United States. If we keep the promise of dedication and excellence, that expectation will be realized. We know that we are only as good as the service we provide our customers. Ultimately, as with everything else in this country, it will be the people's choice."

Headquartered in Englewood, Colo., RE/MAX also provides relocation,

insurance, real estate referral and asset management services.

RE/MAX was founded by Dave and Gail Liniger in 1973.

SAN JOSE, CA (MARCH 21) PR NEWSWIRE - Keegan Management Co. (NASDAQ: KMCI) today announced the signing of letters of intent to acquire a total of 21 Nutri/System Weight Loss Centers in the states of California, Indiana and Michigan. The agreements provide, subject to conditions, the rights to acquire the existing 21 centers and develop the territories. Terms for the agreements were not disclosed. Management expects the acquisitions to close in April and May.

The addition of these 21 centers would bring to 86 the total aggregate number of centers owned and operated by Keegan Management Co. Total annual revenues represented by these 21 centers is in excess of $7 million.

Commenting on these letters of intent, Ken Keegan, president and chief executive office said: "We anticipate that the acquisition of these centers will enhance Keegan Management's profitability in 1990. The potential purchase of these 21 centers in on track with our strategic plan for the acquisition of 35 centers during the next two years. In addition it emphasizes our commitment to enhancing stockholder value through the continued improvement of merchandising and client services to the weight loss program industry."

The company recently announce record year-end results for the year ended Dec. 31, 1989. Net income was $1.8 million, or 59 cents per share on revenues of $49.4 million, compared with net income of $990,000, or 34 cents per share, on revenues of $30.4 million for the year ended Dec. 31, 1988.

Keegan Management Co. is the largest franchisee of Nutri/Systems Weight Loss Centers based on revenues. According to information published by the franchisor, Nutri/System Inc., the Nutri/System Weight Loss Program is one of the weight loss industry's largest personally and professionally supervised complete weight loss and weight control programs in North America. Keegan Management owns and operates an aggregate of 65 centers in five counties of the metropolitan San Francisco Bay Area and in certain areas of Iowa, Kansas, Kentucky, Nebraska and Ohio.

#90080p0097 03/21/1990 ~PR Newswire

NEW YORK (MARCH 21) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) has proposed a multi-step cleanup for chemical contamination in and around the General Motors Central Foundry near Massena, N.Y. The first step in the remedy for this Superfund site would be the dredging and cleaning of contaminated sediments form the bed of the St. Lawrence River and other nearby waterways. Subsequent steps would include evacuation, incineration an/or biological treatment for contaminated soils and sludges within the foundry plant site and on the adjacent reservation of the St. Regis Mohawk Nation. In addition, appropriate treatment of contaminated groundwater, surface water and lagoon water will be conducted prior to discharge to the St. Lawrence River.

EPA's proposed remedies, estimated to cost $138 million, are based on studies performed by GM under a consent agreement with EPA. The foundry is an active manufacturing facility producing engine blocks. The contamination consists of waste polychlorinated biphenyls (PCBs) and other chemicals produced during the manufacturing process.

Before selecting final remedies, EPA is subjecting its proposals to 60 days of public comment. Remedy selection for one part of the site -- a large industrial landfill -- is being deferred pending further discussion.

"This site has been carefully studied," said Constantine Sidamon- Eristoff EPA's regional administrator, "and now it's time to move forward and clean it up. We want GM to tackle the river sediments first because the most direct exposure to contamination occurs from eating fish. By the time all the work is finished, we expect this site to be restored to an environment that is safe for people and wildlife alike."

Both the New York State Department of Environmental Conservation (DEC) and the St. Regis Mohawk Indian Tribe have reviewed EPA's proposal.

The GM site contains approximately 823,000 cubic yards of materials contaminated with PCB at concentrations above 10 parts per million. Other chemicals, including phenols and volatile organic compounds, were also found at the site. EPA's clean-up plan would use a mix of methods to neutralize or reduce to acceptable levels chemicals of concern; on- site incineration, and innovative, biological treatment practices.

The St. Regis Mohawk tribe and DEC have actively participated with EPA in designing and reviewing the site investigation work conducted by GM under the Superfund Consent Agreement.

"For now, EPA is deferring its decision on selecting a remedy for a part of the site, the on-site industrial landfill, which is known to contain PCB wastes but presents the lowest risk to human health and the environment at the site. When a decision is reached on that area of contamination, we expect that the plan we propose for it will be a comprehensive and effective solution," Eristoff stated.

The treatment technologies under consideration for the chemical contamination at the site have been tested and found to be effective at other hazardous waste sites. However, a pilot, or field testing, program to demonstrate the effectiveness of biological treatment at the GM Massena site will be performed.

GM performed the additional river sampling in February 1989, and the report was submitted to EPA in May 1989. On June 9, 1989, EPA approved the RI report, which consists of the draft RI report, the Phase II RI report and the sediment sampling report, for the site.

The draft FS was submitted to EPA last April; EPA required revisions. Those revisions were made and the report was resubmitted to EPA in November 1989.

MIDLAND, TX (MARCH 21) PR NEWSWIRE - Parallel Petroleum Corporation (NASDAQ: PLLL) today announced record earnings for the year ended Dec. 31, 1989, compared with a net loss the previous year. In addition, the company announced a doubling of the value of its oil and gas reserves from the year before.

For the year ended Dec. 31, 1989, oil and gas revenues were $856,919, up 40 percent from $612,244 the prior year. Net income was $42,540, or $.004 per share, compared to a net loss of $38,766, or $.004 per share, the previous year.

Based on an independent engineering study, the estimated future net revenues from the company's proved developed oil and gas reserves at Dec. 31, 1989, were approximately $8.9 million, up 114 percent over $4 million at year-end 1988. The increase is a direct result of the company's purchase of producing properties in the Permian Basin of west Texas during March 1989.

Parallel Petroleum Corporation is an oil and gas development and production company based in Midland.

AUSTIN, TX (MARCH 21) PR NEWSWIRE - Scientific Measurement Systems, Inc. (SMS) (NASDAQ: SCMS) today reported net income of $135,000, or 1 cent a share, for its second quarter which ended Jan. 31. This represented an increase in earnings of $124,000 over the previous quarter.

In the year-earlier period, the maker of advanced X-ray quality inspection equipment had a profit of $224,000. Dr. Larry Secrest, SMS president and CEO, said the company revenue during the period was more than $2 million and noted that the company had been profitable for more than 1-1/2 years. Secrest expressed confidence that SMS has a very bright future and said that he is looking forward to a period of sustained growth and greater profitability.

SMS recently delivered systems to Bethlehem Steel Corporation and the Rocketdyne Division of Rockwell International and will deliver its first system to a Japanese buyer during the next month.

#90080p0110 03/21/1990 ~PR Newswire
HAIFA, ISRAEL (MARCH 21) PR NEWSWIRE - Elscint Ltd. (NYSE: ELT) today announced its audited consolidated results for the year ended Dec. 31, 1989.

As of April 1, 1988, the company changed its fiscal year end from March 31 to December 31, in accordance with an amendment to the Israeli Income Tax Law. All comparisons are of audited data for calendar 1989 to unaudited data for calendar 1988, and to audited data for the nine month fiscal period ended Dec. 31, 1988.

Net income before extraordinary gains for the period under review totalled $3.1 million, as compared to an unaudited loss of $24.2 million for calendar 1988 and an audited loss of $11.7 million for the nine month fiscal period ended Dec. 31, 1988.

Consolidated revenues for the year totalled $147.5 million, as compared to $161.7 million (unaudited) for the year ended Dec. 31, 1988 and $118.1 million (audited) for the nine months ended Dec. 31, 1988.

Operating profit in 1989 was $10.5 million, as compared to a loss of $0.5 million (unaudited) in 1988 and an audited loss of $3.5 million for the nine months ended Dec. 31, 1988. The gross margin for 1989 rose to 43

percent, as compared to 39 percent (unaudited) in calendar 1988 and 37 percent (audited) for the nine months ended Dec. 31, 1988.

The company also continued to maintain a positive cash flow from operations throughout the year, for the first time in six years.

These results and other performance parameters conformed to the plan the company implemented in late 1988. During all of 1989 the company adhered strictly to the cost reduction and efficiency improvement program initiated in the fourth quarter of 1988.

Gross R&D expenditures in 1989 were 9 percent of revenues, as compared to 8.9 percent in calendar 1988, and as compared to 8.7 percent for the nine months ended Dec. 31, 1988. The new "APEX SP" family of nuclear medicine gamma cameras was introduced in mid-year. It has been well received by the market and production is fully booked through mid-1990. The new "Elite" family of computerized tomographs which was announced in the fourth quarter of 1989 is being supplied routinely to customers worldwide and is also eliciting favorable responses.

The new "GYREX V" Magnetic Resonance Imaging System was announced in November 1989 and deliveries are scheduled for the second quarter of 1990.

As previously announced, the consortium of Elscint's lender banks (the banks) exercised the warrants they held under the 1986 agreement and received Elscint Ordinary Shares in exchange for releasing Elscint from $50 million of its indebtedness. In a series of interrelated transactions, the banks sold those shares to Elbit Computers Ltd. (NASDAQ: ELBTF) for $22.5 million in cash and other considerations provided by Elbit. In addition, Elbit has agreed to invest an additional $10 million in Elscint during the next two years, in the form of equity or otherwise.

As a result of the above transactions, Elscint recorded an extraordinary gain of $27.7 million and closed the year with a positive equity of about $40 million.

In a concurrent transaction, Elron Electronic Industries Ltd. (NASDAQ: ELRNF) converted 10 million preference shares it held under the 1986 agreement, and as previously announced Elbit also purchased all of Elron's holdings in Elscint. As a result of the above transactions, Elbit now has a controlling interest in Elscint.

The accompanying table compares the results of the twelve month period under review with the unaudited results of the preceding twelve months and the audited results of the nine months ended Dec. 31, 1988.

Elscint Ltd. designs, manufactures, distributes and services medical diagnostic imaging equipment for selected international markets.

CONTACT: Deborah Bersch, 212-486-9500, or in Israel: Judah Lando, 972-4-540390, both of Elscint, or Daniel Halpern, 212-935-3110, for Elscint

PALO ALTO, CA (MARCH 21) PR NEWSWIRE - Emery Worldwide today announced it has revamped its flight schedule and route system - adding four domestic cargo flights - as part of a new "Schedule Integrity" program that has substantially improved on-time performance.

Under the program, launched in mid-January, Emery Worldwide has achieved "much-needed flexibility" for its 98-aircraft freighter fleet, said Donald G. Berger, president of the $1.2 billion company.

"We are committed to providing our customers with reliable, on-time service for all their shipping needs, be it envelopes, small packages or heavy freight," Berger said. "And that means committing the aircraft and the flights needed to do the job."

By revamping its "air-haul" system, the company has more reserve planes available and has been able to eliminate rerouting of aircraft, a cause of flight delays last year, said Charles J. Zubarik, vice president - aircraft operations.

"This flexibility in our aircraft fleet provides us with true schedule integrity, because it allows us to stick to our original flight plans, even when a plane has to be taken out of service for maintenance," Zubarik said.

In addition to improving on-time performance, the "Schedule Integrity" program has led to an expansion in Emery's aircraft network. The company is now serving Colorado Springs, Colo.; Green Bay, Wis.; Providence, R.I., and Wichita, Kan., with daily B-727 cargo flights.

"We are extremely pleased to be able to have daily 727 service to these cities," Zubarik said. "The new flights not only signify cargo growth in the local markets, but a resurgence of Emery Worldwide and a commitment to future growth."

The new flights add up to four hours to the local shipping day and more than double Emery's cargo-handling capabilities in each of the four cities. Before resumption of the flights, local freight was trucked to the nearest airport served by Emery Worldwide.

The carrier's flights, which touch down at more than 110 airports around the world, originate out of its international "Starbase" freight- sorting hub in Dayton, Chio. The facility, with a seven-million-pound daily capacity, is the only one in North America able to process envelopes, packages and heavy industrial freight in a single sort operation.

LAKE SUCCESS, NY (MARCH 21) PR NEWSWIRE - The Care Group, Inc. (NASDAQ: CARE), which provides specialized home health care services primarily to patients with AIDS, today reported record-level revenues (up 64 percent) and record-level net income (up 41 percent) for the 12-month period ended Dec. 31, 1989.

On a consolidated basis, for the 12 months ended Dec. 31, 1989, as compared to the same period ended Dec. 31, 1988, operating revenues were a record $9,422,444, a 64 percent increase over $5,747,864 for the prior period, and net income was a record $787,041, a 41 percent increase from $556,978 for the prior period. For the same periods, earnings were 35 cents per share based upon 2,266,840 weighted average number of shares outstanding over 33 cents per share based upon 1,675,000 shares outstanding.

For the three months ended Dec. 31, 1989, as compared to the same period

ended Dec. 31, 1988, operating revenues increased 20 percent to a record $2,570,835 as compared to $2,150,332; net income increased 25 percent to $213,478 as compared to $170,591; and earnings per share were 7 cents based upon 3,164,362 weighted average number of shares outstanding compared with 10 cents based upon only 1,675,000 outstanding.

According to Ann Mittasch, president, "The Care Group achieved net income equivalent to 8.3 percent of revenues during the fourth quarter, significantly higher than third quarter net income which was lower to non-recurring expenses related to expansion." Net income for 1989 was 8.4 percent of revenues.

The Care Group successfully completed its $2,000,000 initial public offering on July 14, 1989, after which there were 2,675,000 common shares outstanding and warrants to purchase 1,000,000 shares at an exercise price of $3 per share scheduled to expire on April 24, 1991. If all warrants are exercised, the company would receive $3,000,000 gross proceeds.

CHICAGO (MARCH 21) PR NEWSWIRE - The entire U.S. staff (about 3,000 people) of Foote, Cone & Belding Communications, Inc. (NYSE: FCB), one of the world's largest advertising agencies, saw their "cup runneth over" today.

The staff arrived at work this morning across the U.S. to find a specially inscribed coffee cup on every desk. In the cup was a note from FCB Chairman Norman Brown announcing a company gift of five shares of FCB stock for every employee.

The shares came as a salute to each employee for the agency's 1989 performance, for which it was named "Agency of the Year" by Adweek

magazine.

"Everyone at FCB had a hand in our success and deserves to share in its rewards," said Brown. "These shares are for the people who have the biggest stake in our company ... the people whose hard work and individual excellence contributed so much to an outstanding year. And to FCB's winning of one of our industry's highest honors."

The "Agency of the Year" title -- like the special cup -- is the second in a growing collection for FCB, which less than three years ago was named "Agency of the Year" by Advertising Age magazine.

FCB, with a worldwide network of more than 125 offices in 40 countries, has major U.S. offices in Chicago, New York, San Francisco and Los Angeles.

It employs approximately 3,000 people in the U.S., most of whom are company shareholders primarily through an employee Stock Purchase Plan. About 25 percent of FCB stock is held by employees.

All employees as of March 12, 1990 will receive the stock, which closed on the New York Stock Exchange yesterday at $29-3/8 per share.

DETROIT (MARCH 21) PR NEWSWIRE - Quest BioTechnology, Inc. (NASDAQ: QBIO) ("Quest") held its 1990 Annual Meeting of Shareholders on March 8, 1990. Addressing the shareholders, employees and others that attended, Mary J. Lore, vice president and chief financial officer, said, "We are pleased to report that during the fiscal year ended Oct. 31, 1989, Quest reported substantially higher revenues and reduced losses. Increased revenues, controlled expense levels and sufficient working capital will facilitate our goal of moving Quest forward from a company in the development stage to a successful operating company."

Elected as directors of Quest were: Eugene I. Schuster, chairman of the board, president and chief executive officer; Jayson D. Pankin, vice president and secretary; Lore, vice president, treasurer and chief financial officer; E. Russell Eggers, an independent management consultant; and Jack Faxon, Michigan state senator.

Additionally, the company's Stock Option Plan for Non-Employee Directors was adopted; and Arthur Andersen & Co. was appointed as the company's independent auditors for the fiscal year ending Oct. 31, 1990.

"We continue to seek additional licensing ventures as well as opportunities for acquisition, while searching for new business opportunities," said Schuster. "During fiscal 1990, we will continue to develop our current technologies which are in the early stages of research and development and work within the health-care community to identify promising technologies."

Quest is a development stage company organized to acquire, develop and commercialize biotechnology and human health-care products and processes. Quest has two wholly owned subsidiaries, PolyCell, Inc. and Quest Blood Substitute, Inc.

HARTFORD, CT and BOSTON (MARCH 21) PR NEWSWIRE - Shawmut National Corporation (NYSE: SNC) announced today that its annual meeting of stockholders has been scheduled for May 22, 1990. Stockholders of record at the close of business on March 30, 1990, will be entitled to notice of and to vote at the meeting.

The corporation also announced that its board of directors has adopted amendments to its by-laws, which require advance notice to the corporation of any stockholder nominations for the election of directors as well as of other stockholder-proposed business to be conducted at a stockholders' meeting.

In connection with the upcoming annual meeting, these provisions require notice to the corporation being received not later than the close of business on April 5, 1990. The amendments are being filed today with the Securities and Exchange Commission.

WILSON, NC (MARCH 21) PR NEWSWIRE - Walter Kidde Aerospace, Inc., the world's largest manufacturer of aircraft fire protection systems, today announced a $4 million expansion of its production and engineering operations and the hiring of 75 new employees.

Walter Kidde's expanded Production and Technology Center, which was dedicated today, doubles the firm's production capacity to meet rising demand for new aircraft, vehicle and marine fire protection applications in the 1990s. With the expansion, total employment is now 307.

Walter Kidde Aerospace is a subsidiary of British-based Williams Holdings PLC. "This new facility puts Walter Kidde Aerospace in its best position ever to meet the rapidly changing worldwide demand for our products," said Mr. Nigel Rudd, Chairman of Williams Holdings PLC, who spoke at the dedication.

"These gains in technology and manufacturing will give us continued maximum product reliability and safety as we broaden our services in the global market," added Walter Kidde Aerospace President Joseph L. Then.

Mr. Then said Walter Kidde's annual sales -- $35 million in 1989 -- should continue trending upward as European markets expand and as aging aircraft are retired and replaced. Walter Kidde products are used in both the defense and commercial marketplaces in such diverse applications as the B-2 Stealth Bomber to the new 747-400 airliner.

The Wilson operation provides a one-stop location for aircraft vehicle and marine fire protection systems and equipment.

In 1988, Williams Holdings PLC, with sales in excess of $2 billion acquired Walter Kidde Aerospace, Inc., and other Kidde, Inc., fire protection companies. The corporate restructuring that followed led to the creation of the Walter Kidde Aerospace Production and Technology Center.

Walter Kidde has been the leading manufacturer of fire protection systems since 1918.

DETROIT (MARCH 21) PR NEWSWIRE - Quest BioTechnology, Inc.'s (NASDAQ:

QBIO)("Quest") subsidiary, PolyCell, Inc., announced today that a Quadroma(tm) Center has been formed in conjunction with MCA Development BV in Groningen, Netherlands.

The Quadroma Center will perform fusion of hybridoma cell lines to make bispecific monoclonal antibodies and hybrid hybridoma cells available on a fee-for-service basis.

The Quadroma Center will utilize PolyCell's patented Quadroma technology by which bispecific monoclonal antibodies are biologically produced. These are used primarily for cancer, cardiovascular and autoimmune disease therapy and diagnostic applications. Academic researchers have utilized bispecific antibodies in a number of promising models for therapy of cancer and other diseases. In response to the worldwide use of bispecific antibodies, the National Cancer Institute organized the first annual conference on "Bispecific Antibodies and Targeted Cellular Cytotoxicity" in Annapolis, Md., in October 1989. At this conference, over 100 researchers presented data generated at dozens of laboratories around the world on bispecific antibodies for cancer therapy. A number of laboratories have requested assistance from PolyCell in the preparation of bispecific antibodies.

"The superiority of biologically produced bispecific monoclonal antibodies has created the need for this type of contract service," said Jayson D. Pankin, president of PolyCell and vice president of Quest. "PolyCell in North America and Sumitomo Corporation in Japan will offer this service to the numerous laboratories interested in comparing bispecific reagents to the existing conjugated antibodies."

"The formation of the Quadroma Center in Groningen supplements an exciting technology with our expertise in developing new monoclonal antibodies and thereby gives an extra dimension to the potential monoclonal antibodies," said Dr. Roland G. Lageveen, managing director of MCA Development BV. Recently, the Academic Hospital in Groningen started locally applied bispecific antibody-related therapy in patients. "I am glad the Quadroma Center is available now for production, purification and testing of bispecific monoclonal antibodies," said Dr. Lou de Leij, from the Department of Clinical Immunology.

MCA Development BV is an immunobiotechnology company specialized in contract service-based development of new monoclonal antibodies for a broad range of research and industrial applications. Its product panel includes hybridoma culturing-related factors and monoclonal antibodies for immunodiagnostic applications.

PolyCell is a development-stage company organized to develop and commercialize the proprietary Quadroma technology which biologically produces bispecific monoclonal antibodies primarily for cancer,

cardiovascular and autoimmune disease therapy and diagnostic applications.
Sumitomo Corporation is PolyCell's agent and distributor in Japan.

Quest is a development-stage company organized to acquire, develop and commercialize biotechnology and human health-care products and processes. Quest has two wholly owned subsidiaries, PolyCell and Quest Blood Substitute, Inc.

DETROIT (MARCH 21) PR NEWSWIRE - Michigan-based MCN Corporation (NYSE: MCN) today announced the formation of Coenergy Ventures, Inc., a new subsidiary that is capitalizing on energy-related opportunities throughout the United States and Canada.

The new company, organized under MCN's nonutility division -- MCN Investment Corporation -- is pursuing clients in new market niches and offers a range of energy services, according to MCN Chairman and Chief Executive Officer Alfred R. Glancy III.

"There are opportunities to invest our resources in large cogeneration plants and other large energy-consuming facilities that involve business risks which should be separated from our traditionally regulated gas distribution business," Glancy said.

The new subsidiary's energy-related services for utilities and industries include long-term gas contracts, transportation and storage opportunities.
Coenergy Ventures, Inc. also is targeting potential cogeneration customers who are emerging as a dynamic new market.

MCN Corporation is the holding company for Michigan Consolidated Gas Company, a natural gas distribution, transmission and storage company serving more than 1 million customers in 465 communities throughout Michigan, and MCN Investment Corporation, which owns subsidiaries involved in international data processing, natural gas technology and energy services.

NEW YORK (MARCH 21) PR NEWSWIRE - "Profitability returns to Sterling Bancorp," according to Theodore H. Silbert, chairman.

Silbert stated that, "Income before taxes for the first quarter ended March 31, 1990, will approximate $950,000, compared with a pre-tax loss for the same period last year of $852,000. This represents a turn- around and improvement of about $1.8 million. Earnings are expected to continue this favorable trend for the balance of 1990.

"The principal subsidiary of Sterling Bancorp is Sterling National Bank & Trust Company of New York, which has operated profitably since 1929, and its earnings, likewise, are on an upward trend this year," the chairman stated.

Sterling Bank's primary capital (stockholders' equity and reserves) reached an all-time year-end high of $83 million. The ratio of Sterling Bank's primary capital to assets is more than double the minimum regulatory requirements. Sterling Bank is considered one of the most liquid commercial banks by leading bank analysts.

ARLINGTON, VA (MARCH 21) PR NEWSWIRE - Thomas J. Shafer has been named president and publisher of the Jackson (Miss.) Clarion-Ledger, Gannett announced today.

Shafer, 42, most recently served as vice president/field operations at USA Today. He succeeds Robert E. Robbins, who joins the staff of the Gannett South Region as a general executive.

Shafer joined Gannett in 1972, serving as a sports writer and sports editor of the Melbourne (Fla.) Times. In 1974, he moved to the sports department of Today, now Florida Today.

After a brief period at the St. Petersburg Times and as the owner of a sports publishing and supplies business, Shafer returned to Today in 1976, where he served in a variety of news department assignments, including executive sports editor.

In 1980, he was named pre-press manager. The following year, he became production director.

He joined USA Today in 1982 as field operations director. He was promoted to vice president in January 1988.

Shafer was raised in Leesburg, Fla., and attended Central Florida Junior College and the University of Florida. His wife, Anne, is a former resident of Jackson, where her parents reside.

Frank Vega, president of Gannett South, said Robbins will work with newspapers throughout the region, handling special projects as assigned.

Robbins was named to his position in Jackson in December 1987. He previously served as publisher of the Hattiesburg (Miss.) American and as controller in Jackson and at the Palladium-Item in Richmond, Ind.

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong,

Singapore and Switzerland.

PARIS (MARCH 21) PR NEWSWIRE - Jean Boillot, president of Automobiles Peugeot since 1984, has announced his retirement, effective April 1 of this year.

Jacques Calvet, chairman of Peugeot S.A. (PSA) and president of Automobiles Citroen, is Boillot's likely successor. The Peugeot board of directors will meet on March 28 to decide.

Boillot, 64, an officer in the French Legion of Honor, has been with Automobiles Peugeot since 1954. He will remain on the Peugeot board of directors and work on special projects after his retirement.

Calvet, 58, a former cabinet director of the French Economics and Finance Ministry and once chairman of the Banque Nationale de Paris, came to PSA in 1982. He was named chairman of the PSA group and vice president of Automobiles Peugeot in 1984. Calvet has been president of Automobiles Citroen since 1983.

PSA, composed of Automobiles Peugeot and Automobiles Citroen, is Europe's third-largest automaker and France's No. 1 exporter.

SAN MANUEL, AZ (MARCH 21) PR NEWSWIRE - Magma Copper Co. (AMEX: MCU) today announced an arbitrator has ruled in favor of the company regarding the non-payment of a copper price-related bonus for the fourth quarter 1988.

Agreeing with the company, the arbitrator found that neither production nor sales requirements of the plan were met and thus, no bonus was payable.

Had the arbitrator ruled in favor of the union, bonuses of approximately $9.6 million would have been paid to hourly-wage employees.

Grievances relating to the non-payment of bonuses for the first and second quarters of 1989, which had been deferred pending the recent ruling, have

not been resolved.

Magma believes these grievances are without merit. Magma Copper Co. operates underground and open pit mines, concentrators, solvent extraction-electrowinning plants, a smelter, electrolytic refinery and rod plant at its divisions in San Manuel, Miami and Superior, Ariz.

WASHINGTON (MARCH 21) PR NEWSWIRE - The United Food & Commercial Workers Union announced today a toll-free 800 number hotline to handle what the union called "a flood of telephone calls from Food Lion employees" following the filing of a class action suit against the company's profit-sharing and health insurance programs.

According to UFCW Vice Presidents Gary Duckett and Frank Dininger, directors of the union's Middle Atlantic and Southeastern Regions respectively, the phone number for the "Food Lion Employees Assistance Hotline" is 1-800-435-2265.

"There are 13 UFCW locals unions serving the area where Food Lion operates. Every local union is reporting a tremendous number of calls from current and former Food Lion employees seeking information about the suit and offering their own histories," said Duckett and Dininger.

"By funneling all calls through the hotline number, these Food Lion workers will get a faster response to their inquiries," the union officials said.

The calls were triggered by the filing on March 12 of a class action lawsuit brought by a former Food Lion employee against the company. The former employee, Rickey Bryant, charged Food Lion and its executives with "an unlawful scheme" to fire or get rid of employees before they were eligible for their full profit-sharing benefits.

The suit also contends Food Lion is not providing legally mandated continuation health insurance coverage to terminated employees. Employers must offer the coverage to all employees who leave, except those fired for "gross misconduct." The suit alleges Food Lion is misclassifying the reasons for employees being discharged as "gross misconduct" in order to avoid offering the insurance.

#90080p0169 03/21/1990 ~PR Newswire
SEATTLE (MARCH 21) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) announced today that it filed an amendment to its pending Product License Application (PLA) for OncoTrac(R) Melanoma Imaging Kit.

The amendment includes the final results of an equivalency study designed to show that removal of nearly 2/3 of the kit's antibody dose does not change the product's efficacy. This reduction in antibody content will make the kit simpler to use, less time consuming for patients and physicians, and will lower manufacturing costs.

"Our kit's use of the radionuclide technetium-99 allowed us to compare the old and new formulations of the product in the same patient within one week. This would have been more difficult using another radionuclide. Our studies showed no significant differences in either the quality of the images or the detection rates for melanoma metastases", said Darrell Salk, M.D., NeoRx's director of diagnostic imaging. "By using each patient as his own control, we were able to establish the equivalency of the simpler product formulation", continued Dr. Salk.

NeoRx's OncoTrac Melanoma PLA is currently undergoing FDA review. The agency's review committee has largely completed its analysis of the clinical data and is currently evaluating the nonclinical portions of the PLA and the company's establishment license application (ELA). "I believe we are on track to have the entire review process completed by late summer", said Donald Longenecker, Ph.D., NeoRx's vice president of operations. "Hopefully, approval of the product for sale will occur very shortly thereafter."

NeoRx Corporation, incorporated in May 1984, is developing monoclonal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer. The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac imaging products to detect metastic melanoma and small cell lung cancer.

#90080p0171 03/21/1990 ~PR Newswire
NEW HAMPTON, IA (MARCH 21) PR NEWSWIRE - "Money cannot buy us off. This

strike is about inhumane working conditions and dignity," Bakery, Confectionery and Tobacco Workers International Union Local 417 Business Agent Jan Laue said to explain her local union's continuing strike against the Sara Lee Bakery in New Hampton, Iowa.

At midnight Sunday, March 11, the contract between BC&T Local Union 417, IAM Local 1318, and Sara Lee in New Hampton expired without a settlement. Close to 550 members of the unions voted overwhelmingly to strike at a membership meeting that night and pickets took up position at plant entrances after the deadline.

"We didn't want this strike," Laue said. "The company forced it. There are issues we brought to the table, in a cooperative spirit, that are critical to the health and safety of our members and the company would not even discuss them.

"Soon after the strike vote, the company put a 'new' final offer on the table that provided more money, but at a second vote late Monday, March 12 the members voted overwhelmingly to stand firm," she said.

BC&T International President John DeConcini pledged complete support for the strike, saying: "This union-busting company has long treated our members in Iowa with contempt. Their refusal to bargain in good faith in this case is indicative of their attitude. From their recent actions, it is clear that the company is more obsessed with breaking the strike than in negotiating a settlement.

"While projecting an image publicly of building a solid company, in reality they are trying to destroy their work force. You can't do both. You can't build a company by destroying your workers. Under these circumstances, therefore, we will carry this strike to Sara Lee across the country if we must."

"This company is crippling people," said Laue. "We have a lot of work-related carpal tunnel syndrome and other cumulative trauma disorders. Sara Lee talks a good game about their concern for their workers, but they refuse to work with the union to redesign jobs and reduce the injuries.

"They force injured workers to go to the company doctor who is 100 miles away. People don't report their injuries, go to their own doctors instead, and pay for it out of their pockets and through health benefits. So then the company comes to the bargaining table claiming health care costs are too high and demands cutbacks. And again they refuse to discuss the issues."

Sara Lee also has baking operations in Deerfield, Ill.; Traverse City, Mich.; Forrest, Miss.; Tarboro, N.C.; and Greenville, S.C. It also own

Wolferman's English Muffin Co. in Lexena, Kan.

INDIANAPOLIS (MARCH 21) PR NEWSWIRE - American Monitor Corporation (OTC: AMON) ("AMC") announced results for its second quarter and six months ended Dec. 31, 1989. "Net loss increased substantially due to decreases in revenues and the settlement of longstanding legal claims against the company," said Mike Treble, chief executive officer. "The revenue declines were due to the limited financial resources of AMC which impaired our ability to more effectively reduce our backlog of orders and to a stronger U.S. dollar in all of AMC's primary foreign markets. At Dec. 31, 1989, we had a backlog of orders in excess of $4 million."

As previously announced, AMC's Sixth Amended Plan of Reorganization ("Sixth Plan") under Chapter 11 of the Federal Bankruptcy Code was confirmed, subject to a final order by the United States Bankruptcy Court for the Southern District of Indiana, Indianapolis Division, in December 1989, and accepted by all of the requisite classes of its creditors and equity holders entitled to vote. The Sixth Plan provides for Quest BioTechnology, Inc. (NASDAQ: QBIO) to acquire approximately 34 percent of AMC's common stock and to have the option if certain conditions are met, to purchase 100 percent of the common stock of Nippon Monitor K.K., AMC's wholly owned Japanese subsidiary. The closing date, the date on which AMC will exchange its debt, old warrants and old common stock for new debt, new common stock, new warrants and cash, as appropriate, has not yet been determined. Venture Funding, Ltd., of Detroit, a significant shareholder of Quest, and The Rupp & Bowman Co., of Farmington Hills, Mich., will each own approximately 17 percent of the new common stock of AMC, while preconfirmation shareholders and subordinated debt holders of AMC will each own 16 percent of the new common stock of AMC.

#90080p0176 03/21/1990 ~PR Newswire

HOLLYWOOD, FL (MARCH 21) PR NEWSWIRE - Himedics, Inc. (NASDAQ: HMED, HMEDU, HMEDW) president, Barry N. Heimlich, today announced that the United States Patent and Trademark Office has awarded patents to Himedics for its microencapsulated granules of amoxicllin and erythromycin.

The two patents cover the critical characteristics of the microgranules as well as the process by which they are produced. The principle inventor for both patents is Robert P. Giannini, Jr., Ph.D., the company's director of pharmaceutics. Both medications will be used with the proprietary dispenser integral to the Himedics Delivery System.

Amoxicillin and erythromycin are the two most widely prescribed antibiotics for children, accounting for over 25 million prescriptions per year. Annual sales of the two antibiotics for pediatrics are in excess of $150 million, according to IMS (the leading source of pharmaceutical research).

"These antibiotics in standard formulations have reputations for unpleasant taste and/or may cause gastrointestinal upset which can be due to overdosage," Giannini explained, "making them particularly well- suited for the Himedics Delivery System." According to Giannini, "Himedics has advanced the frontier of particle coating by inventing extremely concentrated and extremely uniform small particles of these antibiotics."

Himedics is a Florida-based company which develops pharmaceutical products to be used in its proprietary drug delivery system. The Himedics Delivery System consists of its patented, adjustable, disposable dispenser which enables individualized, metered doses of tasteless, polymer-coated microgranules of prescribed medication to be sprinkled onto soft foods. This variable-dose drug delivery system for oral microgranules is particularly useful for children and elderly patients who have difficulty swallowing tablets, capsules or unpleasant tasting liquids. The Himedics Delivery System is expected to benefit significant segments of the geriatric and pediatric pharmaceutical markets which together exceed $2 billion in the United States alone.

#90080p0178 03/21/1990 ~PR Newswire

WALL, NJ (MARCH 21) PR NEWSWIRE - The New Jersey Board of Public Utilities (BPU) today approved a $17.3 million increase in base rates for New Jersey Natural Gas Company (NJNG). The total represents an average increase of about 5.7 percent in firm gas revenues and will become effective as soon as the BPU issues a formal written order.

NJNG is the principal subsidiary of New Jersey Resources Corporation (NYSE: NJR).

About 43 percent of the total approved, or $7.4 million, represents federal income and state gross receipts and franchise taxes.

NJNG had filed for an increase of $26.2 million and a return on equity (ROE) of 14.4 percent on March 30, 1989. These figures were updated to $25.4 million and a 13.7 percent ROE on Oct. 30. The company said the increase is needed primarily because of its continuing customer growth, which has resulted in extensive construction of new utility facilities, greater manpower requirements and related increases in operating expenses and financing costs.

The increase reflects the addition of about 26,000 customers, 65 employees and $110 million in construction of new and renewal utility plant since NJNG's last base rate increase of $10.2 million became effective Jan. 1, 1988.

Today's decision also reflects an ROE of 12.8 percent, compared with the 12.85 percent ROE now in effect.

"We're generally pleased that the BPU's decision, which represents about 68 percent of our updated filing, is a positive appraisal of the merits of our case and properly reflects the substantial growth that the company is experiencing," said NJNG President and Chief Executive Officer Philip H. Reardon. "Yet we're disappointed that the resolution of this case took so long and that we were not able to have new rates in effect for the winter heating season.

Reardon said that NJNG is committed to filing for periodic base rate increases to recover the incremental costs associated with rapid customer growth and general system expansion, provide a reasonable return to its investors, and maintain quality customer service.

He noted that NJNG's rates have generally tracked inflation over the last five years. During this period, the company has added more than 70,000 new customers and 180 employees, and spent $234 million for construction of new and renewal utility facilities, more than doubling its utility plant investment.

The impact of specific levels of customer usage will be determined once the BPU approves a new rate design.

NJNG serves more than 300,000 customers in virtually all of Monmouth and Ocean counties and parts of Morris and Middlesex counties.

SHAMOKIN, PA (MARCH 21) PR NEWSWIRE - A cash dividend of $.10 per share for the quarter ending March 31, 1990, was declared Tuesday by the board of directors of Central Pennsylvania Financial Corp. (NASDAQ: CPSA).

The cash dividend will be payable April 27, 1990, to shareholders of record of April 12. There are 1,976,168 shares of stock issued and outstanding.

This will be the 24th consecutive quarterly cash dividend for the company since its principal subsidiary, Central Pennsylvania Savings Association, converted to stock ownership from a mutual association on March 30, 1984.

Central Pennsylvania Savings Association was originally chartered in 1873 and is the 19th largest savings institution in Pennsylvania. A Forbes Magazine-rated Top 200 Best Small Companies in America, the company has 15 banking offices.

The association conducts its business through offices in Shamokin, Mt. Carmel, Williamsport, Lewisburg, Danville, Shamokin Dam, Sunbury, Hershey and Camp Hill-Mechanicsburg. Through its Hamilton-Reliance Division, business is conducted at offices in Norristown, Wayne, Warminster, West Point, and two offices in Philadelphia.

NEW YORK (MARCH 21) PR NEWSWIRE - The High Yield Income Fund, Inc. (NYSE:

HYI) today issued the following March monthly update:

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$.095	April 12, 1990	March 27, 1990	March 15, 1990

Investment Adviser Commentary:

-- The high yield market is beginning to show some positive signs, as there has been a slight increase in trading over the past four weeks. Also the high yield market has experienced some firming in prices of certain issues as well as some buying interest from collateralized bond obligations and insurance companies.

-- The fund's investment adviser took advantage of market firmness to sell pieces of two weaker holdings, Ampex Group and Westwood Group.

-- In mid-March, the fund's investment adviser bought $1 million more of Viacom, a diversified communications company, at a 14.4 percent yield to maturity with what they feel is good potential for capital gains.

The High Yield Income Fund, Inc. is a closed-end management investment company whose primary investment objective is to maximize current income to shareholders. The fund will attempt to achieve this objective primarily through investment in a diversified portfolio of high-yield, fixed-income securities.

The fund's manager is Prudential Mutual Fund Management, Inc., and investment advisory services are provided by the Prudential Investment Corporation, a wholly owned subsidiary of the Prudential Insurance Company of America. Additional information on the fund's assets and performance is contained in the semi-annual report for the period ended Aug. 31, 1989. For further information on the fund, call 212-214-3334.

BINGHAMTON, NY (MARCH 21) PR NEWSWIRE - New York State Electric & Gas Corporation (NYSEG) (NYSE: NGE) will initiate a reorganization next month to meet the challenges of the next decade, said James A. Carrigg, chairman and chief executive officer.

This action, he said, is one result of an overall strategic assessment of the company undertaken by management during the past year.

The company will replace its current structure with the following five

business units:

-- Electric operations
-- Natural gas operations
-- Strategic growth
-- Management services
-- Strategic management group

"Many forces are buffeting the utility industry today. Customers are demanding higher levels of service; deregulation and competition are becoming factors to reckon with, and our investors require reasonable, predictable returns. These developments represent a challenge to all electric and gas utilities, and NYSEG's experience mirrors that of the industry as a whole," said Carrigg.

"In this reorganization, our aims are to meet this challenge and to expand our business substantially by the year 2000. We will separate our electric and natural gas operations in order to achieve growth in both areas. We will also consider new, unregulated businesses in areas of pressing importance to the public such as non-utility generation and environmental services, provided we gain the approval of the Public Service Commission," said Carrigg.

"Internally, we intend to put a stronger focus on the distinct requirements of each of our different business units, decentralize decision-making and performance accountability, and achieve both broader spans of control and fewer levels of management. We want to encourage initiative and be receptive to new ideas and methods, and this will mean changes in our business practices and corporate culture," said Carrigg.

The reorganization will be completed by Jan. 1, 1991, and coordinated with the planned retirements by then of Allen E. Kintigh, president and chief operating officer, Richard A. Jacobson, executive vice president and chief financial officer, and Raymond A. Perine, vice president-gas operations.

MILPITAS, CA (MARCH 21) PR NEWSWIRE - Komag Inc. (NASDAQ: KMAG), the leading independent supplier of sputtered thin-film metallic disks for data storage applications, and Kobe Steel Ltd., Tokyo, today jointly announced the purchase by Kobe Steel USA Holdings Inc., a wholly-owned subsidiary of Kobe Steel Ltd., of 1 million newly issued shares of Komag Common Stock for $20 million. The parties previously announced an agreement in principle on this transaction in December 1989, and the signing of a definitive agreement in February 1990. After giving effect to this purchase, Kobe Steel now owns approximately 10 percent of the outstanding shares of Komag.

The transaction is similar to the investment in Komag made by Asahi Glass Co. Ltd. in January 1989. Kobe has agreed, as Asahi has agreed pursuant to its prior investment, to limit its purchase of additional shares on the open market to 20 percent of Komag's outstanding stock, and to vote its shares as directed by Komag's management. Both Asahi and Kobe are also entitled to consideration as future joint venture partners of Komag. In addition, in accordance with the terms of this agreement, Shigeru Oda of Kobe was appointed to the board of directors of Komag. As a result of today's transaction, Kobe is Komag's second largest stockholder while Asahi remains the largest.

"Kobe's investment in Komag represents a further deepening of Komag's strategic alliance with Kobe," reported Stephen C. Johnson, Komag's president and chief executive officer. Kobe initially invested in Komag's second and third rounds of equity financing in December 1984, and December 1985, respectively. In March 1989, Kobe and Komag established a joint venture, Komag Material Technology Inc., in Santa Rosa, Calif., to develop and produce finished substrates which are in turn used by Komag to manufacture its sputtered thin-film disks.

Komag Inc. develops, manufactures and markets sputtered thin-film metallic disks for use in high-capacity, high-performance Winchester disk drives. Komag is the largest independent supplier of these disks to independent disk drive manufacturers and computer system manufacturers which build their own disk drives. Komag applies a recording layer only microinches thin onto a substrate using a sputtered or vacuum deposition technique

similar to the process used in the semiconductor industry to coat wafers with thin metallic films. Founded in 1983, the company maintains 360,000 square feet of manufacturing and administrative space in California. The company also manufactures and sells products through a joint venture, Asahi Komag Co. Ltd., which is among the top three media producers in Japan. Komag employs nearly 1,500 people. The company is traded on the NASDAQ over-the-counter market under the symbol KMAG.

NEW YORK (MARCH 21) PR NEWSWIRE - The following was issued today by Pfizer Inc. (NYSE: PFE):

The lawsuit announced today by the Public Citizen Health Research Group (HRG) is completely without merit. Pfizer understands that the suit seeks orders requiring notification of all recipients of Shiley C/C heart valves, as well as reimbursement for medical consultations. Such orders, in Pfizers's view, would be unprecedented, unnecessary, contrary to the views of independent medical experts and the FDA, and detrimental to patient welfare.

All physicians who have implemented the Bjork-Shiley heart valve have been notified repeatedly of the very small fracture risk, and have been advised to educate and monitor their patients. We believe that this is the proper and most effective way to communicate with patients about such a sensitive medical issue.

This approach was specifically endorsed by Food and Drug Administration testimony at a recent congressional hearing: "With respect to notifying C/C valve patients about the risk of a strut fracture, FDA has chosen to notify the physicians who use or implant these valves rather than communicating directly with patients. ... (T)he physician can weigh the potential benefits of warning the patient about a fracture against the negative effects to the patient of the warning."

Bjork-Shiley heart valves have saved the lives of tens of thousands of patients. All but a small fraction of 1 percent of these valves continue to function properly. Suits like the one brought by the Health Research Group frighten cardiac patients unnecessarily and ultimately do much more harm than good.

DALLAS (MARCH 21) PR NEWSWIRE - LTV Missiles and Electronics Group announced today its Missiles Division has been awarded additional contracts totaling $92.1 million for its Multiple Launch Rocket System (MLRS).

The contracts, one for $68.5 million and another for $23.6 million, were awarded by the U.S. Army Missile Command. The orders include MLRS weapons platforms, rockets and training equipment.

The $68.5 million contract modification is an increase to a $942 million five-year contract awarded to LTV by the Army in late 1989.

"During a time when declining budgets are the norm, the MLRS program continues to receive strong support from the Army," said LTV's Jay Musselman, senior vice president-fire support and deep attack programs. "The system's accuracy and versatility make it an effective and affordable weapon."

The new contract calls for an additional 27 MLRS weapons platforms, 16,788 MLRS rockets and training equipment. The increase was approved by Congress during consideration of the fiscal year 1990 budget request.

In addition, the Army awarded a $23.6 million contract to LTV for foreign military sales to the countries of Turkey and Bahrain.

Turkey will receive six MLRS weapons platforms, 2,268 MLRS rockets and training equipment while Bahrain will receive seven launchers, 1,362 MLRS rockets and training equipment.

MLRS is a highly mobile automatic weapons platform that permits its crew of three, with a minimum amount of training, to accurately fire either a complete 12-rocket load or two Army Tactical Missile System missiles.

Approximately 80 percent of the work will be completed at LTV's MLRS production facility in Camden, Ark., while the remainder will be performed at the company's Grand Prairie, Texas, plant.

The Missiles Division manufactures missiles, rockets and space systems and is involved in a wide variety of advanced technology research and applications. It is one of three divisions of LTV Missiles and Electronics Group which also produces electronics, avionics and military vehicles.

#90080p0200 03/21/1990 ~PR Newswire
JACKSONVILLE, FL (MARCH 21) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) today announced that Barnett Bank of Palm Beach County will acquire all the deposits, certain other liabilities and some of the assets of First American Bank and Trust, N.A., in North Palm Beach.

First American has been operated as a "bridge bank" since action in December by the Comptroller of Florida and the Federal Deposit Insurance Corporation (FDIC) following the failure of its predecessor corporation. Since then, the FDIC has sought an acquiror.

With deposits of $840 million and 33 offices in four counties, the bank will strengthen Barnett's presence in Palm Beach, Broward, Dade and Leon counties. Barnett has 37 offices and assets of $2.1 billion in Palm Beach; $2.3 billion and 40 offices in Broward; $3.8 billion and 39 offices in Dade; and $456 million and 6 offices in Leon.

"We want to assure customers that we look forward to delivering the same level of service that Barnett's millions of customers in Florida and Georgia have come to expect," said Charles E. Rice, Barnett's chairman and chief executive officer.

Mike Strickland, president and CEO of Barnett Bank of Palm Beach County, said: "This is an excellent strategic fit in our market and an excellent opportunity to serve additional customers from our already proven network."

The acquisition is expected to close within 30 days, after completion of final documentation and other regulatory approvals. In the transaction, Barnett will purchase approximately $120 million of the bank's consumer and other small loans. In addition, Barnett will acquire approximately $280 million of other loans and assets subject to review by Barnett and with an option to putback to the FDIC within 90 days of closing. To facilitate the transaction, the FDIC will advance approximately $400 million to Barnett. Barnett's purchase premium is $41.6 million.

Barnett has assets of more than $29 billion and 563 offices in Florida and Georgia. Its stock (BBI) is listed on the New York Stock Exchange.

#90080p0203 03/21/1990 ~PR Newswire
WASHINGTON (MARCH 21) PR NEWSWIRE - James Madison Limited (AMEX: JML;

NASDAQ-NMS: JMLC), a $930 million bank holding company, today announced revisions to previously announced 1989 net income, reflecting an increased provision for loan losses.

The company set aside an additional $1.8 million in the allowance for loan losses at its lead banking subsidiary, Madison National Bank, in recognition of uncertainty with respect to the performance of the commercial real estate sector in the metropolitan Washington area. In addition, the company set aside an additional $750,000 in the allowance for loan losses at its leading subsidiary, James Madison Financial Corporation, reflecting changes in the performance of certain real estate-based credits.

These additional provisions produced an adjusted net income for 1989 of $1.5 million, or 15 cents per share, vs. the $3 million, or 30 cents per share, previously reported, and $1.2 million, or 12 cents per share, earned in 1988. Revised fourth quarter 1989 net income was a loss of $930,000, or 9 cents per share, vs. previously announced net income of $600,000, or 6 cents per share, and a net loss of $240,000, or 2 cents per share, recorded in the fourth quarter of 1988.

JML Chairman and Chief Executive Officer K. Donald Menefee, stated: "Although we are disappointed in the need for setting aside additional reserves, the fundamentals of the company remain basically unchanged. The additional reserves reflect a prudent posture in the wake of uncertainty and perceived increases in the risks associated with commercial real estate lending activities. Further, no additional charge-offs were recommended by the OCC, which fact is consistent with management's analysis." Menefee also stated, "The company continues to show many strong operating ratios and very strong primary capital of 8.87 percent."

JML announced on March 16 that the Office of the Comptroller of the Currency was completing its examination and that an additional provision was likely. The examination is now complete, and no additional provisions are expected.

James Madison Limited is a registered bank holding company located in Washington.

#90080p0214 03/21/1990 ~PR Newswire

NEW YORK (MARCH 21) PR NEWSWIRE - Sequa Corporation (NYSE: SQA.A, SQA.B) today announced it recorded higher revenues and operating income for the fourth quarter and year ended Dec. 31, 1989. Net income for both periods was lower than in 1988 due to a previously announced loss resulting from transactions to restructure the company's aerospace group.

Sales and revenues from continuing operations advanced to $1.9 billion in 1989 from $1.7 billion a year ago, and operating income rose to $194.6

million from $179.4 million in 1988. Results for all periods reflect the reconsolidation of the company's men's apparel division, which had previously been classified as a discontinued business.

After-tax income from continuing operations amounted to $60.5 million, or $5.55 per primary share, down from $72.7 million, or $6.42 per primary share, in 1988. Net income, which includes the results of discontinued operations, totaled $55.9 million, or $5.10 per primary share, compared with $68.6 million, or $6.04 per primary share, a year ago.

The reduction in 1989 earnings reflects inclusion of a $15.1 million pre-tax loss on transactions concluded in the final quarter of 1989 to restructure Sequa's aerospace group. In these moves, Sequa sold a majority interest in its Atlantic Research Corporation (ARC) subsidiary to another of the company's aerospace units, Chromalloy Gas Turbine Corporation. Sequa also sold a 7 percent equity interest in ARC to a major financial institution. As a result of these transactions, earnings for the fourth-quarter and full-year 1989 were lowered by $1.08 per primary share.

For the fourth quarter of 1989, sales and revenues from continuing operations advanced to $554.2 million from $459 million in the year-ago period. Operating income of $52.2 million in the 1989 quarter compares with operating income of $41.8 million a year ago. For the fourth quarter of 1989, after-tax income from continuing operations, which includes the loss on the restructuring transactions, totaled $6.7 million, or 62 cents per primary share, compared with $15.9 million, $1.40 per primary share, in the final quarter of 1988. Net income, which was unfavorably affected in both periods by the results of discontinued operations, totaled $2.2 million, or 18 cents per primary share, in the 1989 quarter, compared with $13.6 million, or $1.19 per primary share, in the fourth quarter of 1988.

Sequa Corporation is a diversified Fortune 500 corporation with principal interests in aerospace, machinery and metal coatings, marine transportation, specialty chemicals, professional services and financial services.

IRVINE, CA (MARCH 21) PR NEWSWIRE - Fluor Daniel Inc. announced today

that it has been awarded a contract by Alcan Rolled Products Company, a subsidiary of Montreal-based Alcan Aluminum Ltd. The project is valued at approximately $120 million.

Fluor Daniel's Industrial Sector will provide engineering, procurement and construction management services for a major modernization program at Alcan's Oswego, N.Y., sheet-rolling facility. The scope of work includes upgrades of the plant's aluminum ingot casting and heating operations, and modernization of the hot rolling mill.

Engineering is under way in Fluor Daniel's Greenville, S.C., offices with project completion scheduled for late 1991. The work is being performed under a previously established engineeering partnership agreement whereby Fluor Daniel provides a broad range of project engineering and construction management services to Alcan Rolled Products.

Alcan Rolled Products Company produces aluminum sheet, plate, and foil products, for customers primarily in the containers and packaging, transportation, heat exchanger, building and construction, and industrial distribution markets.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

SEATTLE (MARCH 21) PR NEWSWIRE - W.L. Gore & Associates, the Newark, Del.-based maker of the widely used Gore-Tex fabrics, has filed a suit in U.S. District Court here alleging that the patent for its synthetic bagpipe bags has been infringed upon by an Australian manufacturer and a Seattle retailer.

Gore is seeking to have the court enjoin the defendants from further acts of infringement. Gore also is seeking unspecified punitive damages.

The U.S. Patent Office granted a patent for the Gore bagpipe bag last June. Selling for about $120, the synthetic bags will last years longer than traditional bags made of sheepskin, elk hide or cowhide, the company says. It will not become dry, cracked or rotten, as traditional hides do, requires almost no maintenance, and is airtight so it requires less puffing to remain inflated. For the purposes of hygiene, the synthetic bags can be laundered, Gore executives say.

David H. Pfeffer, of the Manhattan law firm of Morgan & Finnegan and Gore patent counsel, said, "The activities of the defendants are in clear violation of the Gore bagpipe bag patent. We seek an immediate end of their actions."

Named in the suit is the Australian manufacturer Ross Bagpipe Reeds PTY LTD. and the Seattle retailer the Scottish Shopper Corporation.

The Gore bags were introduced in Scotland 18 months ago and are now being sold in the United States, Canada and Australia.

#90080p0235 03/21/1990 ~PR Newswire

VINELAND, NJ (MARCH 21) PR NEWSWIRE - IGI, Inc. (AMEX: IG) today reported 1989 revenues of $18.3 million, up 14 percent from $16.0 million in 1988.

After-tax earnings were $40,199, or 1 cent a share, versus $221,269, or 3 cents a share, in 1988.

The company said that the entire decrease in earnings was expected and attributed to a planned continued major research and development program. These expenditures were mainly for IGI's majority-owned subsidiary, Micro Vesicular Systems, Inc. (MVS), which has pioneered the creation of two new technologies, Novasome(TM), a lipid vesicle (liposome) microencapsulation technology, and Ultrasponge(TM), a biodegradable superabsorbent.

IGI said its core business turned in record revenue performances for the year. Sales at Vineland Laboratories (poultry vaccine) were up 18 percent for the year, and its two pet care products divisions, Tomlyn Products and Evsco Pharmaceuticals, posted gains of 11 percent and 9 percent, respectively. International division sales were up 27 percent for the year.

Gross profit increased from $8,434,303 in 1988 to $9,592,998 in 1989. Operating profit fell from $919,359 to $709,608 or from 5.74 percent to 3.88 percent as a percentage of sales.

The company emphasized that MVS itself does not intend to produce diapers, but expects to deal with industry partners who already have such capability. This patent allowance is a natural outgrowth and extension of the company's work on the Ultrasponge technology -- an efficient, completely biodegradable superabsorber.

IGI is a diversified biotechnology company. Its majority-owned subsidiary

Micro Vesicular Systems, Inc. has created novel technologies for lipid vesicle microencapsulation (often called "liposomes") and biodegradable superabsorbents. These are being developed for a variety of commercial applications.

IGI's Vineland Laboratories, EVSCO Pharmaceuticals and Tomlyn Products divisions produce and sell poultry vaccines, small animal pharmaceuticals and pet care products worldwide.

Novasome and Ultrasponge are trademarks of a majority-owned subsidiary of IGI, Inc.

#90080p0242 03/21/1990 ~PR Newswire

BOSTON (MARCH 21) PR NEWSWIRE - MGI Properties (NYSE: MGI) ("MGI"), an equity real estate investment trust, today reported 1990 first quarter results. Earnings before depreciation for the quarter ended Feb. 28, 1990 were $2,805,000, or 30 cents per share, compared to $3,071,000, or 34 cents per share, earned on the shares outstanding in the comparable 1989 quarter. After provision for depreciation and amortization expense of $1,288,000 in 1990 and $930,000 in 1989, net income was $1,517,000, or 16 cents per share, vs. $2,141,000, or 24 cents per share, reported in the 1989 first quarter.

In reviewing operating results, W. Pearce Coues, chairman of the board of trustees, stated that earnings for the first quarter were comparable to the 30 cents recorded in the immediately prior quarter and noted that the 30 cents first quarter earnings were achieved absent any income in the first quarter were acheived absent any income in the first quarter on the $5 million equity participating loan on Yorkshire Plaza, which is 90 percent occupied and located in suburban Chicago.

The Trust has entered into discussions with the owners concerning this situation. Coues also stated that it is the Trust's belief that the current situation reflects recent overbuilding, and that the center remains an attractive long-term investment.

In commenting on the general portfolio, Coues observed that solid leasing performance was achieved during the first quarter. The Trust executed 341,000 square feet of leases, of which 241,000 square feet represent renewal or extensions of existing leases. The benefit of this leasing progress should begin to be reflected during the second quarter.

The trustees declared a quarterly dividend of 28 cents per share, payable

April 11, 1990 to shareholders of record April 4, 1990.

#90080p0246 03/21/1990 ~PR Newswire

CLEARWATER, FL (MARCH 21) PR NEWSWIRE - Tech Data Corporation (NASDAQ: TECD) today announced that an inventory adjustment of "as much as $4 million" and a $1 million charge caused by a customer's bankruptcy will result in the Company reporting a loss for the fourth quarter and a sharp decline in earnings for the year ended Jan. 31, 1990. The loss for the quarter is estimated to be approximately $2 million or $.30 per share and net income for the year is estimated to be approximately $3 million or $.50 per share.

President Steven A. Raymund said the need for the inventory adjustment was discovered while the Company was closing out its books for the fiscal year and was apparently caused by inventory controls not keeping pace with the Company's rapid growth. However, Mr. Raymund noted that the inventory problem has not impaired the Company's ability to deliver products to its customers on a timely basis.

Mr. Raymund stated that an investigation directed by A. Timothy Godwin, the Company's chief financial officer, has resulted in immediate corrective action including implementation of additional controls and security procedures at the Company's distribution facilities.

The Company will release its final results for the fourth quarter and fiscal year ended Jan. 31, 1990, as soon as the Company's internal investigation and annual audit are completed.

Tech Data distributes over 3,000 microcomputer-related software and hardware products through 11 distribution centers throughout the United States to an active customer base of over 18,000 value-added resellers and computer retailers. Its Canadian subsidiary, ParityPlus, Inc., serves customers in all 10 provinces.

GERMANTOWN, MD (MARCH 21) PR NEWSWIRE - RYMAC Mortgage Investment Corporation (AMEX: RM) announced today that its board of directors has authorized the repurchase of up to 500,000 of its common shares over the next 12 months.

The company intends to purchase shares from time to time in the open market.

Dean Witter Reynolds, Inc. will act as the company's exclusive agent for the repurchase program. As of Dec. 31, 1989, the company had approximately 5.4 million shares outstanding.

A company spokesman stated: "Under current market conditions, we believe that the company's stock is an attractive investment. We anticipate that the repurchase program will make it possible for the company to repurchase its common stock on favorable terms and, as a result, increase future distributions to its remaining stockholders."

RYMAC Mortgage Investment Corporation is a real estate investment trust that invests in mortgage derivative securities, primarily residuals of collateralized mortgage obligations. The company began operations in September of 1988 and has declared six consecutive quarterly dividends of 40 cents. The latest dividend, declared on March 7, 1990, will be paid on April 16, 1990, to shareholders of record on March 30, 1990.

NEW YORK, (MARCH 21) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) announced today the appointment of Claude Gallello to the position of executive vice president of Corroon & Black International (CBI), a division of Corroon & Black's Brokerage Services Group. Marnix L.K. Guillaume, president and chief executive officer of CBI, made the announcement.

Gallello's responsibilities will include development of global account business, both with U.S.-based multinationals and with foreign companies doing business in the United States. He will act as a resource to all offices of the Brokerage Services Group, as well as to CBI's network of affiliated correspondent brokers abroad.

Prior to joining Corroon & Black, Gallello was senior vice president of international marketing at AI Global. Before that, he held key underwriting, marketing, and profit center positions at American International Group.

Guillaume said of the appointment, "Claude is extremely well-versed in international risk management, and has extensive experience in designing global programs for both domestic and foreign multinationals. His exhaustive knowledge of the European and Far Eastern markets and his contacts around the world will add substantial value for CBI and all Brokerage Services Group operations."

Corroon & Black Corporation, headquartered in New York, is one of the

world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

HOUSTON (MARCH 21) PR NEWSWIRE - Union Texas Petroleum Corp., a subsidiary of Union Texas Petroleum Holdings Inc. (NYSE: UTH), today reported that it participated in apparent high bids on 19 central Gulf of Mexico blocks offered at the federal offshore lease sale in New Orleans today.

Overall, the company bid on a total of 25 blocks in the sale. The

independent oil and gas producer said that its portion of the 19 high bids was approximately $11.7 million. All high bids are subject to approval by the Department of the Interior. Union Texas will operate 13 of the tracts on which it was the high bidder.

During the past several years, Union Texas has significantly increased its exploration and production activities in the Gulf of Mexico. Prior to Wednesday's lease sale, the company held interests in 112 tracts and had approximately 268,700 developed and undeveloped acres. During 1989, the company's gas production from its Gulf properties averaged 167 million net cubic feet a day, up from 89 million net cubic feet a day in 1988. Union Texas currently operates 19 production platforms in the Gulf.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

PHOENIX (MARCH 21) PR NEWSWIRE - Warner-Lambert (NYSE: WLA) expects earnings per share for the first quarter ending March 31, 1990 to increase about 20 percent, vice president of investor and community affairs Richard W. Keelty told investors attending a meeting of the Phoenix Society of Financial Analysts.

"This excellent first quarter gives us confidence that Warner- Lambert is on target in 1990 to meet our previously stated goal of increasing earnings per share at least 15 to 16 percent for the year."

Keelty said the strong performance is a result of growth in each of Warner-Lambert's major businesses. He said the company's prescription pharmaceutical business has performed especially well in the first quarter. Sales gains were led by the anticonvulsant Dilantin, the cholesterol-regulator Lopid and the company's line of anti-infectives including Doryx and ERYC, for which demand increased due to the severity and length of the cold and flu season. Despite the negative effects of currency translation, Warner-Lambert's business outside the U.S. has grown faster than expected, added Keelty.

Keelty reaffirmed the company's intention to file a New Drug Application for Cognex (tacrine/THA) by mid-year. Cognex is in clinical trials in the U.S. The drug is being evaluated for effectiveness in alleviating symptoms of Alzheimer's disease.

Investors also learned that on March 20 Warner-Lambert dedicated a new polymer facility in Arlesheim, Switzerland, near Basel, which will serve as the European research and development center and the first operating pilot plant for the company's recently established Novon "bio- plastic starch" business. The facility contains state-of-the-art thermoprocessing capability as well as sophisticated equipment for polymer characterization and analysis, according to Keelty.

Earlier this year, the company announced that it had achieved a major advance in materials science by transforming conventional starch into a biodegradable material with many of the characteristics of plastics. The technology could eventually be used to produce substitutes for a wide range of materials in use today from annually renewable agricultural crops such as corn and potatoes. The company expects to be generating revenue from Novon within two to three years.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products. It employs some 33,000 people at its operations in more than 130 countries. In 1989, Warner-Lambert's earnings per share rose 22 percent to $6.10. Sales increased 7 percent to $4.2 billion.

ARLINGTON, VA (MARCH 21) PR NEWSWIRE - Systemhouse Inc. (NASDAQ: SHKIF) of Arlington today announced that it has been awarded a $4.5 million subcontract by Sysorex Information Systems Inc. of Falls Church, Va., as part of a $16 million systems integration and support project for the U.S. Mint.

The five-year Sysorex/Systemhouse contract calls for the provision of hardware and software, as well as installation, training, maintenance and capacity planning services.

Systemhouse will provide integration services primarily in the PC/LAN operations area including support for the U.S. Mint's Distributed Information System Network while Sysorex will deliver services principally to the Mint's two main data centers in San Francisco and Washington.

Andrew Bart, vice president of Systemhouse's Federal Systems division said "Both companies had worked separately on Mint projects for several years. Our successful delivery of a variety of services led us to a decision that, on this latest project, a joint Systemhouse/Sysorex bid would offer the customer the best possible solution."

Systemhouse is one of the largest systems integrators in North America with 3,100 employees in the United States, Canada and Europe.

HOUSTON (MARCH 21) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) and its joint ventures submitted high bids on eight of nine tracts bid upon at today's federal oil and gas lease sale covering the central Gulf of Mexico area.

Pogo's interests in the eight bids range from 33-1/3 percent to 75 percent and its share of the high bids totals $3,863,625. These tracts and Pogo's interest in each bid are:

West Cameron Block 97	50 percent
West Cameron Block 385	50 percent
East Cameron Block 201	50 percent
Eugene Island Block 344	50 percent
Ship Shoal Block 256	33 percent
West Delta Block 59	50 percent
Main Pass Block 61	50 percent
Main Pass Block 123	75 percent

William C. Liedtke Jr., chairman of the Houston-based oil and gas exploration/development company, commented that Pogo's interests in these new blocks will be operated under Pogo Gulf Coast Ltd., the limited partnership recently established by Pogo to further accelerate exploratory activity as the company commences its third decade of offshore exploration and production.

"Today's lease sale results, along with the 11 blocks acquired in the two 1989 OCS lease sales, provide Pogo with an excellent opportunity to continue to build on its proven oil and gas reserves base in the offshore " Liedtke said.

Prior to today's sale, Pogo held interests in 112 offshore oil and gas lease blocks in the Gulf of Mexico.

#90080p0299 03/21/1990 ~PR Newswire

ROCHESTER, NY (MARCH 21) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) today announced an agreement to sell its Verbatim Corporation subsidiary in Charlotte, N.C., to Mitsubishi Kasei Corporation, subject to regulatory approvals.

Under the agreement, Mitsubishi will acquire all Verbatim stock and will obtain Verbatim's floppy disk and digital cassette tape businesses.

Not part of the deal are businesses Kodak and Verbatim co-developed, including Verbatim's small-format optical disk program and its other tape businesses. These operations will remain in Kodak's Mass Memory Division.

Mitsubishi and Verbatim have had a close relationship since 1982, when they formed a floppy disk joint venture in Japan.

Kodak decided to sell Verbatim's floppy disk and digital cassette tape businesses "to concentrate on media products that are more consistent with Kodak's electronic imaging strategy," said Richard T. Bourns, chief executive officer of Verbatim and senior vice-president of Kodak.

"The strategy is to build and market image-intensive systems that will galvanize Kodak's leadership in the electronic imaging arena," Lawrence J. Matteson and Frank P. Strong, the group vice-presidents repsponsible for Kodak's information segment, said in a joint statement. "These systems for business and government customers will take advantage of Kodak's strengths in imaging and color reproduction. They will require the kinds of massive storage capacity that can be achieved only with ultra high-capacity media, such as our System 6800 14-inch optical disk that holds more data than a stack of papers the height of the World Trade Center building."

In the floppy disk business, which focuses more on the personal- computer market, Verbatim has competed aggressively.

A recent study by the Santa Clara Consulting Group, an independent floppy-disk-industry analyst, cited Verbatim's innovation, its increase in original-equipment-manufacturer sales, and its growth in microdisks as strong indicators of the company's potential for the future.

Verbatim, he added, will report to Mitsubishi's Information Storage Products Division, and Verbatim's headquarters will remain in Charlotte. Mitsubishi also plans to retain current Verbatim management.

Founded in 1969, Verbatim was acquired by Kodak in 1985.

CHICAGO (MARCH 21) PR NEWSWIRE - Ford Motor Company (NYSE: F) is making significant progress in vehicle interior noise reduction by utilizing permanent magnet electric motors that are 20-percent quieter than conventional designs.

The new state-of-the-art computer-designed motors are equipped with a permanent magnet rather than a traditional wire-wound field coil. An average Ford vehicle has 13 electric motors to operate power-assisted features like brakes, steering and windows and a luxury car might have as many as 70 motors.

"This is a perfect example of how new technology can contribute to customer satisfaction," Robert Erickson, product design engineer, Electrical and Fuel Handling Division, told the Permanent Magnets Users Conference here. "The customer doesn't understand or care about the design of electric motors, but she certainly understands and appreciates our making the buzz and whirr disappear."

Automobile dealers agree with that assessment. John Evans, general manager of Stu Evans Lincoln-Mercury in Garden City, Mich., said that his customers "expect a quiet ride in pleasant surroundings and they don't want to hear an electric motor singing along with the compact disc player."

TEL AVIV, ISRAEL (MARCH 21) PR NEWSWIRE - Healthcare Technologies (NASDAQ: HCTUF,HCTEF,HCTWF) today reported results of operations for the year ended Dec. 31, 1989.

Total revenues rose by 63 percent and amounted to NIS 2,617,801 ($1,333,572), compared with NIS 1,603,435 ($816,829) last year. Net loss decreased in 1989, and amounted to NIS 872,201 ($444,320), compared with NIS 1,040,878 ($530,249) in 1988. Loss per share in 1989 was NIS 0.24 ($0.12), compared with NIS 0.46 ($0.24) in the previous year.

The company reported that its working capital on Dec. 31, 1989 was NIS 748,548 ($381,329), compared with a deficit in working capital last year of NIS 1,586,699 ($799,133). Shareholders' equity rose to NIS 3,329,486 ($1,696,121), compared with NIS 284,556 ($144,960) on Dec. 31, 1988.

The significant increases in working capital and shareholders' equity reflect the results of the company's initial public offering in the United States, completed in March 1989, in which net proceeds of approximately $1,950,000 were raised.

Savyon Diagnostics Ltd. (97 percent subsidiary) reported a net profit for 1989 of NIS 211,250 ($107,616), compared with a loss of NIS 592,732 ($301,952) a year ago. This increase in profit is due mainly to continued development of marketing and sales in 1989, compared with the previous year.

Savyon is engaged in the development, manufacture and marketing of medical kits for diagnosing certain sexually transmitted diseases. In 1989, the firm completed a successful initial year of sales to Japan, notably of its medical kit for diagnosing chlamydia, a widespread sexually transmitted disease that causes infertility in women. It also commenced sales of this kit to Spain and France this year.

In October 1989, I.C.N. Biomedicals Inc. obtained FDA marketing approval for Savyon's IPazyme Chlamydia IgC/IgA test kits to be distributed in the United States. In January 1990, Savyon signed a five-year private label distribution agreement with I.C.N. worth a total of $3 million, as previously announced.

The company increased its ownership of Savyon in August 1989, from 52 percent to 97 percent. Management believes that Savyon's ongoing marketing efforts to increase sales will result in improvements in its performance in 1990.

Galisar Ltd., the company's 50 percent subsidiary, is engaged in the research and development of a hemoperfusion system to cleanse whole blood.

The firm is continuing its development program in cooperation with Soroka Hospital in Beer Sheva.

Healthcare and its subsidiaries maintain their accounts and present their financial statement in NIS adjusted to reflect changes in the Israeli Consumer Price Index, and all the figures stated herein are adjusted NIS. All dollar figures are convenience translations using the exchange rate as of Dec. 31, 1989 of NIS 1.963 to US$ 1.00.

ARMSTRONG, IA (MARCH 21) PR NEWSWIRE - James L. Koley, chairman of Art's-Way Manufacturing Co. Inc. (NASDAQ: ARTW) today announced that Dr. Ronald W. Roskens has been appointed by President George Bush to serve as administrator of the Agency for International Development and had, accordingly, resigned from the Art's-Way board of directors.

"Dr. Roskens, who was formerly president of the University of Nebraska, has been a director of our company since 1981," Koley said. "His advice and counsel have been invaluable and, while we are delighted that his expertise and capabilities are recognized by our government, we very much regret to lose him as a member of the Art's-Way board."

A successor has not been elected to fill the post vacated by Dr. Roskens, Koley said.

Art's-Way Manufacturing Co. Inc. designs, manufactures, markets and services custom fabricated metal products for the agricultural, lawn and garden, and materials handling equipment markets.

WILMINGTON, DE (MARCH 21) PR NEWSWIRE - Grace Specialty Chemicals Co., a unit of W.R. Grace & Co., and ICI have entered into an arrangement whereby Grace has acquired a portion of ICI Advanced Materials' technology and marketing activities in the area of vermiculite dispersions.

As part of the arrangement, Grace will supply ICI Advanced Materials with vermiculite slurry under a long-term supply contract. In turn, ICI will employ the mineral slurry supplied by Grace in a broad range of value-added fire-barrier products, including those used in aerospace and marine applications. The announcement was made jointly by ICI Advanced Materials' Manager, Commercial Development James P. Smigie and Grace Specialty Vermiculite General Manager Gregory E. Poling. The acquisition price was not disclosed.

According to Smigie, the agreement benefits both parties. "ICI and Grace are entering a business relationship whereby each company will focus on what it does best," explained Smigie. "Grace will formulate and improve the mineral slurry, and ICI Advanced Materials will manufacture value-added fire-barrier products using the slurry."

Smigie added that "ICI is currently evaluating these products in several

proprietary consumer applications and in lightweight fire resistant thermoplastic panels for aircraft and other vehicles." Smigie also indicated that research into other applications continues as planned at both the Wilton Materials Research Centre in the United Kingdom and the Composite Materials Research Facility in Tempe, Ariz.

Poling pointed out that, "The alliance strengthens Grace's vermiculite dispersion product offering and positions us for continued growth in several key market areas." The vermiculite dispersion formulations obtained from ICI will be marketed by Grace under the MicroLite brand name.

ICI owns 25 patents based on the use of vermiculite, and vermiculite dispersions as barriers in a number of applications such as in the prevention of fire burn-through. Under the agreement, Grace acquires certain marketing information and formulation processes and gains freedom to operate under a number of ICI patents.

ICI Advanced Materials is a business unit of ICI Americas Inc. Grace's vermiculite dispersions are manufactured by the company's Specialty Vermiculites unit, based in Cambridge, Mass. For more information, contact Vic Burriss, ICI Advanced Materials, Concord Pike and New Murphy Road, Wilmington, Del. 19897, phone: 302-886-3290; or Barbara Planinsek, Specialty Vermiculite Unit, W.R. NASHVILLE, TN (MARCH 21) PR NEWSWIRE - The formation of a "preferred vendor relationship" between HCA Management Company (HMC) and Mobile Technology Inc. (MTI) was announced today by S. Douglas Smith, CEO and President of HCA Management Company and Robert E. Reilly, Jr., Executive Vice President and Chief Operating Officer of MTI. Under this agreement MTI will offer diagnostic imaging and treatment services to hospitals managed by or affiliated with HCA Management Company.

"This agreement is an important step for us," said Smith. "We have considered expanding the services we offer hospitals through preferred vendor relationships for some time. This agreement was developed with the sole intent of providing cost savings and revenue enhancement opportunities for our client hospitals.

The specific services to be offered through the agreement initially include mobile magnetic resonance imaging (MRI), mobile lithotripsy, and mobile computed tomography (CT).

"While this agreement is between HCA Management Company and MTI, the real benefit is to the hospitals who can now have access to our state-of-the-art technology when they need it, through their relationship with HMC," said Reilly. "We look forward to this opportunity to serve."

HCA Management Company, formerly a subsidiary of Hospital Corporation of America, is headquartered in Nashville, Tennessee and is the nation's largest hospital management and consulting firm. HMC manages or has consulting relationships with more than 225 hospitals nationwide and in Canada.

Mobile Technology Inc. of Los Angeles, California, is the nation's largest provider of mobile diagnostic imaging and treatment services. MTI currently operates a fleet of 68 MRIs, 37 CTs, two lithotripters, and four breast imaging units, serving 375 clients in 33 states.

ROCKY MOUNT, NC (MARCH 21) PR NEWSWIRE - Pioneer Bancorp, Inc. (NASDAQ: PSBN), headquartered in Rocky Mount, North Carolina, announces the results of its annual stockholders meeting held March 21, 1990.

At the meeting, Joel T. Cheatham, Jr., C. Malcolm Copeland, and J.M. Council, Jr. were reelected to three year terms as directors and John H. Daniel was reelected to a two year term. Lucius S. Jones of Wendell, was elected to a three year term.

The stockholders also authorized the repurchase of up to 150,000 shares of the Corporation's common stock, which represents approximately 8.6 percent

of the total shares outstanding, from time to time during the period from March 22, 1990 through March 21, 1991. Implementation of a stock repurchase program will be dependent upon a number of factors, including market conditions, the financial condition of Pioneer and funds available. There is no guarantee as to the exact number of shares, if any, which will actually be repurchased.

Pioneer Bancorp, Inc. is a unitary thrift holding company. Its current activities include only the ownership of its wholly owned subsidiary, Pioneer Savings Bank, Inc., which became a subsidiary through a corporate reorganization completed December 28, 1988.

As previously reported, net income of the Corporation for the fiscal year ending September 30, 1989 was $382,614, or $.21 per share, compared to $2,700,285, or $1.49 per share earned during the previous fiscal year.

Chairman and chief executive officer Theo H. Pitt, Jr. and president and chief operating officer Ed G. Roughton reported on significant events of 1989 and their outlook for 1990. They emphasized the impact of non-performing assets and a relatively high level of general and administrative expenses. They further emphasized that during the coming year each function, department and division will be critically evaluated and adjustments made where appropriate.

Chairman Pitt announced that the board of directors has temporarily suspended payment of the cash dividend which was initiated in July, 1987. This decision was made based on a thorough evaluation of the new capital requirements included under FIRREA and a high priority placed on maintaining compliance during this transition period.

Pitt further announced the bank anticipates establishing additional reserves for losses on loans and real estate owned of approximately $1,400,000 during the quarter ending March 31, 1990. As a result, it is anticipated that this will result in a loss for the quarter and possibly for the first six months of the fiscal year. These additional reserves were established after completion of the Bank's recent regular supervisory examination and management's further evaluation of problem assets. Pitt further commented, "this action points out the general real estate weakness in North Carolina and the effect this weakness is having on real estate related loans at all financial institutions."

Pitt stated that the Bank is in compliance with the new capital regulations implemented by the Office of Thrift Supervision as required by FIRREA.

Pioneer Savings Bank, Inc. is currently the seventh largest thrift institution in North Carolina with assets in excess of $563 million and 25 banking offices in eastern North Carolina.

LAKE MARY, FL (MARCH 21) PR NEWSWIRE - Astronet Corporation today announced that they have signed a contract to supply the cellular mobile telephone system to Poka Lambro Telecommunications, Incorporated. The system will service parts of the West Texas RSA markets (Texas Rural Service Areas 4 and 8 West). Construction is scheduled for the second quarter of 1990 pending FCC approval. The system will serve an area east and south of Lubbock, Texas (MSA No. 161), Poka Lambro is general operating manager of the partnership that holds the B license, Astronet is the supplier and Southwestern Bell is the operating company for the cellular system in Lubbock, Amarillo, Midland-Odessa and Abilene, Texas.

The West Texas system will consist of an advanced billing technique which will allow easier and more accurate billing. This new system feature is known as an Astronet AMA Data Collection System (ADCS). ADCS allows the operator's billing company to routinely poll AMA data via modem for billing. ADCS eliminates inherent cost and delays associated with the use of magnetic tapes.

Mickey L. Sims, general manager of Poka Lambro and newly elected president of NTCA (National Telephone Cooperative Association) stated that a primary consideraton for choosing Astronet is the ease of implementing the IS41 (Inter-system Handoff) and the proven reliability, operation and maintainability of the Astronet cellular system. Poka Lambro originally helped build and maintain Southwestern Bell's Astronet installation at both Lubbock and Amarillo during 1987 and 1988.

Astronet Corporation provides turnkey cellular mobile systems and products and is jointly owned by Mitsubishi Electric/Mitsubishi Corporation of Japan and Stromberg-Carlson Corporation.

CANANDAIGUA, NY (MARCH 21) PR NEWSWIRE - Canandaigua Wine Company, Inc. (AMEX: CDG.A, CDG.B) announced today that its Manischewitz wine products are unrelated to price fixing charges brought against The B. Manischewitz Company concerning its matzoh products. The company wishes to clarify this as published reports have erroneously associated Manischewitz wine

products with The B. Manischewitz Company. Although the company licenses the trademark "Manischewitz" from The B. Manischewitz Company for wine and juice products, the two companies and their products are otherwise unrelated.

Canandaigua Wine Company, Inc. is the fourth largest wine producer in the United States. The company owns and operates seven wineries in New York, California and South Carolina. Its principal brands include "Wild Irish Rose", "Manischewitz", "Sun Country", "J. Roget", "Marcus James", "Widmer" "Italian Swiss Colony" and "Jacques Bonet".

LANDOVER, MD (MARCH 21) PR NEWSWIRE - Applied Research Corporation (PHLX: ARL) today released the following:

We have become aware of a number of rumors currently circulating regarding the possible acquisition of Applied Research Corporation (ARC) by another company. ARC management has had discussions and is currently talking with another company. However, these discussions have not produced an agreement and it would be premature to speculate on whether an agreement will ultimately be reached. The company conducts meetings from time to time with other companies regarding business arrangements that would not necessarily lead to any merger. These types of meetings do sometimes develop into joint working arrangements, several of which ARC is involved in currently. If any agreement regarding a merger or sale of the company happens, this information will be released immediately.

#90080p0337 03/21/1990 ~PR Newswire

TAMPA, FL (MARCH 21) PR NEWSWIRE - First Florida Banks, Inc. (NASDAQ: FFBK), announced today that it will make an additional provision for loan losses of $10 million in the first quarter ending March 31, 1990. Approximately half is due to the recently completed special examination of the real estate loan portfolio by the Office of Comptroller of the Currency and the remainder is due to economic and loan portfolio trends.

The additional provision is being made as a result of an increase of $11 million in non-performing assets. At March 31, 1990, the ratio of non-performing assets to loans and other real estate is estimated to be 1.58 percent. Non-performing assets are expected to reach $59 million at

the end of the first quarter as compared with $48.5 million at Dec. 31, 1989. First Florida's total of loans outstanding as of March 31, 1990, will be approximately $3.74 billion. The reserve for possible loan losses will total $55 million at March 31, 1990, and will provide a coverage ratio of reserve for possible loan losses to non-performing loans of 104 percent and a ratio of 93 percent on non-performing assets.

Net loan losses are anticipated to be $6.4 million in the first quarter 1990. After giving effect to the additional provision and net loan losses, the ratio of the reserve for possible loan losses to total loans outstanding will be 1.47 percent at March 31, 1990.

First Florida Chairman, A. Bronson Thayer said the decision to increase the provision for possible loan losses is not a result of any particular loans, but reflects a prudent approach to changing conditions in the economy, affecting real estate, commercial and consumer markets. Additionally, Thayer stated that First Florida's internal auditors completed a thorough review of its commercial and consumer loan portfolios concurrent with the special real estate examination by the Comptroller of the Currency.

The expected earnings for the first quarter of 1990 will be in excess of $6.4 million or $.40 per share as compared to $12.9 million ($.81 per share) in the first quarter of 1989.

First Florida Banks, Inc., a Tampa-based company with $5.6 billion in assets, operates 150 banking offices along Florida's West Coast from Pensacola to Naples/Marco Island and across the Central Florida corridor to the Atlantic Coast.

First Florida Banks' common stock is traded in the national over-the-counter market under NASDAQ symbol FFBK.

NEW YORK, (MARCH 21) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) said today it will more than double the size of its Coty Division plant in Sanford, N.C. The expansion, which includes new manufacturing capacity, offices, distribution and warehouse facilities, is expected to be completed in March 1991.

"The Sanford plant is our only U.S. manufacturing and distribution facility for Coty's line of fragrances and cosmetics," said Joseph F. Harmon, president, Pfizer Consumer Products Group. "Expanded manufacturing and distribution capacity is needed to keep pace with the exceptional growth of our Coty business."

Products make by some 700 employees at Sanford include Exclamation, Coty's newest fragrance, and the established Stetson, Lady Stetson and Sand & Sable lines.

Plant Manager Robert Clarke said the Sanford plant was built in 1971 and the distribution center added in 1974. Marshall Contractors Inc. of Rumford, R.I., general contractor for the new construction, will be taking bids from local sub-contractors and others throughout North Carolina and surrounding states, Clarke added.

Sanford Grading Company, Inc. began site work March 8 and the contract for the pre-engineered metal building has been awarded to J.H. Hudson Construction Company of Greenville, N.C.

Pfizer Inc. is a diversified, research-based health care company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

PROVIDENCE, RI (MARCH 21) PR NEWSWIRE - GTECH Corporation (NASDAQ: GTCH), the leading supplier worldwide of on-line computerized lottery networks, today announced that it has signed a contract with the Hoosier Lottery in Indiana to provide an on-line network that will begin operations with 2,000 retailer sales terminals. The Hoosier Lottery has the option to

increase the number of terminals to as many as 5,000 over the term of the contract.

The contract is for a five year period, with four 1-year extension options. The value of the contract to GTECH was not reported.

On-line sales for the Hoosier Lottery are expected to begin on April 30, 1990, with two data centers operating in Indianapolis and Fort Wayne. GTECH expects to employ approximately 45 people in Indiana to operate the system in conjunction with the Hoosier Lottery.

In announcing the contract, Robert A. Breakstone, GTECH's executive vice president and chief operating officer, commented, "We are pleased to be working with the Hoosier Lottery in developing, implementing and operating their on-line network. This system will be one of the fastest installations in the lottery industry, and will also be one of the largest operating on-line systems in the state of Indiana."

GTECH Corporation designs, produces and implements computerized on-line networks, principally for government-sponsored or licensed lottery jurisdictions. Typically, GTECH operates, supplies and/or otherwise services these networks after installation. Currently, GTECH has been selected to serve 41 on-line lottery and wagering customers worldwide on five continents.

#90080p0352 03/21/1990 ~PR Newswire

NEW YORK (MARCH 21) PR NEWSWIRE - Ply Gem Industries, Inc. (AMEX: PGI) participated in the First Annual Construction Conference sponsored by building materials analyst Terence York, held today in Phoenix.

Herbert P. Dooskin, executive vice president of Ply Gem, outlined the company's growth strategy and its Teamwork 90's approach to the future. "We are extremely proud of our growth record and the attainment of a $500 million annual revenue base. Our goals for the 1990s will focus on profit enhancement and the acceleration of our cross-selling and cost reduction programs through our Teamwork 90's agenda," said Dooskin.

Ply Gem has acquired 13 companies since 1983, its most recent being SNE Enterprises, the nation's fourth largest window producer. As previously disclosed in the company's 10Q statements, SNE normally posts a first quarter loss, reflecting the highly seasonal nature of its window and door product lines. In his remarks, Dooskin reminded the investment audience that Ply Gem could post a loss for the first quarter of 1990.

"With the acquisition of SNE in late March 1989, our exterior building products lines has grown dramatically. Currently windows, doors and siding account for roughly 35 percent of Ply Gem sales and more than 60 percent of our operating profits. Add to this our specialty wood product lines, namely treated lumber for outdoor decks and building products, and it is quite apparent that seasonality is a definite factor in the home improvement industry. Consequently, our quarterly performance will reflect this, producing a possible first quarter (winter) loss and the bulk of our sales and earnings being reported during the second and third quarters (spring and summer). We expect our 1990 full year performance to show a favorable comparison over 1989 results," said Dooskin.

He also stated that Ply Gem currently has no immediate plans for further acquisitions during 1990 with managements attention being devoted to profit enhancement and internal development. Dooskin expanded on the exciting changes at Ply Gem and the evolution of its corporate management philosophy.

"While continuing to foster the unique entrepreneurial nature of our independent operating subsidiaries, we have expanded our corporate management team to provide a resource center for the Ply Gem companies to develop new products, improve manufacturing techniques and promote the advantages of cross-selling and joint purchasing programs. Recently we announced that David Cohen, former president of Somerville Lumber, joined our management team as vice president, sales and marketing, along with Edmund Linehan as director of merchandising. It has become clear that enormous opportunities exist to increase Ply Gem's share of the home center market by expanding our customer relationships to include the full array of quality Ply Gem products."

Ply Gem is a national manufacturer and distributor of specialty products for the home improvement industry.

COLUMBUS, OH (MARCH 21) PR NEWSWIRE - USAir and the City of Columbus jointly announced today that USAir will begin daily, roundtrip non-stop service between Columbus and Los Angeles, with continuing service to San Francisco starting June 15.

"We are pleased to see this new service to the West Coast, reflecting USAir's knowledge of the growing economic market here in Columbus," said Dana G. Rinehart, mayor of the City of Columbus. "This will be a welcome addition to our increasing flight options at Port Columbus Airport. We look forward to working with USAir in promoting this new service."

USAir will operate the flight with 128-passenger Boeing 737-300 aircraft, offering first class and coach class accommodations. The new flights will

depart Columbus daily at 5:20 p.m. and arrive in Los Angeles at 6:58 p.m., continuing on to San Francisco for a 9:09 p.m. arrival.

At Los Angeles, USAir operates 100 daily flight departures, giving Columbus travelers numerous opportunities to connect to other West Coast cities.

The new eastbound flight will depart San Francisco for Los Angeles at 7 a.m. and then depart Los Angeles at 9 a.m. for the non-stop trip to Columbus, arriving at 4:12 p.m.

Under its June 15 schedules, USAir will operate 21 daily jet departures from Port Columbus Airport.

#90080p0369 03/21/1990 ~PR Newswire

ROSEMEAD, CA (MARCH 21) PR NEWSWIRE - SCEcorp (NYSE: SCE) marked its second year of operation as a holding company with notable achievements and record earnings despite a changing, challenging business environment, according to the company's 1990 annual report now being mailed to nearly 300,000 shareholders, employees and brokerage houses. SCEcorp is the holding company of Southern California Edison.

In 1989, the shareholders of SCEcorp, Edison and San Diego Gas & Electric Company (SDG&E) approved the merger of SDG&E into Edison, SCEcorp's utility subsidiary, Howard P. Allen, chairman and chief executive officer, said. SCEcorp expects a decision on the proposed merger from the California Public Utilities Commission (CPUC) and the Federal Energy Regulatory Commission (FERC) in late 1990.

The annual report includes the following highlights: -- SCEcorp's earnings per share of common stock increased 2.0 percent to a record high of $3.56 in 1989.

-- The board of directors of SCEcorp raised the common stock annual dividend 3.2 percent to $2.56, the 14th increase in the past 13 years.

-- Net income rose to a record $778.2 million and revenue to a record $6.9 billion.

-- The utility recorded a net gain of 109,293 new customers, the third-largest annual increase in Edison's history. Total electric sales, which include sales to municipal and utility customers, rose 1.8 percent to 9.1 billion kilowatt-hours.

-- Edison established "good-faith" goals to increase the number of qualified minorities and women in top corporate positions, to award more business contracts to minority- and women-owned businesses and to sharply increase philanthropic contributions to low-income, minority and women's organizations.

The Mission Group, SCEcorp's nonutility subsidiaries, had 31 percent higher earnings in 1989, contributing $99.9 million, or 46 cents per share. The nonutility subsidiaries contributed 13 percent of SCEcorp's earnings. The Mission Group is comprised of Mission Energy, Mission First Financial, Mission Land and Mission Power Engineering.

During 1989, Edison made steady progress in its proposed merger with SDG&E Allen said. Shareholders of the companies approved the merger at their annual meetings in April. Under the merger agreement, each SDG&E common share will be exchanged for 1.3 newly issued SCEcorp common shares and existing SDG&E preferred and preference shares will be exchanged for newly issued SCEcorp preferred and preference shares.

Turning to productivity and cost containment, Allen said that "except for one-time costs associated with the regulatory proceedings in the SDG&E merger," SCEcorp's cost-containment goals for 1989 were met, with increases in operating and maintenance expenses kept to 1.5 percentage points below the rate of inflation.

"As we face the challenges and opportunities of the 1990s," Allen said, "our foundation is solid and our future is bright."

ARLINGTON, VA (MARCH 21) PR NEWSWIRE - USAir Express has recently instituted several service enhancements at Mercer County Airport, including a new pricing policy, plans for an earlier departure to Washington's National Airport, and new weekend service to Baltimore/Washington International Airport.

USAir Express is now pricing Trenton, N.J. fares equally with those from Philadelphia. Local travelers can park free at Mercer County Airport and conveniently fly to any USAir final destination for the same fare a USAir traveler would pay flying from Philadelphia.

In addition, starting April 1 the earliest USAir Express flight to Washington National Airport will depart at 7:20 a.m. instead of the current 8 a.m. departure, arriving in Washington at 8:20 a.m. instead of 9 a.m.

"This is our direct response to the community's request for an earlier arrival time in Washington, D.C. so Trenton area business travelers can arrive in time for early morning business meetings," said Jim Glasheen, director - USAir Express sales. "We are pleased that we have been able to accommodate this request and hope local travelers will take advantage of this opportunity."

USAir Express recently began using a larger aircraft -- a 30-passenger Shorts 330 -- on this flight, increasing seat capacity over a 19-passenger aircraft previously in use.

Also, on March 1 USAir Express inaugurated new weekend service to USAir's hub at Baltimore/Washington International Airport, offering one Saturday non-stop roundtrip and two Sunday non-stop roundtrips. This supplements USAir Express' three weekday non-stop, roundtrip flights to BWI in operation since mid-1989.

"The new weekend flights offer many flight options to local personal/pleasure travelers -- particularly cruise and group-tour passengers -- who want to connect to other USAir flights at BWI," said Glasheen.

#90080p0380 03/21/1990 ~PR Newswire

MORRISTOWN, NJ (MARCH 21) PR NEWSWIRE - The New Jersey Board of Public Utilities (NJBPU) today approved a stipulation that provides Jersey Central Power & Light Company (NYSE: JYP) with an annual increase in its levelized energy adjustment charge (LEAC) of approximately $41 million, or about 2.5 percent.

The agreement is the result of a comprehensive review by the NJBPU, its staff and rate counsel, of the company's November 1989 request. The increase is expected too become effective within five days.

The company's LEAC is adjusted annually to provide for increases or decreases in the cost of fuel and energy purchases. In addition, the LEAC provides for the recovery of the energy portion of contract costs for the purchase of power from cogenerators and other non-utility suppliers. The LEAC is a pass-along and provides no income or profit to JCP&L.

The NJBPU has deferred the decision on the remaining $25 million portion of the November 1989 LEAC filing. This amount reflects the capacity costs related to JCP&L's power purchases from cogenerators and other non-utility power producers, which was proposed by the company to be recovered through a capacity adjustment clause. The NJBPU decision on this issue will be made coincident with the decision on the company's base rate case, which was also filed in November 1989.

DALLAS (MARCH 21) PR NEWSWIRE - Texas Industries Inc. (NYSE: TXI) today reported a loss of $7,878,000 for the third quarter ended Feb. 28, 1990, compared with the prior year's losses of $1,550,000.

"Reduced income contributed by Chaparral Steel was largely responsible for this unfavorable comparison," stated President Robert D. Rogers. "Statistics are showing that cement shipments in Texas bottomed out last summer. On a seasonally adjusted basis, modest recovery is beginning with renewed construction activity evident."

Texas Industries, a FORTUNE 500 company, produces steel, cement and concrete products, and develops real estate.

CAMBRIDGE, MA (MARCH 21) PR NEWSWIRE - Spinnaker Software Corporation (NASDAQ: SPKR), a leading provider of software for home-office and

small-business, today reported that as of March 15, 1990, it has concluded a $3 million, five-year subordinated debt credit facility. The facility has been arranged with Phemus Corporation, an affiliate of Harvard Management Company, one of the company's principal stockholders. In connection with the establishment of the facility, Spinnaker has granted Phemus Corporation five-year warrants to purchase up to 2,222,222 shares of common stock at a price of $1.35 per share.

The intent of this revolving loan is to supplement Spinnaker's bank line of credit, principally to fund the development and marketing of the company's new PLUS software products. PLUS is a cross platform object oriented hyperprogramming environment for developing custom information management applications.

Separately, in response to continued weakness in consumer software demand, Spinnaker has reported that it has undertaken several cost reduction actions. Several functions in Cambridge and Minneapolis have been consolidated or restructured, resulting in the elimination of certain positions and the reduction of planned operational expenditures. None of the restructuring will affect the company's commitment to the productivity and the PLUS software products.

Reduction in overhead as a result of the restructuring is estimated to be approximately $1.2 million per year. The benefits of these savings, however, are not expected to be fully realized until the fourth fourth fiscal quarter ending June 30, 1990, or until the first quarter of 1991. Therefore the company expects to incur operating losses for its third quarter ending March 31, 1990.

SANTA MONICA, CA (MARCH 21) PR NEWSWIRE - WCI Holdings Corp. (AMEX: WCH) announced today that the quarterly dividend on its 15-1/2 percent Cumulative Exchangeable Redeemable Preferred Stock will be payable on May 1, 1990 to stockholders of record at the close of business on April 10, 1990.

The dividend to be paid will be in the amount of approximately $.969 per share of Preferred Stock and will be paid in additional shares of Preferred Stock at the rate of approximately 0.039 shares for each share of Preferred Stock. No cash dividends will be made.

In lieu of fractional shares, payment will be made in cash equal to the proportionate interest in the net proceeds from the open market sale or sales of the aggregate of all fractional shares otherwise payable as a dividend.

The dividend payment will cover the period from and including Feb. 1, 1990 through and including April 30, 1990.

WCI Holdings Preferred Stock was issued as part of the acquisition of all outstanding shares of Wickes Companies Inc. by WCI Holdings Corp.

#90080p0400 03/21/1990 ~PR Newswire

SAN ANTONIO (MARCH 21) PR NEWSWIRE - The board of directors of La Quinta Motor Inns Inc. (NYSE: LQM) announced the formation of a partnership with AEW Partners, L.P. to own 18 existing La Quinta Inns and to acquire and convert existing inns owned by other parties to La Quinta Inns.

The partnership may also fund the construction of new La Quinta Inns. Aldrich, Eastman & Waltch Inc. is the manager of AEW Partners, L.P., a real estate operating company, the Limited Partners of which are major domestic institutional investors.

"This is a significant transaction for our shareholders," stated Sam Barshop, president and chairman of the board of directors of La Quinta, "because it provides the La Quinta chain with the ability to take advantage of acquisition and conversion opportunities throughout the

country in the current economic environment where capital from traditional sources is not readily available."

According to Barshop, "Acquisition and conversion of existing properties to La Quinta Inns has become an important strategy for the company because the cost of converting inns in considerably less than the cost of new construction.

"The company has already identified more than 100 lodging facilities which are acquisition candidates for La Quinta and we have begun the screening and evaluation process. We anticipate that the new partnership will provide the company with the ability to increase the size of the La Quinta chain by 40 to 50 additional inns to be acquired from third parties over the next several years, thereby providing for long-term increases in La Quinta's earnings and cash flow as well as marketing and operational efficiencies."

The partnership will be capitalized with contributions of cash and a note totaling $72 million from AEW Partners, L.P. and $48 million from La Quinta in cash and equity in 18 existing La Quinta properties being contributed by La Quinta to the partnership.

Including anticipated borrowings and cash projected to be generated from operations, the new partnership expects to have resources of over $150 million to support the company's growth targets. All inns owned by the partnership will be operated as La Quinta Inns and will be managed by La Quinta under a long-term management agreement.

The partnership (La Quinta Development Partners, L.P.) will be owned 40 percent by La Quinta and 60 percent by AEW Partners, L.P., and La Quinta will act as general partner. Michael Steinberg, one of the principals of Aldrich, Eastmand & Waltch has been named to the board of directors of La Quinta.

Under the terms of the Partnership, AEW Partners, L.P. has the ability, after a vesting period, to convert a portion of its ownership interest in the partnership into common shares of La Quinta Motor Inns Inc. at a premium to the present market price of La Quinta's common stock; if AEW Partners, L.P. exercises all of its conversion rights, it would own approximately 15 percent of the then-outstanding common shares of La Quinta.

As of March 15, 1990, La Quinta owned or managed 207 inns in 29 states.

ALBUQUERQUE, NM (MARCH 21) PR NEWSWIRE - Monday, March 19, the Public Service Company of New Mexico (PNM) (NYSE: PNM), filed its response to the March 15 NMPSC Hearing Examiner's recommendation.

In its brief, the company stated that the Recommendation was founded upon a selective and inappropriate use of known and measurable changes, primarily using those changes unfavorable to the company's position while ignoring others.

PNM further stated that the Examiner's Recommendation included an unrealistic, below-market return on equity and an incorrect application of the Commission's tax policy that will strain the company's financial recovery.

In a separate motion PNM also asked the Commission to reopen hearings on the rate case to take additional evidence on its allowed rate of return.

The company cited an increase in both interest rates and market risk of PNM securities as well as the decision by Moody's Investor Service to place PNM securities under review for a possible downgrading of its senior securities following the punitive Hearing Examiner's Recommendation.

On June 12, 1989 the company filed for a $13.7 million rate increase, later revised to $12.2 million, requesting a 13.6 percent return on equity and a phase-in of half (130 MW) of Palo Verde Units 1 and 2. The Hearing Examiner recommended a $6.2 million decrease based on a return on equity of 12.05 percent, and full and immediate inclusion of both Palo Verde Units.

The company believes that adoption of the Hearing Examiner's Recommendation would severly damage PNM's financial recovery. The Recommendation, if adopted by the Commission, would result in $28 million in write-offs, $9 million of which could be charged to paid-in-capital, the balance of which would likely go against future earnings.

SAN FRANCISCO (MARCH 22) PR NEWSWIRE - Visa International, in a strategic move designed to support its burgeoning card payment volume in the Asia Pacific region, has begun installation of a new transaction processing center in Yokahama, Japan, according to Visa Chief Executive Officer Charles T. Russell.

The new facility will join Visa's three other international data centers that currently anchor the VisaNet Delivery System, the world's largest global telecommunications and transaction data processing network. The network has 800,000 miles of communications channels and processes some 230 million transactions worldwide every month.

VisaNet enables more than 7.5 million merchant locations worldwide to receive immediate authorization for Visa card transactions from cardholders' issuing financial institutions and it permits those institutions to clear and settle the transaction funds between themselves.

The new Visa processing center, scheduled to begin operations this summer, will be the largest, most-advanced transaction processing facility in the region, said Russell.

The Visa Asia Pacific Region, headquartered in Tokyo, consists of some 17 countries. Visa International and its member financial institutions operate in over 180 countries and territories worldwide.

"Construction of this center is proof of Visa's phenomenal growth in the Asia Pacific region, said Russell. "Not only will the facility help accommodate the continued growth we expect, but it will also offer Pacific Rim banks a complete range of processing services."

When fully operational at the end of 1990, the new Visa facility -- called Operations Center Asia Pacific -- will handle authorizations as well as clearing and settlement for the more than 200 million Visa transactions currently processed each year in the region.

Russell said that Visa has grown into the largest card program in the Asia Pacific region over the last few years. In 1989 alone, he said, the number of Visa cardholders doubled to 29 million, while merchant locations grew to 1.5 million, an increase of 32 percent. There are currently 253

Visa member financial institutions in the Asia Pacific region.

Visa, which has more than 220 million cardholders, is the largest consumer card payment system in the world.

#90080p0407 03/21/1990 ~PR Newswire

SAN FRANCISCO (MARCH 22) PR NEWSWIRE - Visa U.S.A. today announced plans to build a new 60,000 square foot data center to replace its current East Coast processing facility in McLean, Va.

"The dramatic success of the Visa program has simply made us outgrow our space," said Neil Waldo, senior vice president for VisaNet Delivery Systems domestic operations.

"We expect transaction volume at the McLean site to quadruple over the next ten years so this new facility will ensure Visa members and merchants maximum levels of service and availability," said Waldo, adding that the new center will be three times the size of the current operating space.

The new McLean facility will be constructed as an annex to the existing building that currently houses the VisaNet Delivery Systems East Coast Operations Center.

Construction of the new facility is scheduled to begin this August. Occupancy will begin in October of next year and the facility will be fully operational in May of 1992.

"The center will be brought into operation without any interruption of service whatsoever to members," said Waldo.

VisaNet, the world's largest global telecommunications and transaction data processing network, is currently anchored by three international data centers located in London, England, McLean, Va., and San Mateo, Calif. Visa also announced today that it plans to build a fourth international data center in Yokohama, Japan.

VisaNet enables more than 7.5 million merchant locations worldwide to receive immediate authorization for Visa card transactions from cardholders' issuing financial institutions and it permits those institutions to clear and settle the transaction funds between themselves.

Waldo said that Visa's decision to build the new Virginia facility is an example of how the company constantly develops and upgrades the VisaNet Delivery Systems architecture to meet the processing needs of its members

as the Visa program continues to expand.

Visa, which has more than 220 million cardholders worldwide, is the largest consumer card payment system in the world.

TORONTO (MARCH 22) PR NEWSWIRE - Varity Corporation (NYSE, Montreal, Toronto: VAT) improved net income 13 percent and pre-tax income 17 percent in fiscal 1989.

Strong performances by the company's farm machinery and diesel engine groups overcame lagging demand for automotive components and contributed to net earnings of U.S. $92 million, or 35 cents per common share outstanding, in the year ended Jan. 31, 1990.

A year ago, in its best results since 1976, Varity booked net income of almost $82 million, or 33 cents per common share.

Net sales in 1989, which included two months of sales by recently acquired K-H Corporation and it's Kelsey-Hayes automotive components operations, totalled $2,382 million, compared with year-earlier sales of $2,285 million. Adjusted for fluctuations in currency values, sales in the recent year increased 9 percent.

Other income in 1989 amounted to $21 million, representing the net gain on sales of surplus assets and other peripheral interests after deductions for reorganization and other miscellaneous items; other income a year ago totalled $11 million. The increase in other income for 1989 and improved earnings by the company's finance subsidiaries were largely offset by a loss of $5 million in foreign exchange adjustments and $5 million in higher tax expense.

Net income in 1989's fourth quarter rose 21 percent to $34 million, or 12 cents per common share, while sales amounted to $788 million, highest three-month sales level since 1980. In the year-ago period, the company earned $28 million, or 12 cents per common share, on sales of $624 million. The average number of common shares outstanding was higher in the recent three months.

In the recent period, pre-tax income was $41 million, level with last year's closing quarter.

Varity continued to strengthen its balance sheet over the past year. Long-term debt was reduced to $200 million before the K-H acquisition

incurred new debt of almost $600 million. Cash flow from operations totalled $55 million, and the company's cash position rose $84 million to $302 million at year-end.

SAN DIEGO (MARCH 22) PR NEWSWIRE - The project team of Dairyland Power Cooperative, Pyropower Corp. and Black & Veatch Engineers/Architects, has been selected for negotiations of a cooperative agreement with the U.S. Department of Energy under the Clean Coal Technology Program for financial assistance to construct and operate a demonstration plant. The demonstration plant is intended to prove the technical and commercial viability of the AHLSTROM PYROFLOW(R) Pressurized Circulating Fluidized Bed (PCFB) Combustion Technology by repowering two steam power turbines at Dairyland's Alma, Wis. site. The plant will be designed to generate 40 to 50 megawatts (MW) of electricity.

Pyropower Corp. and its parent company, A. Ahlstrom Corp., are the developers of the PCFB technology. The technology is an advancement of atmospheric CFB technology for which more than 80 AHLSTROM PYROFLOW(R) Atmospheric CFB units are currently in operation or under construction worldwide.

The PCFB development effort will be based upon data obtained from the operation of a 10 MW (thermal) PCFB testing facility at the Hans Ahlstrom Research Center in Karhula, Finland. The Electric Power Research Institute (EPRI) is a participant in the Karhula testing program. EPRI and Dairyland Power have provided Illinois No. 6 coal and Wisconsin limestone for combustion testing at Karhula. The Karhula facility will be

a vital research tool for developing the detailed design and scale-up data for the Dairyland demonstration plant.

Dairyland Power Cooperative is a consumer-owned electric generation and transmission system which supplies electric energy to 29 rural electric distribution co-operatives serving 178,000 consumers in Western Wisconsin, southeastern Minnesota, northeastern Iowa and northwestern Illinois using more than 98 percent coal-fired electric power generation.

Pyropower of San Diego is a full-service company providing design, procurement, construction, start-up, operation and after market services to the industrial and utility steam generator industry. Pyropower's affiliates, Pyropower Development Corp. owns, and Pyropower Operating Services Co. operates, several plants incorporating Pyropower's steam generators.

Black & Veatch is a leading designer of industrial and utility power plants and employs 3,900 employees to provide services in every major field of engineering and architecture throughout the world. Located in Kansas City, Mo., Black & Veatch has designed more than 36,000 MW of fossil fuel capacity.

#90080p0418 03/21/1990 ~PR Newswire

SAN DIEGO (MARCH 22) PR NEWSWIRE - Imperial Corporation of America (NYSE: ICA), the parent company for Imperial Savings Association (ISA) until it was put in a conservatorship February 23, today filed a lawsuit in Federal Court in San Diego against the Office of Thrift Supervision (OTS); the Resolution Trust Corp. (RTC); M. Danny Wall; Salvatore Martoche and the California Department of Savings and Loan, seeking a restraining order and preliminary injunction to prevent the appointment of a receiver and to remove the RTC as conservator of ISA.

ICA filed for Chapter 11 of the United States Bankruptcy Code on Feb. 28, 1990, in an effort to protect its current assets, consolidate pending disputes and litigation and give the company an opportunity to file a plan of reorganization. With the February 23 federal government takeover of its subsidiary ISA, ICA felt obligated to file Chapter 11 in an effort to protect its operating subsidiaries.

The legal issues in the ICA case are similar to those in two other pending cases, one in the District of Columbia involving Olympic Federal Savings and the other in Kansas involving Franklin Federal Savings. Olympic Federal Savings, located in Illinois, today received a preliminary injunction in United States District Court in Washington, preventing the

federal government from imposing a conservator or receiver. U.S. District Court Judge Royce C. Lamberth issued a 46-page opinion concluding that OTS director M. Danny Wall never constitutionally took office and enjoined the OTS from taking any action against Olympic Federal Savings.

Franklin Federal Savings, based in Ottowa, Kan., in a similar suit, earlier received a temporary restraining order from the Federal Court in Kansas preventing the OTS from taking Franklin from conservatorship into receivership. A hearing on a preliminary injunction for this case is set for the end of March.

In all three cases, the plaintiffs alleged that the appointment of OTS director, M. Danny Wall, was unconstitutional and further alleged that certain accounting changes applicable to financial institutions upon the passage of Federal Institutional Reform, Recovery and Enforcement Act of 1989 (FIRREA) applied retroactively to the asset portfolios and took the institutions from solvency to paper insolvency immediately.

"With these other cases pending, and in light of the Federal Court's decision in the Olympic Federal case, it was necessary to proceed with this action and protect the assets of ICA from being diminished by the RTC " said Patrick Shea, managing partner at Lillick & McHose, the law firm retained to represent ICA.

#90080p0419 03/21/1990 ~PR Newswire

MANHEIM, PN (MARCH 22) PR NEWSWIRE - Wissahickon Spring Water Company of Manheim, is recalling all bottles packaged on Feb. 6, because of the detection of low levels of toluene in isolated samples of its one gallon spring water bottles produced on that date.

The affected spring water was distributed in New York, New Jersey, Connecticut and Pennsylvania. It was sold under the following brand names: Super A Spring Water in Associated Food Stores, Shoprite Spring Water, Foodtown Spring Water and as Wissahickon Mountain Spring Water in other outlets.

According to James Land Jr., president of Wissahickon, random testing by independent laboratories hired by his company, as well as the Departments of Health of Nassau and Suffolk County and New York State, detected levels of 11 to 17 parts per billion (PPB) of toluene in eight samples bottled on Feb. 6, 1990. While this is above the five PPB maximum contaminant level set by New York State for all organic compounds as a class, it is far below the U.S. Environmental Protection Agency's proposed level of 2,000

PPB of toluene in drinking water.

"The EPA standard suggests that federal authorities see this as a safe level of exposure in a product of our type," said Land. "Nevertheless, to maintain our own high product standards and to act conservatively in the interests of our consumers, we are voluntarily recalling all one gallon bottles of spring water produced at the Manheim facility on that day.

"We have launched an extensive and thorough investigation to isolate the cause of the Feb. 6 problem and we are now testing the product from the Manheim facility daily," he added. "These daily tests, plus tests conducted on available product produced on other dates in February and March, have revealed no contamination," said Land.

The company is working closely with all appropriate authorities. Land said that any consumer with one gallon bottles of Super A Spring Water, Shoprite Spring Water, Foodtown Spring Water and Wissahickon Mountain Spring Water with code numbers 0206911, 0206913 or 0206914 may return them for a refund to the store from where it was purchased.

Consumers with questions may call Wissahickon Spring Water Company at 1-800-545-0457.

CONTACT: Andrea Land, 215-824-0492 (day) or 215-233-1409 (night), for Wissahickon Spring Water.

SYDNEY, AUSTRALIA (MARCH 21) UPI - Animal rights activists say they will not stand idly by while a long-standing ban on the sale of kangaroo meat, emu drumsteaks and crocodile steaks is lifted.

The state government of New South Wales announced the decision last month, saying the slaughter of the animals would be strictly supervised and that a special tax on the meat would be used to fund parks and wildlife conservation.

But animal welfare groups said Wednesday they would stage demonstrations ouside of any butcher shop or restaurant that sells or serves kangaroo meat.

Majorie Wilson, director of the Kangaroo Protection Society Cooperative, said kangaroo meat is potentially dangerous because it can become

contaminated within four hours after the animal is killed.

The kangaroo and emu, a large flightless bird, are depicted standing on the sides of a shield in the official Australian emblem.

Despite the protests from the animal rights groups, an emu farm in western Australia has been a success, according to owner Leeham Cameron.

Cameron, a one-time miner, fighter and horse-breaker, is one of dozens of aborigines who sell emu meat, feathers, oil and leather.

CAPE CANAVERAL, FL (MARCH 21) UPI - A $150 million satellite was not ejected properly from a commercial Titan 3 launch rocket last week because the second-stage separation system was mistakenly wired for a two-satellite payload, officials say.

NASA engineers at the Johnson Space Center in Houston, meanwhile, plan to meet Thursday to discuss the feasibility of mounting a shuttle rescue mission to save the errant Intelsat 6 communications satellite.

The spacecraft's owner, the International Telecommunications Satellite Organization, sent a letter Monday to NASA Administrator Richard Truly formally seeking assistance in the matter.

Intelsat 6 was launched last Wednesday by a commercially built $115 million Titan 3 rocket making only its second flight.

The ascent to space was flawless, but once the spacecraft was in orbit, engineers could not separate Intelsat 6 from the booster's second stage so that an on-board rocket could fire to continue the craft's ascent to its operational altitude of some 22,300 miles.

With the satellite stuck to the Titan 3 second stage, Intelsat engineers ultimately decided to separate the spacecraft from its solid-fuel booster instead.

They later fired on-board liquid-fueled rocket thrusters to raise the satellite into a higher long-term storage orbit where the otherwise healthy spacecraft will be safe for months to come.

Engineers now are debating several options, including the possibility of a shuttle rescue flight. NASA astronauts rescued or repaired four satellites during three pre-Challenger missions, but agency insiders say a rescue of Intelsat 6 would be espeically difficult to pull off for a variety of technical reasons.

In any case, Titan-builder Martin Marietta Astronautics Group of Denver said Tuesday the initial failure of the Intelsat 6 to separate from the Titan 3 second stage happened because the rocket's separation system was mistakenly wired for a two-satellite payload.

As a result, a separation command to release Intelsat 6 from payload position No. 2 went instead to position No. 1 where there was no satellite.

''It was an engineering error which resulted in the incorrect wiring that prevented the separation signal from getting to the satellite,'' said Robert Gordon, a spokesman for Martin Marietta.

The first launch of a commercial Titan 3 came Dec. 31 when two foreign-owned communications satellites were successfully boosted into orbit.

Such dual payloads are mounted atop each other in the Titan 3 nose cone and ejected one at a time with the top satellite separating first followed by the one below.

Engineering drawings for the second commerical Titan 3 led technicians to mistakenly wire the separation system for two satellites when only Intelsat 6 was on board, Gordon said.

''The wiring for this launch was similar to the point that it was incorrect to fire the first position,'' he said. ''The satellite was in the second position.''

The Denver Post reported Tuesday that the initial mistake came about because of a breakdown in communications at the company's plant outside Denver.

''No one was goofing off or being secretive,'' a company spokesman told the newspaper. ''It was a case where the computer people said they would launch the first payload and the wiring people thought that meant the bottom payload compartment. There was just nothing at the separation device to receive the signal.''

The newspaper said a similar problem was discovered with a Titan 3 scheduled for launch June 1 to carry another Intelsat 6 into space.

Martin Marietta likely will adopt a new system of pre-launch checks, the newspaper said, that includes carrying out a mock satellite separation on the ground, using the firing commands employed in space.

#90080u0137 03/21/1990 ~United Press International
PERTH, AUSTRALIA (MARCH 21) UPI - All 25 crew members aboard a British ship were killed when the vessel mysteriously sank off West Australia's north coast, officials said Wednesday.

Federal Sea Safety Center spokesman Brian Willey said evidence found Tuesday indicated the 94,000-ton ship Alexandre, which was carrying a shipment of iron ore bound for Spain, was ripped apart last week in a ''catastrophic event'' off the north coast of West Australia.

Willey said there were no survivors among the crew of 23 Koreans and two Greeks. He said an oil drilling ship had recovered a battered life raft containing the bodies of two crew members.

The Alexandre left the Australian port of Dampier March 14 and was bound for Spain via Cape Town, South Africa. Authorities do not know for sure when the vessel sank, but debris was discovered Tuesday in a large oil slick about 200 miles northwest of Learmonth that also contained ore dust.

Rescue workers concluded from the evidence of the wreck that the ship had sunk last week.

''There has been speculation about an explosion and fire, but at the moment we have no way of knowing what happened,'' Willey said.

Willey said the life raft had its bow and stern ripped off, and part of the mounts that attached it to the ship were still in place.

John van Voss of the West Coast Shipping Agency, the Alexandre's shipping agent, said the 23-year-old vessel did not issue a distress signal and that seas in the area were calm.

#90080u0172 03/21/1990 ~United Press International
OTTUMWA, IOWA (MARCH 21) UPI - The FBI recovered a vast cache of some $30 million in stolen rare books and documents and arrested one suspect in what the agency said was ''the largest seizure of its kind'' in the nation's history.

Agents Tuesday arrested Steven Cary Blumberg, 41, a self-described antique dealer who said his address was in St. Paul, Minn. but was living in a house jammed with the rare books in Ottumwa, Iowa. He was charged with interstate transportation of stolen goods.

After serving a search warrant, the FBI agents found thousands of books and documents in the house, including a song book dating back to the 8th century. Also discovered was a Nuremberg Bible from 1480, an atlas from

1609 and the original city charter for Portland, Ore.

''The values of the individual books ranged from minimal value to what is described to us as priceless,'' said agent Dennis Aiken, who estimated the total value at about $30 million.

The seizure came two days after the theft of several uninsured masterpieces from a Boston art museum, which may go down as the biggest art heist in history. The Isabella Stewart Gardner Museum Tuesday offered a $1 million reward Tuesday for the safe return of the 12 works valued at more than $200 million, which include masterpieces by Rembrandt, Vermeer, Degas and other famous artists.

The FBI said it will take months to determine from where all of the books and documents found in Iowa were stolen. Most of the identification tags for the items had been removed, however tags from Harvard University, Notre Dame and William and Mary were found discarded in a box.

''Dealing with the volume that we're dealing with, I couldn't estimate how much time or how much manpower it's going to take. I can tell you that it's going to be extensive,'' Aiken said. Aiken said authorities may never know where all of the books came from.

Aiken declined to disclose if authorities believe Blumberg was acting alone or if others are being sought in the thefts.

Agents found other books and documents in a storage warehouse in Ottumwa. and they also seized ''several hundred thousands dollars worth'' of gold coins from safe deposit boxes in St. Paul, Minn., where Blumberg had also lived.

Authorities removed one semi-trailer truckload of the documents and books Tuesday and said they had several more to go. At least 375 boxes of books and manuscripts were removed from the home Tuesday. One worker, who was helping to load the material, said the home had at least 14 rooms and there were books and antiques in all of them.

''There's just shelves and shelves of books, all of the rooms are all books clear to the ceiling,'' said Gary Townsend, one of the movers.

Officials said the books and documents were stolen from universities, museums and other collections across North America.

Agents said they know about $662,500 worth of the material came from the University of Oregon in Eugene. The documents are believed to be part of a pick-up truckload full of books and documents stolen from the school in 1987. One of the documents is the original city charter for Portland, Ore.

(MARCH 21) - EDITORIAL SAMPLER

Charlotte (N.C.) Observer

'''Just Say No' is good, but we have to go beyond that. We must change our approach in reaching our children. ... Go into your own home, that's where the change will come.''

That is what Lonise Bias, mother of University of Maryland basketball player Len Bias - who died from a cocaine overdose - told a B'nai B'rith group in Grady Cole Center here this week.

The group, ParentLink, is a family-oriented drug prevention program that focuses on parents of children in kindergarten through third grade.

Her message is so simple that its importance can easily be minimized by our concentration on approaches that reach large numbers of drug users and that bring about easily measured results. Efforts that bring some immediate change - no matter how small - are needed, to be sure, if for no other reason than to give us hope.

But one of the most effective long-term ways of fighting drugs is to raise new generations of non-users. And parents must play the tedious, day-to-day role in making that happen.

That means parents must educate their children about the dangers of drugs and take the time to know their children as individuals who confront temptations and peer pressure almost on a daily basis.

It also means that parents must serve as role models for their children and teach them to begin thinking, at an early age, about what their values are so that they are not dependent upon someone outside the home to define their values for them.

Atlantic City (N.J.) Press

... Between Jan. 1, 1988, and March 27, 1989, more than 12 percent of narcotics-related crime in the United States involved assault firearms. In organized crime cases, assault firearms were used in 30 percent of the crimes committed.

As (New Jersey) Attorney General Robert Del Tufo said during a recent legislative hearing, ''They (assault weapons) are weapons of war, not of sport.''

... There's no need for a sportsman to use a weapon designed for the battlefield.

Critics continue to argue that the Second Amendment protects one's right to bear arms. They conveniently ignore that part of the amendment that associates the right to bear arms with a ''well regulated militia,'' which the framers of the amendment said was ''necessary to the security of a free state.''

The U.S. Supreme Court, 114 years ago, concluded that the right to bear arms by individuals ''is not a right granted by the Constitution.'' Subsequent decisions on both a state and federal elvel have come to similar conclusions.

The right to bear arms doesn't mean one can own an anti-tank gun or a bazooka or a soon-to-be-developed laser weapon.

The Washington Post

Bankers object that the federal regulators are going too far in tightening the standards for lending on commercial real estate. It's going to mean a sharp reduction in credit for developers, they protest. The regulators reply that the standards have been rather loosely enforced in recent years and amid signs that real estate markets are softening, they only want banks to be more cautious.

They are risking an overreaction by the banks, and a credit drought for commercial construction. It's an important example of the dilemmas confronting the bank regulators in the seventh year of the longest peacetime boom in the country's history. They want to remind the banks that a recession is undoubtedly waiting for them somewhere out there in the future. But in an economy that runs on credit, they don't want to push

the banks into a reaction that would make a recession more likely.

... The Treasury Department's chief regulator, Comptroller of the Currency Robert L. Clarke, says emphatically that he doesn't want the banks to stop lending on commercial real estate. He is simply telling the lenders to be prudent. But the bankers complain that he is changing the basic rules under which they operate.

... Bank regulators like Clarke are trying to strike a balance between too much restraint, which would hurt business, and too little. Recent experience argues strongly that it's better to err on the side of caution.

MILWAUKEE SENTINEL

Look around. How can one be upbeat about the state of the American values system?

Does it even exist anymore? Are we facing a moral Armageddon? What lies down the road if society doesn't take hold of itself and shake loose of the defeatism and ethical stagnation that are slowly strangling the life out of principle and process?

... In politics, sports, entertainment, our person-to-person contacts, government, education, the workplace, the business world and the family, there are clear, convincing and sometimes frightening signs that what it has taken centuries to build is deteriorating.

... We should not be surprised at what, by today's standards, is considered normal behavior. What was aberrant yesterday is, if not acceptable, at least casually dismissed today.

... Look around. Look at the movies we are offered. Listen to the music that sculpts young minds. What about the vision our politicians don't have?

Look at the Donald Trumps and the shame of Wall Street, the lack of caring and the fear of sharing. We have seen the rise of the lie and the fall of the truth. Some lives aren't worth a plug nickel after a certain hour on a certain street.

It is all here.

We have developed an underclass of citizens, locked in poverty and condemned to despair. But we give them lotteries, not jobs and hope. We give them teen pregnancy, not teen responsibility. We don't solve, we

compound.

With greater and greater speed, society rushes toward a reckoning. Our institutions are crippled; they are ''cracking under the strain.'' The answer? There is no single solution. It lies, in part, in our schools, our families - and in ourselves.

It lies beyond government programs that are so accustomed to crash landing. It lies in a moral rebirth.

Most of all, it means taking all those things that glamorize the rot and wretchedness of modern society and exchanging them for a new dedication to fellowship, honesty and human kindness.

LINCOLN (NEB.) STAR

Romanian dictator Nicolae Ceausescu, obsessed with the delusion that rapid population growth meant national power, created a madman's policy that made giving birth a national priority.

Enforcement was oppressive. Women under the age of 45 were regularly rounded up at working places, taken to clinics and examined for signs of pregnancy. Pregnant women who failed to deliver a baby at the proper time were summoned for questioning.

One relatively minor consequence of Ceausescu's obsession with increasing fertility in Romania was a thriving black market in birth control pills. The other consequences were more life threatening.

The law forbade abortion but did nothing to promote life.

China and Romania under Ceausescu had something in common. Both governments used draconian intervention to dictate personal decisions about whether to have children. Both have lessons for us.

Offering family planning information and providing birth control devices to those who cannot afford them are reasonable and responsible actions.

Coercive family planning programs - those that force the use of birth control and abortion in order to reduce the number of chidren and those which force women to have babies they cannot afford and do not want - are unacceptable tyranny.

THE DAILY OKLAHOMAN, OKLAHOMA CITY

Americans who believe Ollie North was a hero and not a scoundrel for his role in trying to keep the Contra movement alive in Nicaragua must surely sympathize with him in the mental anguish he experienced.

Testimony by the former National Security aide in the trial of his one-time boss, John Poindexter, underscores his dilemma: North was under orders not to reveal information about covert aid to the Nicaraguan freedom fighters. Yet he didn't feel good about not telling a congressional committee the whole truth.

In his mind the lies were wrong but not illegal. Moralists and lawyers will have a field day with that. But Americans willing to give the retired Marine lieutenant colonel the benefit of the doubt and look at the administration's overall objective in Nicaragua will understand North's soul-searching.

His assignment was to keep the Contras supplied during a congressional ban on such aid. Congress's own record of on-and-off support and conflicting interpretations of the Boland amendments, including their constitutionality and application to the NSC, offered some justification for this approach.

Despite his worries over the legality of his action, North carried out what he understood to be administration policy. The plan to exert pressure on the Sandinistas by helping the Contras was a calculated risk. If it hadn't been for a supply plane crash, it might have succeeded and American hostages might have been freed. Instead, it became the target of a political witch hunt in which every good intention is made to look bad.

#90080u0188 03/21/1990 ~United Press International

THE IDAHO STATESMAN, BOISE

Two concepts enjoying greater currency in public policy debate - deregulation and accountability - are combining to push the federal government toward a more promising new way of distributing school aid.

Both concepts are sometimes oversold by zealous reform advocates from the business community. Despite what some would have us believe, neither is a magic potion capable of curing all ills.

But when applied in the right amounts in the right circumstances, these concepts do have considerable merit. And the U.S. government's school aid effort represents a good case in point.

... Rep. Peter Smith, a Vermont Republican serving on the House Subcommittee on Elementary, Secondary and Vocational Education, has fashioned a workable bill incorporating the key concepts.

... When it comes to education reform and local autonomy, Congress talks a far better game than it plays.

Smith's bill represents an attempt at meaningful action. It deserves a full and fair airing.

SAN FRANCISCO CHRONICLE

In a year when the U.S. Postal Service is seeking overall rate increases of 19 percent, and is anticipating its biggest deficit ever, the disclosure that it awards incentive bonuses to its division general managers is more than enough to raise eyebrows throughout the country.

The bonus system rewards officials on such factors as fast mail delivery, human relations and financial management. Last year, all 75 of the Postal Service's division general managers - whose annual salaries range from $76,100 to $87,000 - receive bonuses averaging $6,173. Not a single one failed to get something. The executive with the worst record still got $3,200. ...

Postmaster General Anthony Frank, an economy-minded man, conceded there is room for improvement and that expenses should be kept to an absolute minimum. If they are not, the general public will never stomach a 30-cent postage stamp.

AUSTIN (TEXAS) AMERICAN-STATESMAN

Panama. Nicaragua. Peace. Rebuilding. And U.S. dollars. Those words make up the equation for recovery from years of turmoil. The problem is, the U.S. dollars are limited and the problems are vast. Aid programs have to be structured with that in mind, to get as much effect per aid dollar as feasible.

Jailed (former Panamanian strongman) Manuel Noriega's excesses and indiscretions wrecked his country's economy. Its infrastructure is a shambles and is in dire need of assistance from America and other nations with good intentions toward that tyranny-whipped, tiny nation. ... The administration has asked Congress for $500 million in aid to Panama for this fiscal year, along with Peace Corps volunteers.

And Nicaragua, a nation that has weathered times no nation should have to endure, is even more in need of our help, particularly since we spent something on the order of $500 million supporting Contras in their effort to battle the Sandinistas in a decade-long civil war. We threw in an economic blockade of both countries to boot.

... President Bush has lifted a trade embargo to both nations, and that will help. And now he's involved in the political sticker bush of trying

to take $300 million intended for military base upgrading here and speeding that money by April 5 to Nicaragua. He says he will ask Congress for another $200 million before Oct. 1.

America is on the right track. We understand our responsibilities. But, all too often, aid money sent abroad seldom reaches those who need it most. ...

... What is needed, then, when sending aid to Panama and Nicaragua is a way of assuring the public that the millions we send will be employed for the best purposes in rebuilding those nations.

... One person ideally suited to finding a politic way of ensuring that aid money goes where it is needed is former President Carter, a man trusted by Latin Americans, who most recently was in Nicaragua as an election observer, and who last week was in Damascus, working for the release of foreign hostages.

Carter knows how governments and bureacracies work. He would be a superb administrator to channel funds to proper agencies that toil at everything from helping the afflicted to rebuilding economies. he has contacts built on trust and experience. The gentleman from Georgia is a national asset with vast abilities.

... Carter should be asked to head this important effort for our neighbors.

#90080u0189 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Despite all-out lobbying by environmentalists, the Senate refused to toughen auto emission reduction requirements in compromise clean air legislation, raising doubts about the prospects for further strengthening amendments.

Environmental groups made a major push to convince senators that the compromise bill worked out between Senate leaders and the Bush administration did not crack down hard enough on car tailpipe emissions, the main cause of urban smog, which now exceeds federal health standards in 101 cities.

But the senators voted 52-46 Tuesday to reject a hotly debated plan by Sens. Timothy Wirth, D-Colo., and Pete Wilson, R-Calif., to impose tighter limits on tailpipe pollution and require mass production of ''alternative fuel'' vehicles.

Auto industry officials praised the Senate's action as recognition that Wirth and Wilson had demanded too much.

''Passage of the Wirth-Wilson amendment would have made our job impossible in today's marketplace,'' said the Motor Vehicle Manufacturers Association.

But environmentalists charged that while the Senate had pleased the auto industry, it had condemned millions of urban Americans to breathing dirty air well into the next century.

''This vote is a good deal for General Motors and a terrible deal for the general public,'' said Gene Karpinski, executive director of the U.S. Public Interest Research Group.

The auto emissions vote appeared to confirm earlier indications that environmentalists do not have the votes to overcome the coalition put together by Senate leaders to preserve their compromise with the administration.

It was the second time environmentalists failed in their attempt to strengthen the compromise bill. An earlier effort to limit toxic emissions from cars also fell short.

In both cases, Senate leaders argued that tougher auto emission controls were not acceptable to the White House, which said those proposals would impose big costs on the nation's economy while providing little environmental benefit.

The Senate leadership made no such arguments, but warned that adoption of the Wirth-Wilson plan would shatter their fragile clean air compromise with administration. They said that would re-ignite partisan disputes that could kill prospects for a new Clean Air Act.

''I strongly oppose this amendment because I want a clean air bill to pass this year,'' said Sen. Max Baucus, D-Mont., floor manager of the compromise bill. ''It's a deal-breaker.''

Wirth and Wilson contended that with the nation's car fleet growing and Americans driving more and more miles each year, their proposal was essential to ensure the nation's smog problem did not worsen.

They also contended that if automobile pollution was not cut, a wide variety of businesses from paint shops to gasoline stations would have to do more to cut their smog-related emissions, hurting economic growth and costing jobs.

In regard to alternative fuels, the two senators said their plan simply restored a smaller version of the the sweeping program President Bush proposed last summer to require automakers to produce millions of ''clean fuel'' cars for sale in the dirtiest cities. Those cars run on cleaner-burning fuels such as natural gas or grain-based ethanol.

The key provisions of the Wirth-Wilson proposal would have:

-Imposed a second round of tailpipe emission reductions in the year 2003 unless Congress voted to delay or cancel them. The compromise bill calls for an initial round of emission cuts in the mid-1990s, but would not require the second round unless 12 or more seriously smoggy cities still violated federal health standards by 2001.

-Provided for the use of cleaner-burning reformulated gasoline in all cities not meeting federal smog standards by 1993.

-Required government and commercial fleets in seriously smoggy cities to convert to alternative fuels by the year 1994. Car manufacturers would have been required to begin selling clean fuel cars to the general public by 1994 in the Los Angeles area, the nation's smoggiest city, with other badly polluted cities coming into that program in 1997.

#90080u0225 03/21/1990 ~United Press International

(MARCH 21) UPI - Romania's provincial government is urging authorities in western Transylvania province to put an end to the country's worst ethnic unrest since the December revolution. The official news agency reports dozens of people injured Tuesday night in the city of Tirgu Mures as ethnic Hungarians and Romanians fought with iron bars and axes.

The Bush administration continues to keep a close eye on developments in secession-minded Lithuania. Tuesday, it warned the Soviet Union that an atmosphere of ''intimidation and tension'' would jeopardize peaceful dialogue over the fate of the Baltic republic. White House news secretary Marlin Fitzwater says ''indications of troop movements on the ground'' in Lithuania from several sources have raised U-S wariness. But he says there had been NO indication of ''forcible control'' by Soviet forces.

In Anchorage, Alaska, the jury hearing the trial of former Exxon Valdez skipper Joseph Hazelwood briefly organized Tuesday... and then quit for the night to begin deliberations Wednesday. During closing statements Tuesday, prosecutors argued Hazelwood gambled- and lost- by drinking before sailing the tanker to the worst oil spill in U-S history. The defense countered that witnesses unanimously testified Hazelwood was NOT impaired at the time.

-30- 1475

#90080u0239 03/21/1990 ~United Press International

(MARCH 21) UPI - Democrats and Republicans split the results in a pair of special congressional elections in New York City Tuesday. In the South

Bronx, voters picked Democratic State Assemblyman Jose Serrano to succeed convicted Representative Robert Garcia. The New York Democrat is in jail for his part in the Wedtech scandal. On Staten Island, G-O-P City Councilor Susan Molinari will succeed her father, a five-term House Republican.

Illinois Secretary of State Jim Edgar jumped to an early lead over Steven Baer and Robert Marshall in Tuesday's hotly contested Republican gubernatorial primary. Edgar... who received a White House endorsement... is favored to represent the G-O-P in November's general election against Democratic Attorney General Neil Hartigan, who was unchallenged in the primary. At stake is the office now held by outgoing Republican Governor Jim Thompson.

#90080u0276 03/21/1990 ~United Press International

(MARCH 21) UPI - In the NHL, where all but five teams make it to the playoffs, the jockeying for the final postseason berths becomes particularly fierce - especially with less than two weeks left in the season.

Only Quebec and Vancouver are mathematically eliminated, while the last spots in the Patrick and Norris Divisions are up for grabs.

In the Patrick Division, Washington enhanced its playoff chances dramatically Tuesday, and may have dealt a death blow to the New York Islanders with a 3-0 victory. The victory lifted Washington into third place in the division, one point ahead of the Pittsburgh Penguins and three in front of the Islanders. The Islanders loss clinched a playoff position for the first-place New York Rangers.

Meanwhile, Philadelphia crawled back into the race with a 3-2 upset of the second-place New Jersey Devils, putting them one point behind the Islanders and three behind Pittsburgh for the division's fourth and last playoff spot.

In the Norris Division, Minnesota and Detroit continued their dogfight for the final spot. The North Stars beat Los Angeles 5-2 and lead the Red Wings by one point after Detroit tied Vancouver 4-4. The two teams square off in Detroit Thursday night.

CAPITALS 3, ISLANDERS 0

At Landover, Md., Mike Liut stopped 24 Islander shots for his 24th career shutout and fourth this season.

''They have good defensive forwards, and their defensemen played very well

'' Islanders Captain Brent Sutter said. ''We have no excuses; they just beat us plain and simple.

''It's a big emotional letdown, but we can't look back. We're two out of it (the playoffs) with five to play. We just have to get the two points in Los Angeles (Thursday) and go on from there.''

FLYERS 3, DEVILS 2

At East Rutherford, N.J., Murray Craven and Mike Bullard scored second-period power-play goals to give the Flyers two straight victories. The Devils failed to take advantage of one of the two games in hand they have on the division-leading New York Rangers, who they trail by eight points.

''We dug a hole for ourselves, but we are in the process of climbing a mountain,'' Philadelphia Coach Paul Holmgren said. ''If we can keep our defense working and the goals against down I think we might do it.''

Craven took a backhand pass from Pelle Eklund on the power play and shot an eight-footer past Devils goaltender Sean Burke just 12 seconds into the second period for a 2-2 tie.

At 7:47 Bullard blasted a 20-footer from the right faceoff circle past Burke on his short side for the winning goal.

''We can get in if we keep scoring power-play goals when it's a close game '' Bullard said. ''I feel we can make it, because the teams ahead of us have the pressure on them.''

CANUCKS 4, RED WINGS 4 (OT)

At Detroit, Greg Adams scored his second goal of the game with 6:58 remaining in the third period to lift Vancouver to the tie.

''We weren't smart in our approach tonight,'' Detroit Coach Jacques Demers said. ''We can't play like that against Minnesota on Thursday or we'll get beat.''

MINNESOTA 4, LOS ANGELES 1

At Bloomington, Minn., Gaetan Duchesne and Brian Bellows scored two goals each to give the North Stars 26 home victories this season, one short of the club record set in 1972-73. Goaltender Jon Casey made 19 saves in recording his career-high 27th victory, tying the club mark set by Gilles Meloche in 1980.

The Kings, playing without Wayne Gretzky, the NHL's leading scorer, lost

their second straight after winning four in a row. Gretzky is out with a groin injury.

#90080u0345 03/21/1990 ~United Press International
(MARCH 21) UPI - John Poindexter's lawyer plans to show videotaped testimony by former President Reagan for a jury in Washington Wednesday. In its first full day of presenting its case to the federal jury, the defense plans to begin playing the nearly eight hours of videotaped testimony Reagan gave in Los Angeles last month. On those tapes, the former president insists he did NOT know about key parts of the scandal and never ordered aides to lie.

The Transylvanian city of Tirgu Mures, Romania, was rocked by fresh violence Tuesday night. The official Romanian news agency reports dozens of people injured when a ''dialogue'' between ethnic Hungarians and Romanians escalated into pitched battles with iron bars and axes. Earlier, the provisional government... meeting in emergency session in Bucharest... condemned the violence which began Monday. It called on local authorities to put an end to Romania's worst ethnic unrest since the December revolution.

The first official day of spring brought as much as 14 inches of snow to the Northeast Tuesday. Dozens of traffic accidents occurred on snow-slicked highways... including one near Scranton, Pennsylvania, in which pop singer Gloria Estefan suffered a broken back. Estefan's tour bus was rammed by a truck as traffic was backed up because of another accident in the Pocono Mountains. Doctors say Estefan is NOT paralyzed.

-30- 1553
#90080u0350 03/21/1990 ~United Press International
(MARCH 21) UPI - Milwaukee failed to do what only the Atlanta Hawks have accomplished in the past two months: beat the Detroit Pistons.

James Edwards scored 21 points and Detroit outscored the Bucks 36-12 in the second-quarter Tuesday, posting an easy 117-96 victory. The defending championsrecorded their 12th straight victory and 25th in 26 games. The Pistons lost only to Atlanta during that span.

''We're playing pretty good right now,'' Edwards said. ''There's still a little room for improvement. I think we're about where we were last year.''

''I don't know how they blew that one game,'' Bucks Coach Del Harris said of the Pistons' Feb. 23 loss to the Hawks. ''There are few teams in the history of the NBA that have won 25 of 26.''

Detroit, 51-15, improved to 21-12 on the road, tying the Los Angeles Lakers for the best mark away from home. If the Pistons capture the NBA

title this year, they would become only the second team since 1970 to win back-to-back championships (the Lakers won the title in 1987 and 1988).

Milwaukee, playing without injured starters Jack Sikma and Greg ''Cadillac'' Anderson, made only 5 of 23 field goal attempts (22 percent) in the second quarter, allowing Detroit to take a 57-41 halftime lead.

''They started to miss some shots and we tightened up defensively in the second quarter,'' Detroit Coach Chuck Daly said.

''Obviously, they're shorthanded a couple of people and that makes a difference, but I thought we played very good defensively through pretty much three quarters,'' Daly said.

Milwaukee made 57 percent of its field goal attempts in the first quarter and led 29-21 after one period. But the Pistons used a 10-2 run to open the second quarter and tied the score 31-31 on Mark Aguirre's jumper with 8:45 left.

Detroit broke it open by scoring the final 12 points of the quarter. Joe Dumars, John Salley and Rodman scored 4 points each during the run.

Milwaukee had four consecutive turnovers in the final 2:52 of the half and was unable to take a shot.

''In the second quarter tonight, we made a lot of breaks for ourselves,'' Dumars said. ''We were in our defensive rhythm. For the last 25 to 26 games, we really haven't shot that well. But we've played good defense.''

The Pistons also battered Milwaukee on the boards in the second quarter and finished with a 48-38 advantage.

''They beat us on the boards and we didn't stand much of a chance,'' Larry Krystkowiak of Milwaukee said. ''They beat us in so many different ways and they thoroughly whipped us tonight.''

Isiah Thomas scored 19 points and Vinnie Johnson added 18 for the Pistons. Ricky Pierce scored 21 for Milwaukee in his first game after missing two contests with strep throat.

-- AROUND THE NBA --

In other games, Indiana defeated Miami 112-98, Chicago crushed Washington 122-97, Orlando upset New York 121-118, Portland overpowered Houston 120-110, San Antonio defeated Seattle 128-106, the LA Lakers outpointed Charlotte 109-97, Golden State squeaked past Minnesota 105-101 and Denver defeated the LA Clippers 119-112.

PACERS 112, HEAT 98

At Miami, Detlef Schrempf scored a season-high 29 points to help Indiana snap a five-game losing streak. Miami reserve Terry Davis paced the Heat with just 15 points.

BULLS 122, BULLETS 97

At Chicago, Scottie Pippen scored 24 points and rookie Stacey King topped his career best with 24 points, leading the Chicago Bulls to a come-from-behind victory. Ledell Eackles paced the Bullets with 31 points.

MAGIC 121, KNICKS 118

At New York, Scott Skiles collected a triple-double with 23 points, 12 rebounds and 17 assists to help Orlando snap a nine-game losing streak. Orlando's Nick Anderson finished with 29 points, while Jerry Reynolds added 17. The Knicks received 28 points from Ewing and 20 from Johnny Newman.

TRAIL BLAZERS 120, ROCKETS 110

At Houston, Clyde Drexler scored a season-high 41 points and grabbed 16 rebounds as Portland increased its winning streak to 10 games. Otis Thorpe led Houston with 27 points, while Akeem Olajuwon had 21 points and pulled down 20 rebounds.

SPURS 128, SUPERSONICS 106

At Seattle, David Robinson scored a game-high 39 points to lead San Antonio. The victory was the Spurs' sixth in seven games. Sedale Threatt had 19 points to lead Seattle, which had a four-game home winning streak broken.

LAKERS 109, HORNETS 97

At Englewood, Calif., Byron Scott contributed 21 points to lead the Lakers to victory in a game overshadowed by a half-time tribute to all-time Lakers great Kareem Abdul-Jabbar, who retired last year. Armon Gilliam led Charlotte with 25 points.

WARRIORS 105, TIMBERWOLVES 101

At Oakland, Rod Higgins, replacing the injured Chris Mullin, hit a season-high 26 points and guard Mitch Richmond added 24 to lead Golden State. Minnesota's Tony Campbell scored 34 points in a losing effort.

NUGGETS 119, CLIPPERS 112

At Denver, Alex English scored 28 points and Denver blocked a season-high 12 shots in its victory over the Clippers. Fat Lever produced his fourth triple-double of the season: 17 points, 10 assists and a game-high 11 rebounds. Danny Manning led the Clippers with 25 points.

(MARCH 21) UPI - A windup toy known as ''Riding Rabbit'' was recalled Tuesday because it may break into small parts that could choke young children. The Consumer Product safety Commission says NO injuries have been reported in connection with the toy... about 54-hundred of which were sold nationwide between January 1988 and February '89 for five dollars each. Consumers who have the rabbit toys should return them to the store of purchase to get a refund.

An intruder who boldly penetrated a nationwide computer network reportedly did so to taunt security specialists critical of ''hackers.'' A report says the intruder telephoned the newspaper Tuesday. The caller identified himself as an Australian named Dave, and said he was upset by the portrayal of hackers in a new book by Harvard University's Clifford Stoll. Federal investigators have said NO serious damage was done by the illegal intrusion into computers at dozens of institutions linked to Internet, a nationwide network.

#90080u0406 03/21/1990 ~United Press International

(MARCH 21) UPI - Howard to Murphy to winning basket worked like a charm once again for the DePaul Blue Demons Tuesday night.

Stephen Howard's follow of a Chuckie Murphy air ball with two seconds remaining lifted DePaul to a 61-59 victory over Cincinnati and into the quarterfinals of the National Invitation Tournament.

Murphy and Howard combined for the same type of last-second heroics in a victory over Notre Dame at South Bend Feb. 20. Murphy delivered the air ball, Howard grabbed it and layed it in at the buzzer.

With the score tied 59-59 and DePaul inbounding the ball with 10 seconds left Tuesday, Murphy took a pass and delivered a 3-point attempt from the top of the key that was well short. But Howard, who finished with 13 points, grabbed the rebound and banked it in for the winner. The Blue Demons' extended their Alumni Hall winning streak to 45 games.

''It's called the power Murphy play,'' said forward David Booth, who led the Blue Demons with 18 points.

''That's our last-second connection,'' Howard said.

DePaul, 20-14, will travel to St. Louis Thursday for a matchup with the Billikens. St. Louis edged Wisconsin-Green Bay 58-54 to advance.

Cincinnati finished its first season under new Coach Bob Huggins 20-14.

DePaul also received a game-high 18 points from David Booth, 15 from Kevin Holland and 11 from Murphy.

Cincinnati was led by Andre Tate, who scored 13 of his 17 points in the second half. Levertis Robinson chipped in 16 and Louis Banks 15 for the Bearcats.

DePaul last lost at Alumni Hall March 5, 1977. The Blue Demons had a 42-game winning streak at the 5,000-seat campus stadium before moving to the more spacious Rosemont Horizon in 1980. Their first-round NIT victory over Creighton marked their return to Alumni Hall.

Cincinnati scored the first five points of the second half to go ahead 30-28. The Bearcats stretched that to 34-30, their largest lead of the game, before DePaul came back to tie the score 34-34.

The teams then traded leads, none larger than four points, for the rest of the way.

Murphy nailed his third 3-pointer of the game from the left wing to put DePaul ahead 59-56 with 1:59 left. But Banks tied it with a 3-point play with 27 seconds left, and Booth fouled out on the play.

DePaul brought the ball down court and called a timeout with 10 seconds left, setting up the winning basket.

At St. Louis, Anthony Bonner scored 18 points and added 17 rebounds to lead the Billikens. St. Louis, which lost the NIT championship game last year to St. John's, used a 10-point run in the second half to erase a 29-26 halftime deficit.

In other second-round action, New Mexico nipped Oklahoma State 90-88 and Hawaii defeated Long Beach State 84-79.

At Albuquerque, N.M., Luc Longley made a 4-foot jumper with two seconds left to break a tie and lift New Mexico to the quarterfinal round. The Lobos, who have won nine of 10 games, improved to 19-12. They host Hawaii Friday.

Longley, a 7-foot-2 center, finished with 11 points, while teammates Kurt

Miller led New Mexico with 24 points and Rob Robbins finished with 23.

The Cowboys, 17-14, were led by Darwyn Alexander, who scored 19 points.

At Honolulu, Terry Houston scored a game-high 27 points and hit five free throws in the last minute to lead Hawaii to the quarterfinals. Troy Bowe had 16 and Chris Gaines and Vincent Smalls added 15 each for the Rainbows. Tyrone Mitchell led Long Beach State with 18 points and Lucious Harris added 17.

Hawaii, 25-9, set a school record with its 25th victory. Long Beach State finished 23-9.

#90080u0456 03/21/1990 ~United Press International

BEIJING (MARCH 21) UPI - Senior leader Deng Xiaoping resigned from his last remaining official post Wednesday as chairman of the State Central Military Commission, the official press reported.

Despite Deng's ostensible retirement, the 85-year-old leader still wields ultimate power behind the scenes, and has so far managed to balance rival elements within China's fractious leadership.

But Western and Chinese analysts agree that Deng's health appears to be failing and his death could ignite a power struggle.

Deng's request to retire from the largely ceremonial SCMC chairmanship was formally accepted by the National People's Congress, China's rubber-stamp Parliament, on the second day of its annual session.

''The third session of the seventh NPC today decided to accept Deng Xiaoping's resignation from the chairmanship of the central military commission of the People's Republic of China,'' said a brief report carried by the Xinhua News Agency.

Deng's resignation follows his stepping down in November as chairman of the Communist Party's Central Military Commission, the party's most powerful post, which gave him actual power over the People's Liberation Army.

His post as CPCMC head was filled by party general secretary Jiang Zemin, Deng's hand-picked successor, who has no military experience and little actual clout in the ranks.

Jiang is also expected to be named to Deng's last post of SCMC chairman as well during the congressional session.

Deng expressed his desire to resign from both posts in a letter to the party's Central Committee last September on the grounds of ''completing the succession of the older generation by the younger generation.''

The Committee formally accepted Deng's request to give up his last and most powerful party post, but his SCMC chairmanship resignation had not yet been ratified by the congress, China's nominal legislature.

A letter from the party Central Committee proposing that the congress accept Deng's request to resign from his last state post was read at Wednesday's congressional session, Xinhua said.

Real military power is held by President Yang Shangkun, second in the CPCMC line of command after Jiang, and Yang's younger brother, Yang Baibing, a CPCMC member and army political commissar.

#90080u0458 03/21/1990 ~United Press International

CHICAGO (MARCH 21) UPI - Embattled Rep. Gus Savage, D-Ill., says he has proven the ''white racist press'' wrong by winning his party's nomination for a sixth House term, defeating a candidate who many thought had a chance at an upset.

With 95 percent of the 2nd Congressional District precincts reporting late Tuesday, Savage tallied 49 percent of the vote to 45 percent for Mel Reynolds. A third candidate, Ernest Washington Jr., garnered 5 percent.

''The power is truly with the people,'' said Savage, who came under fire last year over allegations he attempted to force himself on a female Peace Corps worker during a visit to Zaire. Savage received a House reprimanded.

Savage will face Republican primary winner William Haspel in the general election next November.

Savage told a group of supporters that, if elected, he would push to make sure Chicago Mayor Richard Daley is not re-elected.

''This movement will take on Richard Daley for mayor next year ... We'll push for a black candidate ... one that is proud to be black,'' Savage said.

''We'll beat the white racist press in 1991.''

Reynolds, who conceded the election that at one point showed him winning by a modest margin, regretted the campaign took on racial overtones.

''No question that hate played a role in this. To a certain extent, it

worked,'' he said. ''I hope he is proud of himself, that he can live with himself.''

Reynolds, a former Rhodes Scholar and a Chicago educator, received the support of former Chicago Mayor Eugene Sawyer, and other Democratic leaders.

Reynolds said during his campaign that the 2nd Congressional District is plagued with problems.

The district has the single worst toxic waste problem in the state, the second highest rate of unemployment in Illinois, and the 10th worst in the entire nation, Reynolds said.

#90080u0480 03/21/1990 ~United Press International

ANCHORAGE, Alaska (MARCH 21) UPI - A jury must decide whether Joseph Hazelwood was a scapegoat for an accident that spawned the nation's worst oil spill or an alcohol-impaired skipper who gambled with the safety of his tanker and lost.

The jurors who sat through Hazelwood's nearly eight-week trial were scheduled Wednesday to begin deliberating misdemeanor charges of reckless endangerment, operating the tanker Exxon Valdez while intoxicated, negligent discharge of oil and felony criminal mischief.

Hazelwood faces up to seven years, three months in jail and a $61,000 fine if convicted.

The six-man, six-woman jury listened to seven hours of closing arguments and instructions from the judge Tuesday.

''Captain Hazelwood chose to be a gambler,'' prosecutor Brent Cole argued. ''He chose to be a risk-taker that day. He chose to sit in a bar, the Pipeline Club, most of the afternoon'' and downed several vodkas before sailing.

Hours later, after Hazelwood had turned over the helm to a mate, the Exxon Valdez smashed into Bligh Reef in the early minutes of March 24, 1989, spilling nearly 11 million gallons of oil that devastated wildlife and despoiled hundreds of miles of environmentally sensitive Alaskan coastline.

Defense attorney Dick Madson said Alaska made Hazelwood a scapegoat in what was simply ''a maritime accident, not a crime. ... There's a reason we're here today. Politics.''

The jurors, like other Alaskans, are painfully aware of the ecological and

economic damage in their state associated with the name Exxon, and Cole made sure to link Hazelwood with the company that hired him to pilot the giant tanker.

He said Exxon wanted Hazelwood acquitted, an assertion scoffed at by Madson. Cole stressed Exxon's invisible presence through its hiring of lawyers for crewmen. ''You can see the pressure of Exxon throughout this trial and you heard (from a ship captain witness) that Exxon had an interest.''

''It doesn't take a brain surgeon to see that the Exxon Corp. has an interest in seeing Captain Hazelwood get acquitted,'' Cole said.

The prosecutor said that while Hazelwood was not falling-down drunk, he was so impaired that he made a series of misguided decisions that set his loaded tanker on a course for disaster.

''When he made that choice, he risked not only the safety of the vessel but the safety of the crew,'' Cole said. ''He gambled that his drinking would not adversely affect his judgment. ... Captain Joe Hazelwood gambled and lost.''

Cole said proof of Hazelwood's alcohol-induced recklessness was that he left the bridge of the ship, sped up, turned on the automatic pilot during a detour around icebergs, and left the controls to unqualified third mate Greg Cousins and helmsman Robert Kagan, who had trouble steering.

''These errors in judgment are not merely the product of a person who was careless,'' Cole said. ''They are actions and judgments of a person whose mind was clouded by alcohol from drinking that day.

Cole noted that after the wreck Hazelwood blamed himself for not being on the bridge, telling an investigator who asked what the problem was, ''You're looking at it.''

''Absolute nonsense,'' replied Madson, recalling the unanimous recall of witnesses that Hazelwood was in control of himself before the Exxon Valdez sailed.

''A lot of things in hindsight could have been done differently, but Captain Hazelwood isn't perfect and he made mistakes, but ... were they the kind of errors in hindsight that rise to the level of criminal offense?'' Madson asked.

Madson suggested Hazelwood should have remained on the bridge but said no law required him to stay.

He argued that crewmen not on trial made the critical mistakes, stressing

that Cousins assured Hazelwood he was comfortable piloting the ship on his own.

The only blood test, taken nearly 11 hours after the grounding, showed Hazelwood had a 0.061 blood alcohol level - below the state's legal limit of 0.10. But Cole estimated Hazelwood's blood level at 0.14 at the time of the accident after having five or six vodkas before sailing.

Madson said, ''There's no question about it. There's no dispute. They drank in that club. And Captain Hazelwood may have had as many as three drinks, four at most.''

Several witnesses said they smelled alcohol on Hazelwood's breath, but Madson said no one found the skipper intoxicated or impaired: ''In one solid uniform voice they said, 'Not impaired.' The state's going to have you disregard 21 people to say he was guilty. Now that is absurd.''

Waving a picture of the gangway leading to the tanker, Madson told jurors, ''That's the toughest sobriety test you're ever going to see.''

If no crew members condemned Hazelwood for being drunk or impaired or acting recklessly - the crew supported the skipper, his judgments and his actions - Cole said that was because they were loyal to Hazelwood to remain in good standing with Exxon.

#90080u0528 03/21/1990 ~United Press International

CHICAGO (MARCH 21) UPI - Secretary of State Jim Edgar soundly defeated two opponents in the Republican gubernatorial primary, while Sen. Paul Simon, D-Ill., and Rep. Lynn Martin, R-Ill., emerged from uncontested primaries to battle each other for a Senate seat in November.

Rep. Gus Savage, D-Ill., who scorned the ''white racist press'' for predicting his political demise, staged a comeback win Tuesday over former Rhodes scholar Mel Reynolds in the closely watched 2nd Congressional District primary.

Savage totaled 39,178 votes, or 51 percent, to Reynolds' 33,190 votes, or 43 percent. A third candidate, Ernest Washington Jr., tallied only 5 percent.

''The power is truly with the people,'' Savage said, vowing to lead his supporters in a push to unseat Chicago Mayor Richard M. Daley.

''This movement will take on Richard Daley for mayor next year. ... We'll push for a black candidate ... one that is proud to be black,'' Savage said. ''We'll beat the white racist press in 1991.''

Edgar cleared the first hurdle in his bid to succeed his political mentor, Gov. James R. Thompson, by thrashing conservative Steven Bear and Dr. Robert Marshall in the GOP primary. Edgar was the favorite to represent the GOP in the gubernatorial race against Democratic Attorney General Neil Hartigan.

With 96 percent of the state's 11,873 precincts reporting, Edgar had 458,581 votes, or 63 percent, compared with Baer's 248,299 votes, or 34

percent. Marshall totaled 26,472 votes, or 4 percent.

''We've had a spirited primary and now it's time as Republicans to close ranks and work for victory on Nov. 6,'' Edgar told supporters.

Illinois elections officials estimated a turnout of 25 percent of the state's 6 million registered voters.

Baer aimed his message at anti-abortion, anti-gun control voters, while Edgar waged a low-key and confident campaign and received an endorsement from the White House. Both are trying to succeed four-term Gov. James Thompson, a Republican.

The senate primary was a formality for Simon and Martin as the two swept to uncontested victories.

Simon, seeking his second term in the Senate, and Martin, who has represented the northwest corner of the state in the U.S. House since 1981 were expected to wage a bitter showdown for the right to be Illinois' junior senator.

The race is considered among the six toughest nationally by the GOP leadership, which has targeted Simon for defeat.

A recent poll gave Simon a 20-point lead over his challenger, but that was a slimmer lead than the one he held last August.

In the 9th Congressional District on Chicago's North Side, Rep. Sidney Yates, D-Ill., 80, handily defeated Alderman Edwin Eisendrath, 32, who was cited for unfair campaign tactics for distributing campaign literature that highlighted their age difference.

In the 16th District of Northern Illinois, where Republicans have ruled for the past 150 years, John Hallock Jr. defeated Donald Manzullo in that primary race.

#90080u0535 03/21/1990 ~United Press International

(MARCH 21) UPI - Around the world... around the clock... U-P-I brings you the world, next:

President Bush today welcomes Polish Prime Minister Mazowiecki to the White House, where the Polish leader will seek a greater role for Poland in the German re-unification process. Mazowiecki wants assurances that Germany makes NO future claims on German territory acquired by Poland after World War Two.

Jurors in the Iran-Contra trial of former national security adviser John Poindexter today will begin viewing nearly eight hours of videotaped testimony from former President Reagan. Reagan will insist in his testimony that he did NOT know about key parts of the scandal and NEVER ordered aides to lie.

The six-man, six-woman jury in the trial of Exxon Valdez skipper Joseph Hazelwood begins deliberations today in Anchorage, Alaska. Hazelwood is charged with reckless endangerment, operating the tanker while intoxicated and other negligence charges in connection with the nation's worst oil spill.

Israeli President Herzog has given Labor Party chairman Shimon Peres the mandate to form Israel's next ruling coalition. Peres has three weeks before reporting back to the president on his efforts. If Peres fails, Herzog can choose another Knesset member to attempt forming a ruling coalition.

Top Democratic lawmakers introduced a bill yesterday that they say is aimed at getting foreign companies to pay their fair share of taxes in the United States. Representatives Dan Rostenkowski and Richard Gephardt say the measure is designed to make sure American firms do NOT shoulder an unfair tax burden.

-30- 1792

#90080u0537 03/21/1990 ~United Press International

ANCHORAGE, AK (MARCH 21) UPI - An Exxon manager announced Prince William Sound was returning to normal following the nation's worst oil spill, leading Alaska's top environmental official to present a grim rebuttal: an oily eagle carcass.

Dennis Kelso, the Alaska commissioner of the Department of Environmental Conservation, said he felt compelled to show evidence to the contrary when Exxon cleanup general manager Otto Harrison told an oil spill operations meeting Tuesday night that Prince William Sound was recovering.

Kelso had a box placed on a table a few feet from Harrison. The box contained a large oil-covered rock from a beach cleaned by Exxon and a dead bald eagle, both in plastic garbage bags.

The brief but tense event occurred in the Anchorage Federal Building at the monthly meeting of Exxon Valdez oil spill operations committee, chaired by the federal on-scene coordinator, Coast Guard Rear Adm. David Ciancaglini.

The grisly eagle remains were carried to the front of the full conference room where Harrison, Kelso, Ciancaglini and three other officials from Exxon, the state and Coast Guard sat in silent anticipation.

Kelso said he picked up the eagle on a beach several hours earlier during a visit to shores hit by nearly 11 million gallons of Exxon's oil after it gushed out of the stricken Exxon Valdez when it smashed into Bligh Reef.

Ever since the March 24, 1989 oil spill, the nation's worst, Exxon has feared environmentalists would invade a news conference or other gathering to confront Exxon officials with dead oily animals.

Partly out of fear that this would happen, Exxon instituted tight security in Valdez last year and, in one incident, police wrestled with a Greenpeace activist suspected of smuggling an oily otter into an Exxon news conference to make a scene. Instead, the woman had dirty laundry in her backpack.

But Kelso, who heads the state department that monitors Exxon, did what the activists were never able to pull off - arrive at a formal oil spill meeting with key officials and take center stage to present the oiled creature.

However, Kelso kept the eagle inside the bag and made it clear that he chose to bring up the eagle and the rock only after Harrison opened the meeting with a series of pronouncements about how the environment was recovering, fishing and tourism would return to normal, shorelines were getting clean, and wildlife was no longer being stressed by the disaster.

Kelso said Exxon's point of view differed from reality, and he asked an assistant to carry the box to the front of the meeting room, identifying its contents as an endangered species and a rock from a beach scoured both by Exxon and stormy waves.

Kelso noted that the rock came from the surface of the beach and was not dug up from the substrate where oil is known to persist. He said the eagle carcass had been partly scavenged but was intact and showed obvious signs of oil on the feathers. Both came from Knight Island. Kelso said Exxon has to realize that Alaska wants the oil removed and the environment restored.

Harrison ignored the presentation of the eagle and the rock, and said Exxon recognized that oil lingered on Alaska beaches and that was why the oil giant had agreed to resume the cleanup in May.

Kelso acknowledged that he did not know when the eagle died or how, but he said it was found on an oiled beach with crude oil on its feathers. The carcass was turned over to the U.S. Fish and Wildlife Service.

More than 150 bald eagle carcasses were found after the spill and federal wildlife officials said many more eagles abandoned their nests in the area of the spill, causing reproduction to drop by an estimated two-thirds in the spill impact zone.

Wildlife officials also tallied 36,471 seabird bodies found after the spill and estimated that the oil killed between 90,000 and 270,000 seabirds, making this deadliest spill in history.

#90080u0540 03/21/1990 ~United Press International

(MARCH 21) UPI - Spring's first full day bore an uncanny resemblance to winter in the East, with temperatures diving below freezing in southern states Wednesday, wet snow making New England's roads sloppy and flurries decorating the mid-Atlantic.

High pressure made southerners shiver and prompted frost and freeze warnings throughout the region, although skies were relatively clear. The mercury dropped to 31 in Knoxville, Tenn., and farmers across the Carolinas and Virginia were warned about possible damage to crops.

Flooding from rains that lashed the region earlier in the week continued to make trouble for Selma, Ala., where state officials said as many as 1,000 people could be evacuated before the waters recede.

Two rain-swollen rivers in the Florida Panhandle - the Choctawhatchee and Apalachicola - continued rising Tuesday, and the Choctawhatchee crested at 9 feet above flood stage. The entire population of Caryville, 800 people, has been evacuated, said Washington County Administrator Roger Hagan.

Rain fell in much of New England, where up to 14 inches of heavy, wet snow left thousands in Vermont without power, spawned dozens of traffic mishaps and caused the Connecticut River to overflow its banks.

Although rain fell in much of the region, many areas were blanketed with snow, including the village of Williamstown, Vt., where 14 inches accumulated, the National Weather Service reported.

An estimated 8,500 customers of the Central Vermont Public Sercice Corp. were left without power from two to five hours Tuesday morning and afternoon.

Meanwhile, motorists were having a hard time negotiating snow-slick roads in central Vermont, with at least 50 cars leaving area highways, Vermont State Police dispatcher Susan Nadeau said.

In nearby Amherst, Mass., the rains triggered an annual spring-mating rite for dozens of spotted mole salamanders. Each spring, the love-struck amphibians leave their holes in an Amherst hillside and cross Henry Street to get to mating ponds across the road.

''It's about 10 days earlier than it's been in the last decade, but for them to move this early is not at all out of line,'' said Lisa Bertoldi, spokeswoman for the Hitchcock Center for the Environment in Amherst.

Nancy Nolke, who works for Vermont's Sugarloaf ski resort said the area got about 2 inches of snow overnight, and said several more inches were expected early Wednesday. She said 39 of the ski resort's 70 trails were open and operating.

Flurries fluttered over most of eastern Pennsylvania early Wednesday, while the western half of the state saw mostly cloudy skies. Temperature lows were in the teens and 20s in western areas, and in the upper 20s in eastern areas.

West Virginia, Maryland and southern New Jersey also reported light snow and overnight lows in the 20s.

In the West, hot, dry temperatures started to cool. Los Angeles, which hit a record 90 degrees Tuesday, breaking the previous mark set two years ago, cooled into the mid 60s overnight and temperatures were expected to hit the mid 80s under mostly clear skies. Elsewhere, California'a summer-like temperatures were cooling under scattered clouds and light winds, which dropped the mercury into the 60s and 70s.

Montana east of the divide had partly cloudy skies, with areas of low clouds and fog near the Canadian border. West of the divide was partly cloudy with lows in the 30s.

-30- 3643

#90080u0541 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Republican City Councilwoman Susan Molinari was elected to succeed her father in Congress, and Democratic State Assemblyman Jose Serrano won the seat vacated by a jailed Wedtech scandal defendant in one of the nation's poorest urban districts.

With all precincts reporting in the 18th Congressional District in the Bronx, Serrano won by a landslide of 92 percent, or 26,719 votes, compared with Simeon Golar, who polled 8 percent, or 2,027 votes.

Serrano will be the sole voting Puerto Rican member of Congress.

With all precincts reporting in the 14th Congressional District on Staten Island, Molinari tallied 60 percent, or 45,682 votes, compared with her closest rival, Democrat Robert Gigante, who had 34 percent, or 25,916 votes.

''I pledge tonight to concern myself with the quality of life issues that

we've worked so hard on for the past four and a half years,'' said Molinari.

The weather figured heavily in both contests as chilly rain kept turnout low.

Serrano joked that despite ''the rainiest election day'' in memory, ''Here we are, a little bit damp, and a lotta bit happy.''

In the South Bronx, one of America's poorest urban districts, voters were asked to choose a successor to convicted Rep. Robert Garcia, D-N.Y., who was jailed in January for his part in the Wedtech scandal.

The race pitted the Democratic favorite, Serrano, against the Republican Golar, a former judge and city official in the administration of Mayor John Lindsay.

On Staten Island, Molinari, 31, the sole woman on the council, prevailed over lawyer Gigante, 41, in the race to succeed Molinari's father, a five-term House Republican.

The campaign was a test of wills between national Republicans eager to hold onto the seat and Democrats hoping to win it for the first time since the elder Molinari was first elected in 1981.

In Washington, a House historian said Molinari becomes the second woman in history to succeed her parent in the House. The first was an Illinois woman, Winnifried Huck, who was elected in 1922. Molinari also becomes the youngest current member of the House.

Serrano and Molinari will serve out the nine months remaining on the two-year terms of their predecessors.

Both congressional seats became vacant in January, when Garcia began serving his sentence at a federal prison in Florida following his criminal conviction and Molinari took over as Staten Island borough president.

Serrano won the backing of the county Democratic organization and organized labor. He also won endorsement of all the city's major newspapers as well as the support of Latino officials.

But just as important in the demographically shifting district, Serrano also won the enthusiastic backing of two top black leaders - Mayor David Dinkins and Jesse Jackson.

Dinkins and Jackson actively campaigned for Serrano, with the mayor appearing in the district as recently as Sunday in a last-ditch bid to urge black residents to choose the Hispanic Democrat over Golar, who is

black and Republican.

(MARCH 21) UPI - Negotiators for Greyhound and its striking drivers have been talking to federal mediators but not to each other and remained far apart in efforts to cement a contract that could bring the employees back to work.

''We're in touch'' with both sides by telephone but no ''substantive conversations'' were held, Paul Stuckenschneider of the Federal Mediation and Conciliation Service said Tuesday. ''We'll be suggesting or calling a meeting as soon as we get some indication that there might be some movement (by either side).''

Stuckenschneider, who participated in negotiations between the two sides in Tucson, Ariz., last weekend, said mediators explored several issues with each side to ''see if some alternative solutions can be developed.''

Wages and benefits have been among the hurdles since the strike began March 2, involving many of Greyhound's 6,300 drivers and 3,000 other union employees.

Earlier Tuesday, a replacement driver hired by Greyhound was turned over to the U.S. Army on a warrant charging him with desertion. Martin A. Shaw, 28, was arrested when police stopped the bus he was driving about 5 a.m. Saturday for a routine log check on U.S. 101 near Crescent City, Calif.

Army officials transferred Shaw from the Del Norte County Jail, where he was being held on a federal fugitive warrant accusing him of military desertion, to Fort Ord, Calif., for processing, a spokesman said.

Greyhound hired Shaw the day the strike began but had not finished his background review, Scarpino said. ''We didn't know he was an Army deserter '' he said.

Shaw disappeared May 28, 1987, from the 364th Supply and Service Co. at Fort Bragg, N.C., a spokesman said. He was placed on the deserter rolls on June 27, 1987.

The weekend talks in Tucson collapsed when Greyhound negotiators accused the union of refusing to budge on its demands. Greyhound said the company has already offered ''all it can afford'' and that the union demands ''three times as much.''

Late last year Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year.

Union members, citing a 22 percent pay cut they took when the company was sold in 1987, rejected the offer.

Greyhound has hired about 1,000 non-union replacement drivers in an attempt to return the strikebound company's operations to a near-normal timetable, angering the union.

#90080u0569 03/21/1990 ~United Press International

TAIPEI (MARCH 21) UPI - President Lee Teng-hui, running unopposed, was elected to his first full six-year term by the National Assembly Wednesday amid increased pressure for greater democracy in Taiwan.

More than 3,000 students, 61 one of them on a hunger strike, gathered for the sixth straight day, demanding a timetable for political reform.

Lee sought to defuse tension Wednesday by promising to press ahead with political reform, saying the government would sponsor a national forum to discuss changes sought by the protesters. He said he would announce more concrete policies at his inauguration May 20.

''I comprehend the significance of the high expectations of the people and the huge responsibilities facing me,'' Lee said in a statement released by the official Central News Agency. ''I will dedicate myself in these next six years to establishing a constitutional democracy, developing the economy, stabilizing social order and elevating cultural life.''

Election officials said a total of 641 of 668 voting members of the National Assembly cast ballots for Lee, the official candidate of the ruling Kuomintang, or KMT, at the ornate Chungshan Building, which was besieged by protesters.

Election chairman Hsieh Lung-shen said 715 members of the National Assembly were eligible to vote for president. He said 27 ballots were declared invalid and the remainder did not vote.

The National Assembly will vote for vice president Thursday. Lee's running mate, Li Yuan-zu, also standing unopposed, was expected to be easily elected.

Protesters are seeking an overhaul of the National Assembly, dominated by members elected 40 years ago on the China mainland and kept in office to bolster Taiwan's claim to be the legitimate government of all of China.

Some 250 opposition protesters broke the car windshields of three assemblymen en route to the voting site, preventing them from reaching the Chungshan Building to cast their ballots, witnesses said.

Lee, formerly Taiwan's vice president, assumed the presidency following the January 1988 death of President Chiang Ching-kuo. The election Wednesday was his first for a full six-year term.

Taiwan's main opposition party, the Democratic Progressive Party, did not field a candidate in the election because it does not have enough assembly members to make an endorsement.

Lee's vote total was seen as a victory for party discipline in the KMT, which was threatened with a split shortly before the election in reaction to the president's dictatorial style of leadership.

The KMT has governed Taiwan since the Nationalists lost the Chinese civil war and fled the mainland in 1949.

Chiang Ching-kuo was the son and heir of the late Generalissimo Chiang Kai-shek, the founder of modern Taiwan.

Top party leaders, disillusioned with Lee's strong-arm tactics, last week threatened to run an alternative electoral slate, but a behind-the-scenes compromise was reached and KMT stalwarts Wednesday praised Lee.

''Lee Teng-hui is a very honest ... man,'' said Hsu Yi-hsi, an 80-year-old mainland-elected assemblyman. ''He has run the country according to his ideals.''

#90080u0593 03/21/1990 ~United Press International

ISLAMABAD, Pakistan (MARCH 21) UPI - The pro-Soviet Afghan government has sentenced to death a number of military officers arrested during a massive crackdown against those suspected of involvement in the recent coup attempt, Western diplomatic sources said Wednesday.

They also reported Afghan guerrillas have stepped up operations against government troops in several areas following a winter lull in fighting.

The guerrillas, based mostly in Pakistan and backed by the United States and some Middle East nations, have failed to capture any major cities or towns despite the Soviet withdrawal last year and need a victory to boost their contention they are still capable of defeating the Kabul regime.

The March 6 coup attempt against President Najibullah was led by the former defense minister, Gen. Shah Nawaz Tanai, and supported by Moslem fundamentalist guerrilla leader Gulbuddin Hekmatyar. Tanai and about 20 other generals fled to Pakistan the day after the attempt failed.

The Afghan government announced Sunday it had expelled 24 members of the Central Committee of the ruling People's Democratic Party of Afghanistan for involvement in the revolt. Most were members of Tanai's ''Khalq'' faction of the party, which has been bitterly opposed to Najibullah's ''Parcham'' wing.

The diplomatic sources said only three of those named, Tanai, former Air Force chief Abdul Qadeer and former Central Committee secretary Niaz Mohammad Mohmand, have escaped. They said the others, including former ambassador to Moscow Sayed Mohammad Gulabzoi, were in prison in Kabul.

''Multiple sources say the wave of arrests in Kabul is continuing,'' one source said. ''Khalqi air force officers, and any officer from Tanai's home town in Paktia Province, are reported to be particular targets.

''Trials of those arrested are already underway, with death sentences already handed down to a number of army and air force officers, including generals.''

The sources also reported that although winter weather continues in most of Afghanistan, the guerrillas have begun spring combat operations in many areas.

They said about 300 guerrillas seized a government post near Sarobi, about 30 miles east of Kabul, on March 10, killing 20 soldiers and capturing 70 others.

Guerrillas also overran a number of posts near the Wardak Province capital of Maiden Shahr, about 20 miles southwest of the capital, in a two-pronged assault March 11, the sources said. They said government counterattacks have slowed the offensive but said fighting is continuing in the area.

Resistance forces also launched coordinated assaults against security posts around western Herat city, killing 75 troops, and attacked a government convoy in the area, destroying several armored personnel carriers, the sources said.

The Moslem guerrillas have been fighting the Kabul government since 1978, when a coup brought the first of series of communist rulers in Kabul. The Soviet Union invaded Afghanistan in 1979 to support the government against the guerrillas, but withdrew its more than 100,000 troops in February 1989.

#90080u0600 03/21/1990 ~United Press International

CAMBRIDGE, MA (MARCH 21) UPI - The School Committee voted 4-3 Tuesday night to allow a high school health center to dispense condoms to students in an effort to curb the spread of AIDS.

Students at Cambridge Rindge and Latin High School will not need parental permission to receive the birth control devices but will be required to receive sex counseling with their first condom.

The vote followed a survey last year indicating that while more than half of the school's students have engaged in sexual intercourse, only about one quarter of them knew condoms could help prevent the spread of the AIDS virus.

A group of students in January began distributing envelopes containing condoms and AIDS prevention literature, prompting a heated public forum on the issue March 13. The School Committee said then it would make a decision on the matter.

The condoms are to be distributed by the school's teen health center, which is administered by the city Commission of Health and Hospitals. The commission unanimously recommended the program at the March 13 forum.

The 2,200-student Cambridge Rindge and Latin is the city's only public high school.

The counseling, which is to be available whenever a student requests a condom, is to begin immediately. The School Committee did not determine when the condoms would be made available.

Students receiving condoms were to be educated in methods of avoiding AIDS including abstinence, as well as the proper use of condoms and their differerent types.

Some School Committee members expressed concern that the program could be the basis for legal action on the part of students' parents, said Bert Giroux, director of public information for the Cambridge School Department.

They were overruled by other members arguing such action was unlikely because city health centers already distribute the devices and have not been sued.

#90080u0650 03/21/1990 ~United Press International

GENEVA (MARCH 21) UPI - Boy Scout units are reappearing in the Soviet Union after decades of pre-glasnost prohibition, the World Scout Bureau reported Wednesday.

''After the rebirth of Scouting in several East European countries there is also some news in the Soviet Union,'' the world coordinating organization said in its latest World Scouting newsletter.

''Membership in the official youth organizations is declining sharply and other organizations, including Scouting, are beginning to form in some areas,'' it said.

''Scout organizations have been formed in the Baltic republics of Estonia, Latvia and Lithuania,'' the newsletter said. The organizations were banned when the Soviet Union annexed the Baltic states in 1940.

''Elsewhere in the USSR, there are reports of Scout groups forming in Georgia, Siberia and the Ukraine,'' it said. Those are the first since the days of some Scouting activity in Czarist Russia.

''Faced with the realization that the needs and aspirations of young people are not being met, Soviet officials are taking a closer look at the world's largest voluntary youth movement,'' the world body said.

It said the Soviet Committee of Youth Organizations, known as KMO, has established contacts with Scout organizations in the United States, Canada and Western Europe.

''The KMO is also expected to send representatives to the World Scout Conference in Paris in July and a youth exchange program is planned in July and August between the Scouts in the United Kingdom and young people in the USSR,'' it said.

Founded in 1908 by Lord Baden-Powell, a British general, the Scouting movement counts more than 16 million members in 150 countries and territories.

#90080u0731 03/21/1990 ~United Press International

(MARCH 21) UPI - Polish Prime Minister Mazowiecki is in Washington today for meetings with top U-S officials... including a meeting with President Bush at the White House.

A senior Bush administration official says Mazowiecki's visit is a milestone toward ''a more friendly relationship'' with the United States.

Mazowiecki says he plans to brief U-S officials on economic issues and propose to Bush a greater role for Poland in German re-unification talks. But the Bush administration reportedly is cool to the idea.

Last week, West and East Germany and the four World War Two allies agreed to give Poland a seat at their ''two-plus-four'' unification talks. Poland has a stake because much of present-day Poland was German territory in 1939.

The German question is so unsettling for Poland that Warsaw has indicated it may keep Soviet troops on its soil as a hedge against German intentions.

West German Chancellor Kohl has renounced German claims on Polish territory ''either now or in the future.''

On the economic front, U-S officials say a massive infusion of Western aid and technical assistance has begun to satisfy the acute need for help that existed just months ago.

The lines have been drawn for November's balloting in Illinois.

G-O-P gubernatorial candidate Jim Edgar followed analysts' predictions by defeating two opponents in yesterday's primary. His victory sets up a showdown with Democratic state Attorney General Neil Hartigan.

In one of the day's most closely watched races, it appears that incumbent Democratic Representative Gus Savage has scored a narrow win over fellow Democrat Mel Reynold in the 2nd Congressional District.

Savage has gained notoriety in the past for repeated accusations that his detractors are racists. His opponent is a former Rhodes Scholar.

New York election officials say miserable weather caused yesterday's low voter turnout.

Those who did cast ballots in the South Bronx 18th Congressional District overwhelmingly supported Democratic State Assemblyman Jose Serrano. Serrano received 92 percent of the vote and will become the first voting Puerto Rican member of the House.

He assumes the seat of convicted Wedtech scandal figure Democratic Representative Robert Garcia.

Meanwhile, the G-O-P held onto its seat in the 14th Congressional District where Republican City Councilor Susan Molinari got the nod from voters to assume the seat her father vacated.

#90080u0743 03/21/1990 ~United Press International

(MARCH 21) UPI - Lawyers for John Poindexter today plan to show jurors in his Iran-Contra trial video-taped testimony by former President Reagan.

Reagan gave the nearly eight-hours of testimony under oath last month in Los Angeles after U-S District Judge Harold Greene ordered him to take the stand.

Poindexter's lawyers hope Reagan's testimony will support their claim that Poindexter was only doing Reagan's bidding in using profits from covert arms trade with Iran to support the activities of Nicaraguan Contras.

Transcripts from Reagan's testimony indicate that Reagan did wish the Contra guerrillas to survive despite a congressional embargo on military aid in 1985. But Reagan denied authorizing illegal actions to secure such a goal.

The prosecution rested its case yesterday, arguing that Poindexter was the mastermind behind the entire affair.

The retired rear admiral is charged with five felony accounts of lying to Congress and then trying to block its probe of the scandal.

Pop singer Gloria Estafan is reported in stable condition today after suffering a back injury in a traffic accident in Pennsylvania.

Officials say the 32-year-old Estefan, the lead singer of the Miami Sound Machine... was sleeping on a bunk when a tractor-trailer hit the rear of the group's private bus during a light snowstorm about 20 miles from Scranton.

Estefan reportedly suffered a broken vertebra in the center of her back. Doctors say she will be able to make a complete recovery.

Dr. William Pfeifer of Community Medical Center in Scranton said the singer is ''NOT paralyzed in any way, shape or form.''

In Miami, Estafan's brother-in-law, Jose Estefan, says doctors gave her a choice of treatments- either surgery or six months in a cast. A spokesman for Estefan in Los Angeles confirmed that she may need corrective surgery.

Five members of the entourage, including the singer's husband and son, also were injured... but NONE seriously.

Estefan and the Miami Sound Machine won the American Music Awards' 1989 favorite pop-rock duo or group award.

#90080u0752 03/21/1990 ~United Press International

CLEVELAND (MARCH 21) UPI - Ozzie Newsome, the leading career pass-catcher among tight ends, reportedly has decided to return for a 12th season with the Cleveland Browns.

The Plain Dealer said Wednesday Newsome made the decision after a lengthy

telephone conversation Tuesday with owner Art Modell. The newspaper said an announcement was expected Wednesday or Thursday, when Newsome returns from Florida.

The decision is not unexpected. Despite indications 1989 would be his last season - and having a ''day'' in his honor at the team's last regular season home game - Newsome left the door open, never saying he would definitely retire.

The Plain Dealer said he turned down an offer at the end of the season to join the coaching staff at Alabama, his alma mater.

Friends said Newsome decided to come back primarily for two reasons:

-One, the team appears to be a Super Bowl contender and Newsome badly wants to cap his career with an appearance in the game.

-Two, the Browns have hired Jim Shofner as offensive coordinator and the two are friends from Shofner's time as quarterback coach with the team from 1978-1980.

Modell refused to confirm or deny Newsome's decision.

''He is leaning very heavily in that direction (returning for 1990),'' Modell said Tuesday night. ''He can be very valuable in our new offense. We will have an announcement very shortly.''

A first-round draft choice in 1978, Newsome has caught 639 passes for 7,740 yards and 45 touchdowns, ranking him fifth on the NFL's career list - first among tight ends. He has not fumbled in his last 534 attempts, dating back to 1980.

Coach Bud Carson said he's encouraged Newsome to come back for another season.

''Some players start going downhill at his age, but not Ozzie,'' Carson said. ''He's one in a million. He has a lot of good football left.

''We didn't get the ball to him enough last season. We will under our new offense.''

#90080u0884 03/21/1990 ~United Press International

(MARCH 21) UPI - Stock prices surged 1.6 percent for their pest performance in more than three weeks Wednesday on the Hong Kong Stock Exchange.

The blue-chip Hang Seng Index, which gained 8.64 points Tuesday, climbed 46.89 points to 2,926.92.

Prices were higher across the board with financials gaining 19.02 points, utilities up 33.76, industrials climbing 47.53 and property stocks closing up 116.45 points.

Turnover amounted to 1.29 billion shares, up from the 932.32 million shares changing hands Tuesday.

Elsewhere in Asia, banks, major businesses and all financial markets in Tokyo were closed Wednesday for Vernal Equinox Day, a national holiday. Trading will resume Thursday.

In Australia, stocks closed lower in light trading on the Sydney Sharemarket following a sharp drop in the value of gold on global markets.

The key All Ordinaries Index, which slipped 2.9 poinst Tuesday, fell 8.3 points to 1587.7.

Turnover was 75.1 million shares, down from the 89.8 million traded Tuesday.

#90080u0909 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - President Bush is walking a political tight rope in dealing with the tranforming communist world, and trying to buy time.

After years of taunting the Soviet Union to free the ''captive nations'' - Lithuania, Latvia and Estonia - the president is now urging the peoples of those countries that were annexed by the Soviets as the result of the Hitler-Stalin pact to hold their horses in the drive for independence.

Bush has to reassert the American policy of self determination when it comes to those three Baltic countries whose takeover has never been recognized by the U.S. government. And yet there is a wish that it wasn't happening all at once with the disintegration of the Soviet empire.

The president does not want to do anything that would destabilize the Soviet Union or President Mikhail Gorbachev's government at a time when he is trying to move his country out of rigid totalitarianism, and even to flirt with the idea of a free economy.

The United States does not know what the Soviet intentions are toward the three nations that have had continued diplomatic ties with the United States and even embassies in Washington, although few believed they would

ever become independent again.

But this is the moment of truth. The United States is withholding formal diplomatic recognition until the Lithuanians gain control of their own territory. That may take some doing since it appears that Gorbachev apparently will move forcefully to stop the secessionist movement.

The new Soviet Parliament is expected to take up the question of secession. But right now that is on hold.

So it's don't-rock-the-boat time. Bush is interested in keeping stability in Europe in this period of historic change. Gorbachev is worried that the Soviet Union will break up further with other republics deciding to go their own way. The international cartoonists are already reducing the superpower to the Republic of Russia with Moscow as its seat.

Nationalism and ethnic rivalries, pent up for so long, are rearing their heads throughout Europe.

Gorbachev has his work cut out for him. To keep his image as a peacemaker who triggered the undoing of communism and held back the Soviet Army to permit free elections in the satellites, he must avoid use of force.

His perestroika and glasnost reforms have led to the problems of freedom that he now confronts. Perhaps he did not foresee that a little bit of freedom is a dangerous thing - for dictatorships.

But now he has the problem of reconciling his hopes for democratic changes to continue while holding his vast country together.

A house divided against itself cannot stand. And it will take a special poliitcal greatness for Gorbachev to solve his problem. For the time being the ideal for him probably would be if he could sell the dissident republics on a loose federation with some ties to Moscow, but with most of the decision making in the hands of locally elected officials.

He would have to show the republics that it is in their interest to maintain their affiliation with the Kremlin.

Meanwhile, the United States is a bystander, encouraging change and also peaceful solutions to knotty problems.

A civil war in the Soviet Union would be a tragedy at a time when it appeared that the remarkable revolution de-communizing Europe would continue peacefully.

Still, the Russians have to face the breakup of the Warsaw Pact and the questionable loyalty of nations forced into their sphere after the war;

that in reality they were only standing in a house of cards.

#90080u0950 03/21/1990 ~United Press International
BONN, West Germany (MARCH 21) UPI - East German conservative leaders fresh from their electoral victory were set to travel to Bonn Wednesday for crucial talks with Chancellor Helmut Kohl, in which they may discuss proposals for German reunification next year.

The officials were also expected to discuss plans for the formation of a coalition government in East Germany, where the conservative Alliance for Germany took 48.15 percent of the vote in Sunday's elections - just short of a majority.

The East German party leaders also were to meet with West German Finance Minister Theo Waigel and other officials of Kohl's Christian Democrats, who back the Alliance for Germany.

Lothar de Maiziere, 50, who heads the largest of the three alliance parties and is likely to become his country's first non-communist prime minister, will head the East German delegation at the talks scheduled to start Wednesday night.

Senior party sources in Bonn said the conservatives from both sides of what once was the Iron Curtain would probably discuss a proposal for reunification on June 17, 1991 - which is celebrated annually in West Germany as ''the Day of German unity.''

The suggestion was made Tuesday by Wolfgang Boetsch, a senior member of Kohl's Christian Democratic Union.

Kohl favors swift reunification of the two states through East Germany's accession to the West German federal republic.

Boetsch suggested the West German Parliament need not be dissolved and that all-German elections will not be needed for reunification.

Instead, East Germans could vote for additional seats in the West German Parliament. Under the proposal, East Germany would have 144 deputies and its larger neighbor would retain the 519 parliamentarians it now has.

The officials will also discuss plans for the formation of a coalition government in East Germany.

De Maiziere established contacts with the small East German liberal alliance Tuesday after the much larger Social-Democratic Party turned down suggestions it participate in a broad coalition.

Waigel's scheduled participation in the talks seemed to indicate the officials will discuss plans for economic and monetary unification by July.

Sunday's elections, the first fair ballot in the state's history marked the end of 40 years of Communist rule and indicated strong endorsement by East Germans of Kohl's plans for swift reunification.

Kohl has said it was essential that progress is rapid to halt a massive exodus to West Germany that is draining East Germany's already-ailing economy. So far this year almost 150,000 East Germans migrated to West Germany.

The West German government said Tuesday it will cut financial benefits that East German immigrants now receive.

The West German interior ministry said the number of migrants had started dropping and only about 1,100 had arrived in West Germany Tuesday, 400 fewer than the previous day and about half the daily average for February.

#90080u0960 03/21/1990 ~United Press International
(MARCH 21) UPI - The Census Bureau's $2.7 million effort to count America's homeless in subways, shelters, abandoned buildings and beaches went ''very well,'' with only one report of violence against two of the army of 15,000 counters, a spokeswoman said Wednesday.

But sub-freezing weather in many of the nation's largest urban cities filled shelters to capacity early in the evening and forced the bureau to add a second night to its unprecedented effort.

And in some places shelter workers waited for counters who never showed up.

Census spokeswoman Rhea Farberman said she did not yet have a definitive list of cities where a second night of counting would take place but said, ''It's safe to say there will be a number.''

''It depends on how the weather played,'' she said. ''There were places where, when our enumerators got there, were already filled to capacity and closed. We were ready for this and this is a contingency plan.''

Dubbed ''Street and Shelter Night,'' the unprecedented effort late Tuesday and early Wednesday was the opening of the Census Bureau's 1990 count - the massive, once-every-10-years tabulation of all people living in the United States and which federal officials claim will be the most comprehensive in its 200-year history.

''Overall, it went very well,'' said Farberman. ''We had one report of a robbery. It was fairly minor. There were no injuries. It was in Fort Lauderdale, Florida. A team of two was robbed at knife-point of a watch and a ring and a small amount of cash. They reported the incident to the police.''

Traveling in teams, the paid counters wore bright, white vests and carried two-way radios while searching out those in 11,000 conventional shelters and run-down motels and hotels.

Many more sought out the familiar street sights of the destitute pressed to hissing steam grates or stuffed inside wrappings of blankets, plastic and weather-beaten cardboard.

Others checked desolate hideouts beneath the concrete and steel of bridges and elevated highways, dank subway and bus stations and abandoned

buildings.

Their orders were to count the homeless even if they had to estimate such facts as age, race and sex. Indifference and reluctance were common response but census takers were told not to press for answers.

At the Baloney Joe's shelter in Portland, Ore., census workers gave out cigarettes to entice some of the 62 men in the shelter to talk with them and fill out the brief forms.

In Dallas, at the Austin Street Shelter, the Rev. Jerry Hill, the shelter director, was unenthusiastic but allowed a team of 10 census takers into the facility.

''We go through this every damn year,'' said Hill. ''If people don't know we have a homeless problem by now, then they never will.''

In Detroit, census takers apparently skipped two of the city's largest and best-known shelters - the City Rescue Mission, where 79 homeless people were staying Tuesday night, and the Salvation Army's Harbor Light Center, which had 55 beds filled.

Census officials said they weren't aware of the mission and thought the center was a permanent group home and not a shelter.

''How can you call yourself a census and you can't come to the most well-known shelter in the city?'' said John Everett, night manager at Harbor Light. ''Everybody knows about this shelter - but evidently they don't.''

#90080u0964 03/21/1990 ~United Press International

ALEXANDRIA, VA (MARCH 21) UPI - The Raytheon Company has pleaded guilty in federal court to unlawfully obtaining secret Defense Department documents and will pay fines and penalties of $1 million.

Raytheon pleaded guilty Tuesday to one felony count in connection with the company's acquisition of secret internal budgeting and planning documents from 1978 to 1985.

U.S. District Judge Albert Bryan ordered Raytheon to pay the maximum $10,000 fine, and the company also agreed to pay $990,000 in settlement of civil penalties and damages.

The count of conveyance without authority dealt with Raytheon's unauthorized obtaining of a secret edition of the Defense agency's program decision memorandum for the Air Force, said U.S. Attorney Henry Hudson.

Raytheon also obtained program objective memoranda of the Army, Navy, and Air Force, budget estimates and other data, he said.

In addition, Raytheon, through former employee John R. Kiely, gave classified documents to other defense contractors and received documents from them, according to Hudson.

Prosecutors said there was no evidence of wrongdoing by current company officials or employees. The plea was part of a continuing investigation into contractors who illegally obtained classified Defense documents. Three other companies pleaded guilty previously to two felony counts each and have been fined millions of dollars.

The Boeing Company was ordered to pay $5.2 million in fines and restitution; Hughes Aircraft Co. $3.5 million in fines and penalties; and RCA Corp. paid $2.5 million in penalties and fines.

#90080u0998 03/21/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 21) UPI - Secretary of State James Baker met Wednesday with black nationalist Nelson Mandela, who hailed a ''new chapter'' in relations with Washington but criticized Baker's planned meeting with South African President Frederik de Klerk as ''regrettable.''

Mandela, 71, also met with Soviet Foreign Minister Eduard Shevardnadze in the highest contacts by Moscow and Washington with Mandela since his February release after 27 years imprisonment as part of de Klerk's racial reform package.

The three men were in Windhoek to join in celebrations marking Namibia's independence after more than 100 years of colonial rule.

Baker, 59, is to meet Thursday in Cape Town, South Africa, with de Klerk, who ordered Mandela's release from imprisonment for his opposition to South Africa's institutional policy of racial separation - apartheid.

''We regard that (Baker-de Klerk meeting) as regrettable,'' Mandela said at a brief news conference with Baker, reiterating earlier criticism. ''There is nothing which Mr. de Klerk has done up to now which would require a change of strategy on the part of the international community.

''And to say that the foreign secretary of a superpower now visits Mr. de Klerk can create a great deal of confusion, specifically that the national government has done something which requires a change of attitude on the part of the international community,'' Mandela said.

The United States has economic sanctions in place against South Africa to

pressure it to end apartheid. Mandela is concerned Baker's meeting with de Klerk will be seen as a reward for his reformist moves and could weaken the international pressure against South Africa.

Baker, who leaves Thursday for his talks with de Klerk and with black nationalist leaders, defended his meeting with the South African president.

But both Mandela and Baker appeared to play down differences as they sought to develop a new political relationship between the United States and the African National Congress, Mandela's black nationalist group that until de Klerk's reforms was banned as a political group.

Mandela said, ''I think we are turning a new chapter and for this we are grateful.''

Baker and Mandela talked about the dismantling of apartheid and Mandela said, ''We have made progress in that regard.''

Baker said he and Mandela were in agreement on ending apartheid through negotiations.

''Efforts are being made in good faith to move the process forward in South Africa,'' Baker said. ''We believe it is important to try to encourage that process and to move forward.''

Baker said the central point in American-South African relations should not be economic punishment, but a cooperative effort to move South Africa toward a non-racial democracy with a free-market economy.

White South Africans are concerned that black political power will mean a nationalization of the nation's business and mineral-rich industries.

''Mr. Baker and I have had very fruitful discussions,'' Mandela said outside a white-washed residence in the hills overlooking the flowering plants and palm trees of sunny Windhoek.

''We have made progress, we have exchanged ideas which we feel will contribute toward the solution of the political problems in South Africa.

''I regard Mr. Baker, the American government, the Congress, and the people of America as true friends, and that has characterized our discussions to date,'' Mandela said.

Baker also praised Mandela, saying, ''I think that his courageousness is something the world has taken note of. This has sustained many, even in the United States, in their position that apartheid must be abolished and we've got to go to a non-racial democracy in South Africa.''

Mandela also met with Shevardnadze and said, ''I told Mr. Shevardnadze ... that we deeply appreciate the efforts that are being made by the two superpowers to relax international tensions.''

''To establish an atmosphere of world peace is a matter that is of interest of humanity as a whole,'' said Mandela in apparent response to the warming of relations between the United States and the Soviet Union.

Mandela plans to go to Canada and the United States later this year to raise money for housing for black refugees in South Africa, but no date for his tour was announced.

#90080u0999 03/21/1990 ~United Press International

BEIJING (MARCH 21) UPI - China announced Wednesday a ''grim'' national budget for 1990, acknowledging the country is near recession and running growing deficits but still giving the largest boost in spending to the military.

The budget message and an overall economic report were read to China's nominal legislature on the second day of its annual session and confirmed that a government austerity program since late 1988 has pushed China to the brink of recession.

''The condition of the state budget for this year is grim,'' Finance Minister Wang Bingqian warned in his annual budget address to the National People's Congress, the rubber-stamp parliament.

Wang and Zou Jiahua, minister of the State Planning Commission, warned the austerity has stalled industrial output, raised joblessness to alarming levels and left the government picking up the tab through deficit-swelling subsidies.

''The growth rate of industrial production has declined too sharply,'' Zou said. ''The number of unemployed people in towns and cities has increased, and some urban residents have begun to experience financial difficulties.''

Wang said the 1990 national budget forecasts a 10.3 percent hike in spending to $70.7 billion on revenues of $68.9 billion, up 10.9 percent. The budget deficit is estimated at $1.9 billion.

The biggest increase goes to defense, a 15.2 percent hike to around $6.1 billion. The increase will only keep pace with or slightly top inflation, but is the first substantial hike in the military budget in five years.

Western diplomats said the government was repaying the military for its role in last year's crackdown on the pro-democracy movement and

acknowledging its greater influence since.

The move is also designed to quiet rumblings of discontent in the ranks over the political turmoil last year and over spending that fell nearly 40 percent in real terms in the last four years.

Although some of China's defense spending is hidden, the military had lost considerable financial clout in recent years. Its hard currency earnings have also dropped since the end of the Iran-Iraq war, for which China was a major arms supplier.

''This is the first time in years they've come near to keeping up with inflation,'' said a Western military attache.

Inflation ran officially at 17.8 percent last year, and officials say it stabilized in recent months at around 7 percent. The State Statistics Bureau, in a new report Wednesday, said inflation dipped in the first two months of this year to 3.3 percent.

Western analysts, however, believe the actual figures are higher.

Other budget increases in 1990 are for agriculture, up 8 percent, and education, up 10 percent, Wang reported.

In 1989, Wang said, ''the financial balance was precarious'' because ''state deficits have exceeded the budgeted amount.''

''We must fully recognize the danger in running a deficit and start thinking in terms of a balanced budget,'' he said.

Expenses in 1989 were $64 billion on revenues of $62 billion, leaving a deficit of $2 billion.

Wang attributed the deficit to losses from the political turmoil last year to postponements or cancellations of unpopular new revenue measures and to unexpected expenses. But he also acknowledged huge subsidies for factories and city residents.

On Tuesday, Premier Li Peng said the government would continue but ease its austerity, which has achieved its goals of trimming record inflation and slowing headlong growth. Credit is already being loosened and more funds injected into selected sectors.

But he also indicated the invigorating free-enterprise reforms launched in the late 1970s would remain subservient to central planning and stability. The government has retreated from reform since the crackdown last June.

China has reemphasized large state-owned industries, traditionally money

losers that gobble subsidies to offset losses. The government has also been forced to give cash payouts to urban residents to compensate for inflation and lost wages.

#90080u1000 03/21/1990 ~United Press International

BUDAPEST, HUNGARY (MARCH 21) UPI - The successor to the Communist Party is expected to pick up only a scattering of votes Sunday when Hungarians cast ballots in the first free elections in 43 years.

Hungarians will cast two votes to elect the 384 members of parliament. One ballot will be for a local candidate and one for a candidate on a national list, for which 12 political parties have managed to put forth candidates.

The elections are expected to result in a shared victory, with no single party obtaining a majority and a possible coalition government dominated by the two largest parties.

The last truly free elections in Hungary were Nov. 7, 1945 when the Smallholders Party, which supports returning land to the peasants, got 57 percent of the vote, with the Communists in third place at 16.9 percent, after the Social Democrats.

Then in a vote on Aug. 31, 1947, the communists won 22.3 percent but these elections were tainted by suggestions of vote rigging. The communists began infiltrating the other parties, forced the Social Democrats into a merger, and hounded out other political leaders, completing their takeover of Hungary by the summer of 1948.

With Soviet President Mikhail Gorbachev's perestroika, the population felt the time was ripe to break away from the hated Stalinist model. More than 60 parties have emerged in the last two years through hard bargaining between the ruling Communist Party and opposition movements.

Opinion polls now indicate that the Communist Party's successor, the Hungarian Socialist Party, can expect no more than 6 to 8 percent of the votes. Party President Rezso Nyers is more optimistic, predicting Monday his party will get between 15 and 18 percent.

His comment may have been prompted by the East German election results Sunday in which the party that replaced the communists obtained 16 percent.

But the East German and Hungarian elections are not easily comparable as they stem from entirely different evolutionary processes.

The political changes in East Germany came about much faster than in Hungary. The East German political parties received support from their

West German counterparts, while in Hungary, the parties had to fend for themselves in a largely hostile political environment.

Under pressure from within its ranks and from opposition groups, the communists have had to accede to political reform.

In Hungary, the opposition parties have had two years to gain muscle and to work out their policies, which span the political spectrum from right-wing Christian Democratic parties to left-wing social democratic and socialist parties.

No party that has adopted orthodox communist principles or extreme right-wing policies stands a chance of obtaining many votes. And the successor to the Communist Party is certain to have to accept the role of being the opposition.

In the final days before the election, candidates of the two largest parties - the Democratic Forum and the Free Democrats - are running neck and neck.

President Janos Kis of the Free Democrats said at a news conference Monday that his party stands a strong chance of finishing as ''the largest party in parliament, but we would consider it also a success to come in second.''

The rapid success of the Free Democrats over the past eight months is attributed to the party's unyielding anti-communist policy and to its strong attacks against the former regime.

By comparison, the Democratic Forum has adopted a milder attitude against the communists and its political stance is less clear cut. It stands for social democratic principles mixed with Christian Democratic ideas.

But the greatest differences lie in the parties' solution to Hungary's economic crisis. The Free Democrats uphold private property and they are backed in this by the Independent Smallholders and FIDESZ, the radical Young Democrats.

The Democratic Forum offers a slightly muddled view of the matter. It talks about ''a mixed economy'' and envisages the future in which employees will become ''custodians of property in a natural process.''

Some other parties are totally against a market economy. The Socialist Party contends that a market economy would end in a massive unemployment.

The Free Democrats want fast privatization of state property. Other parties are more wary of this, arguably because of fears that privatization now favors former communist managers who can obtain free property this way.

#90080u1009 03/21/1990 ~United Press International
WINDHOEK, NAMIBIA (MARCH 21) UPI - Black tribal horsemen, German descendents aboard beer buses and thousands of other Namibians awash in the colors of their new nation's flag paraded through the streets of Windhoek Wednesday, celebrating the first day of independence.

President Sam Nujoma, sworn in after the South African flag was lowered over the territory at 18 minutes past midnight, declared Wednesday afternoon that his nation was ''finally free'' of 75 years of colonial rule by South Africa. But he warned of ''major economic difficulties'' that lie ahead for the mostly poor population of 1.3 million.

''There is still a long way to go before our country's resources are exploited to improve the living conditions for all our people,'' Nujoma told an independence celebration.

He affirmed his committment to a mixed economy but announced plans for an investment code intended to attrack foreign capital and help overcome a $200 million budget deficit in the first year of independence from Pretoria.

As Nujoma spoke, other visiting officials, including South African President Frederik de Klerk, Soviet Foreign Minister Eduard Shevardnadze and U.S. Secretary of State James Baker engaged in a second day of private talks with visiting delegations.

Both Baker and Shevardnadze had their first meeting with black African National Congress leader Nelson Mandela. De Klerk, his country long isolated because of its apartheid policies, captured unprecedented moments to mold new diplomatic links. Among his meetings was a lengthy session with Shevardnadze.

After a morning-long march down the main Kaiserstrasse, the main avenue through the tiny capital lined with shops recalling Germany's rule until 1915, marchers filed into Windhoek's athletic stadium for further celebrations and Nujoma's address.

Rumored soon to be renamed Independence Avenue, Kaiserstrasse was filled with thousands of Namibians, including Herero tribesmen on horseback, Herero women in wide, colonial-style dresses, marching bands from local white schools and more than 80 floats. One vehicle pulling a trailer carrying model pink flamingos was entitled, ''Namibia: Free as a bird.''

The bearded and burly, 60-year-old Nujoma, who led the South West Africa People's Organization in its 23-year bush war against South African rule, swore in the first chief justice, Hans Berker, who then administered the

oath to Nujoma's cabinet.

The crowd witnessing the ceremony included 18 African presidents, among them Hosni Mubarak of Egypt, nine prime ministers and Palestine Liberation Organization chief Yasser Arafat.

Nujoma first inspected units of the new National Guard, dressed in their crisp blue uniforms with white trimming and green berets. He then inspected soldiers of the U.N. peacekeeping force that monitored the territory's year-long independence program.

Earlier, Namibia's new blue, white, red and green striped flag with a sun in the left-hand corner replaced the South African banner.

Nujoma was sworn in by U.N. Secretary-General Javier Perez de Cuellar, whose Nobel Prize-winning multinational force of Blue Berets supervised the independence process under the 1978 U.N. Security Council Resolution 435.

The cermony produced the world's 160th nation and the 50th in the Commonwealth.

South Africa, for years ruling the territory twice the size of California in defiance of world opinion, accepted U.N. Resolution 435 under a U.S.-brokered deal signed by Cuba, South Africa and Angola on Dec. 22, 1988, that also included the withdrawal of about 50,000 Cuban troops from Angola where U.S.-backed UNITA guerrillas are fighting for a share of power.

Less than 12 hours after the flag of South Africa was lowered, a 72-seat constituent assembly elected in independence polls in November, converted itself into the National Assembly. It promptly passed the nation's first law, approving the coat of arms, dominated by two oryx, the common antelope found in Namibia - and a fish eagle, with its wings outstretched.

#90080u1013 03/21/1990 ~United Press International

(MARCH 21) UPI - John Poindexter's Iran-Contra criminal trial will takes a different turn today when his lawyers present to the jury videotaped testimony by former President Reagan. The nearly eight hours of testimony will likely extend into tomorrow as the defense team tries to discredit prosecution claims that Poindexter masterminded the Iran-Contra deal.

The head of the anti-abortion minority in the Maryland state senate says he's confident his group of 16 lawmakers will remain strong in their effort to de-rail a move by pro-choice legislators to keep abortion legal in the state. The vocal minority has kept alive a filibuster against the

proposed legislation since last Thursday. Pro-choice forces fell one vote shy of ending the debate yesterday.

Controversial Illinois Democratic Representative Gus Savage barely survived a bid to UNseat him from his 2nd Congressional District seat in yesterday's primary election in Chicago. Savage recently gained notoriety for allegedly attacking a female Peace Corps volunteer in Zaire. He said his victory yesterday runs counter to the wishes of what he called the ''white racist press.''

NASA engineers plan to meet tomorrow to discuss the feasibility of a shuttle rescue of a 150-Million-dollar communications satellite boosted into space last week aboard a Titan-3 rocket. Officials involved with the commercial launch said yesterday the Intelstat-6 satellite failed to reach its proper orbit because the rocket was mis-wired for a two-satellite payload.

#90080u1021 03/21/1990 ~United Press International

MOSCOW (MARCH 21) UPI - Former Joint Chiefs of Staff Chairman William Crowe defended U.S. interests at sea and on land around the world Wednesday in a friendly but pointed Kremlin exchange with Soviet deputies.

Crowe, on the fifth day of an eight-day private visit, delivered a brief address on U.S. defense policy and then fielded questions for more than an hour from Supreme Soviet lawmakers on the parliament's state security and foreign affairs committees.

''You and I are literally members of a transitional generation that is reshaping the way our two societies have thought about and dealt with one another for many years,'' said Crowe, who retired from active military service Sept. 30.

But the Soviet legislators peppered Crowe, 65, with questions after he expressed his personal views on a number of controversial defense issues over which Moscow and Washington still have significant differences.

''Let me ask you to give equally serious consideration to a view that I know many of you still find difficult to accept,'' Crowe said.

''I firmly believe that both East and West can benefit from the continuing presence of American forces in Europe, and from (a united) Germany's

continued membership in those Western institutions in which it has for decades played a responsible and constructive part,'' he said.

President Mikhail Gorbachev in recent months has accepted the apparent inevitability of German reunification, but Moscow maintains that any future single Germany should be a demilitarized neutral state disclaiming membership in NATO or other Western alliances.

Crowe stood his ground when Deputy Leonid Sharin, a regional Communist Party first secretary from the Far East city of Blagoveshchensk, asked him why U.S. troops should remain in Europe when Moscow is beginning to bring its soldiers home.

''We do not keep troops in Western Europe because we have a burning desire to do so. They are there because our allies have wanted them there, they felt it necessary for their security, and they will stay there as long as they feel that is legitimate.''

Soviet and U.S. representatives are currently negotiating an accord that would cut each superpower's troop level in Central Europe to 195,000, but Washington has not matched Moscow's enthusiasm in foreseeing the day when the region might be free of all their soldiers.

Challenged by another lawmaker on the necessity of a united Germany belonging to NATO, Crowe responded: ''Under the aegis of NATO over the past 40 years, West Germany has grown into a stable and healthy democracy. That is quite an achievement.''

Asked why Defense Secretary Dick Cheney has requested funds for research on anti-satellite systems, Crowe said: ''We have been concerned that you have some capability in that respect that we do not have ... When I was chairman of the Joint Chiefs of Staff, I did not feel comfortable in that regard. It was an asymmetry that bothered me very much.''

Crowe also defended U.S. naval policy, another sore point for Moscow, and said the military's current share of the American gross national product is at its lowest level since World War II.

He scrapped a section of his speech on the U.S. experience with a volunteer army, a controversial idea in Moscow that has split the Soviet military.

Crowe, who toured a military base Tuesday in the Black Sea port of Odessa, came to the Soviet Union last summer on an official visit following the ground-breaking July 1988 trip to the United States of Marshal Sergei Akhromeyev, then head of the Soviet Joint Chiefs of Staff.

PARIS (MARCH 21) UPI - An ailing Yves Saint Laurent was missing Wednesday but his fall-winter fashions were warmly applauded as he joined the Eastern Europe folklore vogue and also shaped a softer look by shaving down his squared shoulders.

One of Saint Laurent's models, Shamin Meghgi of West Germany, said with emotion backstage, ''We wish he'd been here - we did it all for him.''

Saint Laurent was missing the final bow for the first time in 32 years. He reportedly was in a sanitorium with what his salon said was extreme fatigue.

Pierre Berge, his business partner, said after the show that he did not know how many weeks the designer would be recuperating.

Saint Laurent's Balkan-Slavic long or short skirts and square jackets and gleaming evening suits were gay with bright blue, red and gold peasant prints. As in a costume film they were festooned with tassles, chain belts little handbags and embroidered boots.

He next ventured into Scotland with suits mixing different plaids with black velvet tops. Giant pheasant feathers soared skyward from little Scottish caps or even shoulders.

The panther prints that Saint Laurent originated appeared this time mixed with black and white splotches for long or short chiffon evening gowns, a graceful success that closed the show.

Coats were full and long, some with giant patch pockets. His suits took a more feminine turn, the shoulders smaller and the fit softer. One sweet green wool suit was edged with green velvet bands and another with zigzag multicolored bands. The classic suits appeared in black and white checks, gray or black. Leather suits in strong colors were piped in contrasting hues.

Trousers meant black leather pants with a red jacket and perfectly tailored pants suits in khaki, gray and black ''le smoking'' for evening.

The designer, often called the king of world fashion, liked fringe to edge a draped dress and bolero, huge shawls, nice short knitted dresses and the sides of black leather trousers.

He also lent weight to the hood hysteria gripping Paris by showing hooded parkas. And one of the show's most breathtaking numbers was black silk evening trousers and blouse with a huge hood framing the face. The gold sequin wedding gown that closed the show also was hooded.

Other evening hits: short evening dresses with poofy taffeta miniskirts, long gold lame jackets showing just a strip of skirt underneath, black trousers plus blazing green or turquoise satin tailored jackets and a casual ruffled dress closing like a bathrobe.

In his last October show, Saint Laurent stunned his audience with an evening gown revealing one breast. He continued this idea Wednesday with two black evening gowns cut so low that one model folded her hands over her neckline. A smashing red wraparound with ballooning sleeves swerved over a black dress that could have doubled as black lacy underwear.

Another model paraded in the shortest miniskirt in history but obviously wore no underwear - a joke, as Berge said after the show.

BOSTON (MARCH 21) UPI - The Isabella Steward Gardner Museum prepared to reopen to the public Wednesday as officials hoped a $1 million reward will result in the safe return of a dozen stolen uninsured masterpieces.

Condemning the theft as a ''cultural disaster,'' two of the world's leading auction houses - Christie's and Sotheby's - pledged $500,000 apiece to reward the safe return of the artworks.

Anne Hawley, director of the museum, said the reward for the art, valued at more than $200 million, would be given with no questions asked. She said the only concern was the safe return of the pieces by Rembrandt,

Vermeer, Degas and others that were stolen early Sunday.

''This is a cultural disaster, and we're part of that community, an important part. We just want to be of help to the museum,'' said Daniel Davison, the chairman of the Christie's auction house.

Christie's and Sotheby's promised to underwrite the $1 million reward that museum officials say will be paid even to the thieves as long as the works are returned.

''They were in a position where they wanted to act as quickly as possible to make this reward known,'' said Sotheby's Chairman Diana Brooks, who was contacted by the museum Tuesday morning. ''In our conversation it became clear the way we could really help out was to make a major contribution.''

The museum, meanwhile, announced it would reopen to the public at noon Wednesday.

Authorities around the world have been alerted to the missing art, which was stolen from the museum by two men posing as police in what was possibly the most lucrative art theft ever.

''Wonderful,'' said Margaret O'Brien, director of art theft registry at the International Foundation for Art Research, when told of the reward.

O'Brien said the reward could be a record in the art world. ''I've heard of a half a million, but never a million,'' she said.

Museum officials also revealed Tuesday that a metal eagle from a pole attached to a Napoleonic flag was also missing. A guard taking inventory discovered the loss of the eagle, considered a minor piece compared to the other stolen works, museum officials said.

Police have said the stolen art was worth more than $200 million, while Karen Haas, the museum's curator, said it was easily ''worth hundreds of millions of dollars.'' Experts have called the heist the largest in history.

The museum disclosed Monday that it does not have theft insurance.

The two thieves overpowered museum guards about 1 a.m. Sunday and stole 11 paintings, drawings and etchings which they cut from their frames. Also stolen was an ancient Chinese beaker from 1200 B.C.

Among the art stolen were five works from the museum's Dutch Room, including a Rembrandt oil painting, ''The Storm on the Sea of Galilee,'' as well as a small self-portrait etching and a double-portrait, ''A Lady and Gentleman in Black,'' by the 17th-century Dutch master.

Also stolen were two other oils, ''The Concert,'' by Dutch master Jan Vermeer and ''Landscape with an Obelisk,'' by Rembrandt's student, Govaert Flinck; five paintings and drawings by the Frenchman Edgar Degas; 19th-century French master Edouard Manet's oil ''Chez Tortoni;'' and the oldest work in the museum, a Chinese bronze beaker dating to the Shang Dynasty.

The museum, housed in a four-story building designed in the style of a 15th-century Venetian palace, will re-open to the public at noon Wednesday Hawley said. ''The museum is obviously looking at all its options'' about insuring its other works, Hawley said.

Hawley said, to her knowlege, no museum employees had been questioned as suspects by the FBI.

The numbers to call about the missing art are: FBI - (617) 742-5533 or the Gardner Museum - (617) 566-1088.

WASHINGTON (MARCH 21) UPI - President Bush will visit Atlanta, Cincinnati, Indianapolis and Detroit next month to give a few speeches, attend political fund-raisers, plant a tree and tour a jet engine plant, the White House said Wednesday.

Press secretary Marlin Fitzwater said Bush will open his four-city, April 2-3 tour by going to Atlanta to speak to the National Association of Broadcasters.

Bush will then move on to Cincinnati April 2 to tour a General Electric jet engine plant and address a fund-raiser for Ohio Republican gubernatorial nominee George Voinovich, Fitzwater said.

Fitzwater said on April 3 Bush is to go to Indianapolis to plant the first of 30,000 trees in the ''Tree for Tomorrow Campaign,'' attend a fund-raiser for Sen. Dan Coats, R-Ind., and then go to Detroit to address a GOP dinner.

Bush is to return to Washington late Tuesday.

Bush had planned to also mark the trip by throwing out the first pitch of the 1990 baseball season in Cincinnati on April 2. But the baseball labor dispute pushed back Opening Day to April 9, and it is now uncertain when and where the president will make his ceremonial toss.

#90080u1146 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - The Supreme Court parted the veil of secrecy surrounding grand jury proceedings Wednesday, ruling unanimously that a state cannot bar witnesses from divulging their testimony.

The court, in a unanimous decision by Chief Justice William Rehnquist, struck down a Florida law that prohibited witnesses from ever disclosing their own testimony before a grand jury. At least 13 other states have similar laws.

While noting that grand jury secrecy ''remains important to safeguard a number of different interests,'' Rehnquist said those interests are not ''some talisman that dissolves all constitutional protections.''

Rehnquist said that under the Florida law, a witness, before testifying, is free to ''speak at will,'' but after testimony the witness is no longer free to speak at all.

''The potential for abuse of the Florida prohibition, through its employment as a device to silence those who know of unlawful conduct or irregularities on the part of public officials, is apparent,'' Rehquist said in striking down the law.

Secrecy is a major factor of the grand jury system in all 50 states and the federal system. Rehnquist noted, however, that most states and the federal government do not impose total secrecy on grand jury testimony.

According to court records, the states that have an absolute ban on witnesses disclosing their testimony are Arizona, Florida, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nevada, North Carolina, South Dakota, Texas, Utah, and Washington.

The Florida case stemmed from the 1986 testimony of Michael Smith, a reporter for the Charlotte Herald-News in Charlotte County, Fla., before a grand jury investigating alleged improprieties committed by the Charlotte County State Attorney's Office and Sheriff's Department.

Smith had written a series of articles on the allegations before being subpoenaed and was warned before testifying that Florida law would prohibit him from ever revealing his own testimony.

However, after the grand jury ended its investigation, Smith decided to write a news story and perhaps a book about the investigation that would include his own testimony and experiences with the grand jury.

He sued in federal court to have the Florida rule held an unconstitutional violation of the First Amendment guarantee of freedom of speech and the

11th U.S. Circuit Court of Appeals eventually agreed.

Florida appealed to the Supreme Court, which upheld the lower court.

Grand juries, generally composed of about two dozen citizens who hear evidence and decide whether to issue indictments, date back to England in the 13th century. They were originally intended to enhance the power of the king, but eventually gained autonomy by using secrecy to shield themselves from the crown.

The court ruled in Smith's favor despite warnings from Florida that exempting witnesses from the secrecy rule will lead to other breaches.

Florida had argued that if witnesses are entitled to speak, ''other participants in the proceedings are equally entitled'' to make the same argument.

''The tattered remnant of grand jury secrecy that then remains will be virtually worthless,'' they said.

In other action, the Supreme Court ruled unanimously that Florida migrant workers injured en route to their jobs may sue their employer in federal court even though they received workers' compensation.

#90080u1157 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - The Supreme Court unanimously ruled Wednesday that Florida migrant farmworkers injured on their way to work may sue their employer in federal court even though they received workers' compensation.

Justice Thurgood Marshall, in the 9-0 ruling, wrote that exclusivity provisions in Florida's workers' compensation laws do not bar private lawsuits under the Migrant and Seasonal Agricultural Worker Protection Act.

The migrant workers suffered serious injuries in a 1985 accident as they rode to work in their employer's van, which they contended was intentionally overloaded with passengers in violation of the worker protection act's vehicle safety regulations.

The employer, Adams Fruit Co., argued state law provides for injured migrant workers to receive damages exclusively through workers' compensation, and the workers, therefore, cannot sue privately under the federal workers' protection act for the same injuries.

Marshall rejected that argument, holding that state law may not take precedence over a specific federal law in this case.

''A finding that a specific federal remedy trumps a more general federal remedy may be appropriate in certain circumstances, but that conclusion is a far cry from a presumption that a general state remedy invariably trumps a specific federal one,'' Marshall wrote.

The case emerged after the workers, who had already received workers' compensation from the state, then sought damages from Adams Fruit Co. in federal court.

The trial court granted Adams' request to dismiss the case before it came to trial, but the 11th U.S. Circuit Court of Appeals reversed that decision. The Supreme Court's decision Wednesday upheld the appellate court's ruling.

NEW YORK (MARCH 21) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.00-73.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 140.20 c-lb.

Lead, common, U.S. primary producers 55.00-65.00 c-lb.; U.S. non-primary (secondary) producers 59.00-60.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $3.90-$4.45 per

pound.

Palladium, N.Y. Am. Met. Mkt. dealer $130.00-135.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $504.00-$506.00; dealer-approx., $502.00-$504.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $98.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $99.83 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 299.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 70.75-78.00 c-lb.

#90080u1245 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - The National Association of Manufacturers said Wednesday it strongly encouraged participation by the United States in a development bank for Eastern Europe.

"The most important thing the U.S. government can do at this juncture is to ensure American participation in the European Bank for Reconstruction and Development on the most favorable terms possible," said Kempton Jenkins, corporate vice president of Armco and chairman of a NAM working group on the Soviet Union and Eastern Europe.

Jenkins' remarks came in testimony before a subcommittee of the Senate Foreign Relations Committee, which is holding hearings on U.S. business initiatives in Eastern Europe.

Jenkins told the foreign relations committee that U.S. companies faced a risk of not receiving a share of the projects financed by the bank in Eastern Europe without U.S. financial participation.

"To think that U.S. firms will get a fair chance at EBRD-funded projects if the United States is not a major participant in the (development bank) is a pipe dream," he said.

The hearings followed remarks by Treasury Secretary Nicholas Brady that discussions were continuing between the United States and its allies on a possible U.S. role in the development bank.

Brady told a Senate appropriations subcommittee Tuesday that the United States was concerned that if the Soviet Union were permitted to borrow from the bank, it would "crowd out" other nations seeking loans to rebuild their battered economies as they break from the Soviet bloc.

Brady said the Bush administration believed the Soviets should not be allowed to borrow more than the capital they would invest in the 34-nation development bank.

#90080u1247 03/21/1990 ~United Press International

BOSTON (MARCH 21) UPI - College women are using condoms more frequently in response to AIDS but their sexual behavior otherwise is unchanged from that of their 1970s predecessors, a campus survey indicated Wednesday.

Researchers in Rhode Island who queried 132 women students in 1989 found the same proportion had six or more lifetime sexual partners as 486 women who were surveyed in 1975, prior to the epidemics of AIDS and other sexually transmitted diseases.

The women of the pre- and post-AIDS eras showed no differences in their willingness to engage in oral or anal sex or to have multiple partners, said Dr. Stephen Zinner, a professor of medicine at Brown University who helped conduct the survey.

While he called the increase in condom use ''encouraging,'' he noted the proportion of women polled in 1989 who had their partners use condoms still was only 41 percent.

''If less than 50 percent of the women in this educated college group use condoms, one would have to wonder what the proportion is in other groups '' said Zinner, whose study appeared in The New England Journal of Medicine.

He said the fact that the women were no more likely than their predecessors to limit their number of sexual partners, despite apprehensions about AIDS, means ''we have a long way to go to get the message across about safe sex practices.''

Although the women in 1989 were knowlegable about AIDS and sexually transmitted diseases such as chlamydia, which annually infects an estimated 4 million Americans, Zinner said they did much less than the researchers expected to protect themselves.

In addition, ''when they got seriously involved with someone, they tended to use less, rather than more, protection,'' he said, calling that ''a

potentially dangerous habit, since just knowing someone better doesn't make you more safe.''

In their survey, Zinner and colleagues asked questions of women who had medical examinations at a college health center in 1975, 1986 and 1989.

The women all attended the same school, which the researchers described only as a ''large private university in the Northeast.'' In each survey, the women - nearly all undergraduates - averaged age 21.

Among those surveyed in 1975, 40 percent said they had between two and five lifetime sexual partners. In 1986, when 161 women were queried, the corresponding number was 42 percent. By 1989, those with two to five partners grew to 52 percent.

The proportion with six or more partners was 22 percent in 1975, 20 percent in 1986 and 21 percent in 1989.

Those who said they had three or more partners in the year prior to the survey accounted for 21 percent in 1975, 18 percent in 1986 and 21 percent in 1989.

The women of 1975 were more likely to use birth control pills than those in 1989, but much less likely to use condoms. Only 12 percent of those surveyed in 1975 used condoms.

The study found the proportion of women who occasionally engaged in anal sex was low but relatively unchanged over the study years, ranging from 10 percent in 1975 to 7.5 percent in 1986 and 8 percent in 1989.

By comparison, a fairly high number ''occasionally'' or ''regularly'' engaged in some form of oral sex, with the proportion exceeding 60 percent in all three survey years.

Zinner said the ''basic message'' he gleaned from the survey results was that ''there has to be more education and more awareness about safe sex'' strategies such as using condoms, avoiding anal sex and reducing numbers of sexual partners.

He said health educators also need to stress that ''when people use alcohol and drugs, their education level doesn't matter, because they lose some control'' and often fail to take protective measures.

#90080u1252 03/21/1990 ~United Press International

MANILA, PHILIPPINES (MARCH 21) UPI - Some 1,500 Filipinos burned an effigy of Uncle Sam at a rally at the U.S. Embassy Wednesday to protest the trial

in New York of Imelda Marcos and warn of a ''revolution'' if the wife of the late dictator Ferdinand Marcos was convicted.

As the pro-Marcos rally was in progress, riot police guarding the embassy dispersed some 50 leftist students approaching to demand the dismantling of strategic U.S. military bases in the Philippines.

No injuries were reported, but one of five tiny homemade bombs hurled by the students at the police exploded at the roof of the embassy building. The blast caused no damage, but police said 17 students were arrested.

During the four-hour rally by Marcos supporters, demonstrators screamed ''Long live Imelda Marcos'' and hoisted placards that read, ''No to American gangster-type of justice,'' ''Imelda, hope and savior of the Filipino race'' and ''Bring back Imelda.''

At the close of the rally, protesters yelling ''ugly American'' burned an effigy of Uncle Sam draped in a U.S. flag and then dispersed peacefully.

Imelda Marcos, whose husband died last year in exile in Hawaii after being forced from power by a ''people power'' revolution, went on trial Tuesday in New York.

She is charged with stealing more than $100 million from her heavily indebted nation's treasury to buy real estate and art in the United States and faces a maximum of 50 years in jail if convicted.

''A conviction will trigger a revolution in this country,'' said rally leader Reynaldo Fajardo. ''We will not allow a foreign government to pass judgment not only on Imelda but on the Filipino race.''

In another development, troops captured Tuesday night a Marine captain who led the assault on the Philippine Air Force headquarters in the capital during the Dec. 1-9 coup attempt, the military said.

Capt. Benito Chavez, 39, was arrested during a visit to his wife at his brother's house in Manila's Santa Ana residential district.

Some 2,000 mutinous soldiers and officers have either surrendered or have been captured following the coup, the sixth in Aquino's four years as president.

Also on Wednesday, Aquino's national security adviser, Rafael Ileto, told reporters the military was closely monitoring activities of the Reform the Armed Forces Movement, or Ram, which spearheaded the December insurrection.

''We have not completely eliminated the fact that it could be a threat in the future,'' Ileto said.

Asked about rumors of another coup attempt, Ileto said, ''We feel there won't be any for a few more weeks ... that's as far as our projection could go. It's a little difficult to go beyond that.''

#90080u1256 03/21/1990 ~United Press International

GENEVA, SWITZERLAND (MARCH 21) UPI - Participants in the Uruguay Round trade talks agreed Wednesday on a negotiating timetable for dealing with improved market access for natural resource products like wood products and minerals.

The timetable called for initial proposals to be presented by April 20, according to the General Agreement on Tariffs and Trade, which provides the overall framework for the Uruguay Round. Natural resource products was the last sector lacking a procedural outline because of differences between the major world trading countries.

Under a compromise, the European Community agreed to U.S. and Australian demands to include energy products in the sector and especially subsidies paid to EC as well as Japanese coal producers.

The EC for its part won acceptance by the United States, Canada, Australia, and Latin American countries that participants could at least raise the question of fishing rights. "That does not, however, commit any country to actually negotiating on the issue," one Uruguay Round delegate said.

The negotiations began in 1986 and are scheduled to conclude this December although they may fall short of an overall 33 percent reduction in protectionist barriers.

There are serious U.S.-EC disputes over agricultual trade and particularly Community farm subsidies, between the U.S. and Japan over trade barriers in general, and between industrial and developing countries.

#90080u1264 03/21/1990 ~United Press International

WARSAW, POLAND (MARCH 21) UPI - Unemployment has quadrupled in the last six weeks to more than 200,000 as the Solidarity government's stabilization program has begun taking hold, government statistics showed Wednesday.

''The problem of unemployment is becoming serious,'' said the government newspaper Rzeczpospolita.

It quoted a figure of 216,000 people unemployed, but a government source said the jobless figure is already well over 300,000.

Unemployment never officially existed in communist Poland because Marxist systems have a policy of employing all workers even if it makes its enterprises unprofitable.

When the Solidarity government was formed in August last year - the first noncommunist government in the East bloc - it prepared a package of economic reforms to transform the centrally planned communist system into a market-oriented economy. The reforms were introduced Jan. 1.

As a result of the changes, plants now must decide their own employment policies and can expect no subsidies from the state if their operations bring deficits.

The chief architect of the economic changes is Finance Minister Leszek Balcerowicz, whose policies are expected to raise consumer prices by 140 percent over the year while keeping the lid on wages.

The Solidarity newspaper Gazeta Wyborcza said it polled an unspecified number of workers in state-run plants and they support the tough economic measures.

''A total of 96 percent of those polled said the changes introduced by Balcerowicz were necessary,'' Gazeta said.

But a majority opposed excessive prices of various goods, which could push Poland into a recession.

''Seventy-nine percent of those polled described the prices of furniture as scandalous,'' Gazeta said.

A large bookcase for a living room costs up to $947 while the average monthly wage is $526.

A small car costs $2,135, an equivalent to 19 months' salary.

Many plants started to lay off workers or to send them on paid leave because customers stopped buying goods due to high prices. Inventories have soared.

The dramatic changes have spread concern among workers. As many as 39 percent of Poles fear they can lose their jobs and unemployment benefits amount to only $13.40.

''These benefits in no way solve the problem of the unemployed,'' Rzeczpospolita said.

Economic experts from the World Bank have predicted that unemployment may reach 1.5 million people as Poland struggles to adjust to a freer economy.

BONN, WEST GERMANY (MARCH 21) UPI - Libya has suspended trade and business with West Germany in the wake of a fire that destroyed at least part of a plant near Tripoli where chemical weapons were reportedly produced, a government official said Wednesday.

Foreign affairs spokesman Juergen Chrobog said the West German government was astonished at the measure and told its ambassador in the Libyan capital to seek clarification from the Libyan government.

Libya earlier claimed the fire was an act of sabotage and said it detained several people suspected of setting fire to the plant that was built with help from West German firms. It said it suspected the United States, Israel and West Germany were behind the fire, an allegation all three countries denied.

Official figures released Wednesday showed a sharp increase in trade between the two countries in 1989. Imports from Libya totaled $1.85 billion, a 17.4 percent over the previous year's figure. Exports to Libya rose 21.5 percent to $770 million.

Government officials in Bonn said that an oil tanker that was to deliver fuel in West Germany, returned to Libya without unloading, after Libyan authorities suspended trade and business with West Germany.

The officials did not say when the measure was taken.

The fire broke out one week ago at the chemical plant in Rabta, about 60 miles southwest of Tripoli, damaging at least part of the plant.

U.S. and West German officials said earlier they had strong indications that the plant, built recently with the help of West German firms, had launched test production of mustard gas.

Libya has denied the plant was used to manufacture chemical weapons and said it only produced pharmaceutical products.

BOGOTA, COLOMBIA (MARCH 21) UPI - A Colombian congressman wanted in Puerto Rico on drug-trafficking charges was captured this week and brought to a high-security prison in Bogota, authorities said Wednesday.

Jacobo Mendez Campo, 45, a member of Colombia's House of Representatives, has been wanted since 1986 in San Juan, Puerto Rico, on charges of smuggling marijuana from Colombia to the island, a U.S. territory, a security police spokesman said.

Mendez Campo, a Social Conservative representative from the Caribbean resort city Santa Marta, was arrested Monday night by undercover agents and international police officers when he and his family visited a relative in a Barranquilla hospital, 440 miles north of the capital.

Mendez Campo, an agricultural engineer by training, was elected in 1986 to represent Magdalena state in the House of Representatives in Bogota. His four-year term ends next July 20.

The Justice Ministry is investigating whether Mendez Campo is covered by parliamentary immunity, a ministry spokesman said. If the congressman is covered, the government will take steps to lift the immunity and process his extradition to the United States.

Since the government re-established extradition of wanted traffickers to the United States, 14 Colombians have been sent north to face drug charges. Fifteen more suspects are held in Bogota awaiting extradition.

JACKSONVILLE, FL (MARCH 21) UPI - A woman who is legally blind scored a hole-in-one on a golf course last weekend and then repeated the feat the following day.

''It hasn't sunk in yet,'' said Margaret Waldron, 74. ''If it happens as infrequently as my husband says, I'm going out to buy some lottery tickets.''

Waldron's eyesight began to deteriorate 10 years ago and she now has only peripheral vision. She cannot read or drive a car. When playing golf, she relies on her husband to give her distance, direction and pin placement.

''My husband will tell me where the pin is. If I can't see it, he will tell me to look for a certain tree behind the green. To align myself, I'll look for something like a leaf or little twig, whatever is five or six feet out in front of me and try to swing to that point, along that line,'' she said.

The first of her back-to-back aces came Sunday on the 87-yard seventh hole at Amelia Island Plantation's Long Point course as her husband, Pete, and two club members watched.

''I didn't see it, of course,'' Waldron said. ''But the woman I was playing with said, 'Ohhh, that's pretty! Ohh, it's in the cup!' I didn't believe her.''

She didn't believe it the next day either when she used the same 7-iron and same scarred old golf ball to ace the hole again.

''Unbelievable,'' said Jay Gress, a vacationer from Fort Washington, Pa., who witnessed the shot with his wife, Dale. ''Her husband and I were on the men's tee, the gals were on the ladies'. Mrs. Waldron teed off first, and the ball went over a mound to the left of the green, disappearing from view. But it apparently hit the side of the hill, then came shooting across the green, straight at the hole.''

The ball rolled in and everyone except Mrs. Waldron began jumping and yelling and hugging her.

''She turned around and said, 'Why are you ganging up on me?' She thought we were teasing her,'' said Dale Gress.

''The nice thing is, both were well-hit balls,'' said Waldron, who began playing golf when she was 43. She developed into a 12-handicapper and recorded her first hole-in-one 15 years ago on a municipal course at Fernandina Beach.

Three years later, she scored another ace on a golf course near Pell City, Ala.

Neither were as special, however, as the back-to-back ones she recorded on the Amelia Island Plantation course.

''I've retired it now,'' she said of the battered golf ball. ''It's kind of beat up, so it won't putt straight.''

#90080u1321 03/21/1990 ~United Press International

ST. PAUL, MN (MARCH 21) UPI - Northwest Airlines Chairman Al Checchi said he takes responsibility for the March 8 flight of an suspected drunken cockpit crew from Fargo, N.D., to Minneapolis, but said the airline did not have enough information to ground the plane in Fargo.

The three crew members were fired late last week by Northwest and their flight certificates were revoked by the Federal Aviation Administration pending a hearing before the National Transportation Safety Board next month.

Checchi told the Star Tribune of Minneapolis that one reason the airline did not ground the plane was that a FAA inspector interviewed the crew in Fargo before the plane took off.

''The FAA were there and, for whatever reason, determined they would not stop the flight,'' Checchi told the newspaper.

''I don't think it would be reasonable for us - the station manager or the ticket agent - to step forward and conduct an independent surveillance or observation.''

Checchi said he did not blame the FAA for allowing the flight to leave Fargo.

Reports that the crew had been drinking in a bar in Moorhead, Minn., were received by both Northwest and the FAA through anonymous telephone tips several hours before the flight was to depart.

But the caller gave the name of a pilot that did not match that of any crew member staying overnight in the Fargo-Moorhead area.

''When someone gives you a name and it bears no resemblance to anyone flying for you, I don't think I can fault our people under those circumstances,'' Checchi said.

About two hours after the anonymous call, the FAA informed Northwest it would meet and interview the crew before it was to leave Fargo at 6 a.m. for Minneapolis-St. Paul.

Sources familiar with the blood alcohol tests taken after the crew arrived in the Twin Cities at 7:30 a.m. said the captain of the flight, Norman Prouse, 51, of Conyers, Ga., had an alcohol concentration in his blood of .12 to .13 percent. First officer Robert Kirchner, 35, Highland Ranch,

Colo., and flight engineer Joseph Balzer, 34, Antioch, Tenn., had concentrations of .06 percent or more. Federal regulations prohibit flight personnel from flying with concentrations of .04 percent.

FAA rules also prohibit pilots from consuming alcohol eight hours before a flight and Northwest prohibits consumption 12 hours before a flight.

Checchi said all of Northwest's employees ''have been sensitized as a result of this. If there's any good that comes out of this, it's the fact that the incident occurred, that everyone was shocked and certainly everyone's awareness has been heightened.''

He said all Northwest pilots will receive a bulletin stressing the importance of alcohol-free and drug-free flying.

Authorities in Minnesota and North Dakota are considering misdemeanor charges against the crew for flying while intoxicated.

#90080u1326 03/21/1990 ~United Press International

JERUSALEM (MARCH 21) UPI - Labor Party chairman Shimon Peres, chosen by the Israeli president to form a new government, asked Prime Minister Yitzhak Shamir Wednesday to join a broad ruling coalition, but the right-wing Likud Party leader rejected the request.

Peres told Army Radio he telephoned Shamir and proposed a meeting between Likud and Labor to discuss ''the possibility of setting up a broad government or unity government.

''Mr. Shamir's answer was that he will not join a government headed by Labor and therefore he sees no need (for a meeting),'' Peres said.

''We will act with all our ability so that a government headed by Mr. Peres is not set up,'' said Ehud Olmert, Likud minister without portfolio. ''We think that a government headed by Mr. Peres is not good.''

The 15-month-old Likud-led coalition government, formed after indecisive November 1988 elections, collapsed last week after Shamir refused to approve a U.S. peace plan calling for talks with a Palestinian delegation.

Israel's parliament, the Knesset, on Thursday passed a no-confidence motion introduced by Labor that brought down Shamir's government.

President Chaim Herzog chose Peres Tuesday night to form the next Israeli government. Peres immediately went to work to forge the new government, meeting with members of the ultra-Orthodox Agudat Israel party.

On Wednesday, Labor leaders met with small left-wing and centrist parties while the Likud leaders gathered to plot their strategy to block a Labor-led coalition.

Israeli newspapers reported Wednesday the four ultra-Orthodox Parties that hold a total of 18 seats in the Knesset, were wavering in their support of Likud and might support Labor. The abstention of five Shas party Knesset members during the no-confidence motion brought down the government.

In addition, the allegiance of a five-member Likud breakaway faction was not certain.

In consultations with Herzog before he chose Peres, half of the 120-member Knesset express support for Labor with all the religious parties lining up with Likud.

Several religious party leaders have expressed support for another Likud-Labor coalition, similar to those that have governed Israel since 1984.

Peres joined a ''national unity government'' that year after failing to put together a Labor-led coalition. Under the coalition agreement, Peres and Shamir rotated the posts of prime minister and foreign minister.

After the 1988 elections, Shamir was picked to form the new government. In the broad coalition he assembled, he took the post of prime minister while Peres was given the finance portfolio.

Under Israeli law, Peres has to report back to Herzog within three weeks on his progress in forming a coalition. The president can then grant up to three more weeks. There is no time limit on the process of forming a new government.

Only a Knesset majority can call for elections.

BELFAST, NORTHERN IRELAND (MARCH 21) UPI - A Protestant man was shot dead in front of his family and two others were wounded in a new wave of sectarian violence in Northern Ireland, police said Wednesday.

A Royal Ulster Constabulary spokesman said Billy McClure was killed by gunmen who burst into his apartment in the Skegoniel district of north Belfast late Tuesday night and opened fire as his wife and teenage son watched.

Irish People's Liberation Organization, an extremist republican group that

had split from the Irish Republican Army, claimed responsibility for the killing. Both are fighting British rule in Northern Ireland.

An IPLO spokesman told a Belfast newspaper, The Irish News, McClure was killed in reprisal for recent attacks by Protestants on Catholics.

McClure, a truck driver, had no connection with security forces or paramilitary groups, police said. He is the 13th person killed by gunmen on both sides this year.

Police said they feared the killings would provoke extremist Protestant paramilitary groups, who last month warned Catholics would be attacked if the IRA continued its violence in the province.

Protestant paramilitary groups also warned that reprisals would be taken for the recent bomb attacks at the Shorts Brothers arms manufacturing plant in Belfast. Five workers were wounded Tuesday when two bombs exploded in the missile division.

Early Wednesday, two Protestant men were shot and wounded in Antrim, 10 miles west of Belfast, in what police said was a feud among Protestant paramilitary groups.

Both men were hospitalized, one in critical condition.

The outlawed Ulster Freedom Fighters claimed it shot the men for ''traitorous activities against loyalists.''

The activities were not specified, but police said they suspected racketeering.

#90080u1347 03/21/1990 ~United Press International

PITTSBURGH (MARCH 21) UPI - USX Corp. warned shareholders Wednesday that a proposal of investor Carl Icahn to spin off the company's steel business is "a simplistic approach to a complicated issue" and advised a vote against it.

Icahn, the company's largest shareholder with 13.3 percent, or approximately 33 million shares, of USX stock, wants the oil and steel conglomerate to separately incorporate its United States Steel division and spin off at least 80 percent of it.

Icahn, long the subject of speculation that he was considering a takeover of USX, has said the company's stock is undervalued. Analysts have said Icahn's actions may amount only to sabre-rattling and a move to boost the price of the company's stock.

USX recommended that shareholders vote against Icahn's proposal, saying it dictated a single option to the board without alternatives. The resolution submitted by Icahn and certain unspecified affiliates kown as the Icahn Group is "a simplistic approach to a complicated issue," the statement said.

The company's formal response came with the release of a proxy statement and notice of its annual shareholders meeting May 7 in Findlay, Ohio, home base of USX.

Icahn's specific recommendation would be against stockholders' interests and could undermine the board of directors' efforts to direct the corporation's future, the company statement said. Directors also called the Icahn plan "unnecessary and unwise," in light of the corporation's restructuring during the past decade.

"The concept underlying the resolution submitted by the Icahn Group is not new to the corporation or your board of directors," the company said. "During the past decade, as part of its ongoing restructuring efforts, the corporation has considered numerous options with respect to its steel business," it said.

"Not only are there significant and complex tax, legal and business issues involved in such a spinoff, but the timing of any such restructuring effort is critical," the company said.

Directors believe the combined financial strengths of USX's oil and steel holdings "enhances its borrowing power and flexibility and also its ability to resist business downturns and disruptions that could adversely affect a single business," the statement said.

In the 1980s, USX engaged in one of the largest corporate restructurings in history. The nation's No. 1 steelmaker acquired $10 billion in assets, primarily energy-related through its Marathon Oil Co. and Texas Oil and Gas Co. subsidiaries, and disposed of $7 billion in assets and businesses. At the same time, the company wrote off approximately $3.5 billion, primarily in steel, officials said.

Those changes helped USX to "emerge as a strong company while remaining the largest and among the most profitable domestic integrated steel companies," directors said.

The restructuring involved significant changes to the corporation's steel business, including the shutdown or sale of marginal facilities, installation of modern, efficient equipment at the remaining plants and formation of major joint ventures at various operation locations, the company said.

USX also was able to "significantly reduce its financial obligations while maintaining a substantial capital investment program" through restructuring, directors said.

The proxy statement also cited the company's 1989 financial results, which included the best operating income ever earned, as a reflection of the success of restructuring efforts.

#90080u1348 03/21/1990 ~United Press International

BERWYN, IL (MARCH 21) UPI - Voters have decided that eight cars stacked on a pole like an automotive shish kebab is not the type of art they want in front of their local shopping center.

In Tuesday's primary election in suburb of Berwyn west of Chicago, 69 percent of the voters said they would like to get rid of the so-called ''Spindle'' artwork in front of Cermak Plaza.

Voters liked the piece call ''Bil-Bored'' even less. Eighty percent wanted to remove a sculpture some critics describe as a large pork chop-shaped slab of household junk that is passing as art.

Davie Bermant, owner of Cermak Plaza, said he would be willing to remove at least one of the sculptures if residents disapproved. He said he'd be more likely to take down ''Bil-Bored,'' because ''Spindle'' has been on display only a few months.

#90080u1352 03/21/1990 ~United Press International

DETROIT (MARCH 21) UPI - Two city budget analysts used a pocket screwdriver and a plastic fork to get around City Hall's new $44,000 voice-activated security system when they couldn't get into their office.

On the very day that the high-tech system, which its manufacturer says is almost foolproof, was activated last month, Marie Percham tried it out. She arrived at work, punched her four-number code into the security system and spoke her name into the system's phone.

She tried two more times, but the door didn't open.

Co-worker Jerry Pokorski came along, and together the two were able to wedge open a side door with a plastic fork and pocket screwdriver that Percham had in her purse.

Their boss, budget director Walter Stecher, took it all in stride.

''The lady wanted to go to work,'' an amused Stecher said Tuesday. ''Every once in a while, you have glitches.''

After Percham's unorthodox entry, a steel plate was installed near the lock on the side door to prevent employees and others from jimmying their way in, Stecher said.

#90080u1358 03/21/1990 ~United Press International

GREEN BAY, WI (MARCH 21) UPI - Robert Selissen got a surprise in his cereal box: a bonanza of coupons.

Selissen said he was pouring a bowl of Golden Grahams cereal as a snack for his daughter Monday night when he discovered the box was loaded with coupons.

He counted them and found the box contained 294 coupons offering discounts of 20 to 60 cents on cereal purchases.

When Selissen called the cereal manufacturer, General Mills, an official explained a machine that automatically dropped coupons into boxes probably malfunctioned.

Company spokeswoman Kathy Newton said it was the first time the company ever received such a report.

Newton said General Mills is sending Selissen another coupon for a free box of Golden Grahams, because he did not get a full box of cereal the first time. All those coupons took up a lot of space.

''We want happy customers,'' she said.

Selissen said he does not know what he is going to do with all the coupons he found in the cereal box.

''The company doesn't want them back. The store (where the cereal was purchased) doesn't want them all back. I don't know what I'm going to do with them,'' he said.

#90080u1361 03/21/1990 ~United Press International

JEFFERSON CITY, MO (MARCH 21) UPI - U.S. District Judge John Nangle issued a stay of execution Wednesday for Maurice Byrd, less than 14 hours before he was to be executed for killing four restaurant employees in 1980.

Byrd, 35, had been scheduled to receive a lethal injection at 12:01 a.m. Thursday but Nangle set a new execution date of March 28.

Earlier, Byrd was in an isolation cell near the execution chamber at the Potosi Correctional Center and Don Schroeger, spokesman for the Missouri Department of Corrections, said he was confident the court would stay his execution.

Byrd was sentenced to death for fatally shooting four employees during a $9,000 robbery at Pope's Cafeteria in Des Peres in 1980. Trial testimony showed that Byrd herded the victims into a rear office of the restaurant and shot each in the head with a .22-caliber pistol.

Killed were James E. Wood, 51, the manager, and three cooks, Carolyn Turner, 51, Edna R. Ince, 68, and Judy Cazaco, 37.

Cazaco was shot in both eyes and did not die until a week later. The other victims died on the spot.

Byrd eluded police but was found later in Georgia, where he had been convicted of armed robbery and the murder of a liquor store clerk in Savannah.

Byrd, who has been on death row since Dec. 8, 1982, said in an interview with United Press International in 1984 that he was innocent of the cafeteria slayings and was elsewhere when they occurred.

Byrd was a security guard at St. Louis University in 1979 and 1980 and was given an award by the St. Louis Grand Jury Association for helping police recover stolen guns. He had volunteered to wear a hidden transmitter while talking to people trying to sell the guns.

His execution would have been the third in Missouri since the state restored the death penalty in 1977. George ''Tiny'' Mercer of Kansas City was executed Jan. 6, 1989, and Gerald Smith of St. Louis was executed this year on Jan. 18.

#90080u1380 03/21/1990 ~United Press International

SANTIAGO, CHILE (MARCH 21) UPI - Two retired air force generals, one of them the commander who ordered the aerial bombing of the presidential palace during a 1973 coup, were attacked and seriously wounded by gunmen Wednesday.

Police said retired Gen. Gustavo Leigh Guzman, 70, former air force commander and former junta member, and retired Gen. Enrique Ruiz Moya, a partner in Leigh's real estate firm, were attacked by two men in their

fourth-floor office at about 11 a.m. The gunmen escaped.

Leigh, who ordered the Sept. 11, 1973, air attack on the La Moneda presidential palace in the coup that toppled and killed Marxist President Salvador Allende, was struck by five bullets in the thorax and abdomen and a bullet put out one of his eyes, a doctor attending him said.

A witness said Ruiz Moya appeared to have bullet wounds in the neck, arm and leg.

A women who identified herself as Mariela Vargas, spokeswoman of the left-wing terrorist group Manuel Rodriguez Patriotic Front, told Radio Cooperativa her organization tried to bring Leigh ''to justice,'' which in revolutionary jargon means to execute.

Calling Leigh a ''terrorist,'' she said ''meting out justice'' will continue.

Enrique Correa, the general secretary of government, called the attack ''tremendously regrettable and reproachable.'' He said the government would investigate the attack.

From his jail cell, Francisco Escobar, who claims to be a spokesman of a faction of the Manuel Rodriguez Front, denied that his group was involved in the assault.

The Manuel Rodriguez Front tried to assassinate strongman President Augusto Pinochet in 1986 and killed seven of his bodyguards.

After Wednesday's attack, witnesses said, a secretary called for police after the assailants fled into a subway station.

The witnesses said they heard nine or 10 shots fired from automatic weapons.

The attack came as conservative opponents of President Patricio Aylwin, inaugurated March 11, cricitized him for freeing political prisoners, although the new government has maintained that those freed were involved in crimes of ''conscience'' and not violence.

Early reports indicated that two men fired on Leigh without warning after they entered his office.

Leigh was one of the most militant proponents of the Sept. 11, 1973, coup against Allende. He ordered jet planes to attack the La Moneda presidential palace, the presidencial residence and the pro-government radio station Radio Corporacion.

Leigh, who was appointed air force chief of staff in August 1973, was a member of the junta, led by Pinochet, an army general, from the day of the coup until he resigned in July 1978 following disagreements with the president.

Leigh wanted a rotating presidency and a quicker return to democracy but Pinochet insisted on keeping the presidency for himself for a long period of time.

Although he surrendered the presidency to Aylwin on March 11, Pinochet retains the powerful post of army commander.

#90080u1394 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Taking credit for the U.S. role in creating an independent Namibia, President Bush Wednesday promptly extended U.S. diplomatic recognition to the new African state and lifted U.S. economic sanctions against the former South African colony.

In a written statement, Bush also said he was welcoming Namibia ''as a full trading partner and taking steps to ensure that it is given access to the American market.''

''The independence of Namibia today marks the end of colonialism in Africa and a proud beginning for the world's newest country,'' Bush said. ''Americans can take pride in the role the United States played in making this transition to independence possible, the 1988 Brazzaville Protocol and the New York Accords cleared the way to Namibian independence and the withdrawal of all Cuban troops from Angola,'' he said.

President Sam Nujoma, sworn in after the South African flag was lowered over the territory at 18 minutes past midnight, declared Wednesday afternoon that his nation was ''finally free'' of 75 years of colonial rule by South Africa. But he warned of ''major economic difficulties'' that lie ahead for the mostly poor population of 1.3 million.

Bush said he sent Secretary of State James Baker to the ceremonies at Windhoek ''as a sign of the respect and esteem in which we hold the world's newest democracy.''

He said Baker ''carries the good wishes of all Americans to President Sam Nujoma and the Namibian people.''

''We're especially gratified that Namibia's Constituent Assembly has produced a constitution that is among the most democratic in Africa,'' he added, ''and which provides an excellent basis to ensure national harmony and development.''

''The United States established diplomatic relations with the Republic of Namibia today,'' Bush said, ''and we will take the necessary steps to exchange ambassadors as quickly as possible.''

''With the end of South Africa's administration, all U.S. sanctions against Namibia are being lifted,'' he said.

''From this promising beginning we look forward to a warm and productive relationship with Namibia.''

#90080u1396 03/21/1990 ~United Press International

LONDON (MARCH 21) UPI - Stock prices closed slightly lower in lackluster trading Wednesday on the London International stock exchange.

The blue chip Financial Times 100-stock index, which climbed 21.7 points Tuesday, slipped 9.4 points at 2,250.3. The narrower top 30 industrial average eased 6.2 points to 1,771.4.

Volume amounted to around 444 million shares, compared with 377 million shares changing hands on Tuesday.

Analysts said investors seemed reluctant to commit themselves too firmly to fresh positions as Tuesday's British budget announcement did not offer any particularly bullish news for the market.

Chancellor of the Exchequer John Major vowed to beat the inflation that has troubled the British economy and pledged to take advantage of the changing European market.

Major repeated the government's commitment to maintaining high interest rates until Britain's inflation is in retreat.

Some analysts attacked the budget statement as not being tough enough on inflation.

Analysts also said worries that interest rates could go higher depressed the buildings, properties and retailers sectors and put additional pressure on the British pound.

On the London Foreign Exchange, the pound fell more than 1.5 cents against the U.S. dollar, despite intervention by the Bank of England.

The Bank of England said the pound ended the day at $1.5945, compared with $1.6110 Tuesday.

Market watchers also noted the market remained cautious ahead of the government's report Thursday on Britain's trade for February and the Mid-Staffordshire by-election - seen as a crucial test of the Conservative Party's strength.

Among the most widely traded stocks, pharmaceutical giant Glaxo Holdings fell 25 cents to $12.86 amid some profit taking after gaining 60 cents Tuesday.

Elsewhere in the pharmaceutical sector, Wellcome PLC added 10 cents to $10.97.

B.A.T Industries eased 5 cents to $13.01 after reporting its 1989 results rose 24 percent, slightly above market expectations.

Grand Metropolitan PLC bucked the overall trend, jumping 44 cents to $9.35 on what market watchers called strong U.S. buying in anticipation of an analysts meeting next week.

Imperial Chemical Industries, Britain's largest chemical concern, lost 19 cents to $18 on reports that one of its subsidiaries, Australia Ltd., issued an estimate of lower profits.

Elsewhere in Europe, prices surged to their highest level since early February on the Frankfurt Stock Exchange in moderate trading.

The key German Stock Index gained 29.16 points or 1.5 percent to 1,937.99 just 2 points below the record closing high on Feb. 5.

Traders said investor confidence was boosted by some concrete steps made by the West German government to establish a currency union with East Germany.

#90080u1402 03/21/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MARCH 21) UPI - Thousands of black workers and students stayed away from work and school across the nation Wednesday and activists firebombed cars to mark the 30th anniversary of the Sharpeville massacre.

Activists barricaded roads out of black townships, stoning and firebombing vehicles, and diverted buses and taxis to rallies commemorating the 1960 killing by police of 69 black protesters in the black township of Sharpeville.

Worst hit in the unrest Wednesday was the Indian Ocean port of Durban, where four buses were set afire and destroyed, at least one house razed,

roads blocked and cars firebombed.

Students at a school in the black township of Umlazi near Durban set fire to the principal's office, police said. And police used tear gas to disperse crowds that attacked them with gasoline bombs and stones as they attempted to remove barricades.

Umlazi residents claimed police shot dead two youths in the unrest, but a police spokesman denied knowledge of the shooting.

About 98 percent of port workers stayed away from the job, paralyzing the harbor and causing daylong delays to shipping, the state-run South African Broadcasting Corp. reported.

The greater Durban area was affected by an estimated 70 percent stayaway, the SABC said, but the 80 percent strike by workers at the city's two airports had failed to disrupt traffic.

Students at the mainly white University of Natal in Durban also joined the stayaway.

There was a near-total strike by workers in the black townships around the administrative capital of Pretoria, with transport unavailable as bus drivers joined the strike, the SABC reported.

Police shot and wounded a youth in the black township of Atteridgeville near Pretoria when a group of youths stoned a police vehicle, apparently mistaking it for a taxi, the Johannesburg daily The Star reported.

Lack of transport in townships near industrial areas east of Johannesburg prevented people from getting to work.

In the major eastern Cape Province centers of East London and Port Elizabeth, businessmen reported a high absentee rate and disruption to production. Cape Town, on the other hand, was scarcely affected.

Rallies and church services were held throughout the country. Most employers agreed to the stayaway on a ''no work, no pay'' basis.

On March 21, 1960, a crowd of blacks demonstrated peacefully against influx control legislation outside a police station in Sharpeville near the industrial city of Vereeniging, south of Johannesburg. Police opened fire, killing 69 and wounding 180, most of whom were shot in the back.

The protesters had gathered in response to a call from the Pan Africanist Congress, a radical offshoot of the African National Congress, for blacks to present themselves for arrest at their local police stations without their mandatory ''pass books.''

In the wake of the incident, which provoked international outrage, the government declared a state of emergency and outlawed the ANC and PAC. The ban on the two organizations was lifted Feb. 2 this year.

Influx control was abolished in April 1986.

#90080u1413 03/21/1990 ~United Press International

BOSTON (MARCH 21) UPI - A daily dose of aspirin can cut in half the risk of strokes in people who suffer from a heart condition that affects 1 million Americans, researchers reported Wednesday.

A study of older people who suffer from an irregular heartbeat that makes them prone to strokes found one tablet of aspirin a day was an effective preventive measure, said Ruth McBride, who helped compile the results.

McBride said people with a condition known as atrial fibrillation who took the aspirin had 50 percent fewer strokes than a comparable group that received no medication.

The aspirin therapy was so successful, she said, that 18 months into the study a monitoring group told researchers to start giving the non-aspirin group either aspirin or an anti-coagulant known as warfarin.

The research ''found, unexpectedly, that you've got to give these people something,'' said McBride, a biostatistician at the Statistics and Epidemiology Research Center in Seattle. The study results were published in The New England Journal of Medicine.

From June 1987 to November 1989, 517 people with irregular heartbeats were given one aspirin tablet daily while 528 received a useless substitute. Nineteen people in the aspirin group suffered strokes and 38 people had strokes in the comparison group.

There was also a reduction in the stroke rate among 199 people who received warfarin but because the research was interrupted by the monitoring committee, ''we really don't have a good idea of warfarin's effectiveness yet,'' said McBride.

McBride said that because most of the study subjects were under 75, the researchers could not come to any conclusions about the effect of aspirin or warfarin in people older than that.

Atrial fibrillation affects about 1 million Americans, most of them over 60. Of these people, ''about 75,000 will suffer strokes,'' said Anne Leonard, a senior research nurse at the University of Texas Health Science

Center in San Antonio.

Leonard and colleagues at the Texas facility coordinated the study using information on patients treated at 16 medical centers around the United States.

In people with atrial fibrillation, the risk of stroke is increased five-fold because the heart tends to ''quiver like a bowl of jelly,'' forcing blood to pool in the top two chambers, Leonard said.

As the blood pools, clots tend to form that can cause strokes if they reach the brain. Aspirin and warfarin, as anti-coagulants, prevent the formation of the clots.

Altogether, 1,244 people with the condition took part in the study. When researchers compared those taking either aspirin or warfarin with those receiving the phony substitute, they found a five-fold increase in strokes among the placebo group.

However, since the warfarin group was small and the research was interrupted, McBride said the study could not judge the effects of warfarin versus aspirin.

The ''relative merits of warfarin and aspirin are unclear, particularly with reference to the severity of stroke and ensuing disability,'' the researchers wrote in their report. They said the answers would require follow-up research, which McBride said is going on now.

#90080u1415 03/21/1990 ~United Press International

LONDON (MARCH 21) UPI - The Bank of England intervened Wednesday to halt a run on the pound caused by market disapproval of the 1990 budget and analysts predicted further stock and currency drops with the likely defeat of the ruling Conservative Party in a by-election.

The main opposition Labor Party declared it would sweep Thursday's vote in the central England district of Mid-Staffordshire, where Prime Minister Margaret Thatcher's party now has a majority of more than 14,600 seats.

Observers said the mid-term election will show whether voters endorse opinion surveys which show Thatcher trailing about 20 points behind Labor, largely because of disillusionment over her handling of the economy and a controversial new tax.

Polls predict Labor will win with a 28 percent majority, which would be the most spectacular by-election defeat of the Conservatives since 1935. "We are enormously confident and not just by the polls," said deputy Labor

leader Roy Hattersley, who predicted the election would prompt back-bench members of the ruling party to plead with Thatcher to drop her poll tax scheme.

The poll tax is a flat levy set by each local council for community costs regardless of income, and has aroused bitter opposition in the run-up to its imposition in England and Wales next month.

Stock and currency markets dropped in a negative reaction against the 1990 budget announced Tuesday by Chancellor of the Exchequer John Major. Analysts said Major did not take a firm enough stand against inflation, and could have raised taxes in order to bring down interest rates, which they attribute as a main cause of economic stagnation.

The British pound plummeted to its lowest level of 2.7168 against the German mark, to a three-and-a-half-year low against a basket of European currencies, and $1.592 against the dollar. The Bank of England purchased vast amounts of the currency, stabilizing it by lunchtime.

The London stock market opened down 20 points, but rallied later. The blue chip Financial Times 100-stock index, which climbed 21.7 points Tuesday, slipped 9.4 points to 2,250.3 at the close. The narrower top 30 industrial average eased 6.2 points to 1,771.4.

Major tried to calm markets by defending his budget. "I have to carry the rap for my judgment in a way that some other people don't," he said. "This is the right fiscal balance ... and I believe it is tough enough."

However, experts predicted there would be further market drops Thursday, because of the by-election and the release of March trade figures, which are expected to give a gloomy picture of Britain's excess imports.

"This could be the calm before the storm," said economist Rodger Bootle. "If the government loses that by-election very badly and the figures are also bad I think we may well see some very heavy selling of sterling."

Other analysts agreed. "The currency will remain under pressure so long as there is a doubt about the chancellor's commitment to defending the currency and bringing down inflation," said one banker. "Certainly there is very little reassurance for them in the budget on that score."

#90080u1417 03/21/1990 ~United Press International

NEWARK, NJ (MARCH 21) UPI - The nation's best-known maker of kosher food conspired to fix the price of ''kosher for Passover'' matzo, the unleavened bread Jews use to commemorate the escape from Egypt more than 3,000 years ago, prosecutors charged Wednesday.

B. Manischewitz Co. of Jersey City was charged in a one-count federal indictment with illegally fixing the price of the matzos made especially for use during the holiday, said Joe Krovisky, a Justice Department spokesman.

Passover is the eight-day Jewish holiday commemorating the Exodus from Egypt in 1200 B.C. The use of matzo recalls the fact the Jews did not have time to let their bread rise before they were forced to flee into the desert.

The holiday begins this year at sundown on April 9.

The indictment, handed up Monday by a federal grand jury in Newark, charges the company with conspiring with competitors through six holiday seasons - from 1981 through at least April 1986 - to set higher prices on about $25 million worth of matzo items sold in the United States.

No Manischewitz executives were charged in the indictment. The company, if convicted, could be fined $1 million.

Robert Mann, Manischewitz's vice president and secretary, refused to comment beyond a statement saying the firm ''denies the charges and maintains that its prices have been independently and fairly determined and have never been set pursuant to any agreement with an competitor.''

''Manischewitz will vigorously defend against the charges,'' the statement added.

The indictment does not identify the alleged co-conspirators or elaborate on how much the alleged price fixing cost consumers. It does allege, however, that the conspiracy included ''the major manufacturers of kosher for Passover matzo products in the United States.''

The nation's other large manufacturer in the kosher for Passover matzo business is Streits Matzos of New York.

''No one is in the office right now. It's the busy time of the year,'' a receptionist at Streits said in response to a request for comment on the indictment.

None of Manischewitz's other products, which include kosher cakes, cookies soups and processed fish, are mentioned in the indictment.

The company, founded in 1888 in Cincinnati, also makes matzos under the Goodman and Horowitz Margareten labels.

Manischewitz reported record sales of $32.5 million in 1989 in its latest

annual report.

#90080u1448 03/21/1990 ~United Press International
(MARCH 21) UPI - Illinois Representative Gus Savage says that if he's re-elected to Congress in November, he'll push to make sure a black candidate defeats Chicago Mayor Richard Daley in 1991. Savage won a hard-fought Democratic primary victory yesterday... saying he has proven what he called the ''white racist press'' wrong by winning his party's nomination for a sixth House term.

There's NO end in sight to the Greyhound bus strike... but federal mediators say they are in touch with both Greyhound and the union representing nine-thousand-300 striking employees. The two sides reportedly remain far apart in efforts to cement a contract that could bring the employees back to work. Wages and benefits have been the big hurdles since the strike began March 2nd.

Czechoslovakian President Havel arrived in London today for a three-day visit. A British official says Havel will have lunch with Queen Elizabeth in Buckingham Palace and hold talks with British Prime Minister Thatcher, which are expected to focus on German unity. Havel is a former political prisoner who became Czechoslovakia's first NON-communist president in four decades.

The World Scout Bureau reports that Boy Scout units are re-appearing in the Soviet Union after decades of pre-glasnost prohibition. The latest World Scouting newsletter says membership in the official Soviet youth organizations is declining sharply... and other organizations, including Scouting, are beginning to form in some areas.

#90080u1467 03/21/1990 ~United Press International
MOSCOW (MARCH 21) UPI - Five anti-Semitic rightist groups announced Wednesday they have joined forces and called for the return of the Czarist monarchy to save Russia.

Leaders of the new People's Russian Orthodox Movement said the root of all Russia's problems is Zionism and the country's 2 million Jews, who form less than 1 percent of its population of 290 million.

''Seeing that our country is now in a very dangerous situation, we decided to join all the Russian Christian Orthodox popular movements into a fist to smash in the teeth of the scum who would see Russia destroyed,'' said Evgeny Pashkin, who brought the five groups together.

The rightist extremists held their news conference in an old working-class neighborhood of Moscow at a flat filled with colorful portraits of the last Russian monarch, Nicholas II, and Czarina Alexandra. Also prominent was the swastika-like emblem of the Russian People's Party, a black cross in a yellow circle.

''Russia's salvation lies with God and patriotism,'' Pashkin said.

The consolidation of the militant rightists in Russia follows resounding defeats for conservative nationalists in recent parliamentary and local elections across the Soviet Union.

The Russian nationalists maintain that Russia, the largest Soviet republic has been victimized by the Soviet Communist empire and should have its own capital, Communist Party, KGB and Academy of Sciences like the other 14 republics.

Pashkin, head of the Christian Patriotic Union, accused the Jews of inciting strife between Armenians and Azerbaiajanians, and for the policy of reducing the Soviet armed forces to ''make Russia defenseless.''

The most virulent of the new coalition's five groups, the Pamyat Union for Ethnically Proportional Representation, called for the KGB intelligence agency to wage war on Jews and Freemasons.

''The Union demands that the budget of the KGB and analogous bodies be expanded,'' its program said. ''All their activities should be concentrated on combatting Zionism and Freemasonry in this country and abroad.''

The umbrella organization's other two groups are the National Patriotic Front of Novosibirsk and the Russian Armed Forces Union.

Pamyat activist Alexander Kulakov said the country's mounting ethnic strife can be stopped only by reintroducing the monarchy that ended with the 1917 Russian Revolution, not through the emerging multi-party system.

''Only the unity of the monarchy and the people, and not the presence of many parties, will create the necessary balance between the interests of various nations,'' he said.

Added Pashkin: ''Czarism is the God-given order of things.''

Russian People's Party head Konstantin Sidoruk said the two most likely claimants to the Russian throne are Vladimir Kirillovich, who lives in Geneva, and another emigre in San Francisco.

But Kulakov cast doubts on Kirillovich's claim: ''He has some Jewish

blood.''

#90080u1468 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - The Klamath River in Oregon topped an environmental group's list Wednesday of the 10 U.S. rivers most endangered by mining, flood control dams and hydroelectric projects.

''There are some rivers that are so outstanding that they ought to be off limits (to development). The burden is always on us and seldom on the developers,'' said Kevin Coyle, acting president of the non-profit group American Rivers.

The 1990 most endangered rivers and river systems are the Klamath, Colorado's South Platte River, Maine's Penobscot River, California's American River, Idaho's Bruneau and Jarbidge rivers, Alaska and Canada's Alsek and Tatshenshini rivers, New Jersey's Passaic River, Alabama's Cahaba River, New Mexico's Jemez River, and Missouri's James River.

American Rivers named the Klamath as ''the most endangered'' river because of a proposed hydropower plan at a time when a 19-mile stretch has been found eligible for inclusion in the national Wild and Scenic Rivers System.

The city of Klamath Falls's hydropower no-dam plan would involve diverting water from the 19-mile stretch into a tunnel. American Rivers contends this threatens fishing, boating and year-round whitewater rafting.

''This hydroelectric project is probably as environmentally benign as any proposed in the United States,'' Michael Hartfield, information officer for Klamath Falls, said in a telephone interview.

The other rivers on the list include:

-South Platte River in Colorado. A 24-mile stretch of the river that flows through the Pike National Forest, 35 miles south of Denver, would be inundated by the proposed Two Forks water storage dam, American Rivers said.

-Penobscot River in Maine. The Bangor Hydroelectric Co. proposes to build a hydroelectric dam on the Lower Penobscot.

-American River in California. A 1986 flood that washed through Sacramento revived a U.S. Army Corps of Engineers' proposal to build a ''dry'' dam at the Auburn Dam on the river strictly for flood control. American Rivers fears the dam could easily be upgraded to a multi-purpose dam, which would permanently inundate more than 48 miles of spectacular canyons along the river.

-Bruneau and Jarbidge rivers, which flow through the high desert country of southwest Idaho. The Air Force wants to expand its 100,000 acre Saylor Creek Range to include these rivers and adjacent lands for low-level supersonic bombing.

-Alsek and Tatshenshini rivers in Alaska and British Columbia, Canada. Canadians have proposed developing a copper mine near the confluence of the two rivers.

-Passaic River in northern New Jersey. In Paterson the river plunges 70 feet, creating the second largest U.S. waterfall east of the Mississippi River, smaller only than Niagara Falls.

The U.S. Corps of Engineers proposes a 13-mile underground tunnel to curb a recurring flooding problem. American Rivers said wetlands and the scenic beauty of the falls would be destroyed.

-Cahaba River is Alabama's last major undammed river, flowing from Birmingham to Selma. It is threatened by technology to extract methane gas from coal seams.

-Jemez River in New Mexico, which is eligible for inclusion in the national Wild and Scenic Rivers System. A recent proposal to mine 2,000 acres of high-grade pumice used for stone-washed jeans and other purposed threatens the river.

-James River near Springfield, Mo., considered one of the best float streams in the Midwest. A water supply dam is proposed.

#90080u1469 03/21/1990 ~United Press International

NEW DELHI, INDIA (MARCH 21) UPI - Police detained about 60 Tibetan protesters outside the Chinese Embassy Wednesday hours before Chinese Foreign Minister Qian Qichen arrived on a visit expected to include talks on a border dispute that has plagued Sino-Indian relations for 27 years.

Qian, on his first visit to India and the first by a Chinese foreign minister since 1981, flew to the Indian capital in the early evening from the northwest city of Agra, where he toured the Taj Mahal and other historic sites.

In brief comments at the airport where he was met by Foreign Minister Inder Kumar Gujral, Qian said the two countries shared an ancient civilization and are close neighbors.

''I am on a mission to increase bilateral ties,'' Qian told reporters.

Relations between the world's two most populuous nations improved slightly after former Prime Minister Rajiv Gandhi in 1988 paid the first visit to China by an Indian government chief in more than three decades.

Beijing was also apparently pleased with New Delhi for declining to condemn the massacre in June 1989 of pro-democracy protesters around Tiananmen Square.

Trade ties between the two neighboring countries in 1989 reached a record $270 million.

But the improvements are mostly superficial, with no substantial progress on a dispute over the international boundary that has remained the main impediment to better ties since 1962, when India lost territory to China in a brief frontier war.

New Delhi says China occupies 14,500 square miles of its territory in the desolate Aksai Chin region of the western Himalayas.

China claims the Indian state of Arunachal Pradesh, a mountainous region of 56,000 square miles in the eastern Himalayas that Beijing says is historically and culturally bound to Tibet.

Beijing in the past has offered to give up its claim to the eastern sector if India recognizes Chinese sovereignty in Aksai Chin. New Delhi has rejected the offer, saying both regions belong to India.

Qian arrived in the western port city of Bombay on Tuesday to inaugurate a Sino-Indian trade group and returns home Saturday.

The protest rally outside Beijing's mission was organized by the Tibetan Women's Association to protest the visit and Chinese rule of their Himalayan homeland.

About 60 demonstrators, shouting ''Chinese dogs leave Tibet'' and ''Death to the Chinese foreign minister,'' pounded their fists on the 10-foot-high metal mission gate.

The officers, their hands clasped in the traditional Indian sign of respect, appealed unsuccessfully to the women to stop.

The protesters were pushed back and surrendered without a struggle when police ordered them onto a bus, which took them to a nearby police station. A police official said they would be released later in the day.

India is home to some 100,000 Tibetan exiles, many of whom fled their homeland with their spiritual and temporal leader, the dalai lama, in 1959

after a failed uprising against Chinese rule.

#90080u1478 03/21/1990 ~United Press International
(MARCH 21) UPI - TODAY'S PEOPLE

DRUMS AND TREES: There's an environmental tie-in with the new book on drums by Mickey Hart, one of the Grateful Dead's two drummers. ''Drumming at the Edge of Magic: A Journey into the Spirit of Percussion,'' which will be published in September by Harper & Row San Francisco, is about the history and significance of drumming and Hart's travels around the world in pursuit of ancient and endangered drumming traditions. ''It's a natural progression from learning about endangered music to caring about our endangered planet,'' says Hart. Therefore, because of Hart's concern for the environment, particularly rain forests, his publisher will plant two trees in a South American rain forest for every one tree required to produce his book. ''Although obviously the paper used for book production doesn't come from rain forest trees, we see this action as a powerful symbol of our joint responsibility for replenishing natural resources,'' said Clayton Carlson, publisher of Harper & Row San Francisco.

CABBIE RECORD: Carmen ''Irish'' Fasanella, who had some pretty famous fares in his 68 years as a cab driver in Princeton, N.J., has made it into the Guinness Book of World Records as the world's longest-licensed cab driver. Many of Fasanella's customers were Princeton University students, including Brooke Shields. ''That Brooke Shields, she was a wonderful girl '' he says, ''but her mother was a snob.'' Fasanella also served as a bodygyard of sorts to Albert Einstein when the scientist came to the United States. ''He hired me to follow him on his walks in the morning,'' Fasanella said. ''People used to come after him on his walks to try to get his autograph and scare him out of his shoes. They didn't mean any harm but he didn't know that. I used to shoo them away.'' He said another famous scientist, J. Robert Oppenheimer, who worked on the atom bomb, ''wasn't much of a customer. He had his own cars.''

COUNTRY DECENCY: Country singers Emmylou Harris and Ricky Skaggs agree that there's some trashy music around but they still oppose mandatory warning labels on records. They both testified Tuesday before a Tennesse Legislature committee that is considering a proposal to put warning stickers on songs that touch on suicide, sex, violence or drugs and alcohol. Harris, who is president of the Country Music Foundation, said offensive lyrics are a ''cry for help'' by troubled songwriters but says warning labels still aren't a good idea. ''There is music out there today

that frightens me,'' she said. ''We might succeed in eliminating some of this stuff out there, the trash, but it would also inhibit the industry.'' She's also concerned because her 20-year-old daughter works in a record store. ''If the bill passes, my 20-year-old would be in danger of being arrested for selling records to minors,'' she said. The lobbying worked. The proposed legislation was killed by a subcommittee Wednesday.

FIRE SALE: Country singer Conway Twitty continues to sell off his assets. He just completed a million-dollar sale of the rights to his hit songs to Tree International, a Nashville publishing company. ''I just decided to sell everything,'' Twitty said. ''I'm trying to simplify my life. Things have never mattered that much to me. Those things take time and one of the things that has suffered is my songwriting. I want to get it down to just me and my music.'' Last month, Twitty announced he is trying to peddle his Twitty City tourist attraction in Hendersonville for $6 million and he's been selling off other business interests, such as his share of the Nashville Sounds minor league baseball team, his classic car collection and one of his custom touring buses.

GLIMPSES: Britain's Prince Charles and Princess Diana, who often travel seperately these days, flew in to Yaounde, Cameroon, Wednesday for a low-key welcome with no cheering crowds or flag-waving. The royal couple had first taken their yacht, the Britannia, from Nigeria to the port of Douala and then caught a plane for Yaounde. During their sojourn, the two will throw a dinner for President Paul Biya aboard the yacht ... Five people were hurt in a mob scene at a Los Angeles record store where the British pop band Depeche Mode was signing albums. Fans has been camping out near the store since the weekend and by the time the group appeared Tuesday the crowd had swelled to at least 5,000. The injuries resulted when the fans rushed the store in hopes of getting in before closing time.

-30- 4723

#90080u1479 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Panamanian Vice President Guillermo Ford, striking an anti-drug chord in a bid for $500 million in economic aid, announced a series of steps Wednesday aimed at curbing money laundering by Panama's banks.

At a news conference, Ford outlined a new series of laws that will require all banks to report any cash transactions involving more than $10,000. Banks that fail to comply could be fined up to $1 million.

According to Ford, the Panamanian banking commission has frozen 230 bank

accounts suspected of being used by traffickers for money laundering.

Ford said, ''In Panama, because of the very nature of the Noriega nightmare, narcotics jeopardized the very fabric of our nation. We want to eliminate the threat of drugs, because narco-trafficking and narco-terrorism are a threat to the survival of our democracy.''

He said he would announce further banking restrictions next week, putting stricter controls over financial transfers and documents such as letters of credit.

Referring to people who try to use Panamanian banks for drug money, Ford declared, ''If they get cute, they are going to get clobbered.''

The measures are part of an effort to reassure members of Congress that the new government of Panama is acting to root out criminal activity that flourished under the rule of Gen. Manuel Noriega, who was deposed by U.S. troops in December and brought to Florida for trial on drug-trafficking charges.

Ford also said the government is preparing to monitor and control the sale of chemicals, such as ether, used to refine narcotics.

Deputy Secretary of State Lawrence Eagleburger, talking Tuesday about the aid package proposed by President Bush, said, ''We won. We got what we wanted'' in Panama and Nicaragua.

''Now we are going to see if we have what it takes to sustain what he helped to start,'' Eagleburger said. ''We may be about to learn that winning was the easy part.''

Bush is seeking $500 million for Panama and $300 million for Nicaraguan, where U.S.-backed presidential candidate Violeta Chamorro is to be inaugurated in April.

Some members of Congress have talked of moving some of that money to a similar package for Eastern Europe. State Department spokesman Richard Boucher said Wednesday, ''The aid proposal for Panama was very carefully considered. We believe it is justified.''

Senate Democratic leader George Mitchell of Maine said Wednesday that the Senate will not satisfy Bush's call to finish the aid package by April 6.

Ford said the final two years of the Noriega dictatorship - and a U.S. economic embargo, now lifted - left Panama's economy in ruins. He said the country's manufacturing sector declined by 25 percent and the construction industry was cut 60 percent.

Some 180,000 people are unemployed in the nation of about 2 million, he said, adding, ''We need a jump start for our devastated economy.''

He pledged that if Congress delivered the $500 million, Panama would become self-sufficient and never return to request more.

During his three-day visit to Washington, Ford arranged meetings with administration officials, members of the House and Senate, and officials of the International Monetary Fund.

#90080u1481 03/21/1990 ~United Press International

NAIROBI, KENYA (MARCH 21) UPI - Kenyan authorities Wednesday released two men detained last week as suspects in the killing of British woman Julie Ward in a game park 18 months ago, said one of the British detectives who arrested them.

Det. Insp. David Shipperlee said he and Graham Searle had finished questioning the two men pending results of forensic tests in London and that the men had been released.

''We are not looking for anyone else at this time,'' Shipperlee said. ''We think these may be the right people.''

The suspects, both game wardens in the Masai Mara game reserve, 120 miles west of Nairobi, were arrested after Searle and Shipperlee were invited to Kenya three weeks ago to reinvestigate Ward's death.

Ward's remains - a jaw-bone and part of a leg - were found in the game reserve in September 1988, but it was not until last October that an inquest said she had been murdered and not, as first thought, killed by wild animals.

Ward, 28, on an extended vacation from Britain, is believed to have been driving alone through the grassland park when she met her killers, who abducted and held her for six days before hacking her to death.

The detectives interviewed all park wardens and detained the two men pending forensic examination of material found inside their ranger station.

Ward's parents, Janet and John Ward flew to Kenya Saturday after last week's arrests, and John Ward said he understood the suspects were freed on bail and were required to report daily. He said he believed the forensic investigation could lead to murder charges.

''They took the floor sweepings from five game posts for examination,'' he said. ''It's a slow business.''

John Ward has pursued an independent inquiry into his daughter's death and said he would continue investigating.

''I am unconvinced that it was only these two guys,'' he said Wednesday. ''If they are charged I would expect that other arrests would follow.''

''We have in any case been carrying on inquiries on our own independent lines,'' he added, saying he was following up evidence given to him in London by a Kenyan who flew to see him recently.

''It is difficult to establish where the murder ends and a cover-up begins '' he said. Shipperlee said he and Searle would return to London Thursday submitting a report to the Kenyan police and leaving it up to them whether or not to charge the two suspects.

#90080u1484 03/21/1990 ~United Press International

LONDON (MARCH 21) UPI - Nathaniel Mayer Victor Rothschild, the colorful scientist, banker, philanthropist and a descendant of the famous German banker Mayer Amschel Rothschild, has died, the family bank announced Wednesday. He was 79.

The dean of the British branch of the Rothschild families, Lord Rothschild died Tuesday, N.M. & Sons Rothschild Bank in London said. Neither the cause nor the location of his death was disclosed.

His ancestor, Nathan Mayer Rothschild, opened the Rothschild bank's London office in 1805. The family has since spawned bankers, scientists, and patrons of the arts, but many have considered Lord Rothschild the most interesting of the line.

Although a banker, Lord Rothschild preferred the administrative side of the family business and did not make banking his first priority. He described himself as "reasonably well off" but complained that people tended to think all the Rothschilds were "fantastically rich." "I don't think I'm a millionaire," he once said. "I gave a lot away to my children."

A war hero who worked in military intelligence and was decorated for defusing German bombs, Victor studied at Cambridge to be a biophysicist and went on to head the government's think tank and the research arm at the Royal Dutch Shell group. He was also an accomplished cricket player and, tutored by Teddy Wilson, played jazz piano.

With his retirement in 1974 as director-general of the Cabinet Office's central policy review staff, Lord Rothschild warned that the U.K.'s financial crisis could only be solved if it regarded itself as at war. He

predicted the nation would be one of the poorest in Europe by 1985 unless it did.

He held honors from a number of universities and institutions including the Weizmann Institute and the Technion in Israel, a nation in which he had a deep, abiding interest.

Lord Rothschild married Barbara Hutchinson in 1933. They divorced in 1946, and later that year he married Teresa Mayor. He had two sons - one of whom, Jacob, he described as a "financial genius" - and four daughters by the two marriages.

SPARTANBURG, SC (MARCH 21) UPI - A truck driver was killed early Wednesday when someone threw a a 30-pound dumbbell off a highway overpass onto his truck, authorities said.

Spartanburg County Coroner Jim Burnett said Philip E. Reed, 38, of Westville, Ind., was driving east on Interstate 26 when the dumbbell crashed through the windshield of his rig.

Burnett said the end of the steel weight bar penetrated Reed's chest and ruptured his heart, causing him to bleed to death.

He said Reed's truck apparently was targeted at random.

''It's a very cold-blooded murder in my book,'' the coroner said. ''It's just a pure homicide.''

The weights apparently were thrown off the overpass shortly after midnight and Burnett said the truck traveled about 1,000 feet before coming to rest along the right shoulder of the highway.

Burnett said the problem of people throwing objects from highway overpasses exists across the nation.

''It has not really been a local problem but it's my understanding from talking to other truck drivers that there's a great fear about this because there's no defense against it,'' Burnett said.

ANCHORAGE, AK (MARCH 21) UPI - An Air Force F-15 jet fighter inadvertently fired an armed missile at another Air Force jet, which was hit and damaged, triggering an investigation and cancellation of the

''Arctic Cover'' training exercise, Elmendorf Air Force Base officials said Wednesday.

The pilot who ''unintentionally'' fired the missile realized what was happening moments after he released the heat-seeking Sidewinder at his training partner and urgently radioed him, Sgt. David Haulbrook said.

The pilot in the second F-15 took evasive action but was unable to completely avoid the attack. He was not injured, but his jet fighter suffered a significant amount of damage at the rear of the plane where it was hit.

''It took real good flying to get it back,'' Haulbrook said.

The accident happened Monday, on the first day of the Arctic Cover air war game exercises 150 miles west of Anchorage over the Stony military operations area. The maneuvers were canceled. The planes had left Elmendorf, at the edge of Anchorage, at 1:15 p.m. Monday and were back at 2:40 p.m.

''It's not normal procedure to call off an exercise, but we did it in the interest of safety,'' Haulbrook said. He said he had no information on whether other jet fighters in the exercise also were inadvertently armed.

Just how a loaded missile was fired during a routine training exercise is something of a mystery that investigators hope to solve, Haulbrook said.

The missile, an AIM-9 ''sidewinder,'' is a high-explosive warhead designed for air-to-air combat, finding its target by seeking a source of heat and then exploding into fragments.

During exercises such as Arctic Cover, F-15 jet fighter pilots simulate releasing missiles but do not actually release missiles loaded on their planes and, Haulbrook said, unarmed missiles are not released.

When the first pilot saw he had released a missile, he radioed the other pilot who was within visual range.

''We don't know why it was armed,'' Haulbrook said. ''Missiles are activated by a weapons loading team (at Elmendorf Air Force Base), but the pilot arms the release mechanism for firing the missile.''

The Air Force wasn't saying what happened to the missile and whether there were any loaded charges out on the tundra beneath the flying range.

#90080u1519 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - A lawyer for the Rev. Al Sharpton, who arrived with supporter Tawana Brawley at his trial on charges of looting $250,000 from a youth movement, was accused Wednesday of trying to influence potential jurors.

Sharpton and Brawley, the black teen whose claim that she was raped by six white men was rejected by a grand jury, listened silently as the prosecutor made his accusations against defense lawyer Alton Maddox Jr. The hearing took place at state Supreme Court in Manhattan, where jury selection is continuing in the Pentacostal minister's fraud and grand larceny case.

Sharpton, 35, is accused of stealing at least $250,000 from the National Youth Movement, a Brooklyn charity he founded while in high school in 1971. If convicted, he faces up to seven years in prison.

State Assistant Attorney General Victor Genecin complained to Justice Joan Carey that Maddox was trying to influence potential jurors with statements broadcast on radio station WLIB-AM and shouted by demonstrators outside the courthouse.

Maddox conceded that during a radio talk show he said it was important to let potential jurors know that they can ''make a difference.'' He said, however, it was ''ridiculous'' to think his comments would taint the jury pool.

''For Mr. Genecin to believe that the people who listen to WLIB are so unsophisticated, so dumb, so unintelligent and so vulnerable that everything they are going to hear on the airwaves they will be susceptible to is ridiculous,'' Maddox told the judge.

Judge Carey declined to chastise Maddox but admonished both lawyers to ''act appropriately.''

She said protestors have every right to gather outside the courthouse, ''but those demonstrations have to end at the door of the courthouse.''

''Paramount is the fact that the case will be tried in the courtroom,'' Carey said.

Sharpton has claimed he is the target of a political vendetta sparked by the Tawana Brawley case.

''I never took any money. I can account for all of the money,'' the civil-rights activist said Monday outside the Manhattan Criminal Courts Building.

As Sharpton arrived Monday for jury selection, he greeted about 75

supporters outside the courthouse.

The supporters, members of the New Alliance Party, chanted ''Sharpton is our leader! Cuomo is the enemy!'' and hoisted placards reading ''Tawana Brawley's story has yet to be told.''

The black teenager claimed she was raped by six white men, including one wearing a badge, who scrawled racial slurs on her body and left her in a garbage bag behind her Wappingers Falls, N.Y., home in November 1987.

A subsequent grand jury investigation, led by state Attorney General Robert Abrams at the request of Gov. Mario Cuomo, determined that Brawley's claims were unfounded.

#90080u1523 03/21/1990 ~United Press International

WAYNESBORO, GA (MARCH 21) UPI - A dead emergency telephone and a diesel engine that wouldn't crank were among the mysteries inspectors tried to unravel Wednesday while investigating a potentially dangerous system failure at Georgia Power Co.'s Plant Vogtle nuclear station.

There were no injuries.

Ken Clark, spokesman for the team of seven Nuclear Regulatory Commission inspectors working in Waynesboro, said Wednesday it appeared backup power systems and a phone line used to alert agencies around the state failed during Tuesday's power failure at the plant about 10 a.m. EST.

Clark said inspectors did not know if Georgia Power will face any punitive actions because of the incident, and they did not know how much longer they would be at the plant.

''We may do additional inspections,'' he said.

Georgia Power spokesman Tal Wright said a ''site area emergency'' was declared when a truck backed into a pole supporting electrical equipment, knocking out power to the plant. A site area emergency is the second-highest emergency level that can be ordered under NRC regulations, below a ''general emergency.''

The lack of power prevented coolant from being pumped through the Unit 1 Reactor, which was shut down for refueling but still needed cooling.

Clark said problems at the plant would have been minor if a diesel engine providing backup power to Unit 1 had started immediately, as it was designed to do. Instead, plant workers had to manually crank the engine three times before it started, causing a delay of 35 minutes and

triggering the site area emergency declaration.

''During the period of time they had no power, they didn't suffer any problems with the reactor,'' Clark said. ''There was some increase in temperature in reactor coolant water, but it was not sufficient to cause any damage to the fuel.

''The concern was the water would have continued heating if power had not been restored. They don't want the water to boil - that could damage the fuel.''

Fuel damage would have resulted in a release of radiation into the coolant system, Clark said, although radiation probably would have been contained by the system and the building housing it.

''There was a potential for a 35-minute period of time for that situation to worsen,'' Clark said. ''It's difficult to speculate on where a series of incidents might or might not go.''

#90080u1526 03/21/1990 ~United Press International

LUSAKA, ZAMBIA (MARCH 21) UPI - The chief of intelligence of the African National Congress left Lusaka Wednesday to return to South Africa after 15 years in exile.

Jacob Zuma left aboard a South African Airways flight for Johannesburg with two other ANC officials. He is the first senior ANC official to return home in response to the Feb. 2 announcement by South African President Frederik De Klerk lifting a 30-year ban on the organization that fights apartheid.

Accompanying Zuma were Penwell Maduna, a lawyer expected to be involved in formulating a post-apartheid constitution, and Gibson Macanda, a security officer of the organization.

Their return is in advance of a planned meeting between de Klerk and members of his Cabinet with ANC leaders, including ANC Deputy President Nelson Mandela.

The ANC had attempted to keep secret Zuma's departure and would not disclose the nature of his mission.

KATMANDU, NEPAL (MARCH 21) UPI - About 80 percent of the schools in the capital and nearby Patan were closed Wednesday as teachers joined a

nationwide strike to pressure the government to allow opposition political parties.

The strike, which checks with schools and other sources showed had shut down about eight out of 10 primary and secondary schools, marked a growing willingness among Nepal's professionals to join the opposition-led movement and followed Tuesday's arrests of about 500 professionals as they met to discuss the campaign.

Most of the 500 were later released but at least two were jailed, apparently without trial, family members said.

Devendra Raj Pandey, a U.S.-trained economist who is acting president of Human Rights Organization of Nepal, and Mathura Prasad Shrestha, medical professor and president of the Forum for the Protection of Human Rights, were both imprisoned Wednesday for undetermined lengths of time, family members said.

The editor of the popular weekly newspaper Deshantar was arrested in his office by uniformed police Wednesday, the newspaper reported.

At least 13 people have been killed and thousands arrested since Feb. 18 when a coalition of eight leftist parties began strikes and demonstrations aimed at ending Nepal's partyless panchayat system.

About 500 students from the Siddhartha High School in Katmandu stood on a road Wednesday and held up traffic for about one hour before police dispersed them with batons, witnesses said.

King Birdendra was said to be considering political reforms within the panchayat system but his overtures were rejected by opposition leaders who insist on the full restoration of the multi-party democracy the king's father abolished 29 years ago.

Wednesday's strike was called by the Nepal National Teachers Association, which has presented the government with 10 demands that include the official recognition of their association.

#90080u1537 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A man claiming to be an intruder who penetrated a nationwide computer network said he staged the invasion to ''thumb his nose'' at critics of computer hackers, a Harvard scientist said Wednesday.

The caller, who identified himself as Dave and said he was from Australia, phoned at about 2 p.m. Tuesday and spoke for about 10 minutes, said

Clifford Stoll, an astronomer at the Smithsonian Astronomical Observatory at Harvard.

''In short he said he broke into my computers to show that hackers could get into my computer. He did all this to thumb his nose at legitimate users. He's essentially a combination vandal and thief,'' Stoll said.

''He called and said, 'Hey I got in and did it to show that people like you are easy targets.' My response is, 'Yeah we do astronomy here. We don't want secure computers,''' Stoll said.

''He said, 'Hey I'm the guy who broke into your computer. I didnt mean to destroy anything. I did it to show that your opinion of hackers are wrong. He wanted to correct my opinion of hackers,'' Stoll said.

''I think hackers are childish vandals or unethical people. I said, 'Wait a second. You've convinced me even more of my opinions. Anyone who behaves ethically will respect someone else's computer.' He didn't seem to udnertand that,'' Stoll said.

Federal investigators Monday said an intruder had illegally entered computers at dozens of institutions linked to Internet, a nationwide network. No serious damage was reported.

Stoll wrote a book called ''The Cuckoo's Egg'' in which he described how he tracked down a group of West Germans breaking into U.S. computers, and criticized hackers.

''He left me a note in the computer saying now the 'cuckoo has egg on his face,' '' said Stoll. Stoll found the note on Sunday and shut down the center's computer system.

''It's a rather snide way of saying, 'Look at how low the mighty have fallen,''' he said.

''I've come to an important conclusion. When you tell people they've acted like children, they get even with you by acting like children,'' he said.

''He thinks the way to make computers more secure is by breaking into them. (That's) like making neighbhorhoods more secure is by breaking into homes,'' said Stoll.

The New York Times reported Wednesday it received a similar telephone call.

Eugene Spafford, a computer scientist who specializes in computer security issues at Purdue University, told The Times the intruder broke into that system, although nothing had been compromised.

''The problem with most of these guys is that they think there is no way they'll get caught. It's not a game and some of them will be rudely surprised,'' Spafford complained.

Among other institutions believed to have been broken into by the intruder are the Los Alamos National Laboratory, Digital Equipment Corp., Livermore Laboratories, Boston University and the University of Texas, the Times said.

#90080u1542 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - The recent global warming trend cannot be explained away by natural, long-term climate changes, bolstering views that man-made ''greenhouse'' gases are causing the temperature rise, a study showed Wednesday.

A team from Britain's University of East Anglia said its computer simulation shows natural climate variations cannot completely account for the 0.9 degree Fahrenheit jump in the world's average temperature over the past century.

Although long-term climate swings were found to be ''unexpectedly large,'' researchers said their study showed such fluctuations probably could not generate more than a 0.54 degree rise or drop in average global temperature over a 100-year period.

Many scientists think carbon dioxide and other gases, produced by the burning of fossil fuels and clearing of forests, are boosting Earth's temperature by acting like a greenhouse and trapping energy in the atmosphere. But others have argued the warming trend recorded since the mid-1800s may stem from natural, long-term variations in Earth's climate, not man-made pollutants.

Reporting in the journal Nature, East Anglia's T.M. Wigley and S.C. Raper said their work ''virtually eliminates'' the likelihood that natural climate variablity is the sole explanation for recent global warming.

But the researchers cautioned that their findings still do not provide indisputable proof that the greenhouse effect is the prime cause of the temperature rise.

Andrew Lacis, a research scientist at the Goddard Institute for Space Studies in New York, said the findings were consistent with results he and his colleagues had previously produced using different models.

''I think it points out that there is this long-term variablity but despite this variablity the observed temperature that we've seen over the

past century is a real increase in temperature,'' Lacis said.

Because of the lack of suitable data, it is possible the new model may have underestimated how long oceans retain heat or overlooked other possible warming factors, like unusual shifts in ocean circulation, they said.

Many global warming models estimate if carbon dioxide emissions continue at current rates, the amount of the major greenhouse gas will double by the year 2030 and average temperatures will rise anywhere from 4 degrees to 9 degrees Fahrenheit above the pre-industrial mark of 1850.

The British study was supported by a grant from the Energy Department's carbon dioxide research division, researchers said.

#90080u1547 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Supporters of nuclear free zones disclosed internal memos Wednesday revealing a corporate campaign to lobby high ranking federal officials to bar local ordinances restricting nuclear weapons and radioactive materials.

The documents also show that the nuclear weapons industry has mounted a costly campaign to defeat two nuclear free zone initiatives in Alameda and San Francisco counties in California.

And the papers suggest that major defense contractors had a hand in pressing the Justice Department to file a lawsuit in September challenging the constitutionality of the nuclear free ordinance in Oakland, Calif.

Oakland's law is considered the most stringent of nuclear free zones adopted by 168 U.S. communities in 23 states. Missoula, Mont., became the first nuclear free zone in the United States in November 1978.

''At a time when Democracy is breaking out all over the world, our federal government is considering negating the decisions of voters in communities across the country,'' said Chuck Johnson, president of Nuclear Free America.

''What they (defense contractors) cannot win at the ballot box, they hope to gain by secretly lobbying the federal government for relief,'' said Hank Prensky, secretary-treasurer of the U.S. Nuclear Free Zone Association.

The memos, circulated last year by the Aerospace Industries Association to its 40 corporate members, were mailed anonymously in December to the Baltimore office of Nuclear Free America, a clearinghouse for the nuclear

free zone movement in the United States.

AIA spokeswoman Alexis Allen said there was nothing sinister or illegal about efforts by the industry to lobby federal officials against nuclear free zones or to campaign against them.

''We were conveying the viewpoint of the aerospace industry on this issue to the appropriate government officials,'' Allen said. ''That's our democratic form of government at work.''

Eric Fersht of the environmental group Greenpeace acknowledged, ''These activities probablly are not illegal, but they should be.''

Fersht said there was an inherent conflict in defense contractors who ''derive a certain portion of their revenues from taxpayer dollars'' lobbying top federal policymakers to overrule the will of voters.

One AIA memo reveals the group's president, Don Fuqua, and Electronics Industry Association President Pete McCloskey met privately with Deputy Defense Secretary Donald Atwood to press for Pentagon regulations pre-empting nuclear free zones.

The same document states that Atwood was ''receptive to the idea of pre-emptive action'' and that ''plans for a similar meeting'' with Energy Secretary James Watkins were ''under way.''

The memorandum was written by Fuqua, a former Democratic congressman from Florida who chaired the House Science and Technology Committee.

Another memo prepared by lawyers for the association suggests instead that the Defense Department could seek an executive order from President Bush banning local nuclear free zone laws.

''This approach could avoid inherent rulemaking delays,'' the memo says.

In a third internal memo dated Feb. 8, 1989, the AIA states: ''A possiblity of a legal challenge to the (Oakland) ordinance by the Department of Justice ... now exists.''

Nuclear free zone proponents said that memo suggests the trade association knew in advance that the Justice Department was preparing to bring suit.

Other documents outline the industry strategy for developing a sophisticated political and media campaign against other nuclear free zone initiatives scheduled for the California ballot in June.

Those campaigns were aimed particularly at ballot questions in San Francisco and Alameda County, which would affect the Lawrence Livermore

Laboratories and American Telephone and Telegraph's Sandia Labs.

#90080u1548 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Plans for building of plants overseas for the manufacture of propylene are mistaken because demand in the next decade can be satisfied by the byproduct from oil refining, a study concluded Wednesday.

Plants to make propylene, a building-block for acrylic fibers and phenolic resins used in the manufacture of plywood, are under construction in Belgium and Thailand and under consideration in Mexico, Kuwait, Venezuela, Malaysia, and Saudi Arabia, the study found.

Done by John Johnson of Probe Economics, Inc., Mount Kisco, N.Y., the study found that there will be enough propylene available worldwide in the 1990s from oil refining to make separate plants unnecessary.

"It doesn't make sense to build separate plants, certainly in the first half of the decade," Johnson said in a telephone interview. "Ten years from now, there won't be enough propylene from the traditional oil-refining source. In ten years, it would make more sense. Right now it doesn't," the analyst said.

Propylene is made directly from the propane in natural gas, Johnson said. Each plant costs from $25 million to $50 million to build, depending on its size.

Johnson said "conventional wisdom" currently holds that construction of new propylene capacity is a "near-sure bet in an increasingly uncertain petrochemical market." He said an analyst looking only at the chemical marketplace will conclude that there is a need for new capacity.

"But a broader view of the global economy shows a rapid rise in the use of automobiles in Japan and in emerging export-oriented economies. To meet the demand for gasoline, refiners in these fast-growing economies will install more refinery-cracking capacity," the study concluded.

"We believe these countries will upgrade an ever larger proportion of their refinery propylene to satisfy regional (propylene) demand," it said.

Johnson said he expected U.S. refineries to produce enough propylene to remain a significant exporter, particularly to South America, through 1995 and to meet its domestic needs through the year 2000. There are no plants in the United States devoted to making propylene separately from natural gas, the analyst said.

#90080u1549 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - President Bush telephoned White House press secretary Marlin Fitzwater to tease him about the porno doll that reporters had placed on the podium. But Fitzwater kept his eyes averted during the entire briefing, denying the cameramen a moment they were waiting for.

The Chilean wooden Indian doll was brought back by reporters who traveled with Vice President Dan Quayle to Latin America. Quayle caused his wife, Marilyn, some consternation when he purchased one of the dolls as a souvenir. Reporters observing the purchase wrote about it. Quayle apparently took it all in stride.

Fitzwater said that Bush has not seen the doll.

President Bush selected Quayle to serve as the nation's No. 2 leader because ''he's comfortable with him,'' says Marlin Fitzwater, White House press secretary.

Bush himself has not fully explained his choice. But then President Ronald Reagan did not have to justify his choice of Bush.

The selection of a vice presidential running mate is in the hands of the presidential candidate and a few close advisers.

The aide said that Bush felt that Quayle had won his spurs in the Senate, had beaten Democratic Sen. Birch Bayh for the Indiana seat, and he felt that Quayle would fit into the loyalty mold, just as he had done for Reagan.

As for being pilloried, Fitzwater says Bush has been there, and that he was often criticized for being a ''wimp'' for never opposing Reagan on any controversial issue during his eight years as vice president.

If anything, Quayle has been allowed to take a harder line on some key issues, apparently in line with his own conservative ideology and to appease the ultra-right supporters who do not want Bush to stray from the Reagan fold.

At the behest of Reagan, Bush, as vice president, presiding in the Senate, twice voted to break a tie that permitted continued production of chemical warfare weapons.

The first time he broke the tie Bush told Reagan he would do so if Reagan called his mother, Dorothy Bush, who was opposed to gas warfare. Reagan made the call and apparently poured on the charm and won Mrs. Bush's

approval.

Fitzwater has pictures and cartoons up on one wall in his office in the West Wing. He calls it the ''me'' wall. There are several autographed photographs with Bush, dating back to Fitzwater's service as the vice president's press secretary.

There also are framed cartoons that go with the turf of being the spokesman for the president of the United States and for the federal government.

Fitzwater is reminiscent of former White House press secretary Pierre Salinger who ruled the media roost in the Kennedy era. They both smoke cigars. But Salinger preferred Havana cigars and somehow got them despite the ban on Cuban imports.

Fitzwater told reporters that Cuban cigars are too strong.

Reporters are happy to see him take time out for a cigar. When he does so, he usually wanders down to the press room where they can corral him on an informal basis and kibitz about goings on that would not come up in a formal briefing.

Barbara Bush will accompany her husband to Bermuda Easter weekend when he meets with British Prime Minister Margaret Thatcher. The Bushes will return to the White House on Saturday, April 14, and were expected to spend Easter Sunday in Washington, going to church in the morning.

They also plan to be on hand for the annual Easter Monday egg roll that will bring thousands of youngsters and their mothers to the White House for fun and frolicking on the south lawn.

#90080u1560 03/21/1990 ~United Press International

BRUSSELS, BELGIUM (MARCH 21) UPI - A treaty recognizing Poland's western border should be initialed soon by the two Germanys then signed later by a unified Germany, Poland's foreign minister said Wednesday.

Krzysztof Skubiszewski met with Belgian officials and visited NATO headquarters to meet with Secretary-General Manfred Woerner and NATO ambassadors.

He was the third Warsaw Pact foreign minister to visit NATO. Jiri Dienstbier of Czechoslovakia visited earlier this month and Eduard Shevardnadze of the Soviet Union came in December.

The Polish foreign minister said a treaty recognizing Poland's western

border should be worked out, ''with our participation,'' at the ''two-plus-four'' talks on German unification.

He said such a treaty should be ''initialed by the two German states and signed later when they become a single country.

The ''two-plus-four'' talks involve the two Germanys and the Big Four Allies of World War II - Britain, France, the United States and the Soviet Union. At their first meeting last week in Bonn, representatives rejected full Polish participation, but agreed to let Poland join the talks when they discussed the sensitive Oder-Neisse Line that forms Poland's western boundary with East Germany.

Skubiszewski said ''a new security system'' was needed in Europe to address recent dramatic changes as well as the effect of a unified Germany.

Poland opposes a neutral Germany outside of any alliance, he said, ''but it is necessary to discuss a lot of points including guarantees for the Soviet Union.''

''The fact that East Germany will cease being a member of the Warsaw Pact will change the balance of Europe, so it is necessary to deal with all of these problems,'' he said.

Skubiszewski said Poland ''accepts the results'' of Sunday's East German elections, which represented a stunning victory for West German Chancellor Helmut Kohl's drive for swift German unification.

He said Poland's western frontier ''should not be a problem for the winners of the election. The general feeling in East Germany is to accept the frontiers.''

The foreign minister said Poland is ready to begin negotiations with the 12-nation European Community on an association agreement, calling for closer trade relations and other ties.

''But Poland is far from being qualified now for (EC) membership,'' he said. ''We have to first put our own economy in order.''

#90080u1561 03/21/1990 ~United Press International
BY LEON DANIEL - UPI

WASHINGTON (MARCH 21) UPI - The first attempt by the census bureaucrats to count America's homeless was seriously flawed.

''Overall, it went very well,'' said Census Bureau spokeswoman Rhea

Farberman, but her contention was challenged by considerable evidence to the contrary.

When dawn broke Wednesday, one census team that had walked the streets of a blighted North Philadelphia neighborhood throughout the bone-chilling night had failed to locate a single homeless person.

Neil Resnick, the disgusted team leader, blamed the weather and bureau procedures for what he said was an inability to count the homeless accurately.

''There's no homeless on the street in this weather,'' Resnick told UPI reporter David Enscoe while cruising block after block of burned-out, graffiti-splattered Germantown Avenue, shining a flashlight into doorways strewn with trash. ''They're all inside abandoned buildings. And we're not allowed inside.''

Conceding that entering such places would be dangerous, Resnick said, ''If we walked into a crack house, we'd be shot.''

He said the counting procedures seemed designed to undercount the homeless.

''I think it's a setup by the government,'' he said. ''They don't want the people to read in the headlines that there are 8 million homeless or whatever.''

R.E. Evans, a Washington bootblack who was easy to count because he sleeps on a heat grate near the White House, predicted, ''They'll miss most of us.''

The homelesss, ubiquitous in daylight, tend to become invisiblle after dark, disappearing into boarded-up buildings and under bridges when darkness falls.

Results of the homeless count will help determine federal aid to local governments as well as seats in Congress and state legislatures.

Advocates for the homeless fear an undercount would deprive existing programs to aid the destitute of vital funding. Some refused to cooperate in the count, arguing that the inevitable undercount would help the Bush administration downplay the homeless crisis.

Mitch Snyder, the nation's best known activist for the homeless, barred enumerators from the 1,400-bed shelter he runs on Capitol Hill.

Even as the bureau began its count, the city council in the nation's capital voted to cut spending on services for the homeless by $19 million.

In Detroit, census takers evidently skipped two of the city's largest and best-known shelters - the City Rescue Mission, where 79 homeless people were staying, and the Salvation Army's Harbor Light Center, which had 55 beds filled.

Census officials said they were not aware of the mission and believed the center was a permanent group home and not a shelter.

''How can you call yourself a census and you can't come to the most well-known shelter in the city?'' said John Everett, night manager at Harbor Light.''Everybody knows about this shelter - but evidently they don't.''

For its part, the bureau had conceded in a Washington news conference that its procedures would preclude an accurate count, but insisted its enumeration could approximate the magnitude of homelessness.

The public will have to wait a year for a look at what the bureau promises will be its ''snapshot of the homeless,'' a picture critics warn can only be distorted and out of focus.

#90080u1595 03/21/1990 ~United Press International

SEATTLE (MARCH 21) UPI - The chances of Japanese companies playing a major role in the development of a new Boeing Co. commercial airplane appear increasingly remote, The Wall Street Journal reported Wednesday.

Citing sources close to the talks between Boeing and three Japanese companies, the Journal said Boeing apparently is growing more confident that it could finance the expensive program for the proposed 777 jetliner. Industry experts say the program could cost $3 billion or more.

Boeing began holding talks with Mitsubishi Heavy Industries Ltd., Kawasaki Heavy Industries Ltd. and Fuji Heavy Industries Ltd. before making a formal announcement in December that it would pursue development of the 777.

The three companies already operate as subcontractors to Boeing in the construction of the 767 and other planes by manufacturing fuselage panels and other parts.

Boeing approached the Japanese as possible equity partners in the development of the 777 because of the cost involved. But sources said the Japanese were balking at the 25 percent or more financial stake Boeing was seeking.

In addition, the sources said Boeing realized having Japanese as full partners in development of the 777 could add to fears about transferring

sensitive technology in one of the few industries left where the U.S. has a clear advantage.

Analysts also have said that Boeing probably could line up financing without the Japanese and that its huge backlog of commercial aircraft orders, which is expected to keep production lines busy through most of this decade, wouldprovide a cash cushion for a costly development and startup program.

Boeing decided to pursue development of the 777, a 300-seat twin-jet, because of increasing demand from carriers for a plane providing the best of the seating and flight range capabilities of the 767 and the 747 jumbo jet. Boeing also is facing competition for the plane from McDonnell Douglas Corp.'s MD-11 and Airbus Industrie's A-330 and A-340.

#90080u1602 03/21/1990 ~United Press International

ANNAPOLIS, MD (MARCH 21) UPI - Maryland Senate leaders Wednesday urged members to put aside philosophical and religious differences and settle a 7-day-old filibuster over abortion restrictions that threatens to cause a permanent rift in state government.

Abortion rights supporters remained one vote shy of ending the filibuster, which was started last Thursday by opponents attempting to kill legislation guaranteeing that abortions remain widely available in the state.

Amendments that would add modest restrictions to the bill were tacitly accepted by pro-choice lawmakers to pick up new votes toward cloture and force a final vote on the bill, which still needs approval from the House of Delegates and Gov. William Donald Schaefer.

Abortion opponents, however, did not consider the changes a good-faith compromise and vowed to continue the filibuster until the session's April 9 adjournment, if necessary.

The changes remove from the legislation provisions allowing viable fetuses to be aborted based on the mental health of the mother, and would require abortion statistics to be reported to the state and force doctors to test for viability after the 20th week of pregnancy before performing the procedure.

Sen. William Amoss offered the amendments, and added his vote toward ending the debate Tuesday night. Sen. Frank Komenda also voted for cloture but refused to say why.

Abortion rights legislators need 32 votes to end debate and now have 31. Once cloture is achieved, pro-choice lawmakers believe they can win a simple majority in the 47-member Senate to pass the bill.

A brief shouting match - with some of the venom aimed at Senate President Thomas V. ''Mike'' Miller - erupted in the Senate Tuesday night as members tried to wrest floor control from abortion opponents to introduce the new amendments.

Miller said he called a vote Tuesday to pressure abortion opponents to settle the filibuster. ''We've been inching our way forward,'' said Miller. ''Hopefully, by offering the amendments, the 32 votes can be obtained.''

Senate Majority Leader Clarence Blount took the floor Wednesday morning following a night-long recess, and urged both sides to make concessions toward ending the split.

''Acrimony is building,'' Blount said. ''I cannot suggest how we are going to get out of this, but we cannot continue on this course. As grievous as this problem is, we're going to have to do something with it.''

As the filibuster drags on, legislators also say it is more likely that major revisions to the bill will be accepted to gain cloture.

''I don't think we're going to get it by sitting around, waiting for the other vote to come in, because I don't think it's going to happen,'' said Sen. Bernard Fowler, a Southern Maryland Democrat who dispelled any speculation that he might be the elusive 32nd vote.

''I don't think it's possible for the president of the body or the governor, to call that one vote in,'' Fowler said.

Abortion opponents have vowed to force a referendum on any abortion rights bill adopted by the General Assembly.

As written, the omnibus legislation effectively would write into law the state's current abortion practices, allowed under the U.S. Supreme Court's 1973 Roe vs. Wade decision that created a constitutional right to abortion.

The legislation being considered in the Senate would allow unrestricted abortions until a fetus was deemed viable, at which time the procedure would be permitted when the mother's health was were in danger or if the fetus faced profound deformity.

The measure was introduced after Maryland's attorney general determined that a 1968 state law restricting abortions would become enforceable if the Supreme Court ever overturned Roe vs. Wade.

The 1968 law would require abortions only be performed in cases of rape, incest or when the mother's life were in danger, and demand that the procedure be performed in an accredited hospital only after a medical

board gave its approval in each case.

#90080u1606 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - A special Joint Meeting of Congress will launch a series of events to mark the 100th anniversary of the birth of Dwight D. Eisenhower, the 34th U.S. president and commander of allied troops in Europe during World War II, it was announced Wednesday.

Senate Republican leader Robert Dole, chairman of the Dwight D. Eisenhower Centennial Commission, said the joint meeting will be held Tuesday, March 27, in the House of Representatives.

Among those paying tribute to the World War II general and president will be his son, former Ambassador John Eisenhower, longtime television anchorman Walter Cronkite, Winston Churchill, grandson of Britian's wartime prime minister, and golf legend Arnold Palmer.

Eisenhower was born Oct. 14, 1890, and died March 28, 1969.

The event will be the third presidential centennial Joint Meeting in this century. One was held Jan. 28, 1982, for Franklin D. Roosevelt and the second May 8, 1984, for Harry Truman.

The Joint Meeting will be followed by other centennial events in this country as well as in the parliaments of Belgium, Italy and Great Britain and other salutes in France, Denmark, Egypt, the Netherlands, Norway, Luxembourg, the Soviet Union and West Germany.

#90080u1611 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - The nation's savings and loan crisis is likely to get worse before showing signs of improvement, L. William Seidman, chairman of the Federal Deposit Insurance Corp, said Wednesday.

''The good news is that we are off to a better start than most people think,'' Seidman said. ''The bad news is that we've seen just the tip of the iceberg. So, unfortunately, the message is: Stand by. The worst is yet to come.''

Seidman's remarks came in a speech to the National Press Club, in which he outlined the progress the Resolution Trust Corp. has made to sell the assets of failed thrifts.

The RTC, which was created in August as part of President Bush's $166 billion thrift bailout bill, has been roundly criticized in Congress for

its slow pace in resolving failed thrifts.

Seidman said the agency has sold or liquidated 52 thrifts since August. ''It took the FDIC from 1945 until 1982 - 37 years - to handle that many institutions.''

He said he intends to pick up the pace of thrift sales through a new RTC accelerated resolution program, which seeks to pre-sell troubled institutions before they are placed under conservatorship.

Placing a thrift under conservatorship lowers the institution's value, Seidman said.

''Just like a car on the road has a better re-sale value than a car in the junkyard, we believe we can get a better deal for problem thrifts by keeping them off the junk heap,'' he said.

Seidman said the new policy is modeled on the a successful FDIC program.

''Except in cases of fraud, instability, or total lack of buyer interest, we will not place institutions in conservatorship until they are pre-sold '' he said.

Seidman said the RTC expects to sell 140 of the 350 thrifts now under conservatorship by June 30. He said the hardest part of selling thrifts remains their bad assets, which he termed ''opportunity assets.''

This summer, Seidman said, the agency plans to hold what he said could be the largest real estate auction in history - the sale of about $200 million worth of problem real estate assets.

A revised inventory of these properties is expected to be complete by the end of April and the agency will hold seminars in 10 cities next month to explain how investors can buy assets from the RTC.

#90080u1612 03/21/1990 ~United Press International

CHICAGO (MARCH 21) UPI - The grain market made session highs about midday Wednesday on the Chicago Board of Trade, then drifted lower the rest of the day.

Prices were mostly lower except for soybean meal which closed with moderate gains.

The March contracts went off the board at noon in quiet trading. March corn was up 2 1/4 cents at expiration while March soybeans and wheat were lower.

Soybeans rallied early on spillover from soybean meal and reports of harvest delays in South America, but gave up the gains to profit-taking and liquidation.

Meal was supported by active trading and higher prices for soybean meal on European markets.

Soybean oil was weak on the lack of buying interest and lower prices overseas.

Corn was lower on profit-taking and reports of an increase in farmer selling, but losses were limited by news that Mexico would be in the market Thursday for 216,000 tons of corn.

Wheat futures were narrowly mixed in lackluster trading.

At the close, corn was down 2 to 3, soybeans off 1/2 to 2, wheat up 2 1/4 to down 1 3/4 and oats off 1/4 to 3.

#90080u1613 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - In language that fell short of guaranteeing Poland the precise role it has sought, President Bush promised Wednesday that Polish borders and security will be "totally assured" in talks on German unification.

''In any decision affecting the fate of Poland, Poland must have a voice '' Bush declared as Polish Prime Minister Tadeusz Mazowiecki, the first non-communist leader in Eastern Europe, opened a three-day state visit.

With flags whipping in a strong wind, Bush welcomed Mazowiecki to the White House as ''a great Polish patriot and a patron of freedom'' for more than an hour of talks on Poland's security concerns and economic rehabilitation.

Held against a backdrop of Polish unease over German unification, the meeting did not appear to resolve technical differences over how Polish interests will be safeguarded as that process moves forward.

But as he went jogging after the meeting, Bush said he and Mazowiecki were ''not that far apart.'' The two agreed to meet again Thursday to review that Assistant Secretary Raymond Seitz called "a damn interesting set of problems."

Key among them are the security arrangements to emerge from the ''two-plus-four'' negotiations on German unification, involving East and West Germany and the four World War II allies: Britain, France, the United

States and the Soviet Union.

At a meeting of those powers last week, Poland was granted a limited presence in those talks to ensure the integrity of its borders. The Poles want to prevent any future German claim to territory ceded to Poland after World War II.

At the State Department, where he attended a working lunch with Acting Secretary of State Lawrence Eagleburger, Mazowiecki said the German issue ''is a major one and we will talk about it more.''

Beyond the border question, Mazowiecki has asserted a claim for full participation in any two-plus-four discussions bearing on Polish security.

Without addressing that issue directly, Bush assured him he can continue to look to the United States for support as ''a full European power, a force for freedom, stability and security,'' even as postwar political divisions recede.

''We see a new Europe in which the security of all European states - and their fundamental right to exist secure within their present borders - is totally assured,'' Bush declared.''

How that will be reflected in the mechanics of the unification process was left unclear. While Poland may not win full membership in the two-plus-four talks, Seitz said there will be ''many other fora'' for addressing issues raised by unification, including the East-West talks on conventional force cuts in Europe and the 35-nation Conference on Security and Cooperation in Europe.

''There are a variety of ways in which Poland can express itself on a variety of concerns it will have,'' he said.

Mazowiecki, a once-imprisoned founder of Solidarity, which fought back from repression to topple the communists at the polls last June, was candid about the present and optimistic about Poland's future as he opened his visit.

Praised by Bush for ''great personal courage'' in directing the implementation of Eastern Europe's first experiment in democracy and free markets, he noted his visit came ''in the face of momentous changes in the heart of Europe.''

''It was us who sparked the process of democratic revolution across Eastern Europe,'' he said. ''The victory of that revolution will, in large measure, depend on our success. Therefore, we must succeed and I do believe that we will.''

Despite daunting economic challenges, Seitz said Mazowiecki ''quite specifically'' did not request new U.S. financial help. In recent months, Poland has received commitments for $10 billion in international aid to restructure its economy, stabilize its currency and lay the foundation for foreign investments.

Seitz said Mazowiecki described its $39 billion debt as ''the noose around the economic neck of Poland.'' Poland recently won a generous rescheduling of its debt to Western governments and was designated a candidate Wednesday for Treasury Secretary Nicholas Brady's debt-relief plan, which would ease the burden of its debt to commercial banks.

To promote economic integration with the West, Bush and Mazowiecki signed a treaty that would guarantee property, investment, currency, patent and copyright rights for American businesses in Poland.

Potential investors have flocked to Poland, hoping to stake a claim in its economic reconstruction, only to be find a devastated industrial base and antiquated infrastructure.

#90080u1638 03/21/1990 ~United Press International

TIGRU MURES, ROMANIA (MARCH 21) UPI - Army tanks and troops kept rival ethnic groups apart Wednesday following overnight clashes that left at least six people dead and nearly 300 wounded.

The tanks rolled into Tirgu Mures's main square late Tuesday to break up fighting by rival Romanian and Hungarian groups of demonstrators who battled with iron bars, axes and clubs in Transylvania's worst ethnic unrest since World War II.

A spokesman for the Mures County provisional government confirmed that six people were killed in the fighting and 294 people were wounded, 36 of them seriously, the official news agency Rompres said. At least 318 have been injured since bitter ethnic rioting erupted Monday.

Despite the military intervention, scattered violence continued through the night, and one of the city's main hotels was stormed and heavily damaged.

News of the violence sparked mass protests Wednesday by tens of thousands of ethnic Hungarians in two other central Transylvanian towns, Budapest Radio reported. In Bucharest, small gangs of Romanians marched through the streets chanting, ''Down with Hungarians,'' Hungary's official MTI news agency said.

Tirgu Mures, an industrial and cultural center in the picturesque Upper Mures Valley about 200 miles northwest of Bucharest, was reported calm

Wednesday, but the situation remained tense as a group of about 100 ethnic Hungarians continued to occupy the city's main square.

An investigating panel commissioned by the national government in an emergency meeting late Tuesday was dispatched to Tirgu Mures to assess the situation.

Hungarian tourists returning from Tirgu Mures told Budapest Radio the city is surrounded by troops. Armored cars were deployed outside all public buildings and helicopters circled above the downtown area, they said.

Stores in the downtown shopping district were closed, and bread was in short supply, Budapest Radio said.

The official Yugoslav news agency Tanjug said there were reports than ethnic Hungarians in surrounding villages were arming themselves and forming combat units.

''Some have already arrived (in) Tirgu Mures by buses,'' Tanjug said. It said citizens from Hungary were crossing the border to aid their compatriots.

Meanwhile, relations between Hungary and Romania continued to deteriorate following Budapest's allegations that a ''pogrom'' or systematic persecution was being carried out against Romania's ethnic Hungarian minority.

''We shall not start a war, but we will try to make sure international pressure is exerted to resolve this problem,'' Jozsef Antal, president of the leading opposition group Hungarian Democratic Forum, told a news confernce.

Hungarian Foreign Minister Gyula Horn summoned Romania's ambassador to his office Tuesday to protest anti-Hungarian violence, and he also sent an urgent message to U.N. Secretary General Javier Perez de Cuellar expressing ''profound concern'' over the ''serious attrocities'' committed against ethnic Hungarians.

The violence followed a week of escalating tension over Hungarian demands for cultural autonomy, including schools in their native language and Hungarian-language books and newspapers.

The western province of Transylvania, where most of Romania's 2 million ethnic Hungarians live, has seen a resurgence of Hungarian nationalism since the December revolution that toppled communist dictator Nicolae Ceausescu and ended a decades-old policy of forced assimilation.

Vatra Romaneasca, a right-wing Romanian nationalist group, is leading the

opposition to what it perceives as a Hungarian bid for cultural dominance in Transylvania.

After weeks of escalating tensions, violence broke out Monday when Romanian nationalists stormed the headquarters of the Hungarian Democratic Union in Romania, injuring several ethinc Hungarians including prominent author Andras Suto. Rompres said the attack was instigated by Hungarians who locked themselves in the building and began throwing stones and bricks at Romanian demonstrators on the street below.

Rival mobs roved the streets Monday afternoon and evening, attacking a radio station and beating up passersby in clashes that injured at least two dozen people.

The violence peaked Tuesday evening when rival demonstrations by thousands of Hungarians and Romanians outside the local government offices erupted into fighting.

#90080u1639 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - The love of pantomime is a special taste like that for artichokes or yogurt.

When it works well, it has the universal childlike appeal of circus clowns and the enduring charm of a Charlie Chaplin, Marcel Marceau or Harpo Marx.

When it doesn't, it simply seems silly, slapstick and self-indulgent.

Geoff Hoyle's ''Feast of Fools'' at the Westside Arts Theater embraces both ends of that spectrum. The first half of this English-born clown's one-man show is an exercise in self-indulgence and questionable taste, leaning heavily on sexual innuendo and body functions.

In a series of skits, each one lasting too long, Hoyle, dressed in oversize black tux trousers, black T-shirt and suspenders, gives a lecture on the history and the tradition of fools. He plays a court jester, demonstrates the ancient Roman feast of fools, and portrays a lecherous old Italian and two waiters.

Only two of the skits really work and show the talent and range of which Hoyle is capable.

As a court jester in cap and bells, he brings out a jester mask on a stick which quickly becomes a second character so real in its disapproving nods and head shakes that it has the compelling quality of a Senor Wencas made from a fist and handkerchief.

In the waiters' skit, Hoyle alternately plays the impeccable waiter with all of the correct moves and gestures and his slob antithesis, who breaks the cork off a wine bottle and then opens it with his teeth. In the end they have a classic fist fight behind a screen in which the audience sees parts of one, then the other as in ''Irma La Douce.''

Where the first half of Hoyle's show is seriously compromised by less than appealing material and timing problems, the second half is sheer delight.

With his versatile facial expressions, body language and balletic movements, Hoyle becomes three characters, assisted by masks and simple costume changes. All three are winners.

At first he is a pathetically inept fund-raiser introducing a show and trying to ingratiate himself with the audience by telling a long, dreary, inane joke to which he forgets the punchline. His ineptitude is so overwhelming that he can't even find his way off the stage.

Then he is Mr. Sniff, a cartoonlike character with a bulbous nose that looks like a baking potato. In a series of pratfalls, he winds up with his hand attached to the back of a chair, which becomes a hilarious prop that produces, finally, devastation of the entire stage. It is a brilliantly original bit of theater and the staging works marvelously. This sketch alone is worth the price of admission.

Hoyle's final turn is as a three-legged man dancing in one of the most inventive, preposterous and appealing illusions you'll ever see. Combined with Mrs. Sniff, the three-legged man warrants the reviews Hoyle has received on his cross-country tour that call him ''a comic genius.'' But this comic genius needs is a judicious editor.

#90080u1653 03/21/1990 ~United Press International

(MARCH 21) UPI - Census Bureau officials said Wednesday the agency's massive effort to count the nation's homeless was an overall success and a good start on making the rest of once-a-decade head count ''a full and fair census of the American people.''

But the officials acknowledged a Frost Belt cold snap that filled and closed a large number of shelters before census takers arrived meant a second night of counting in a number of cities. Officials at the bureau's Suitland, Md., headquarters said they did not yet have a list of cities where the counting would take place other than Washington.

''I believe our efforts have given us a good start on achieving our goal of a full and fair census of the American people,'' bureau Director Barbara Bryant said.

On Friday, the Postal Service will begin delivering 1990 census forms to the nation's 106 million housing units.

''Inevitably, in a first-time operation of this magnitude, there will be problems and reports of incidents,'' Bryant said, adding, ''As a result of last night's efforts, the various components of the homeless population can begin to receive their fair share of political respresentation and assistance programs that are based on population.''

The number determined in the homeless count will become part of the 1990 census but a specific number will not be reported until late 1991.

Nearly 15,000 census takers fanned out through some of the worst neighborhoods in the nation Tuesday night and early Wednesday morning to find and count those who rarely count.

Census officials said there were few incidents and just a few foul-ups in the massive $2.7 million effort dubbed ''Street and Shelter Night.'' In many places, those being counted greeted the effort with skepticism,

indifference and some reluctance.

In one incident, a team of two census takers was robbed at knife point of a watch, a ring and a small amount of cash. In Brooklyn, N.Y., ''what sounded like a shot'' was fired near a team of counters, Census spokesman Ray Bancroft said. ''They walked around the block, came back and continued their work. What's so unusual about a shot fired in Brooklyn?''

But in Detroit, some shelter operators were angered when counters failed to check two of the city's largest and best known refuges - the City Rescue Mission, where 79 homeless people were staying Tuesday night, and the Salvation Army's Harbor Light Center, which had 55 beds filled.

''How can you call yourself a census and you can't come to the most well-known shelter in the city?'' said John Everett, night manager at Harbor Light.

Census officials said they weren't aware of the mission and thought the center was a permanent group home and not a shelter.

Traveling in teams, the paid counters searched out those in 11,000 conventional shelters and run-down motels and hotels. Other teams checked steam grates, parks, abandoned buildings, subways and bus stations.

Their orders were to count the homeless even if they had to estimate such facts as age, race and sex. They were told not to press for answers.

In Dallas, at the Austin Street Shelter, the Rev. Jerry Hill, the shelter director, was unenthusiastic but allowed a team of 10 counters to come in.

''We go through this every damn year,'' said Hill. ''If people don't know we have a homeless problem by now, then they never will.''

About 300 men at a shelter in Charlotte, N.C., answered census questions cheerfully before going to a nearby cafeteria for dinner. But some felt the government's effort would not help them.

''The money they're spending to count, they could be using to put these people in a house,'' said Mike Lowe.

In Philadelphia, some census takers were sometimes greeted with belligerence and jeering.

''A lot of them don't want to be bothered. And we don't want to bother them,'' counter Richard Dawkins said. ''They tell us to get away, we get away.''

While Census Bureau officials were pleased with the results, many

advocates of the homeless, even those who participated, were skeptical, fearing an undercount would lessen concern - and money - aimed at the problem.

Estimates of the number of homeless vary widely, with some government estimates putting the figure around 350,000 people and some homeless advocates arguing it may be 3 million.

WASHINGTON (MARCH 21) UPI - The Bush administration, in a policy decision likely to anger conservatives, said Wednesday it would not seek any content restrictions on the federal funding of art.

President Bush's decision was revealed at a congressional hearing on the reauthorization of the National Endowment for the Arts, which was besieged with protests last year for funding controversial art projects.

Rep. Pat Williams, D-Mont., chairman of the House Education and Labor subcommittee on postsecondary education, revealed the Bush administration position when he announced: ''The administration has decided to ask for a reauthorization of the National Endowment for the Arts that does not contain any controversial language with regard to content. That's a very important matter.''

Williams said he was hopeful the decision would put an end to the contentiousness that has surrounded federal funding of the endowment.

NEA Chairman John Frohnmayer, who confirmed the Bush administration position, agreed, saying Congress should not meddle in the affairs of artistic freedom or the First Amendment protection of free speech.

''I think we must have accountability'' in deciding what art projects get funded, Frohnmayer said. ''But it shouldn't be through legislation.''

Frohnmayer, using a Washington synonym for meddling, said the NEA should not be ''micromanaged'' by Congress. He also noted that the endowment has designed an elaborate process for screening art project candidates for funding. The NEA refuses to fund art it deems ''obscene.''

Last year a storm of protests erupted after arch-conservative Sen. Jesse Helms, R-N.C., vehemently objected to federal funding of two controversial art projects. One exhibit of homosexual eroticism by photographer Robert Mapplethorpe featured pictures of nude men in erotic poses. Another exhibit included a photograph by Andre Serrano of a crucifix in a bottle of urine.

Helms pressured the NEA to restrict funding for controversial art and pushed through Congress a measure that pulled $40,000 of NEA funding, the equivalent of money spent for the two objectionable projects. Congress appropriated $171 million for the NEA this year.

On March 6, Helms asked the General Accounting Office, the investigative

arm of Congress, to determine whether the NEA violated the law when it approved funding for 11 projects.

The NEA continues to be bound to turn away proposals that are ''obscene'' as defined by Congress. The Bush administration proposes that the NEA should be permitted to define obscenity.

The Bush proposal did not stop lawmakers at the hearing from sparring over the meaning of obscenity or setting the limits of federal funding for art that many people may find offensive.

''I for one am deeply distressed by some of the grants made by the National Endowment for the Arts,'' said Rep. Paul Henry, R-Mich. ''The Congress has the right and the responsibility to establish criteria for the appropriateness of funding.''

But Rep. Major Owens, D-N.Y., said, ''You can't define creativity. I think the government has taken an obscene turn.''

Owens noted that the controversy over the public funding of art has been blown out of proportion. He said of the 80,000 grants the NEA has awarded, ''only 25 have generated controversy at all.''

Owens said, ''We should instead turn our attention to the vital issues like the (estimated $100 billion) savings and loan government bailout.''

Most of the panel members were Democrats who echoed Owens' view.

The packed hearing room featured testimony from writers, musicians, artists and arts associations.

One folk and rock singer, Tom Rush, strummed his acoustic guitar to a Woody Guthrie song that mocks Congress for failing to recognize the plight the poor in the midst of the depression.

In a similar vein, other artists implored Congress to recognize that individuals who favor censorship of unpopular art represent the minority interest.

(MARCH 21) UPI - Census officials report only one incident of violence this morning as 15-thousand workers spread out across the country to count the nation's homeless. Two workers in Fort Lauderdale, Florida, were robbed at knifepoint of a watch, a ring and some cash. Officials describe the incident as ''minor.'' The census-takers wore bright clothes and carried two-way radios as they set out this morning in search of the

homeless.

It's up to a jury in Anchorage, Alaska, to decide whether Joseph Hazelwood was a scapegoat in America's worst oil spill, or an alcohol-imparied skipper who gambled with the safety of his Exxon tanker. Jurors who heard testimony at Hazelwood's trial are expected to begin deliberating charges of reckless endangerment, operating the tanker while drunk, negligent discharge of oil and felony criminal mischief. It was nearly one year ago that the tanker Exxon Valdez hit a reef, spilling 11-Million gallons of oil along the Alaska coastline.

Polish Prime Minister Tadeusz Mazowiecki is meeting with President Bush at the White House this morning. Mazowiecki plans to brief U-S officials on the economic situation in Poland and to request a greater role for Warsaw in negotiations on the re-unification of Germany. Bush administration officials say they appreciate Polish concerns about Germany... but that Poland already has a seat at the negotiating table.

#90080u1718 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Sharp Electronics Corp. introduced Wednesday in the United States and Europe a new notebook-size portable personal computer powerful enough to perform a full range of desktop functions.

The new portable computer, called PC-6220, weighs only four pounds, including its battery unit, measures 8.5 by 11 inches and is only 1.4 inches thick, the size of a standard notebook, the manufacturer said.

Sharp priced the PC-6220, to be available in the United States and Western Europe in June, just below $4,000, or about ten percent cheaper than its nearest competitors, the line of portable computers manufactured by Houston-based Compaq Computer Corp.

"The PC-6220 is a competitive product for three reasons," said Bob Levin, products manager at Sharp Electronics. "Its weight and size make it the lightest portable with the full range of desktop abilities on the market, while it offers the highest-quality screen display and has the ability to expand its functions through a wide range of cards."

The IBM-compatible PC-6220 is equipped with a hard drive which allows the loading of an array of sophisticated programs, from word processing to spreadsheets.

"What we are introducing is the next generation of portable computers," Levin said. "The PC-6220 comes with a modem unit which can access databanks and also send facsimile without having to hook up the portable computer to a fax machine."

Sharp described the modem on its new PC as a "fax-modem" unit which has the ability to transmit a document punched into the computer directly to a fax machine.

"This is particularly important for people who want to send documents to receiving points which are not equipped with a computer where documents can be downloaded," Levin said. The ten-inch-wide screen offers a full-contrast black and white display with high resolution which can support complex graphics.

Although mostly aimed at the user away from his office, the portable computer can be used as a desktop with expansion cards and can be hooked up to a main business computer.

Sharp, which, as the largest distributor of facsimile equipment in the United States, holds 21.5 percent of the market, entered the portable computer field in the mid-1980s and currently ranks sixth for the sector, with a 7.4 percent share of the U.S. market.

Levin said the company was banking on the new competitive product to increase its portable computer market share, but Sharp did not release any official sales projections for 1990.

"It is too soon to make projections, but the products has been previewed by industry experts and the reaction was very favorable, mainly because the PC-6220 is competitively priced, offers high-quality features and is truly portable since it weights 40 percent less than its competitiors," he said.

The new product, which was mostly developed at Sharp's laboratories in Japan, was designed for the western market. Sharp Electronics, based in Mahwah, N.J., is the $2 billion U.S. subsidiary of Sharp Corp. of Japan, a world leader in business data processing equipment with annual sales of $9 billion.

(MARCH 21) UPI - Secretary of State Baker met with anti-apartheid leader Nelson Mandela in Namibia this morning. Both men played down differences in talking about U-S cooperation in the struggle to end apartheid in South Africa. Mandela said Baker's plans to meet South African President F-W De Klerk in South Africa tomorrow are ''regrettable.'' But Mandela says all-in-all, relations with Washington are better than ever.

Shortly after midnight this morning, The president of South Africa formally lowered his country's flag in Namibia... completing a long march

to democracy for Africa's last colony. The new president raised the Namibian flag and proclaimed a new star has risen on the African continent. President Sam Najoma called for unity among the country's 11 ethnic and racial groups.

Officials say a satellite put in orbit by a commerical Titan-3 rocket last week went astray because the separation system was mistakenly wired for a two-satellite cargo. NASA engineers meet tomorrow at Houston's Johnson Space Center to study the possibility of a shuttle rescue mission to save the errant Intelsat 6 communications satellite. The 150-Million-dollar relay station was launched last Wednesday by a commercially-built Titan-3 rocket.

#90080u1728 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A consumer group sued two medical device manufacturers Wednesday, demanding that about 80,000 people implanted with potentially defective heart valves be individually warned of the risk of life-threatening failures.

The Public Citizen Health Research Group said it filed a lawsuit in Los Angeles Superior Court on behalf of recipients of the Bjork-Shiley heart valves.

The non-profit consumer group asked the court to order the maker of the valve, Shiley Inc. of Irvine, Calif., and its parent firm, Pfizer Inc. of New York, to notify all people who received the "convexo-concave" mechanical valve of its potential dangers.

Shiley and Pfizer officials Wednesday called the suit "completely without merit." All doctors who implanted the valves "have been notified repeatedly of the very small fracture risk and have been advised to educate and monitor their patients," they said.

Shiley pulled such valves from the market in November 1986, more than five years after the first reports of life-threatening valve fractures in patients. Although the valves are no longer available, some 80,000 people - about 40,000 of them in the United States - still have the devices implanted in their hearts, and reports of fractures continue.

As of Feb. 20, Shiley had reported 394 fractures with 252 deaths, one occurring just six months ago, linked to its convexo-concave valves. Congressional investigators say those numbers may be 50 percent too low.

A report by Democratic staff of a House subcommittee recently accused Shiley of failing to report valve fractures promptly to the Food and Drug Administration and downplaying risks in a warning letter sent only to the

surgeons who implanted the devices.

"Shiley and Pfizer have engaged in a longstanding and continuing course of deceptive and fraudulent conduct in order to conceal the valve defects and their risks," said Dr. Sidney Wolfe of Public Citizen.

Besides directly warning valve recipients, the Public Citizen suit demands that Shiley and Pfizer pay for medical consultation so patients can be advised of symptoms of imminent valve failure and benefits of possible valve removal.

Dr. Roger Sachs, Shiley's medical director, has said replacing valves already in patients would be foolhardy because the death rate from replacement would be about five percent, far higher than the 0.02 percent to 0.13 percent annual risk that a Shiley valve will fail.

Public Citizen, founded by consumer activist Ralph Nader, also asked that the companies be ordered to foot the bill for psychological evaluation and counseling for the 80,000 patients. Such help is necessary to help the patients cope "with anxiety and emotional distress caused by the presence of the potentially life-threatening Shiley valve," the group said.

If the court grants all of Public Citizen's demands, the Washington group estimates Shiley and Pfizer would have to pay as much as $50 million to help valve recipients.

About 2.1 million Americans suffer disease or deformity of the heart valves, and about 40,000 patients undergo heart valve replacement surgery each year. Without surgery, many patients would quickly die.

Dozens of valve recipients and their families already have filed lawsuits against Shiley and Pfizer, arguing that they were never told of the dangers of the Shiley valves.

OTTAWA (MARCH 21) UPI - Former Liberal Prime Minister Pierre Trudeau, in a rare appearance since retiring from active political life, warned Wednesday Canada is ''headed for the grave'' unless a constitutional agreement giving Quebec's French-speaking majority special status is changed.

Trudeau also accused Conservative Prime Minister Brian Mulroney of offering Quebec anything it wants to get the province's signature on the 1982 constitution.

The so-called Meech Lake Accord, negotiated by the federal government and ten provinces in 1987, recognizes Quebec as a distinct society and gives it the power to promote and preserve its French identity. The accord also gives all provinces additional powers over Senate and Supreme Court appointments, something critics say will weaken Canada's federal system.

''Unless our present great helmsman gives a great push on the tiller, we are headed for the grave,'' Trudeau told reporters in Ottawa. He said Mulroney should ''steer toward a strong, unified country'' by renegotiating the Meech Lake accord rather than relinquishing powers of the federal government to appease Quebec nationalists.

Trudeau, who served as prime minister between 1968 and 1984 and now practises law in Montreal, launched a book this week that examines the Liberal record of government and its attempt to create a so-called Just Society based on individual rights, including linguistic rights. The concept demanded a strong federal government that would equalize

opportunities for all Canadians regardless of where they lived.

Since Mulroney won power in 1984, he has repeatedly accused Trudeau and his Liberal regime of ruining the country economically by driving up the deficit and brutally ignoring Quebec.

When Canada adopted its constitution in 1982, Quebec, the largest and second most populous province in the country, refused to sign the document because it did not recognize the province as the principal home of French-speaking people.

The Meech Lake accord requires the consent of all ten provinces, but New Brunswick and Manitoba have refused to ratify it on grounds that recognizing Quebec as a ''distinct society'' relegates other ethnic communities to second class status. Newfoundland has vowed to rescind its approval unless key elements of the accord are changed.

Trudeau also dismissed warnings from Quebec politicians and business leaders that the province will secede unless the Meech Lake accord is ratified.

''The majority of Quebecers know in North America you have to speak English,'' he said.

Trudeau speculated that most Francophones were ashamed of Quebec laws that restrict the teaching of English to children below a certain age and prohibit the use of English on outdoor commercial signs.

#90080u1756 03/21/1990 ~United Press International

MIAMI (MARCH 21) UPI - A Panamanian military officer indicted on drug-trafficking charges with Manuel Noriega tentatively agreed Wednesday to plead guilty to reduced charges, but his lawyer declined to say whether he would testify against the deposed dictator.

Lt. Col. Luis del Cid, 46, would be the second of 16 defendants to plead guilty in the cocaine trafficking case.

''We have reached an agreement in principle with the government,'' said del Cid's attorney, Sam Burstyn. ''We're waiting to hammer out the details and the paperwork. It's a very favorable proposal. We hope to finalize it in a few days.''

Burstyn said del Cid agreed to plead guilty to one count of conspiracy and the government would dismiss the remaining charges of racketeering and drug trafficking.

He refused comment when asked if del Cid would testify against Noriega and estimated del Cid would serve about 2 1/2 years in prison under the plea bargain, but emphasized that was only an estimate.

If convicted on all the original charges, del Cid could have been sentenced to up to 70 years in prison and fined up to $550,000.

Diane Cossin, spokeswoman for U.S. Attorney Dexter Lehtinen, declined comment, saying any discussion of the agreement would be ''premature.''

Del Cid is accused of using his position to foster drug trafficking between Colombia and the United States from 1981 to 1986. Prosecutors contended earlier that del Cid once headed Panama's secret police, a claim both del Cid and Noriega have denied.

Del Cid surrendered during the U.S. invasion of Panama in December and was sent to Miami.

In February, pilot Eduardo Pardo pleaded guilty to flying $800,000 in drug profits between Florida and Panama in 1983. His sentencing is scheduled for April 25. He faces up to five years in prison and a $10,000 fine.

Meanwhile, the FBI is investigating a videotape of Noriega that was filmed in his cell and smuggled outside of the Metropolitan Correctional Center.

The silent 5-minute videotape showed Noriega walking around his cell, reading a newspaper and sitting on a cot. It was offered for sale to the highest bidder to at least three television networks, but none bought it.

A television official described it as dimly lit and poorly shot, comparing it to a home movie.

At the request of Noriega's attorney, U.S. District Judge William Hoeveler met with prosecutors and law enforcement officials Tuesday to discuss the tape. Lawyer Steve Kollin demanded that Noriega, who is considered a prisoner of war, be moved to a military installation.

''It has to do with the privacy of my client, improper pretrial publicity and security,'' Kollin said. ''For all of the above reasons, General Noriega should be moved to Homestead Air Force (Base). It should have been done before and it should now be done forthwith.''

Lehtinen later released a statement saying he had asked the FBI to investigate the videotape.

''The underlying case should not be affected, but the allegations are serious and will be treated as such by this office,'' Lehtinen said.

The Miami Herald quoted unidentified sources Wednesday as saying that a lawyer who was not part of the Noriega team had offered to sell the tape to news divisions at the NBC, CBS and ABC television networks.

Dave Miller, director of foreign news for NBC in New York, said the network's Miami bureau was shown the tape and told to make a ''blind bid'' for it.

''We made a nominal bid based on the fact that it was not topical and wasn't very well shot,'' Miller said. ''It wasn't news. We have seen (Noriega) before. We have seen him in custody. We know what he looks like. This is not Howard Hughes.''

CBS bid $22,000 but later declined to buy the tape ''based on ethical, journalistic and legal reasons,'' The Herald quoted an unidentified network source as saying.

CBS News spokesman Donna Dees acknowledged the video ''was offered to us, but we did not buy it.''

ABC news spokesman Scott Richardson refused to say if his network was offered the tape.

#90080u1852 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - Despite warnings it was weakening existing law, the Senate refused Wednesday to require the Environmental Protection Agency to impose smog cleanup plans on cities that do not adopt tough enough anti-pollution measures.

In another important victory for Senate leaders determined to protect their compromise clean air bill with the Bush administration, senators voted 53-46against a plan by Sen. John Kerry, D-Mass., to preserve the mandatory EPA enforcement provisions in the current Clean Air Act.

Kerry's amendment also would have wiped out controversial sections of the compromise bill that would allow states to obtain emission reduction waivers from the EPA if necessary pollution control measures cost more than $5,000 per ton of pollutants eliminated.

Kerry argued many states would be tempted to abuse the waivers in an effort to minimize pollution control measures so they could attract or keep industry and jobs.

The third major thrust of Kerry's plan was to regulate small businesses that emit relatively minor amounts of pollution individually but which, altogether, account for an estimated 43 percent of all smog-causing emissions nationwide. The compromise bill generally would exempt small pollution sources from controls.

Environmental groups and more than a dozen governors lobbied senators to support Kerry's amendment, saying the compromise bill was too weak to ensure speedy cleanup of urban smog, which now exceeds federal health standards in 101 cities.

The Senate's action was denounced by environmentalists as a needless step backward. ''Today the Senate voted to break something that didn't need fixing,'' said Dan Weiss, lobbyist for the Sierra Club.

On the key issue of EPA enforcement powers, the compromise bill would give the EPA the option of imposing pollution control requirements on recalcitrant states, but it would not require such action.

In addition, the compromise would roll back existing provisions authorizing the EPA to impose a broad array of penalties on state and local governments that fail to take adequate smog-reduction steps, ranging from withholding of federal highway funds to a ban on new construction.

Instead, the compromise requires the EPA to carry out only one such penalty for each year of non-compliance.

''The fact is, current law is stronger.'' Kerry said. ''If we are passing a bill to have stricter (air quality) standards, why would we want to retreat from what is current law?''

Kerry said that without the certain threat of federal intervention, many governors and mayors would drag their feet on the often expensive and unpopular pollution control measures needed to meet federal health standards.

''The compromise (bill) strips away the enforcement power of the federal government,'' he said. ''It takes away the capacity of the federal government to step in and make people do what they are reluctant to do, what they don't want to do.''

However, Senate leaders argued the enforcement provisions in current law had not worked because the EPA did not have the money or manpower to draw

up and enforce wide-ranging smog reduction plans across entire states.

Senate Democratic leader George Mitchell of Maine said the EPA had never exercised that authority, except in response to court orders, and that agency officials did not consider it a credible enforcement tool.

Mitchell said the compromise bill would produce more results than current law because it required all states now in violation of federal health standards to reduce emissions by 3 percent a year.

''This does strengthen current law because the current provision simply doesn't work,'' Mitchell said. ''Why are we so insistent in holding on to provisions that do not work?''

As with past strengthening amendments, Senate leaders also warned senators against voting for ''deal-breaker'' proposals that would blow up their compromise with the administration, thus jeopoardizing overall prospects for passage of clean air legislation.

Senate leaders denied the cost-based waivers would delay smog cleanup, saying states would not be able to apply for such exemptions until six years after clean air legislation was enacted, when substantial progress already will have been made.

They said placing emissions controls on small businesses was not cost-effective and could drive many into bankruptcy. Furthermore, they said states had authority to regulate smaller sources if they found it necessary.

#90080u1859 03/21/1990 ~United Press International

BOSTON (MARCH 21) UPI - A study of identical twins has uncovered an apparent link between schizophrenia and brain abnormalities, suggesting the mental illness may not be inherited as some had thought, researchers said Wednesday.

National Institute of Mental Health researchers said they found brains of schizophrenia suffers had malformations not present in the brains of their twin brothers or sisters without the disease. The brains of schizophrenics were also slightly smaller than their non-schizophrenic siblings, they said.

The findings suggest that schizophrenia, a chronic mental illness affecting about 1.8 million Americans, may be caused by physical changes in the brain - changes that might even happen in the womb, said Dr. Daniel Weinberger, co-author of the study.

Weinberger said his research may help settle a long-simmering controversy about ''how much of this disorder is of the mind and how much is of the brain.''

It also cast doubts on whether the disease is inherited as some recent studies have suggested, Weinberger said.

Calling the new research ''a landmark study,'' Lewis Judd, director of the National Institute of Mental Health, said previous neurological studies of schizophrenia had been clouded by the normal variation that exists among different people's brains. The latest study overcame that difficulty by comparing the brains of identical twins, who share the same genetic makeup and should have identical brains if no enviromental factors come into play Judd said.

Reporting in The New England Journal of Medicine, Weinberger and colleagues said they detected up brain abornomalities in 14 of 15 twins with schizophrenia that did not exist in their non-schizophrenic siblings.

Using a high-technology, non-invasive technique known as magnetic resonance imaging, the researchers found brains of schizophrenic twins to be slightly smaller than those of their normal brothers and sisters.

Although prior studies using less sophisticated imaging scans have detected enlarged fluid-filled spaces in the middle brains of some schizophrenics, Weinberger said they did not provide the finely detailed look that the new research provides.

Using the magnetic resonance imager, Weinberger said the researchers were able to pick out 12 of the 15 schizophrenic twins simply by looking at the pictures of brain tissue.

The computerized images revealed that all but one of the twins with schizophrenia had smaller brain lobes and larger fluid-filled areas, known as ventricles, than their normal siblings.

''We don't know what caused these changes, but it is popular to think that something happened early in the development of the brain, possibly in the fetal stage,'' Weinberger said.

Even among identical twins, he said, ''there are many differences in the course of fetal life'' that might prompt one twin to develop brain abnormalities while the other does not.

The fndings may also help explain why schizophrenia strikes both members of an identical twin set no more than 35 percent of the time, Weinberger said.

In an editorial accompanying the study, Dr. M. Marsel Mesulam of Beth Israel Hospital in Boston said a better understanding of the causes of schizophrenia may lead to new treatment based on a collaboration between psychiatrists and neurologists.

Even with the best treatment now available, the disease leads to chronic deterioration in half of all schizophrenics, with costs totaling as much as $20 billion in the United States, Mesulam said.

#90080u1861 03/21/1990 ~United Press International

PAOLI, PA (MARCH 21) UPI - Vice President Dan Quayle said Wednesday he feels comfortable campaigning for Republican gubernatorial candidate Barbara Hafer despite their differences on abortion.

Quayle spoke to reporters after a GOP luncheon in the Philadelphia suburb of Paoli and then headed to Pittsburgh to appear with Hafer at another party fund-raiser.

''You don't reconcile the differences. We recognize that there are differences. It's a very important, sensitive issue,'' Quayle said about abortion, which he opposes. Hafer supports abortion rights.

''The Republican Party is a diversified party. We recognize that reasonable men and women can disagree on this issue. We are all united behind President Bush.''

Quayle said he would campaign ''strongly'' this fall for the Republican gubernatorial candidate. Hafer faces only token opposition in the May 15 primary.

On the way to the luncheon, Quayle made an unscheduled stop at Baxter's restaurant in Paoli to shake hands with diners.

When Quayle arrived at Philadelphia International Airport to begin his Pennsylvania visits he was greeted on the tarmac by ActionAIDS' Executive Director Ennes Littrell.

Littrell urged Quayle to lead the passage of a congressional relief plan that would provide $600 million to states and cities hardest hit by AIDS.

''Without federal support, the day will come when we will be unable to provide services at our current levels,'' Littrell said. ''I would hate for our 'point of light' to be extinguished because we couldn't even pay for the matches to keep it lit.''

Quayle also addressed the recent independence movement in Lithuania, which

is opposed by the Soviet Union.

''We anticipate and we hope the independent determination of Lithuania will be observed and that this situation will be resolved peacefully,'' Quayle said.

Quayle said Bush had received assurances from Soviet leaders that the situation would be resolved peacefully.

#90080u1890 03/21/1990 ~United Press International

PARIS (MARCH 21) UPI - Short hems and stretch suits, Eastern European accents, summer colors, hoods and drawstrings summed up the tendencies of some 100 designers in this year's fall-winter Paris fashion shows.

Short in the 10-day parade meant hemlines at a summery mid-thigh, but they could be ordered longer by the 700 store buyers in attendance.

Yves Saint Laurent's creations fell to the knee, below the knee, and there were some that were the popular micro-mini length. Sonia Rykiel was among the few to offer midi or maxi daytime skirts for anti-mini customers.

But it wasn't just miniskirts that showed off the leg. Entire legs and even entire bodies were plastered from neck to toe by stretch body suits that emerged in almost all of the main shows.

The stretch suits appeared to be a plot to abolish the skirt. Sometimes waist-to-toe tights were worn under dresses or skirts. But many full-length body suits made the runways under just open coats and jackets, period. No skirt, no dress.

The designs thus zeroed in on the sole part of the female anatomy that until now had not been spotlighted - the rear end. Buttocks were clearly outlined by some houses. Jean Paul Gaultier with tongue in cheek showed bare rear ends camouflaged only by gold netting.

Christian Lacroix's body suits were handpainted with semi-abstract designs like works of art. Issey Miyake made silver stretch suits equipped with bicycle pouches.

The micro-minis and body tights were fresh and fun on the beautiful, pencil-thin models swaying on the runways. For most of the world's female population, the shows also offered more conservative looks - short and narrow or flippy skirts married to jackets fitted in the waist to revive the hourglass shape. Some long tunic-jackets barely showed the skirt.

Another silhouette was the flared A-line at Lacroix, Chanel and Karl Lagerfeld.

The ethnic look, reflecting the changed Eastern Europe, dominated at the shows of Kenzo, Emanuel Ungaro, Lacroix, Romeo Gigli, Saint Laurent with brocaded boots, whirling peasant skirts, intricately printed jackets, and tassels. In several shows, fringes also flounced on capes, leather pants and coats.

Trousers were usually narrow and above-ankle. City shorts made many runways, even for cold winters. Short and long jumpsuits were another alternative. Coat dresses also were popular.

Evening wear meant mini, mid-calf or ankle-length and included the traditional Paris little short black dress. There also were trouser suits and shorts for evening.

Capes flourished, usually long and ample. Coats were long or knee-length, ample, and often with giant lapels and collars. Enough duffle coats and hooded parkas, sometimes quilted, were shown to fill every ski slope in France.

Hoods, in fact, covered heads in almost every one of the shows, and were attached to dresses, blouses and coats or shown as separate items. The hood revival apparently began with Gaultier's show last October. The 1990 styles ranged from monastery hoods at Lacroix to the largest in town crafted by Italian designer Romeo Gigli.

Drawstrings were yanked at almost every show on jackets, coats and dresses. Bernard Perris used them on nearly every outfit. Claude Montana's drawstrings puckered on jackets, skirts and sometimes only on front hems or in back.

One American buyer muttered before the Lacroix show, ''If I see another drawstring I'll hang myself on one.'' Lacroix promptly showed drawstrigs.

Boots made a strong comeback, many at mid-thigh or above the knee and some below the knee and often decorated.

It will be a summery winter with happy colors of copper, salmon, tomato, sky blue, gold, turquoise, lime green, orange, plus burgundy, khaki and ruby red.

Wool and silk were popular fabrics, often lively with panther, tiger and floral prints or printed like brocades. Checks and plaids were popular, especially in a first-rate show at Nina Ricci. Ecologists applauded the prominent use of fake fur.

Hats included embroidered berets, 1920 aviator helmets, brimmed felts, Russian fur hats and tiny Eastern European pillboxes.

ATLANTA (MARCH 21) UPI - Chrysler Corp. Chairman Lee Iacocca said Wednesday that the company is going "head to head" with Japanese auto makers for the auto buyer's dollars and that the public should know U.S. cars are being made with quality.

"When you're surrounded, you attack," Iacocca said as he unveiled Chrysler's new line of vehicles at the Georgia World Congress Center. "We're out strictly to tell the American public what we're doing - that is making the best cars, trucks and vans money can buy." Atlanta was the third stop on a six-city Chrysler promotional tour that began in Washington and that will end in Los Angeles in May.

Chrysler recently began an aggressive advertising campaign, called "Advantage Chrysler," aimed at touting its cars' advantages over other domestic autos and especially over imports. Industry observers said the campaign is aimed at reversing Chrysler's recent slide, reflected in the company posting a fourth-quarter loss of $664 million.

Saying he was not criticizing the Japanese auto industry, Iacocca said: "They build good cars; we build good cars. The bottom line is, we're going head to head with them and we'll let the buying public decide who's best."

The Chrysler chairman continued a theme he began in a recently released series of television ads: the American public needs to change its attitude that Japanese products are always better than American products.

"I'm not here to wave any 'Buy American' flag, or to do any 'Japan bashing

'" said Iacocca. But he criticized import quotas imposed by the Japanese government and said that, when it comes to American cars sold in Japan, "They don't play by the same rules. We're getting hosed."

Iacocca said the thaw in East-West relations will mean "great possibilities" for Chrysler products in Eastern Europe, especially Czechoslovakia and Hungary. Chrysler is also concentrating on its mini-van program in Austria, he said.

Iacocca, 65, who came to Chrysler in 1978 from Ford Motor Co., said his contract as head of Chrysler expires at the end of 1991. He said he has not yet decided what his role will be with the company after that.

As each vehicle was unveiled at the show, Iacocca gave a brief description and a history of its design. One of the highlights was a bright red $200,000 Lamborghini Diabolo, one of only 750 that Chrysler plans to manufacture this year. The car packs 485 horsepower in a 5.7-liter, 48-valve engine.

#90080u1896 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A federal judge agreed with an Illinois thrift Wednesday that M. Danny Wall was unconstitutionally appointed head of the Office of Thrift Supervision and had no authority to place the thrift under conservatorship.

U.S. District Judge Royce Lamberth granted a preliminary injunction to prohibit the OTS from placing Olympic Savings and Loan Association under conservatorship until a new director is constitutionally appointed.

Charles Cooper, a lawyer representing Olympic, argued that Wall was not constitutionally qualified to head the thrift regulating agency because he had never been confirmed by the Senate.

Wall, who resigned in December, argued that the Senate approved him when it voted to skip the normal confirmation hearings in approving the thrift bailout bill last year.

''The court stresses that it is neither closing the door on OTS nor making any finding beyond the specific facts of this case,'' the judge wrote, adding that the court is not issuing an order invalidating Wall's acts as OTS director or those of his temporary replacement, Salvatore Martoche.

''Although this may lead to a great deal of litigation and place OTS operations in some confusion, the clear violation of (Olympic's) constitutional rights and the public's interest in protecting the Constitution outweigh these harms to the public interest,'' Lamberth wrote.

Government lawyers argued last week that a ruling in Olympic's favor would be devastating and would serve as an ''invitation to chaos.''

They said by ruling in Olympic's favor, Lamberth could open a floodgate for the 200 thrifts seized by the agency to argue that the OTS, Wall and agency employees were not qualified constitutionally to handle their cases.

Earlier this month, Lamberth issued a temporary restraining order, which expired today, blocking the OTS from taking any actions against the Berwyn Ill., thrift.

Wall, who resigned from the OTS in December, denied last week that he was improperly appointed to head the agency. He termed Olympic's arguments ''ridiculous,'' and said the thrift its doing whatever it can to prevent the government from placing it under conservatorship.

Earlier this month, President Bush named Salvatore Martoche, the Treasury's assistant secretary for enforcement, to head the OTS temporarily until the naming of a permanent director.

A White House spokesman has confirmed that Bush has tapped Timothy Ryan, a former Labor Department lawyer, to head the OTS pending completion of a background investigation.

Wall, the former chairman of the Federal Home Loan Bank Board, became director of the OTS when it was created in August as part of Bush's $166 billion thrift bailout bill.

A provision of the bill allowed Wall to move from his position at the bank board to head the OTS without undergoing Senate confirmation hearings.

''Mr. Wall clearly was not appointed in the manner specified by the Constitution,'' Lambert wrote.

''Since he was never renominated or confirmed, he never constitutionally took office.''

But Wall said the Senate voted on him when it approved language in the bailout bill last June to permit him to bypass the traditional confirmation hearings.

Lambert also found that Martoche, Wall's replacement, was not properly appointed because under the Vacancies Act, the president can only designate an acting officer when a ''prior, constitutionally appointed'' officer dies, resigns or is sick or absent.

''As a result, in light of the court's conclusion that Mr Wall never

constitutionally became the director of OTS, the court finds that Mr. Martoche's appointment was not authorized by the Vacancies Act,'' Lambert wrote.

#90080u1930 03/21/1990 ~United Press International

MOSCOW (MARCH 21) UPI - Soviet President Mikhail Gorbachev Wednesday ordered all Lithuanians to turn in their firearms and directed the KGB to increase control of the border of the secession-minded republic.

''The Supreme Soviet and the government of the Lithuanian Soviet Socialist Republic continue to adopt illegal acts that violate the rights of Soviet citizens and the sovereignty of the U.S.S.R.,'' Gorbachev said in his first presidential decree since being given sweeping new powers last week.

Gorbachev personally commanded Soviet authorities to confiscate weapons that are not turned in within seven days and to guarantee the upholding of the Soviet Constitution and the rights of all citizens in the Baltic republic.

Lithuania's parliament declared its independence March 11 and demanded negotiations with Moscow on formal secession. The central government in Moscow later declared the independence resolution ''null and void'' but Lithuanian leaders said they would procede with secession plans.

Gorbachev's five-point decree, carried by the official Tass news agency, also placed strict controls on foreigners traveling or working in Lithuania.

The decree ordered ''the Soviet Foreign Ministry and Soviet Interior Ministry to strengthen the monitoring of the granting of visas and permission for foreign citizens to enter Lithuania.''

It directed ''the Soviet Interior Ministry and the Procurator of the U.S.S.R. to take all necessary measures to bar violations by foreign citizens located on the territory of Lithuania, up to and including expelling them in compliance with the Soviet law.''

Lithuanian President Vytautas Landsbergis criticized Gorbachev's crackdown on his Sajudis nationalist movement's drive to secede from the Soviet Union.

"We regret that the Soviet Union is meddling in our affairs," Landsbergis told United Press International by phone from the Lithuanian capital of Vilnius.

Landsbergis declined to comment further on Gorbachev's decree.

Wednesday's move culminated 10 days of pressure from the central government since Lithuania's new nationalist-controlled parliament approved a declaration of independence at its first session following historic elections two weeks earlier.

Gorbachev's decree may have been in direct response to a message sent him Tuesday night by Lithuanian Prime Minister Kazimiera Prunskiene, who protested recent Soviet army maneuvers in the republic, including troop movements and low-level jet flights.

Prunskiene's statement, released by her office early Wednesday, said, ''The people of Lithuania are deeply disturbed by the actions of the Soviet armed forces: the intense mobilization of armored vehicles and tanks, the intensified flights of military air force planes and unauthorized sorties into Lithuanian territory by paratroopers involved in intelligence activities.''

In Washington, White House press secretary Marlin Fitzwater said he had no independent confirmation of press reports about the decree but repeated U.S. concern expressed Tuesday and called again for a peaceful resolution.

''We view these press reports with concern. We continue to urge dialogue between both sides,'' Fitzwater said. ''We note that as late as yesterday, Foreign Minister Shevardnadze reaffirmed the Soviet commitment to resolve the issue through peaceful means. We will continue to watch the situation closely."

Fitzwater, who also said he knew of no official U.S. contact with the Soviet Union, declined to comment further other than to say, ''We hope the statements from yesterday are the course that they are going to follow.''

Gorbachev's decree came a day after President Bush said he was alarmed by the reports of intimidation and urged Moscow and Vilnius to resolve their differences in negotiations.

Premier Nikolai Ryzhkov on Monday ordered direct ministerial control of all federal enterprises in Lithuania and instructed KGB and MVD internal police to ensure customs control at its borders.

In the swirl of political developments in the Soviet Union, one chamber of the bicameral Soviet parliament approved on first reading a law that would provide all 15 republics a mechanism for secession under tight restrictions.

In Tbilisi, the Georgian parliament ended the Communist Party's monopoly on power in a constitutional amendment and postponed until October or November parliamentary elections that had been scheduled for Sunday, Tass said.

The postponement was necessary ''to give other parties time to prepare'' for the elections, Tass said.

#90080u1933 03/21/1990 ~United Press International

(MARCH 21) UPI - Greyhound, striving to restore bus service in the face of a nationwide strike by its drivers, announced Wednesday it has hired enough replacement workers to operate nearly 50 percent of its routes.

The announcement came only hours after yet another Greyhound bus was struck by gunfire.

The bus, carrying 50 people on Interstate 81 in Virginia, was hit by three shots fired from a passing car Tuesday night, but no one was injured, state police said Wednesday.

Tina Devereaux, a passenger on the bus, told police she saw three blue flashes after a car passed the bus about 11 p.m. while it was heading south from Roanoke to Christiansburg.

''This is carrying it just a little too far,'' said Mark Lawson, who was riding from Norfolk to Knoxville, Tenn. ''Why take it out on the passengers?''

The shooting was the latest incident of violence in the often heated strike - the 14th sniping at a bus, according to Greyhound - since some 9,000 Greyhound workers walked off their jobs March 2.

Greyhound, meanwhile, said Wednesday it has expanded its passenger service network to about 46 percent of its pre-strike schedule.

Frank J. Schmeider, Greyhound's president and chief operating officer, said Wednesday's expansion increased the number of buses to about 70 locations - mostly in the Boston-Washington corridor - that have been without service since the walkout.

The bus company, the nation's largest intercity carrier, has hired more than 1,000 non-union replacement drivers since the strike began. The move has angered the union, which claims many of the replacements have little or no experience driving buses.

Since negotiations broke down last weekend in Tucson, Ariz., both sides have been contacted by federal mediators hoping to restart talks. But no direct talks are scheduled, and both sides are reported far apart on the issues.

Jim Power of the Federal Mediation and Conciliation Service said talks may reconvene in separate meetings, but he did not know when that might be.

''What the mediators are probably doing at this point is exploring the possibility of separate sessions at some point,'' Power said.

He said it is difficult for mediators to tell whether the two sides are now any closer than when the strike began.

''I don't think there's anything you could say that is specific. At least now there is some understanding as to what the differences are,'' Power said.

Wages and benefits have been among the chief hurdles in the strike involving the majority of Greyhound's 6,300 unionized drivers and 3,000 other union employees.

Late last year Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year. Union members, citing a 22 percent pay cut they took when the company was sold to a group of Dallas investors in 1987, rejected the offer.

WASHINGTON (MARCH 21) UPI - Sen. Paul Simon, D-Ill., who sponsored a Poland aid bill last November, was not invited to the White House dinner Wednesday night for Polish Prime Minister Tadeusz Mazowiecki, an aide to the senator said.

David Carle, spokesman for Simon, said the senator, who heads the Senate Foreign Relations subcommittee on European affairs that deals with Poland, has ''obviously been slighted.''

Carle said Rep. Lynn Martin, R-Ill., who is running against Simon in this fall's Senate race, was invited to the dinner hosted by President Bush.

Chicago, Illinois' largest city, boasts a large Polish-American community and Carle said that Martin ''recently discovered'' she had some Polish ancestry.

Also, he said, Rep. Dan Rostenkowski, D-Ill., chairman of the House Ways and Means Committee, and retiring Republican Gov. Jim Thompson of Illinois also were invited.

Alixe Glen, deputy White House press secretary, responding to the complaint, said, ''There's a limited number who can be invited.''

Guest lists for White House dinners are drawn up by the White House social office with selections made by the president, first lady Barbara Bush and top aides.

Carle said Simon had hammered out the Polish aid bill with the prime minister in Warsaw last fall.

#90080u1955 03/21/1990 ~United Press International
WASHINGTON (MARCH 21) UPI - Texas Agriculture Commissioner Jim Hightower

gathered a phalanx of consumer, environmental and farm groups Wednesday to ask Congress for a farm policy that is ''both economically and ecologically sustainable.''

Saying that ''just finetuning'' current federal farm programs ''isn't enough,'' Hightower presented his vision of ''sustainable agriculture'' to the Senate Agriculture Committee as it formulates the 1990 farm bill, a five-year program of national agriculture policy.

''We can use the 1990 farm bill to plant the seeds of change,'' Hightower told the committee, ''and foster a kind of agriculture that is trying to work in balance with nature rather than always trying to overrun it.''

Hightower and the diverse coalition of national organizations used the hearing to launch a proposal, called ''New Beginnings,'' emphasizing changes in commodity and price-support policies, as well as promoting environmentally sensitive farming practices.

''The overall goal,'' Hightower said, ''is to steer America toward a 21st century system of family-farm agriculture that is both economically and ecologically sustainable.''

Congress should be ''extending the helping hand and rewarding those who want to embrace the transition'' from traditionally subsidized crops and from farming practices highly dependent on chemicals, Hightower said.

Sen. Thomas Daschle, D-S.D., agreed.

''Today I think farmers are in a straitjacket with regard to farming practices,'' Dashcle told Hightower. ''If we do anything within the next five years I hope it's to apply your advice ... and loosen that straitjacket.''

Hightower offered the growth in Texas of organic farming and cultivation of such non-traditional crops as wine grapes, Christmas trees and berries as examples of ''sustainable agriculture'' that current federal policy ignores.

''There's a tendency in too many of the government bureaucracies to scoff at these new crops,'' he said, ''when in fact they are the new mainstream. These are the pioneers of the new agriculture and we've got to invest in them.''

#90080u1957 03/21/1990 ~United Press International

(MARCH 21) UPI - East German conservatives are all set to travel to Bonn today for crucial meetings with West German Chancellor Kohl to discuss

uniting the two Germanys next year. The conservative Alliance for Germany took 48 percent of the vote in weekend elections... just short of a majority. Party leaders are expected to meet with West German officials who backed the Alliance for Germany.

The Chinese government has announced a ''grim'' national budget for 1990. Officials acknowledge the country is near recession and is running growing deficits. But the budget still gives the largest boost in spending to the military. Western diplomats say the government is repaying the military for squelching last year's pro-democracy uprising.

Federal prosecutors in Miami are asking the F-B-I to investigate reports that someone videotaped deposed Panamanian leader Manuel Noriega walking around his cell, reading a newspaper and sitting on a cot. Officials of two television networks say they were offered the chance to bid on the tape.

President Bush called singer Gloria Estefan at a Pennsylvania hospital where she is recovering from an accident yesterday on a snowy highway in the Pocono Mountains. The lead singer with Miami Sound Machine is in stable condition with a broken vertebra in the middle of her back. Doctors say they do NOT anticipate paralysis. The White House says Bush called Estefan to express concern and ''wish her well.''

#90080u1963 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A House Judiciary subcommittee voted Wednesday to expand restrictions on semiautomatic rifles by including U.S.-made weapons in the ban President Bush imposed on similar foreign firearms.

On a 5-3 vote, the panel approved the bill that also provides a 10-year mandatory minimum prison sentence for persons who use or carry so-called assault weapons during a violent crime or drug-related crime. The bill now goes to the full Judiciary Committee.

The bill would prohibit the sale of U.S.-made assault weapons after the effective date of the law, although dealers would be permitted to sell what they had in stock. Bush, by executive order, banned the imports of such weapons last year. The measure approved Wednesday also gives the executive branch the same authority to restrict domestically manufactured semiautomatic firearms as it now uses to ban such foreign-made rifles that are not intended for ''sporting purposes.''

It would require the Treasury secretary to publish a list of firearms models, both foreign and domestic, that would be banned under the ''sporting purposes'' standard.

The ownership and transfer of existing weapons would not be affected by the new legislation.

Rep. Bill Hughes, D-N.J., chairman of the Judiciary Subcommittee on Crime, said the the bill strikes a proper balance between the needs of public safety and the legitimate interests of gun owners.

Assault weapons ''are being used with increased frequency by drug dealers, criminals and mental incompetents to carry out acts of violence,'' Hughes said.

''Many of the weapons on the streets today were developed for use by military forces in combat. The casual gun owner who keeps a firearm to protect his family or for legitimate sporting purposes has no need for a lethal weapon used by soldiers and commandos,'' he said.

The bill would prohibit the manufacture of firearms to which silencers or bayonets can be attached, and would ban magazines or other ammunition-feeding devices with a capacity of more than seven rounds.

It would allow the export of assault weapons only to governments of foreign countries that have not been found to violate human rights or support terrorists.

WASHINGTON (MARCH 21) UPI - Barbara Bush will begin a two-day southwestern swing Thursday with stops at a New Mexico elementary school and a Texas luncheon where she will be honored as ''Texan of the Year,'' the White House said Wednesday.

The first lady will be joined at Longfellow Elementary School in Albuquerque by Kathy Carruthers, wife of New Mexico Gov. Garrey Carruthers and Nancy Domenici, wife of Sen. Pete Domenici, R-N.M.

Bush planned to visit a school newspaper planning class and attend a school assembly, the White House said.

On Friday, Bush will visit New Braunfels, Texas to attend the 24th Annual Texas Legislative Conference and where the Chamber of Commerce will honor her at a luncheon as ''Texan of the Year.''

NEW YORK (MARCH 21) UPI - Pop singer Gloria Estefan, injured when her tour bus was hit by a truck in Pennsylvania, was flown by helicopter to New York Wednesday to undergo spinal surgery.

The 32-year-old lead singer of the Miami Sound Machine arrived at the Hospital for Joint Diseases in Manhattan at 3:45 p.m. after a flight from Scranton, Pa.

Mary Costello, a hospital spokeswoman, said surgeons will attempt to fuse two fractured vertebrae in Estefan's back at 8:30 a.m. Thursday.

She said doctors were still unsure whether the 32-year-old Estefan will suffer any form of paralysis and that they will not know until after surgery is completed.

An ambulance attendant who made the flight with the singer said Estefan was in good spirits and quoted her as saying, ''It's a nice, sunny day for

flying.''

Michael Neuwirth, a spinal specialist, was flown to the singer's bedside in a Scranton hospital earlier Wednesday to make an evaluation of her condition. He accompanied her back to New York in the helicopter along with Estefan's husband, Emilio, 37, who suffered head and hand injuries.

Estefan was taken into the hospital in a stretcher.

Dr. Harry Schmaltz, a Scranton spinal specialist, said he was concerned about possible paralysis and said the singer will be out of action for at least three months.

Schmaltz said Estafan suffered ''some partial neurological deficit, which means she has a little bit of weakness and a little bit of numbness in her feet.''

Although doctors are hopeful the numbness and weakness will diminish as her broken vertebrae heal, Schmaltz said Estefan is still in danger of paralysis.

''This situation can worsen and that is of the most concern to us. There can be bleeding. There can been swelling. There can be further damage to the spinal cord,'' Schmaltz said.

''This is a very serious injury and it has potential for further dire consequences.''

Scranton trauma surgeon Dr. William Pfeifer said Estefan was resting comfortably and described her condition as stable.

''She's awake,'' Pfeifer said. ''She's chatting with her family. While she's certainly not chipper, she's feeling somewhat more at ease than she was.''

Fans and well-wishers - including President Bush - flooded Community Medical Center in Scranton with cards, flowers and telephone calls. Hospital officials said Estefan received two calls from Bush, who had met with the singer Monday at the White House.

Estefan, 32, suffered two broken vertebrae Tuesday when a tractor-trailer plowed into her tour bus, driving it into a second rig, on a snow-slickened highway in the Poconos. Her son, Nayab, 9, also suffered a broken collar bone in the accident.

Three other people on the bus were injured. All were treated and released except for Barbara Arencibia, 25, of Hialeah, Fla., an assistant to the singer, who also was in stable condition with minor injuries.

Estefan was catapulted to national prominence with the hit single, ''Conga.'' Miami Sound Machine's music is a mixture of Latin, pop, rock and urban influences. Estefan and the band won the American Music Awards' 1989 favorite pop-rock duo award, and Estefan was a host on the 1990 awards show.

The group's upcoming concert dates were expected to be canceled.

LOS ANGELES (MARCH 21) UPI - Vincent van Gogh's ''Irises,'' sold for an art auction record of nearly $54 million three years ago, has been resold to the J. Paul Getty Museum for an undisclosed price, it was announced Wednesday.

The purchase by the Getty, the world's wealthiest private museum, brings to three the number of paintings it owns among the 10 most expensive ever sold at auction.

The Malibu museum bought the 1889 Impressionist painting from Australian financier Alan Bond. Bond had created an unprecedented controversy in the art community when he bought the painting in 1987 for a record $53.9 million, making it the most expensive painting ever bought at auction.

Diana D. Brooks, president of Sotheby's North America, which arranged the sale to the Getty, said ''Irises'' had been sold to the Getty for ''an undisclosed sum in a private transaction.''

'''Irises' has a power that nobody can miss,'' museum director John Walsh said. ''A picture this important needs a permanent home and we're overjoyed that it can be the Getty.''

The masterpiece, a vivid flower painting done a year before Van Gogh's suicide in 1890, depicts the corner of a garden in the asylum of St. Paul Mausole in St. Remy, France, where the artist had committed himself.

Bond, whose crumbling financial empire is more than $5 billion in debt, bought the painting just after the October 1987 stock market crash in an unusual deal financed by Sotheby's.

The deal reassured a nervous art community that the international art market was soaring despite Wall Street's troubles. But there was widespread criticism that the auction house had artificially inflated the art market by financing the record-setting sale.

The auction house, the world's largest, loaned Bond $27 million to buy the masterpiece and accepted the painting itself as collateral on the loan. Bond was later forced to renegotiate his loan and to sell an Eduard Manet from his collection for $14.85 million to help pay off the debt. Sotheby's has since stopped accepting intended purchases as collateral.

''It would be very interesting to know what the Getty paid. They might have gotten a bargain, which is unlikely. But if they paid equal to what Bond paid or more, it reconfirms the market,'' said Deidre Sadeh, associate editor of Art & Auction magazine in New York.

''What the purchase does confirm is the Getty's incredibly buying power,'' Sadeh said.

With the purchase, the Getty owns three paintings in what is commonly called the ''Top 10,'' the 10 most expensive paintings ever sold at auction.

Van Gogh's painting joins the Old Master oil ''Halberdier'' attributed to Pontormo and purchased by the Getty for $35.2 million last May, and Eduard Manet's ''Rue Mosnier, Paris'' bought by the museum last November for $26.4 million. Those two paintings are the seventh and eighth most expensive bought at auction.

''Irises'' was in private European collections until 1947, when New York philanthropist Joan Whitney Payson bought it for $80,000. It was bequeathed to her son, who placed it on long-term loan to Westbrook College in Portland, Maine.

Prompted by the sale of Van Gogh's ''Sunflowers'' for $39.9 million in

March of 1987, Payson's son put ''Irises'' on the block to fund a charitable foundation.

WASHINGTON (MARCH 21) UPI - Boxer Sugar Ray Leonard unexpectedly donated $250,000 Wednesday for a research center on Africa and the Caribbean at a ceremony held to announce a $375,000 contribution by the company that makes Reebok sneakers.

The donations were made to the TransAfrica Forum, research arm of the lobbying group that has helped lead the fight in America against apartheid South Africa's system of racial separation.

TransAfrica is working to build a research center and library, to be named for Rep. William Gray, D-Pa., that ''will be the nation's primary repository'' of materials on the role of black Americans in shaping foreign policy, as well as maintain collections on Africa and the Caribbean.

At the Capitol Hill ceremony held to announce the Reebok donation, Leonard said he had been moved to make his own contribution for the Washington center.

''It dawned on me ... that unfortunately me being a superstar in boxing is not going to change foreign policies in Africa and the Caribbean, and it's not going to enhance our young people's education,'' Leonard said.

''But something like the Gray Library and Research Center would to that. So I want to announce that I will donate a quarter-million dollars,'' he said.

As applause greeted the announcement, TransAfrica Executive Director Randall Robinson said, ''I must tell you this comes as a complete surprise.''

The Reebok contribution was the biggest yet to the campaign, TransAfrica said. Entertainer Bill Cosby will host a fund-raising dinner for the center April 1 in Los Angeles.

#90080u2086 03/21/1990 ~United Press International
ST. PAUL, MN (MARCH 21) UPI - Federal drug czar William Bennett said Wednesday Minnesota's marijuana laws are too lenient and will only encourage criminals to come to the state.

''Lenient sentences will attract more criminals. When the Northwest cracks down, they'll move to Minnesota. Watch out,'' Bennett told a sparse crowd of legislators in an address to a joint meeting of the House and Senate.

He said no other state hands out a suspended sentence for possessing 100 pounds of marijuana.

Republican Rep. David Bishop of Rochester told Bennett that legislators are considering new, tougher penalties for drug abuse. ''If you wish, we will keep your office informed,'' he said.

Bennett said 60 percent of the marijuana users go on to hard drugs such as cocaine. ''It's a dangerous drug. It's 20 times more powerful than a few years ago,'' he said.

At a news conference, Bennett continued to assail marijuana, saying Minnesota's marijuana laws ''are too lenient.''

He said the city of Portland, Ore., found that California drug dealers

''went up the coast'' when Los Angeles got tough on pushers. ''The drug dealers now know the heat is on,'' Bennett said.

About a dozen people of the Grassroots Party demonstrated on the Capitol steps when Bennett arrived, saying marijuana should be legalized.

Bennett met Gov. Rudy Perpich, a Democrat, shortly before the noon address to the Legislature. Bennett said he talked with Perpich mostly about education issues. Bennett was education secretary under President Ronald Reagan.

The joint session in the Minnesota House chambers, which normally would be cramed with a standing room only crowd if all 201 legislators came, was lightly attended. The Democratic side of the aisle was virtually empty until lobbyists and staff members were encouraged to fill in the seats.

#90080u2105 03/21/1990 ~United Press International

ATHENS, GREECE (MARCH 21) UPI - Iran and the Soviet Union, in a gesture that coincided with the Iranian New Year, Wednesday reopened after 73 years a wooden bridge across the Araxes River that forms the border between the two countries in the Azerbaijan region, Tehran radio said.

The bridge at Jolfa, about 400 miles northwest of Tehran, was reopened to allow people living in the border areas to travel more freely from one country to the other.

A Tehran radio dispatch monitored in Athens said the two countries had reached an agreement on reopening the bridge, closed since the 1917 Russian revolution.

Azerbaijanis from the Soviet side crossed the bridge to visit friends and relatives in Iran, and were welcomed with flowers by people from Jolfa and nearby Marand, who formed a special committee to receive them.

Jolfa is close to the Poldasht area were several people plunged into the icy Araxes, or Aras, River to cross into Iran in early January, after Azerbaijani Turks rioted on the Soviet side, tearing down barbed wire fencing and other installations.

Thousands of people crossed illegally into Iran at Poldasht and other crossing points close to the Caspian Sea, until Soviet troops moved into Baku and other Azerbaijan cities to restore order, finally sealing the border again on Jan. 21.

The Tehran newspaper Kayhan said that even after the border was sealed, people appeared on the banks of the Araxes River to chant slogans and wave

to friends and relatives in Iran, but the barbed wire fencing on the Soviet side was restored days ago.

Last month, Tehran and Moscow signed an agreement to grant visas more freely to people living in the border areas to allow them to visit friends and relatives on the other side of the border frequently and for extended periods.

The Soviet Azerbaijani visitors at Jolfa were among the first to arrive since the agreement was signed. Others arrived in Astara, on the Caspian Sea, in the first group tour organized by the Soviet authorities.

Azerbaijani Turks on the Soviet and Iranian sides of the border share a common language, culture and faith, Shiite Islam, and Wednesday's visits were made on the occasion of Nowruz, the Iranian New Year.

Nowruz is celebrated in several countries in the region with the Persian tradition, including the southern Soviet republics, Afghanistan, parts of Pakistan and parts of Iraq.

For the first time since the 1917 Russian Revolution, the Soviet Union this year officially recognized Nowruz as a festival and day of celebration.

Nowruz, originating in pre-Islamic times, marks the first day of spring. On the Iranian calender, Wednesday was the first day of the year 1369, the count beginning from the Prophet Mohammed's migration from Mecca to Medina in 622 A.D.

In Tehran, Iranian spiritual leader Ayatollah Ali Khamenei paid a visit to the tomb of the late Iranian leader Ayatollah Ruhollah Khomeini early Wednesday, and later received President Akbar Hashemi-Rafsanjani and his cabinet in traditional palace ceremonies.

WASHINGTON (MARCH 21) UPI - The U.S. government reported a $36.4 billion budget deficit in February after running a surplus of $9.4 billion in January, the Treasury Department said Wednesday in its monthly statement.

For the fiscal year to date, the government is running a $97.5 billion budget deficit, virtually identical to the deficit of $92.65 billion for the comparable period in fiscal 1989, the Treasury Department said.

In February 1989, the government ran a deficit of $27.9 billion, the department said.

#90080u2120 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A relief convoy of 11 trucks carrying 120 tons of food crossed the battle zone in Ethiopia, the State Department said Wednesday, and a second convoy is expected to take the same route Thursday.

The food column was the first to be permitted in the northern part of Ethiopia, where Ethiopian government forces are locked in a civil war with the Tigrayan Peoples Liberation Front.

Although the report was encouraging, the State Department said that food shipments are only a tiny fraction of what is needed in a country that faces widespread famine.

A report to the administration by Trans-Africa, a Washington ''think tank'' specializing in African issues, said on March 12 that as many as 5 million people may face starvation in Ethiopia because of the combination of civil war and drought.

The United States has urged the warring parties to allow food convoys to pass, but until now there has been no response. Secretary of State James Baker asked his Soviet counterpart, Eduard Shevardnadze, to use his influence with the Ethiopian government to allow the convoys to pass.

Bouch said, ''We welcome the movement of this test convoy made possible by informal agreements among the warring parties in Ethiopia.''

But, Boucher added, given the fact that as many as 5 million people may be at risk, only a small fraction of the potential victims will be reached by the single corridor to Kobo, in the northern part of the country.

''There is an urgent necessity of opening other relief corridors and for the warring parties to give top priority to feeding the hungry,'' Boucher said. ''We once again call on all sides to the conflict to put hungry people first.''

Boucher said the United States States would like to see the port of Massawa reopened for food shipments. Recently taken by the Eritrean Peoples Liberation Front, the port facilities are reported to be in ruins.

The State Department spokesman also said that agreements should be reached for airlifts into other affected areas.

#90080u2147 03/21/1990 ~United Press International
RICHMOND, VA (MARCH 21) UPI - Gov. Douglas Wilder, seeking to distance himself from the controversy over admitting women to Virginia Military Institute, asked Wednesday to be removed as a defendant in the Justice Department's lawsuit against the school.

In a seven-page memorandum to the U.S. District Court in Roanoke, Wilder contends he should be removed from the dispute because he had no role in the creation or maintenance of the all-male policy.

The Justice Department filed suit against the 151-year-old Lexington military school March 1, claiming the all-male admissions policy is discriminatory and violates the Civil Rights Act and the 14th Amendment, which affords citizens equal protection under the law.

''The government should be required to look to those defendants responsible for the alleged discrimination - in this case, the board of visitors - for the relief it seeks,'' the memorandum states.

(MARCH 21) UPI - Former President Reagan is the key witness before a jury at John Poindexter's Iran-Contra trial today the panel views Reagan's videotaped testimony. Poindexter once was Reagan's national security adviser. As the jury watched Reagan's testimony on t-v monitors set up in a Washington, D-C, courtroom... federal Judge Harold Greene issued a ruling denying Poindexter access to excerpts from Reagan's personal diaries. Greene says because Reagan testified, he may shield his diaries under the doctrine of executive privilege.

President Bush welcomed Polish Prime Minister Mazowiecki to the White House today and promised that Poland will have a voice in any decision affecting its fate. Bush says Poland's current border with Germany is ''totally assured.'' Mazowiecki's trip is aimed at strengthening Polish-U-S relations and at lobbying for more Polish input on German re-unification.

It's the first day of independence in Namibia. Black tribal horsemen and

German descendants were among thousands of Namibians parading through the streets of the capital in celebration. President Sam Nujoma... sworn in after the South African flag was lowered over the territory... says his country is ''finally free'' after 75 years of colonial rule by South Africa.

All is reported calm but tense in the Romanian city of Tirgu Mures where clashes overnight between ethnic groups left six people dead. At least 300 people were wounded. Army troops moved into the city, 200 miles northwest of Bucharest, to break up fighting by ethnic Hungarian and Romanian groups armed with clubs and axes. Despite military intervention, officials say the situation remains tense, with a group of 100 Hungarians still occupying the main square.

(MARCH 21) UPI - The Census Bureau has scheduled a second night of counting the homeless in some cities where sub-freezing temperatures filled shelters to capacity last night. But census officials are reporting that overall, the count of homeless people around the country went well. Some shelters say they waited for census-takers who NEVER came. Detroit's City Rescue Mission says it's one of the best-known shelters in the city and should have been counted.

Western diplomatic sources say the Soviet-backed Afghan government has passed death sentences on several military officers involved in this month's failed coup attempt. The Afghan government announced it has expelled 24 members of the ruling party for involvement in the overthrow attempt. Three have escaped. But many of the others have reportedly been tried and sentenced to death.

Boston's Gardner Museum is re-opening to the public today after a weekend robbery of art works valued at hundreds of Millions of dollars. Two of the world's leading auction houses are offering a one-Million-dollar reward to anyone that returns the paintings and other art taken. The thieves themselves are eligible as long as the art is returned UNdamaged.

It's Spring, but the weather is NOT co-operating in the East where snow made for sloppy New England roads and temperatures dived below freezing. Snow flurries sprinkled over most of eastern Pennsylvania early today, while rain fell in much of New England. Heavy wet snow left thousands in Vermont without power. Up to 38 inches of snow was reported in Vermont ski country yesterday and today, particularly in the Champlain Valley..

#90080u2217 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Senior Democrats in Congress blasted the Bush administration's new aviation proposal Wednesday and demanded promises any higher taxes would be used to rebuild the system rather than mask the deficit.

Sen. Wendell Ford, D-Ky., chairman of the Senate Commerce Committee's aviation subcommittee, warned that ''Congress is not going to agree'' to the proposal ''unless it's part of a package resolving our problems.''

''There has got to be a package or nothing will happen,'' he said in an address to Washington's Aero Club.

Any agreement by Congress for higher taxes and fees to build up the aviation trust fund, already at $7.6 billion, must be accompanied by an administration promise to spend the money, Ford said.

And Rep. James Oberstar, D-Minn., head of the companion subcommittee on the House side of Capitol Hill, argued the administration should first spend the money now in the trust fund to improve the aviation system before boosting the fees.

The money salted away in the fund is counted against the federal deficit by the Office of Management and Budget, an action that has for years infuriated many in the aviation community who want the money spent for new runways and air traffic control improvements.

''It is an administration con game where air travelers think the money is being used to improve aviation and it's not,'' said Oberstar, adding that his panel is writing legislation ''to meet these (modernization) needs with money from the trust fund and no new taxes.''

And Ford - in a parody of President Bush's campaign pledge - added, ''Read my lips: no new taxes until the administration agrees to fix what is wrong.''

Ford also suggested an aviation summit conference to resolve the issue, adding, ''The current situation cannot continue with the administration offering unrealistic suggestions, dream world promises.''

The administration's $22 billion five-year plan, he said, would ''tax more and promise to spend more, and I underscore promise.''

The proposal would raise the airline ticket tax from 8 percent to 10 percent, allow airports to charge up to $12 for a round trip through the facility, boost the tax on aviation gasoline from 12 cents per gallon to 15 cents, and raise the jet fuel tax from 14 cents per gallon to 18 cents. It also would reduce federal funding at airports by 50 cents for each dollar raised by the airport.

The administration has proposed spending between $22 billion and $24 billion on operations and maintenance for FAA facilities over five years, and $22 billion from the fees for airport modernization and improvements in the air traffic control system.

The trust fund is projected to drop to $3 billion at the end of the period.

The 300,000-member Aircraft Owners and Pilot's Association, representing pilots of private planes, also criticized the new policy, saying the financing mechanism ''will do little to assure adequate spending on capacity-enhancing aviation system improvements.''

House Democrats also organized a concerted attack on the plan Wednesday, with a series of brief speeches on the floor, with Oberstar leading off.

Rep. Bob Wise, D-W.Va., said the plan amounted to ''pay now, fly later, maybe.''

Rep. Peter Visclosky, D-Ind., said Bush is playing ''a game of hide and seek - seek new taxes from consumers and hide the extent of the budget deficit. ... It's time to stop applying stealth technology to our aviation and transportation budget.''

''Who is being used and who is being abused here?'' asked Rep. Larry Smith D-Fla. ''The answer is obvious - American consumers.''

#90080u2241 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - The dollar moved higher in New York trading Wednesday, less on its own vigor than on political and economic vulnerabilities in the West German mark, the British pound and other world currencies.

Currency traders said uncertainty over the Soviet Union's response to the Lithuanian independence bid and about the headlong pace of reunification of the two Germanys undermined the West German money.

Political turmoil in the East as well as fears of inflation from the economic union of East and West Germany tend to drive capital away from investments priced in marks, lessening demand for the currency.

Senior dealer Erik Lehtis of Mitsui Bank described "directionless" trading but said he saw underlying strength in the dollar. "It feels like the market is still short (needs to buy) dollars," Lehtis said.

Creditanstalt Bankverein foreign exchange manager Lawrence Ryan said trading was lackluster, dollar-buying without conviction. "The market still hasn't made up its mind on the dollar yet," he said.

Britain's pound stayed under pressure after the poor reception accorded the country's 1990 budget. Critics called it soft on inflation and

incapable of lowering interest rates. And Prime Minister Margaret Thatcher's Conservative government faces a critical test in a local election Thursday.

In late New York trading the dollar was quoted at 1.7120 German marks, up from 1.7045 marks late Tuesday. Against Japan's currency the dollar changed hands at 154.60 yen, also up from 154.15.

The British pound slipped to $1.5950 from $1.60. Lehtis said sterling fell almost to $1.59 in trading but recovered as those who had sold the unit too aggressively bought it back.

The yen lost further ground on disappointment with the timing and size of a Bank of Japan interest rate hike. The increase of the discount rate by one point to 5.25 percent was seen as too little, too late.

In Washington, Treasury Secretary Nicholas Brady waved off concern about the falling yen, telling reporters: "From time to time it goes down ... We can't look at these things within a framework of one or two days."

Other dollar rates: 1.5250 Swiss francs, up from 1.5220; 5.775 French francs, up from 5.760; and 1,260 Italian lire, up from 1,257.

In Europe the dollar ended higher. It closed in Frankfurt at 1.7070 marks, up from 1.6940 Tuesday, and in Zurich at 1.5195 Swiss francs, up from 1.5140. It rose in Paris, Brussels and Milan to 5.7550 French francs against 5.6985, 35.44 Belgian francs against 35.19 and 1,257.80 lire against 1,246.70.

In London, the pound ended lower at $1.5945 against $1.6110 despite Bank of England intervention. Dealers said the unit was pressured because of the market's view that the new British budget would not curb inflation.

Tokyo currency trading halted Wednesday for the vernal equinox, a Japanese national holiday, and was to resume Thursday.

Republic National Bank in New York closed cash gold at $392 an ounce, off from $392.50 Tuesday. The New York Commodity Exchange settled gold at $391.80 an ounce, down from $392.20. In Zurich, gold eased to $392.50 an ounce against $399.50. London gold fell to $391.75 an ounce from $398.50.

Republic closed cash silver at $5.075 an ounce, up from $5.055. Comex spot silver rose to $5.055 from $5.043. Zurich silver closed lower at $5.04 an ounce against $5.10. London silver fell to $5.07 an ounce from $5.13.

-30- 3638
#90080u2253 03/21/1990 ~United Press International

NEW YORK (MARCH 21) UPI - The stock market closed lower Wednesday in one of the lightest trading days of the year as a late bout of profit taking and computerized program selling pressured prices.

The Dow Jones industrial average, which fell 16.89 Tuesday, lost 10.81 to close at 2727.93.

Among broader market gauges, the New York Stock Exchange composite index fell 0.89 to 186.82 and Standard & Poor's 500-stock index eased 1.83 to 339.74. The price of an average share lost 16 cents.

Declines led advances 874-591 among the 1,959 issues crossing the NYSE tape. Big Board volume totaled 130,990,000 shares, versus 177,320,000 shares traded Tuesday.

Only three sessions this year have seen lighter turnover - March 12, 114,790,000 shares; Feb. 12, Lincoln's Birthday, 118,390,000 shares; and on Feb. 5, 130,950,000 shares.

Analysts said a late bout of profit taking and computerized program selling, used to profit on price differences between stocks and stock-index futures, knocked the Dow industrials down from the afternoon's unchanged levels.

"Profit taking was definitely part of the equation" after the Dow's four-session winning streak, which ended Tuesday, said Rao Chalasani, market strategist with Prescott, Ball & Turben Inc. in Cleveland.

But all in all, many investors were on the sidelines with no strong incentives to buy or sell. Computerized buying provided the market with its only direction in early trading, boosting the blue chips, especially Boeing and Goodyear Tire and Rubber.

Those stocks helped the Dow industrials outperform broad market averages in the early going. They held their ground, but the average of 30 industrial issues lost its advance by midday and the broad market sagged.

"Basically, the market just needed a day of rest after the volatility earlier in the week," said Jay Goldinger of Capital Insights Inc., an institutional brokerage in Beverly Hills, Calif., referring to the market's swings Tuesday and Monday.

On the trading floor, Navistar was the most active issue, unchanged at 4 1/8. Homestake Mining followed, unchanged at 19 3/4. Chase Manhattan was third, down 1/8 to 27 1/8.

Also active was Citicorp, up 1/4 to 24 after chairman John Reed's statement Tuesday that earnings are expected to triple to $5 billion by

the mid- or late-1990s.

Among the other blue chips, AT&T added 1/8 to 41 7/8 after boosting its dividend to 33 cents from 30 cents and IBM fell 3/4 to 107 1/4.

Boeing tacked on 5/8 to 71 1/8. Reports said the company apparently feels it can finance its expensive 767-X aircraft project by itself and the possibility of Japan taking part in the project is becoming less likely.

Goodyear jumped 1 1/8 to 38 1/4. A growing number of money managers are said to see the stock as attractively valued.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 161,002,610 shares, compared with 212,699,560 shares traded in the previous session.

Prices closed slightly lower in active trading on the American Stock Exchange. The Amex Market Value index lost 0.27 to close at 363.15. The price of an average share fell one cent. Declines led advances 291-258 among the 815 issues traded. Composite volume totaled 18,070,700 shares, compared with 18,322,200 traded Tuesday.

Salomon's put warrants on the Tokyo stock market's Nikkei index led the Amex issues, up 3/4 to 8 3/4.

The National Association of Securities Dealers composite index lost 0.78 to 439.30.

NEW YORK (MARCH 21) UPI - Average yields for money market mutual funds rose in the latest reporting week, while rates at competing savings and loan institutions were mostly higher, two organizations that track the funds and institutions said Wednesday.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were up to 7.67 percent from 7.65, while 30-day simple yields rose to 7.65 percent from 7.64. The average maturity of fund portfolios rose to 44 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mostly higher in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.08 percent, up from 6.07; Super-Now accounts 5.01 percent, unchanged; six-month certificates of deposit, 7.68 percent, up from 7.67; one-year CDs 7.77 percent, up from 7.74; 2 1/2-year CDs 7.76 percent, up from 7.72; and five-year CDs 7.81 percent, up from 7.78.

The average rate for a one-year adjustable rate mortgage was 8.58 percent, up from 8.57.

The average rate on a 15-year fixed-rate mortgage rose to 9.95 percent from 9.94 and the average rate on a 30-year fixed-rate mortgage was unchanged at 10.13 percent.

The average rate for a four-year automobile loan rose to 12.21 percent from 12.19.

WASHINGTON (MARCH 21) UPI - Thomas Root, the communications lawyer involved in a bizarre six-hour flight down the East Coast last year that ended with a crash off the Bahamas, was charged Wednesday with defrauding the federal government and a number of his clients.

A federal grand jury in Washington indicted Root on charges of defrauding the Federal Communications Commission and and five radio stations he represented before the commission from June 1987 through September 1989.

Root, 37, of Alexandria, Va., also was charged with trying to obstruct a federal probe of his Washington law practice that began last April.

He was charged with 20 counts of wire and mail fraud; seven counts of filing materially false legal documents with the FCC; four counts of using

counterfeit and altered federal documents; and one count each of forgery and obstruction of a grand jury's investigation.

If convicted of all the counts, Root could face a sentence of 200 years in prison and more than $8 million in fines.

Root made headlines last July during the height of his financial difficulties when he ditched his single-engine plane in the Atlantic Ocean after a six-hour flight in which he suffered a self-inflicted gunshot wound. He denied it was a suicide attempt.

''The criminal charges lodged against Mr. Root depict a tangled web of fraud, falsehoods, deceit and forgery, calculated to defraud his clients and to corrupt the processes of government,'' said U.S. Attorney Jay Stephens.

The indictments allge Root:

-Defrauded Northern Missouri Christian Broadcasting of Kirksville, Mo., by filing a fraudulent Federal Aviation Administration certificate approving the broadcast tower design for the proposed radio station.

-Fraudulently dismissed the license application of Holy Spirit FM Ltd., of Raleigh, N.C., without the station's knowledge.

-Filled out a false FAA certification fraudulently negotiated for a lease of land on which to build a proposed station for CM Broadcasting Ltd., of Long Island, NY, when he had never contacted the land owners.

-Dismissed the FCC application for Timothy FM Ltd., of Charlottesville, Va., with a forged signature of his client.

-Dismissed an FCC application for Louisburg FM Ltd., of North Carolina, after agreeing to be paid $10,000 from a competitor.

On July 11, 1989, Root agreed to reimburse Louisburg $50,000, and delivered a check, which later bounced, according to the indictment.

Two days later, on July 13, Root - a licensed private pilot - took off from Washington National Airport in his Cessna 210 en route to Rocky Mount N.C.

Shortly after takeoff, however, Root radioed controllers and complained of chest pain and trouble breathing.

He put the plane on automatic pilot and was seen slumped over the controls as a series of military planes trailed the flight until it ran out of gas and spun into the ocean some six hours later - 14 miles east of Eleuthera,

Bahamas.

Root escaped the sinking plane and swam to rescuers.

It was later discovered Root had been shot in the stomach.

Root maintains he passed out early in the flight and was jarred conscious by the crash. He claims his handgun on board must have fired automatically when the plane hit the water, a scenario gun experts have called highly unlikely.

Root also is charged with trying to obstruct the grand jury investigation by ''corruptly causing a records custodian of his law firm to withhold relevant records maintained by his law firm,'' the indictment alleges.

Stephens said Root was ''aware in some respects of the scope of the investigation, several months before his flight.''

Neither Root nor his attorney were immediately available for comment.

All but two of the 33 counts involve incidents that allegedly occured before the plane crash.

None of the five radio stations Root allegedly defrauded ever received their FCC permits, Stephens said.

#90080u2289 03/21/1990 ~United Press International

HOUSTON (MARCH 22) UPI - Blimpie, a submarine sandwich chain with outlets in 16 states, no longer will use tuna whose capture results in the deaths of large numbers of dolphins, a company official said Wednesday.

Blimpie, with 350 stores, is switching from yellowfin to skipjack tuna in hopes of saving a large number of dolphins killed each year in the netting of yellowfin tuna, said Joe Conza, president of Lone Star Blimpie.

Conza said he believes Blimpie is the first major fast-food chain to make such a switch.

The company already uses only skipjack tuna, from the Philippines, in 65 Atlanta outlets and 32 Houston stores, Conza said. It hopes to complete the switch from yellowfin in all of its stores within 60-90 days, he said.

''We're coming out saying that anything we can do to prevent the slaughter of dolphins ... we will do,'' Conza said. ''We're not guaranteeing there's not going to be any dolphins killed, but the chances of that happening are slim because the type of tuna we're using does not swim with dolphins.''

Yellowfin tuna swim with dolphins in the eastern tropical Pacific, and typically are found by fishermen who use helicopters and speed boats to track schools of dolphins. Large nets are dropped over both the tuna and dolphins, and many dolphins become trapped in the nets and die.

Last year, an estimated 150,000 dolphins were slaughtered in catching tuna. The United States is the No. 1 consumer of tuna worldwide, taking roughly 75 percent of the yearly tuna catch.

Blair Palese, a Greenpeace representative in Washington, applauded Blimpie's efforts, but said such changes must be accompanied by measures that ensure tuna such as skipjack is not combined by distributors with tuna caught by tracking dolphins or with drift nets.

''Even though we appreciate their search for a solution, as of yet as far as we know, no one has been able to guarantee any fish product completely without mixing yellowfin or albacore,'' she said. ''So we would ask companies, aside from just saying they want to make a switch, to demand that it be verified.

''But we definitely support the (Blimpie) effort, and that's exactly what we're looking for ... that they be questioning it and asking for a safe alternative.''

Conza said the company hopes other fast-food franchises and restaurants will follow its example in the tuna-dolphin controversy.

''It has to make some type of impact,'' he said of Blimpie's action. ''I think it's also a concern that's growing around the country, as is the fur issue. Ultimately, with us making this change, other chains, I think, will follow us and it will affect the tuna industry.''

Laura Urian, assistant director of education with the Dolphin Research Center in Grassy Key, Fla., also said Blimpie's action may prompt others to follow suit.

''What's really exciting about it ... is that all it takes is one fast-food chain and the rest fall like dominoes. They just keep going,'' Urian said. ''What's exciting, too, is that they're listening to the consumers and it makes us all feel like we can do something about this and make a difference.''

Blimpie, which sold 2 million tuna sandwiches last year, has not yet considered eliminating the item from its menu, Conza said.

''As time goes by, if the consumer decides they don't want to eat tuna because of the dolphins' situation, then we would consider taking it off

our menu,'' he said. ''We're going to let the consumer dictate that to us.''

Notices will be posted in each Blimpie outlet explaining the change, Conza said.

''We believe that the consumer will support us more if we adopt an environmentally responsible position,'' said Anthony Conza, president and co-founder of the chain. ''We intend to continue to address the tuna-dolphin issue and other issues which are important to consumers and to our environment.''

#90080u2303 03/21/1990 ~United Press International

(MARCH 21) UPI - World crude prices bounced back Wednesday after inventories failed to increase as expected and the New York Mercantile Exchange began trading a new delivery contract.

In the first day of trading the May delivery contract on the Merc, the benchmark West Texas Intermediate crude gained 19 cents to $19.96 a barrel. Trading volume was a sub-par 77,294 contracts.

Following the Merc's lead, WTI for prompt delivery jumped 35 cents to $19.60 a barrel on the U.S. Gulf Coast cash market.

With refineries curtailing production during their maintenance ''turnarounds'' from heating oil to gasoline production, some traders had expected a weekly industry survey to show crude supplies growing up to 5 million barrels.

But the oil industry's American Petroleum Institute reported late Tuesday after the Merc closing that the nation's crude stocks last week rose a scant 200,000 barrels.

''That helped. It was better than expectations,'' said Michael McDermott of Paine Webber Inc. in New York.

A more important factor was that Merc futures trading moved into contracts

for May delivery, closer to the warm weather driving season with its higher demand for gasoline and crude, the analyst said.

Demand for April delivery contracts, which stopped trading Tuesday, had waned, and the price of WTI had threatened to drop below $19 a barrel.

And downward pressure was strengthened in the last few days when the 13-nation Organization of Petroleum Exporting Countries failed to enforce production limits in its weekend meeting in Vienna.

''We are no longer plagued by the low-demand cycle for crude oil. Traders are trying to assess the market in light of the new situation,'' McDermott said. ''In the short term, I think we're going to go up a little higher as the market reacts to the favorable products picture. Gasoline and heating oil are right where they should be from the demand-supply standpoint.''

The API reported gasoline inventories declined 2.5 million barrels last week to 241.2 million barrels, slightly higher than the 241 million-barrel level of a year ago.

On the Merc, unleaded gasoline for April delivery rose 0.63 cent to 57.94 cents a gallon, while the May contract gained 1.24 cents to 62.45 cents a gallon.

On the New York Harbor cash market, unleaded gasoline jumped 1.15 cents to 56.65 cents a gallon, on top of Tuesday's 1.25 cent gain.

On the European spot market, Britain's widely traded North Sea Brent rose 13 cents to $17.84 a barrel.

The UAE's Dubai light, the key OPEC crude from the Middle East shipped mainly to the Far East, gained 5 cents to $15.30 a barrel.

On the Merc, home heating oil for April delivery moved up 1.19 cent to 55.54 cents a gallon, while gaining 0.20 cent on the New York Harbor spot market to 59.05 cents a gallon.

#90080u2308 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Ronald Reagan testified on videotape Wednesday before the jury in John Poindexter's Iran-Contra trial, but the judge ruled the former president did not have to turn over portions of his personal diaries.

Called as a defense witness for his former national security adviser, Reagan insisted in his testimony that he did not know about key parts of the worst scandal of his administration and never ordered aides to lie.

The seven hours and 40 minutes of videotaped testimony was recorded in Los Angeles Feb. 16 and 17. While a transcript had been released and sparked massive media coverage, the actual videotape had never been broadcast until Wednesday.

By the end of the day, the first six tapes had been played out of a total of nine. Greene recessed the trial shortly after the beginning of the seventh tape and ordered the case resumed at 9:45 a.m. Thursday.

Attorneys for Poindexter, 53, had hoped to show that the retired Navy rear admiral was simply following orders. Poindexter is charged with five counts of lying to Congress and impeding its investigation of the scandal.

However, when Reagan testified repeatedly that he did not remember much of the scandal and he always told his aides to act legally, Poindexter's lawyers made a renewed effort to obtain some 30 excerpts of Reagan's personal diaries.

U.S. District Judge Harold Greene ruled Wednesday that Reagan could keep the diaries secret because he had properly invoked the doctrine of executive privilege and also took the highly unusual step of giving testimony under oath.

''Sight must also not be lost of the overriding fact that Mr. Reagan did testify under oath at great length about many specific activities in his administration - an event that is unprecedented in American history,'' Greene ruled.

In footnotes to his ruling, Greene - who read the diary excerpts - said Reagan's ''diary entries are brief and even cursory; the longest consists of five sentences.'' They ''shed no new light on the sale of Hawk missiles to Iran, a matter that occupied much of the videotaped deposition and about which the former president sometimes indicated a lack of recall,'' Greene said.

On the tapes, Reagan often seemed confused by the questioning. He also appeared to have a cold - he coughed several times and blew his nose.

At least 124 times Reagan said he could not remember key events.

The former president wore a dark suit, a white shirt and a dark patterned tie. He looked fit, although his hair was streaked with gray. Reagan's voice and picture appeared on five monitors in the courtroom.

Members of the jury of five men and seven women were initially attentive, then their attention seemed to drift. They laughed only rarely at Reagan's jokes, but then appeared much more interested when prosecutor Dan Webb

began cross-examining Reagan.

Reagan's testimony did not appear to bolster Poindexter's case. Under Webb's cross-examination, Reagan said he did not authorize Poindexter to send false letters to Congress. The letters are a key part of the government's case.

Webb: ''I take it also that as president of the United States you were aware that it not only is wrong but it is a crime to obstruct Congress and to provide them with false information? You were aware of that, is that correct, sir?''

Reagan: ''Yes.''

Webb: ''And you would never have authorized anyone in your administration to do anything that you knowingly believed to be against the law regarding the Contras; is that a fair statement?''

Reagan: ''That is a fair statement.''

Webb: ''And the time that the Iran initiative was ongoing, were you aware that money was being diverted over to aid the Contras? Were you aware of that?''

''

Poindexter's lawyer, Richard Beckler, would not say which witness he would call after Reagan. He also declined to say whether he would put Poindexter on the stand.

The scene inside the courtroom was sometimes comical as the judge and lawyers watched themselves on television monitors. Greene often looked amused as he watched his rulings in Los Angeles.

Poindexter carefully studied the faces of jurors, trying to gauge their reaction, and at other times watched Reagan. At times he leaned back in his leather chair, his head resting on his right hand.

Poindexter's wife, Linda, an Episcopal priest, arrived in the early afternoon. When she arrived, she and Poindexter kissed. She then sat in the front row and sometimes laughed at some of Reagan's jokes.

Reagan never wavered from the position he has taken since the scandal broke in November 1986 - that even today he is unaware of the crux of the affair, that profits from secret arms sales to Iran were funneled to the Nicaraguan Contras when U.S. aid to the rebels was banned.

''I said that whatever we do, that we must continue helping the Contras,

but we must do it within the law,'' Reagan said.

#90080u2318 03/21/1990 ~United Press International

CHICAGO (MARCH 21) UPI - The Illinois general election campaign was in full swing Wednesday, even before all the votes cast in Tuesday's primary were tallied.

Democratic Sen. Paul Simon and Republican challenger Rep. Lynn Martin, both unopposed in the primary, aired their first general election spots - Martin Tuesday night and Simon Wednesday.

''We didn't want to waste any time getting our message across,'' said Simon campaign spokeswoman Ann Roosevelt. She said the campaign theme will be getting across ''the really good story Simon has to tell.''

Martin said she picked primary night to start her commercials because she needs to increase name recognition against the better-known Simon.

''There's no question. A lot of people have no idea who Lynn Martin is. But I'm getting better known in my party,'' she said.

Her first advertisement features only Martin speaking about how she wants to run a campaign without negative television commercials. It also gives people an address to write to give their input on her spots.

''Let me know what you think,'' Martin says in the commercial. ''You have the right to know where I stand and the issues where Paul Simon and I disagree.''

The second spot gives some of Martin's personal background and discusses her legislative experience in Washington and Springfield. It calls her ''a recognized champion of tax cuts and spending restraints.''

Simon's first ad shows a nurse caring for a newborn infant. As she cradles the child, the nurse praises Simon's concern for drug-addicted mothers and their offspring and his sponsorship of legislation creating special prenatal units for them.

The second spot shows Simon attending his regular ''town meetings'' and other gatherings in Illinois, noting the senator has returned to the state ''more than once a week for the past six years'' and has sponsored more than 400 town meetings.

#90080u2364 03/21/1990 ~United Press International

LOS ANGELES (MARCH 21) UPI - A former lover of Liberace linked a convicted drug dealer Wednesday to a house where four people were killed in a 1981 murder case for which the late porn star John Holmes was tried and acquitted.

Scott Thorson, who once filed a palimony suit against Liberace, is the star witness at the Superior Court murder trial of Eddie Nash, 60, and his former bodyguard, Gregory Diles, 41.

Prosecutors contend that the four people were murdered in a Laurel Canyon residence on July 1, 1981, at the behest of Nash, who allegedly believed that some of the victims had previously robbed him of $1 million worth of drugs and cash at his Studio City home.

Thorson testified Wednesday that prior to the slayings, he heard Nash and Diles beating Holmes in Nash's bedroom and Nash screaming at the porn star to take Diles to the Laurel Canyon residence on Wonderland Avenue.

''They were beating Mr. Holmes up,'' Thorson testified under questioning from Deputy District Attorney Dale Davidson. ''I heard Mr. Nash threatening Mr. Holmes, telling Mr. Holmes that if he didn't take him to where those people were who robbed him, he would have every member of his family killed.

''He ordered Mr. Diles to take Mr. Holmes to Wonderland Avenue to get back his drugs and money,'' Thorson testified.

He said that Diles and Holmes then left Nash's residence.

At a preliminary hearing in January 1989, Thorson testified that Nash never directly admitted that he had ordered the killings, but did lament after the slayings that he had decided to send Diles and Holmes to the Laurel Canyon residence.

''He felt he was responsible for sending Mr. Holmes and Mr. Diles there and it had all turned into a bloody mess,'' Thorson testified at the hearing.

He is expected to duplicate that testimony later in the trial.

During cross-examination, defense lawyer Jeff Brodey tried to show that Thorson decided to testify against Nash and Diles in exchange for leniency from prosedcutors in his own robbery case, for which he was convicted in 1988.

Bludgeoned to death in the brutal attack were William Deverell, 42; Joy Miller, 46; Barbara Richardson, 22; and Ronald Lanius. Beaten and left for dead was Lanius' wife, Susan, 25, who survived but was unable to identify

the assailants because of brain damage.

Deverell and Lanius had allegedly participated in the robbery at Nash's home.

Nash, once described by Holmes as ''the most evil man I've ever known,'' and Diles have pleaded innocent to four counts of murder and one count of attempted murder. If convicted, they could be sentenced to death.

In an unusual courtroom arrangement, two juries - one for each defendant - are hearing evidence in the trial. During certain evidence offered against Nash, Diles's jury will leave the court. During periods when certain evidence is offered against Diles, Nash's jury will leave.

Holmes, a superstar in the adult film industry, was tried and acquitted of the murders in 1982. He died of AIDS in March 1988 at age 43.

Thorson filed a palimony suit against Liberace in 1982, claiming that in return for being his live-in chauffeur, travel secretary, animal trainer and lover, Liberace promised him $70,000 a year for life. The suit was settled out of court in 1984.

#90080u2385 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - The nation's rivers have been endangered by everything from acid rain to oil spills, but a river in New Mexico is the first to be threatened by denim jeans, Rep. Bill Richardson, D-N.M., said Wednesday.

To protect New Mexico's Jemez River from the potentially fatal fashion, Richardson planned to offer a floor amendment in the House Thursday that would prevent a New Mexico company from mining pumice at a tract on the east fork of the river.

''Pumice, incidentally, is used to stonewash demin and other fabric,'' Richardson said. ''Therefore, in the case of the Jemez River we have the first river endangered by stonewashed jeans.''

Richardson made his ecological stab at the American fashion staple during a news conference called by the environmental group American Rivers to announce its list of the 10 U.S. rivers most endangered by mining, flood control dams and hydroelectric projects.

The proposed pumice mining on the Jemez River put the waterway among the group's top 10.

Legislation Richardson proposed that would make the east fork of the Jemez

part of the nation's Wild and Scenic Rivers designation was slated to reach the House floor Thursday. Aides to the congressman said he would introduce a floor amendment aimed at preventing the Copar Pumice Mining Co. of Espanola, N.M. from purchasing from the government a 170-acre tract along the Jemez.

Richardson's press secretary, Stu Nagurka, said the firm already owns mineral rights to 1,700 acres near the river, but the application for patent, ownership, of the 170-acre parcel would allow the company to sidestep regulations requiring return of the land to its original condition.

''We cannot take away their right to the minerals,'' Nagurka said, ''but their decision to seek patent of the land knowing that we have this scenic rivers legislation in is just a slap in the face.''

Nagurka said the current popularity of stonewashed jeans, which have a faded, well-worn look, ''is why pumice is such a hot commodity now.

''It's also used in the making of cement,'' Nagurka said, ''but the fashion industry is really the motivator behind the need for it now.''

#90080u2406 03/21/1990 ~United Press International

NEW YORK (MARCH 22) UPI - Fred Lebow, director of the New York City Marathon and president of the New York Road Runners Club, was diagnosed Wednesday as having cancer.

Tests indicated Lebow has lymphoma of the brain, which can be treated with radiation. Doctors said radiation treatment will begin immediately.

Lebow was first admitted to Mount Sinai Hospital for tests Feb. 14, and subsequently re-admitted March 8 for blood clots.

Lebow, 52, a native of Romania, has been director of the NYC Marathon since 1970 and the president of the NYRRC since 1972. The NYC Marathon, which began as a race around Central Park, has developed into the world's largest marathon. Last year, 24,996 finished the event.

Lebow has also been instrumental in staging the Mercedes Mile on Fifth Avenue, the L'eggs Mini Marathon, the New York Track and Field Games and the Empire State Building Run-up.

#90080u2418 03/21/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Leaders of a House Agriculture subcommittee

proposed a major revision in dairy policy Wednesday but quickly faced Bush adminstration accusations of crafting a ''milk tax'' to hide the cost of their plan.

A handful of subcommittee members also were worrying - needlessly, sponsors said - that the proposal could lead to a 60-cent price cut.

The proposal called for using an assessment on milkfat as the first step in trying to prevent overproduction with adoption of a two-tier milk price as a last resort. The intermediate step would be to reduce the support price, which would begin at $10.60 per 100 pounds of milk.

The current dairy program tries to control production by raising or lowering the support price, now set at $10.10.

Deputy Agriculture Undersecretary John Campbell said the plan drafted by Reps. Charles Stenholm, D-Texas, and Steve Gunderson, R-Wis., would encourage dairy surpluses by raising the support price. He called the milkfat assessment a ''milk tax.''

''The ultimate impact is to tax the industry for additional (government) purchases and not to reduce production of milkfat,'' Campbell said. ''You cannot change what comes out of a cow by imposing a tax.''

Stenholm and Gunderson chose the milkfat assessment because milkfat, as represented by butter, has been the only dairy product in surplus recently. The government expects to buy 335 million pounds of butter and 40 million pounds of cheese - but no dry milk - this year to prop up dairy prices.

''We do not have a surplus problem. We have a milkfat problem,'' Stenholm said.

Campbell, however, said dry milk and cheese purchases would rise under the Stenholm-Gunderson plan.

''If you don't like our solution, give us a better one,'' Gunderson said.

Campbell repeated the Bush adminstration preference to retain the current system, but with more flexibility on the size of price cuts or increases.

''We're going to see price cuts - $9.10, $8.60,'' Stenholm responded, raising the often-heard fear of huge price cuts if the White House has its way.

''We project at the end of the (five-year) period, we'll see $9.60,'' Campbell said.

The Congressional Budget Office estimated that freezing the milk support price at $10.60 would mean the dairy program would cost $821 million in fiscal 1991 but could hit $1 billion a year by fiscal 1993. A hefty milkfat assessment would be needed to offset the additional cost.

An Agriculture Department official said the adminstration estimates the dairy program will cost $617 million in fiscal 1991 and call for the purchase of the equivalent of 7.4 billion pounds of surplus milk.

#90080u2451 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - Federal dollars to states during the 1980s gushed into the South and West, flowed steadily to New England but trickled to the Mid-Atlantic region and Midwest, a congressional report said Wednesday.

For every tax dollar paid to the Treasury during fiscal years 1981-1988, the federal government returned an average $1.13 to the South, $1.10 to the West and $1.01 to New England states, while Mid-Atlantic states lost 11 cents and Midwest states lost 20 cents on the tax dollar, according to the report from the Northeast-Midwest Coalition.

The coalition includes members of Congress from those areas who have joined together to promote common inetrests.

The report tracks the distribution of $5.7 trillion - about 81 percent of federal outlays during the 1980s. It is based on Census Bureau data that includes direct payments to individuals, such as Social Security and Medicare; procurement, of which three-quarters is defense spending; federal civilian and military salary and wages, and grants to state and local governments.

''If the Northeast-Midwest region had received 46.9 percent of total federal spending - equal to its share of the nation's tax burden - the region would have received an estimated $359 billion in additional federal spending during this period,'' said Keith Laughlin, the coalition's staff director.

''At a time when the region needed federal investment for revitalization, it was subjected to continued disinvestment,'' he said.

Rep. Howard Wolpe, D-Mich., said his state is an example of states that were ''shortchanged'' by the 1980s' budget trend of massive defense spending and reduced domestic spending.

''However, the dramatic changes sweeping through the world offer the best opportunity in a decade to redirect those priorities to investments which

would benefit Michigan in the 1990s,'' Wolpe said.

Sen. Daniel Moynihan, D-N.Y., said the report can help states ''anticipate plan, and perhaps to be ready for the future.''

The report also found that on a per capita basis - federal spending per person - the New England region won with $28,722; the West received $27,261; the Mid-Atlantic region received $24,568; the South received $24,247; while the Midwest received $19,537.

Defense spending had much to do with how a region fared.

For the 1981-1988 period, 35.9 percent of federal spending in New England - $130 billion - involved defense dollars. However, New England received just 8.4 percent of total defense spending nationwide.

In the 18-state West, 33.8 percent, or $533 billion, of its share of federal dollars was defense-related, with California the big winner. The West received 34.4 percent of defense spending.

In the 14-state South, 28.4 percent, or $524 billion, of the federal dollars were defense-related, with Texas, Virginia and Florida collecting the most. The South received 33.8 percent of defense spending.

The Mid-Atlantic states were next, receiving 20.7 percent, or $214 billion of its federal share in defense dollars. New York collected the most in the five-state region. The region received 13.8 percent of the defense spending.

And in the Midwest, 15.4 percent, or $146 billion, of its share of federal spending was defense-related, with Ohio collecting the lion's share in the seven-state region. The region received 9.5 percent of the total.

The regions as considered by the study:

-New England includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

-Mid-Atlantic includes Delaware, Maryland, New Jersey, New York and Pennsylvania.

-Midwest includes Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio and Wisconsin.

-South includes Alabama, Arkansas, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina Tennessee, Texas, Virginia and West Virginia.

-West includes Alaska, Arizona, California, Colorado, Hawaii, Idaho, Kansas, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

(MARCH 21) UPI - President Bush says Poland's present borders with Germany are ''totally assured.'' Bush made the remarks today during a ceremony welcoming Polish Prime Minister Tadeusz Mazowiecki to the White House. The president told Mazowiecki that Poland will have a voice in any decision affecting its fate. Mazowiecki wants to prevent the possibility of any future claims on territories that Poland acquired after World War Two.

Jurors in the Iran-Contra trial of former national security adviser John Poindexter watched videotaped testimony of former President Ronald Reagan today. Also today, U-S District Judge Harold Greene issued a 14-page ruling denying Poindexter access to excerpts from Reagan's personal diaries. Greene says the entries would NOT add much to the case because they are ''brief and cursory''... the longest of them running five sentences.

The U-S Supreme Court has lifted the veil of secrecy surrounding grand jury proceedings. The high court ruled unanimously that a state canNOT bar witnesses from divulging their testimony. The ruling stems from a suit by a Florida reporter who wants to write a book about alleged corruption in county government. But a Florida law prohibited him from repeating anything he had told the grand jury. Today's Supreme Court ruling struck down the Florida law.

The Treasury Department today lifted economic sanctions against the African nation of Namibia... which gained independence after 75 years of South African rule. The lifting of the sanctions clears the way for U-S trade, loans and investment in Namibia. The statement from federal authorities says economic sanctions ''remain in full force and effect with respect to South Africa.''

(MARCH 21) UPI - More violence in the Greyhound bus strike. Virginia state police say a sniper fired three shots at the windshield of a Greyhound bus from a passing car last night. NONE of the passengers were injured and the bus continued south on Interstate 81 from Roanoke to Christiansburg. The shooting was the latest incident of violence in the often heated strike. It's the 14th incident involving sniper fire at a bus.

In New York, questioning is moving slowly in selection of a jury to hear testimony in the racketeering trial of Imelda Marcos. A potential juror told lawyers yesterday that he knew little about the former Philippines first lady, except that he ''read someplace about her shoe collection.'' Marcos and Saudi Arabian financier Adnan Khashoggi are accused of transferring Millions of dollars from the Philippines and investing it in Manhattan property.

An abortion rights advocate who came to Guam to test a new anti-abortion law is pleading ''NOT guilty'' to a charge she illegally told women how to seek abortions in Hawaii. The U-S territory's governor signed a bill this weekend that allows abortion only if a pregnancy threatens a woman's life. Janet Banshoof held a news conference yesterday to provide names and phone numbers of abortion clinics in Hawaii.

An orthopedic specialist says pop singer Gloria Estefan will need a spinal operation because she suffered a broken vertebra when her tour bus was hit by a truck yesterday. Estefan is in a Scranton, Pennsylvania, hospital, where Dr. Harry Schmaltz says the lead singer of the Miami Sound Machine is still in danger of paralysis. He says Estefan's back injury is ''very serious and it has the potential for further dire consequences.''

#90080u2613 03/21/1990 ~United Press International

BRIDGEPORT, CT (MARCH 22) UPI - Paul Newman doodled and took notes Wednesday in court as a delicatessen owner testified he was angry to learn he would not receive stock in the Academy Award winning actor's charity food business.

Newman, 65, was in court to fight a lawsuit filed by Julius Gold of Westport who claims the actor and his partners reneged on verbal promises to give him a slice of the profits from Newman's Own salad dressing and other food products.

Testimony in a second trial in the civil case began Tuesday in Superior Court.

Dressed in a gray suit and black boots, Newman at one point drew a bearded Grinch-like character with a strong resemblance to Gold.

''It was my recipe ...,'' Newman wrote underneath the doodle, which he drew on a yellow legal pad with his still-bandaged right hand. The celebrity said he injured his hand Monday when it became caught in his dog's collar.

Newman showed the drawing to co-defendant A.E. Hotchner during a break in the proceedings while the jury was out of the room. Hotchner chuckled and

then showed it to their attorney, W. Patrick Ryan of Stamford, who also laughed.

Gold, the first witness to be called in the case, testified he was promised an 8 percent share of stock in Newman's food business by Newman's partners.

Gold said he was told in late 1982 by Hotchner that the stock would be distributed by the end of the year.

However, in late December of that year, Gold said Newman's attorney, Leo Nevas, told him there had been a misunderstanding and that when he had said by the end of the year, Hotchner had meant by the end of the fiscal year in July 1983.

Gold then recounted how in May 1983 he met with Nevas in the attorney's Westport office and Nevas told him Newman had decided there would be no stock distribution.

''I said, Leo, 'I am very, very shocked, in fact I am angry,''' Gold testified. ''I have put more than two years of my time, my effort, my best judgement in furthering this endeavor.''

Gold said Nevas told him Newman planned to acknowledge him publicly for his contribution to the business and give him a sum of money.

''I said, ''I never wanted money. I want stock. That's what I was promised '' Gold said.

Gold said he told Nevas he planned to give the proceeds of any stock to charity. He also has said he planned to give any award he received in the case to charity.

SAN MATEO, Calif. (MARCH 22) UPI - Citing ''explosive'' growth in credit cards in Japan and the Pacific Rim, Visa International said Wednesday it would open a new data processing center in Yokohama, Japan.

Using powerful IBM mainframe computers, the center will process hundreds of transactions a minute from credit-card holders in 17 countries throughout the Pacific Rim.

Previously such business was processed at the company's San Mateo, Calif., headquarters, meaning communications had to travel over expensive and sometimes unreliable trans-Pacific telephone cables. The San Mateo center will continue as a back-up to the Japanese center.

Visa always has been able to switch to satellite transmissions if problems developed in the trans-Pacific cables - as happened on a line between Guam and Hawaii a few weeks ago - but the addition of the Japanese center will put the primary processing center closer to where transactions take place, the company said.

More important, having a Japanese center fully staffed during normal business hours in the Pacific region will mean can Visa can respond more quickly to problems raised by member banks in the region, said Mike Massey senior vice president.

''Visa's phenomenal growth in the Asian region makes this (center) almost a necessity,'' Massey said, noting that the number of Visa card holders in Asia has reached 29 million.

The Yokohama center, to be set up at a cost of $5 million, is expected to begin operations this summer, Massey said.

To cope with U.S. growth, Visa also plans to expand its McLean, Va., data processing facility. Combined with a center in London, Visa's four data processing centers process 5,000 transactions a minute from credit card holders in 180 countries, the company said.

The Visa card is the most widely used credit card in the world, exceeding both MasterCard and American Express.

#90080u2654 03/21/1990 ~United Press International

BOSTON (MARCH 21) UPI - The FBI released sketches Wednesday of two thieves who carried off the largest art heist in history and said they have been flooded with tips since a $1 million reward was offered for the safe return of the 12 masterpieces.

The Isabella Stewart Gardner Museum opened to the public for the first time since Sunday's robbery of works by Rembrandt, Vermeer, Degas and Manet as a Boston police artist sketched drawings of the two alleged thieves.

The FBI said museum guards described one of the thieves as being in his early 30s, about 6 feet tall, with a fair complexion, black hair and dark eyes. The other was said to be in his late 30s, 5-foot-9 or 5-foot-10, with a slim build and wearing gold wire-rim glasses.

''Both were wearing mustaches, which were possibly false,'' FBI spokesman Paul Cavanaugh said. Asked about the quality of the drawings, he said, ''We feel comfortable that what the artist handled was what the guards observed. Qualifying their observations is another matter.''

FBI offices across the country were flooded with phone calls from people claiming to have information about the stolen treasures, but Cavanaugh said it was difficult to determine how many were substantial. ''We haven't determined whether they're crank or valuable, but all will be addressed,'' he said.

The museum's estimated 400 visitors - considered normal for a Wednesday - included sympathetic art afficionados and the just plain curious, but museum spokesman Corey Cronin said, ''Everyone who has come has been very supportive.''

The stolen works include Rembrandt's oil paintings, ''The Storm on the Sea of Galilee,'' ''A Lady and Gentleman in Black'' and a small self-portrait etching.

Also stolen were two other oils, ''The Concert,'' by Dutch master Jan Vermeer and ''Landscape with an Obelisk,'' by Rembrandt's student, Govaert Flinck; five paintings and drawings by the Frenchman Edgar Degas; 19th-century French master Edouard Manet's oil ''Chez Tortoni;'' and the oldest work in the museum, a 3,100-year-old Chinese bronze beaker dating to the Shang Dynasty.

Though the Dutch and Blue rooms, which housed most of the stolen works, were closed to the public, Cronin said visitors were cooperative.

''People are being very good. They're not pestering us to see the closed rooms. They've come in to see the other favorite works,'' Cronin said.

Among the classics the thieves did not touch are Titian's, ''Rape of Europa,'' John Singer Sargent's, ''El Jaleo,'' works by Botticelli and Roman and Egyptian antiquities.

On Tuesday, museum director Anne Hawley announced a reward of $1 million for information leading to the safe return of the treasures.

Two of the world's leading auction houses - Christie's and Sotheby's - pledged $500,000 apiece for safe return of the artworks.

Hawley said the reward for the art, valued at more than $200 million, would be given with no questions asked. She said the only concern was the safe return of the works.

While Cavanaugh said the FBI supported the reward offer, he said the thieves would not be immune if caught. ''We look at the reward as a separate issue. We don't discourage it,'' he said. ''We're out to solve the case and punish those who perpetrated the crime.''

He noted that rewards have been helpful in the recovery of stolen art in the past.

Authorities around the world have been alerted to the missing art, which was stolen from the museum by two men posing as police in what art experts consider the largest art heist in history.

Museum officials revealed Tuesday that a metal eagle from a pole attached to a Napoleonic flag also was missing. A guard taking inventory discovered the loss of the object, which was considered a minor piece compared to the other stolen works, museum officials said.

Although police have said the stolen art was worth at least $200 million, Karen Haas, the museum's curator, said it was easily ''worth hundreds of millions of dollars.''

The museum disclosed Monday that it does not have theft insurance.

The two thieves overpowered museum guards about 1 a.m. Sunday and stole 11 paintings, drawings and etchings which they cut from their frames.

The museum is housed in a four-story building designed in the style of a 15th-century Venetian palace.

Hawley said, to her knowlege, no museum employees had been questioned as suspects by the FBI.

#90080u2725 03/21/1990 ~United Press International

LOS ANGELES (MARCH 21) UPI - Dolco Packaging Corp., a major producer of light-weight polystyrene packaging, said Wednesday it has become the first manufacturer to receive federal approval to market polystyrene egg cartons from recycled material.

Dolco, the main operating unit of Olson Industries Inc., said the Food and Drug Administration's approval includes clearance to use recycled material

to produce polystyrene meat trays, fast-food containers, school lunch trays and foam beverage cups.

However, the company - the nation's largest producer of polystyrene egg cartons - plans to produce only the one-dozen-egg cartons from recycled materials for the immediate future.

Executive Vice President Richard Olson said the company, which produces about 10 million polystyrene egg cartons per week, will be able to begin producing the recycled cartons within a few months.

Polystyrene producers, hoping to create demand for recycled products and reduce the volume of waste at landfills, have formed the National Polystyrene Recycling Co. as a joint venture to open new plants for recycled products. The venture plans to open four such plants by the end of this year.

Olson said Dolco's plants in Pico Rivera, Calif., Wenatchee, Wash. and Decatur, Ind., are already able to produce the recycled cartons. Dolco, of Los Angeles, also operates plants in Dallas and Lawrenceville, Ga.

Dolco had 1989 sales of about $74 million, with about half of that coming from egg cartons.

#90080u2830 03/21/1990 ~United Press International

WASHINGTON (MARCH 21) UPI - A smaller percentage of railroad workers tested positive for drugs after serious rail accidents in 1989 than in any of the three previous years of mandated testing, the Federal Railroad Administration said Wednesday.

The agency issued a statement that said 3 percent of workers tested positive for drugs compared with 5.6 percent in 1988.

The administration gave no figures for the number of accidents, the number of positive tests, the responsibilities of workers involved in testing or the substances discovered.

''This is encouraging news,'' Railroad Administrator Gil Carmichael said. ''The industry's investment in prevention and testing is paying off. We expect that the addition of random testing will help us go even farther toward our goal: a rail system that is free from potential danger and human tragedy caused by drug abuse.''

The administration requires the collection of blood and urine samples after certain major train accidents, collisions and employee fatalities. Samples are analyzed for alcohol and controlled subtances.

Last March, the U.S. Supreme Court upheld the railroad drug testing policy in a 7-2 ruling. The case was challenged by railway unions objecting to the unilaterial imposition of drug testing.

The administration's drug testing policy became the subject of controversy after a January 1987 collision between a string of Consolidated Rail Corp. locomotives and an Amtrak passenger train in Essex, Md., that killed 16 people and injured 174.

The National Transportation Safety Board, among other things, cited marijuana use by a Conrail engineer as a major cause of the crash.

#90080u2837 03/21/1990 ~United Press International

ANCHORAGE, AK (MARCH 22) UPI - A leak in the 800-mile trans-Alaska oil pipeline Wednesday forced officials to shut down the artery for six hours, but the small amount of crude that spilled was held in a containment area, the Alyeska Pipeline Service Co. said.

The leak was limited to between 20 and 25 barrels (840 to 1,050 gallons) of crude oil. The pipeline, which carries 2 million gallons per day, began leaking at 10:30 a.m. and was sealed shortly thereafter.

Alyeska spokesman George Jurkowich said the oil leaked from a cracked valve, which was replaced.

The spilled oil was trapped in a containment area beneath the floor of Pump Station No. 3, north of the Arctic Circle and 104 miles south of the pipeline's starting point at Prudhoe Bay, Jurkowich said.

The state Department of Environmental Conservation said the oil was confined to the building and no oil escaped into the environment.

Pump Station No. 3 sends the crude oil over Atigun Pass, the highest point of the pipeline through the Brooks Range.

The leak triggered activation of the fire suppression system and the oil was immediately covered with foam, and the pipeline was shutdown.

Oil travels down the pipeline from Prudhoe Bay to the southern Alaska oil port of Valdez where tankers load oil to deliver to U.S. refineries. The pipeline supplies one-fourth of U.S. oil production.

#90080u2840 03/21/1990 ~United Press International

DHAKA, BANGLADESH (MARCH 22) UPI - Five people were killed and hundreds injured when members of rival political parties and police clashed Wednesday during a strike called to protest alleged vote rigging.

The violence occured across the nation on the eighth day of Bangladesh's local council elections, which opposition parties have said were rigged by the ruling government.

Some 61 million voters were expected to cast ballots over 10 days in the staggered elections that began last Wednesday.

Police said members of the opposition Awami League and Bangladesh Nationalist Party clashed with police in Boalkhali, 150 miles south of Dhaka, leaving one person dead and 50 injured. They said security forces opened fire to quell the crowd.

In nearby Chittagong district, armed workers of President Hussain Muhammad Ershad's ruling Jaitya Party and the opposition Awami League fought to seize a polling center, leaving two people dead and injuring at least 65 others, police said.

In a third incident, in Tangail, 60 miles north of Dhaka, a candidate of Ershad's party shot and killed his sister-in-law because she had voted for an oppostion candidate, police said.

They said scattered incidents of violence between rival party workers left one other dead and at least 85 others injured.

ELIZABETH, NJ (MARCH 22) UPI - Jury selection was completed Wednesday in the trial of John List, the mild-mannered accountant charged with killing his wife, mother and three children in their home in 1971.

The last of of 12 jurors and 4 alternate jurors was selected in the second day of screening at the Union County Courthouse in Elizabeth. The 12 men and 4 women were selected from a pool of 225 jurors.

Lawyers were expected to give their opening statements next week after Judge William Wertheimer hears pretrial motions. Jurors were told to return to the court on March 30 and were told the trial would last no longer than 10 days.

List is charged with shooting his mother Alma, 85; wife Helen, 45, and three children, Patricia, 16; John, Jr., 15, and Frederick, 13. He vanished in December 1971, a month before Westfield police broke into his house to find the bodies of his alleged victims arrayed in sleeping bags

with towels over their faces.

A number of the jurors said they had watched a re-enactment on ''America's Most Wanted,'' a Fox TV Network broadcast that led to List's arrest in Richmond Va., last year.

The show featured a bust of List, created by an artist to include the effects of aging, and led to a friend of List's wife tipping off the FBI.

List, 64, had remarried and was living under the name Robert Clark and working as an accountant in Richmond when he was arrested.

Delores Clark, who married List in 1985 after meeting him through a Lutheran singles group, has not appeared in court, and it is said she is bitter over his deception.

#90080u2897 03/21/1990 ~United Press International

LOS ANGELES (MARCH 22) UPI - Columbia Pictures announced Wedensday that Frank Price, who was responsible for many of the studio's top-grossing movies, has returned to head Columbia, seven years after leaving it to head Universal Pictures.

Price, whose credits include ''Ghostbusters,'' ''Kramer vs. Kramer,'' ''Gandhi'' and ''Out of Africa,'' has headed his own organization - The Price Company - since 1986.

Price, as chairman of Columbia Pictures, will be responsible for overall studio operations, effectively succeeding Dawn Steel, who left as president of Columbia in January.

The announcement marks the completion of the new regime at Columbia, which was bought last fall by Sony Corp. for $3.4 billion. ''Batman'' producers Peter Guber and Jon Peters were subsequently named co-chairman of the parent Columbia Pictures Entertainment after Sony paid Warner Bros. an estimated $500 million to buy out their contract.

On Feb. 27, Guber and Peters named former Orion Pictures executive Mike Medavoy as chairman of Colmbia's Tri-Star unit, effectively replacing Jeff Sagansky, who had left as president to head CBS Entertainment.

''We now feel that the motion picture divisions of both Columbia and Tri-Star are in the hands of men who will provide leadership, innovation, experience and energy to the arena,'' Guber said.

The combined Columbia and Tri-Star operations managed to rank third in box-office share last year behind Warner and Universal. Columbia's big hit

last year was ''Ghostbusters II,'' while its ''Lord of the Flies'' opened strongly last week.

Price, who began his career as a writer and story editor at CBS in the 1950s, became chairman, president and chief executive officer of Columbia in 1978. In the next five years, he was responsible for ''Ghostbusters,'' ''Tootsie,'' ''Kramer vs. Kramer,'' ''The Karate Kid,'' ''Stripes,'' ''Annie'' and ''Stir Crazy.''

Those seven films, along ''Ghostbusters II'' and ''Karate Kid II' are nine of Columbia's top 10 grossing films. He also backed the release of ''Ghandi,'' which won eight Academy Awards.

During his three years as chairman of the motion picture group at Universal, Price was responsible for ''Out of Africa,'' which won seven Academy Awards, ''Mask,'' ''Fletch,'' ''Back to the Future,'' ''Legal Eagles,'' ''The Breakfast Club'' and ''the Secret of My Success.''

Price, who will also named to the board of Columbia Pictures Entertainment said, ''I am thrilled to be joining the company at this moment in time. Peter and Jon are creating an inspiring new company and their intelligence and experience in all areas of the creative community make the future of Columbia bold and exciting.''

#90080u3031 03/21/1990 ~United Press International

(MARCH 21) UPI - Mikhail Gorbachev orders Lithuanians to turn in their firearms... Namibia celebrates its independence... and the Polish prime minister visits the White House. Those and other top stories, next, from U-P-I.

Soviet President Gorbachev is cracking down in Lithuania.

The Soviet leader today ordered all Lithuanians to turn in their firearms within one week... and directed the K-G-B to increase control along the border of the independence-minded republic.

In his first presidential decree since being given sweeping new powers, Gorbachev said Lithuania- quote- ''continues to adopt illegal acts that violate the rights of Soviet citizens and the sovereignty of the U-S-S-R.''

Gorbachev's five-point decree... carried by the official news agency Tass... instructs Soviet authorities to confiscate weapons that areN'T turned in within seven days. Strict controls also have been placed on foreigners traveling or working in the the Baltic republic.

Lithuania's parliament declared its independence March 11th and is

demanding formal negotiations with Moscow on the subject of secession.

In Vilnius, Lithuanian President Vytautas Landsbergis responded to the Gorbachev decree saying he regrets- quote- ''that the Soviet Union is meddling in our affairs.''

-30- 1454

#90080u3076 03/21/1990 ~United Press International

(MARCH 21) UPI - Today is the first formal day of independence for the southwest African nation of Namibia.

The event drew thousands of Namibians into the streets of the capital of Windhoek... where they paraded in celebration.

President Sam Nujoma joined in the festivities, but warned the mostly-poor citizens that ''major economic difficulties'' lie ahead. Namibia faces a 200-Million-dollar deficit in its first year of independence from South Africa.

Secretary of State Baker and other dignitaries from around the world attended the independence ceremony. South African anti-apartheid leader Nelson Mandela held talks with Baker and with Soviet Foreign Minister Shevardnadze .

In Washington, President Bush said the United States is lifting its trade embargo against the former South African colony. He also extended formal diplomatic recognition to Namibia.

President Bush today assured visiting Polish Prime Minister Tadeusz Mazowiecki that his country will be included in any decision affecting its fate. Bush also told Mazowiecki Poland's present borders with Germany are ''totally assured.

Bush made the remarks during ceremony welcoming Mazowiecki to the White House. The Polish leader's visit is aimed at burying remnants of the Cold War and promoting a stronger voice for Poland in shaping NON-communist Europe.

Polish officials have made it clear they want a bigger part in European security issues regarding a reunified Germany, and NOT just on border issues.

But one Bush administration official says Poland's objectives were met by being invited to participate in discussions on border issues. The administration so far has NOT supported a larger role for Poland.

#90080u3145 03/21/1990 ~United Press International
(MARCH 21) UPI - Romanian army tanks and troops are keeping rival ethnic groups apart today following last night's clashes in the city of Tirgu Mures .

The fighting left at least six people dead and nearly 300 wounded.

Romanian nationalists and ethnic Hungarians battled each other with iron bars, axes and clubs in Transylvania's worst ethnic UNrest since World War Two. Hungarian tourists returning from the area tell Budapest Radio that Tirgu Mures is surrounded by troops. The city is about 200 miles northwest of Bucharest.

Transylvania has seen an increase in Hungarian nationalism since Romania's December revolution. Most of the country's two-Million ethnic Hungarians live in the region. They're demanding more autonomy, including schools and newspapers in their native tongue.

Budapest Radio says news of the violence sparked mass protests by ethnic Hungarians in two other Transylvanian towns.

A Washington, D-C, jury watched former President Ronald Reagan testify on videotape today in the Iran-Contra trial of former national security adviser John Poindexter.

Also today, the judge in the case released a 14-page ruling allowing Reagan to keep his presidential diaries secret. Poindexter's lawyers wanted to use excerpts of the diaries in their defense, but U-S District Judge Harold Greene said Reagan's videotaped testimony would substitute.

Greene said Reagan's ''diary entries are brief and even cursory... the longest consists of five sentences.'' He said they ''shed NO new light on the sale of Hawk missiles to Iran.''

In his video testimony... Reagan said at least 124 times that he could NOT remember events in the scandal. But Reagan insisted that he NEVER knew profits from secret arms sales to Iran were funneled to the Nicaraguan Contras.

-30- 1963
#90080u3223 03/21/1990 ~United Press International
(MARCH 21) UPI - Pop singer Gloria Estefan is being flown from Pennsylvania to a hospital in New York City today following a serious injury yesterday in a traffic accident. Doctors at the Scranton, Pennsylvania, hospital where she was treated earlier say she needs spinal surgery.

Estefan, the lead singer for the popular group Miami Sound Machine, was hurt yesterday when a truck plowed into her tour bus, driving it into a second truck on a snowy highway in the Poconos.

Estefan suffered a broken vertebra. Dr. Henry Schmaltz says she is experiencing ''some neurological deficit,'' which means she has some numbness and weakness in her feet.

Although doctors say they're hopeful the numbness and weakness will diminish, they add Estefan still is in danger of paralysis.

President Bush called Estefan... who met with him at the White House Monday... to wish her well. Four others were injured in the accident, including Estefan's nine-year-old son who suffered a broken collar bone.

(MARCH 21) UPI - Soviet President Gorbachev is tightening his grip on Lithuania following the Baltic republic's declaration of independence last week. Today, he ordered civilians to turn in their weapons and restricted access to Lithuania by visitors.

The Florida Attorney General's office appears to be satisfied with today's unanimous U-S Supreme Court ruling that a Florida grand jury law is UNconsitutional. The law prohibited people from repeating testimony given to a grand jury.

Temperatures fell below freezing in parts of the South today, even though it's the first full day of Spring. It was 31 degrees in Knoxville, Tennessee, and farmers across the Carolinas and Virginia were warned about possible crop damage.

Army tanks and troops are keeping rival groups of Romanians and ethnic Hungarians apart in Romania. The ethnic tension has spread to several other Transylvanian towns. Six people were killed in overnight clashes.

Census Bureau officials are calling the agency's effort to count the nation's homeless a success. But officials say cold weather that filled and closed many shelters before census takers arrived means a second night of counting in several cities.

Strikes are reported across South Africa today as people commemorate the 1960 Sharpeville massacre of 69 peaceful black protesters shot to death by police... most of them in the back.

Conservatives might NOT be happy about it, but President Bush will NOT

seek any content restrictions on the federal funding of art. The administration says the National Endowment for the Arts should be permitted to define for itself what is ''obscene.''

In Miami, A co-defendant in the case of former Panamanian General Noriega has tentatively agreed to plead guilty to reduced charges. But the lawyer for Luis del Cid is NOT saying whether his client will testify against Noriega.

Pierre Trudeau, Canada's former Liberal prime minister, warns that Canada is ''headed for the grave'' UNless it changes a constitutional agreement giving Quebec's French-speaking majority special status as a distinct society.

A Washington-based consumer group is suing two manufacturers of potentially defective heart valves. The group says about 80-thousand people who were implanted with the medical devices should be individually warned aboutlife-threatening failures.

An extremist offshoot of the Irish Republican Army is claiming responsibility for shooting a protestant Belfast man to death. The group says it shot the man in response to recent British loyalist attacks on Irish Catholics.

(MARCH 21) UPI - Lithuanian President Vytautas Landsbergis says Soviet President Gorbachev is ''meddling'' in the Baltic republic's affairs. Gorbachev says the Lithuanian government is adopting policies that violate the rights of Soviet citizens. And in an apparent crackdown on pro-independence leanings, Gorbachev today ordered all Lithuanians to turn their firearms over to Soviet authorities. He also directed the K-G-B to step up controls along the Lithuanian border.

Czechoslovakia's President Vaclav Havel arrived in London today and began a three-day visit by lunching with Queen Elizabeth. Havel also met with Prime Minister Thatcher to discuss Europe's future. A Thatcher spokesman says the two leaders also touched on security issues. The British government today announced a program to help Czechoslovakia- quote- ''face the challenges of a free-market economy.''

The Senate has rejected a move by environmentalists to retain a clean-air bill provision requiring the Environmental Protection Agency to impose smog cleanup plans on cities that do NOT adopt tough anti-pollution plans. Opponents say keeping the controversial provision would break a compromise with the Bush administration. But supporters say the compromise was ill-advised if it weakens existing environmental law.

Officials at Greyhound bus lines say despite a strike that's been going on for three weeks... service is back up to 46 percent of the company's pre-strike schedule. Passengers and replacement drivers are still being plagued by violence. A sniper fired on a bus in Virginia last night, but NO one was injured.

Two suspects in the murder of British citizen Julie Ward have been released on bail in Kenya. British detectives working on the case say the suspects appear to be the killers reponsible for Ward's murder. Ward's remains were found in a game park 18 months ago. She was originally believed to have been attacked by wild animals.

(MARCH 21) UPI - The situation is coming to a head in the Soviet republic of Lithuania. President Gorbachev has termed Lithuania's actions aimed at succession as- in his words- ''illegal acts.'' He's demanding that Lithuanians turn in their firearms, and he's commanding Soviet authorities to confiscate any firearms NOT turned in within seven days.

The jury in the trial of Exxon Valdez Captain Joseph Hazelwood began deliberations today with 51 pages of instructions from the judge. The 43-year-old Hazelwood could face a sentence of more than seven years in jail and 61-thousand dollars in fines if found guilty on all charges stemming from the worst oil spill in U-S history.

Former President Reagan's videotaped testimony was the main attraction today in the Iran-Contra trial of his national security adviser John Poindexter. Reagan insisted he was NOT aware of key elements of the scandal and that he never authorized any aide to lie as part of a cover-up. The judge in the case ruled today Reagan will NOT have to turn over portions of his personal diaries.

The Hungarian government is closely monitoring the unrest in neighboring Romania. Hungary is especially concerned for the safety of some two-Million ethnic Hungarians living in Romania's Transylvanian region. An ethnic Hungarian union headquarters in Transvylvania has been destroyed, and a prominent ethnic Hungarian playwright injured in the clashes has been hospitalized in serious condition.

(MARCH 21) UPI - The chairman of the Federal Deposit Insurance Corporation has good and bad news on the nation's savings and loan crisis. William Seidman says the crisis is likely to get worse before it gets

better. Seidman's remarks came in a speech in Washington today in which he outlined the progress of the agency created as part of President Bush's 166-BILLION-dollar thrift bailout bill.

Five Soviet anti-Semitic groups have joined forces in calling for the return of the Czarist monarch to save Russia. Leaders of the new People's Russian Orthodox Movement say the root of the nation's problems lies with the nation's two-Million Jews- who make up less than one percent of the population. The rightist extremists announced their formation today in Moscow.

A West German official says Libya has suspended trade and business ties with Bonn in the wake of a fire that destroyed at least part of a plant near Tripoli. Libya has said it suspects the United States, Israel and West Germany in the blaze at the plant, which Washington suspected of producing chemical weapons. A Foreign affairs spokesman says West Germany is astonished at the measure and told its ambassador in Tripoli to seek clarification from Libya.

A published survey indicates AIDS has NOT changed sexual practices much on the nation's college campuses. Researchers in Rhode Island questioned 132 women students and found they asked their partners to use condoms more frequently than in the past... but their willingness to have sex was the same as in 1975. One professor who helped conduct the survey says the increase in condom use is ''encouraging,'' but he adds the figure stands at only 41 percent.

#90080u4165 03/21/1990 ~United Press International

(MARCH 21) UPI - African National Congress leader Nelson Mandela met with the diplomatic leaders of the two superpowers today in Namibia . Mandela held discussions with Secretary of State Baker and his Soviet counterpart Eduard Shevardnadze. Mandela hailed what he called ''a new chapter'' in U-S relations, but scolded Baker for his upcoming meeting with South Africa's President de Klerk. Mandela called that meeting ''regrettable.''

Mandela, Baker, Shevardnadze and de Klerk all were in Namibia for that country's first official day of independence. The South African flag was lowered over the former colony, and former rebel leader Sam Nujoma was sworn in as president. Nujoma praised independence but warned of ''major economic difficulties'' that lie ahead for the new country.

Egyptian President Mubarak says he'll join in efforts to free the Western hostages held in Lebanon. Mubarak plans to hold talks with Syria's President Assad to determine what can be done to break the impasse. Mubarak calls the freedom of the hostages- in his words- ''a humanitarian issue we must all work for.''

A team of British researchers released a study claiming to show that the so-called ''global warming'' phenomenon cannot be explained away as a natural, long-term change in the world climate. The team says the Earth's average temperature has risen nine-tenths of one degree in the last 100 years. A worst-case computer simulation of changing climates showed that the Earth's average temperature could NOT change much more than one-half degree over 100 years.

#90080u4407 03/21/1990 ~United Press International
(MARCH 21) UPI - Soviet President Gorbachev issued some intimidating edicts today against the secession-minded republic of Lithuania.

Gorbachev ordered all Lithuanians to turn in their firearms. He also authorized Soviet authorities to confiscate any firearms that aren't turned in within seven days.

The Soviet leader then ordered the K-G-B to take control of the Lithuanian border.

The Lithuanian parliament declared its independence earlier this month and announced that local laws overruled the Soviet Constitution.

Gorbachev today called those actions ''illegal acts'' and said they violate- in his words- ''the rights of Soviet citizens and the sovereignty of the U-S-S-R.''

He affirmed that the Soviet Constitution remains the law of the land in Lithuania.

It was the first time Gorbachev issued a presidential decree since being granted sweeping executive powers last week.

The Soviet Union appears ready to accept blame for the so-called Katyn Forest massacre of World War Two.

The execution of 15-thousand-131 Polish officers has soured relations between the two countries ever since. The official Soviet party line has always blamed the massacre on Nazi Gestapo agents. And a joint Soviet-Polish commission studying the incident has NOT issued any findings.

But K-G-B secret documents released today in the weekly newspaper Moscow News attribute the massacre to detachments of the N-K-V-D- the World War Two forerunner of the K-G-B secret police.

The documents are from previously secret K-G-B archives.

They say the more than 15-thousand Poles held in three P-O-W camps were killed on the orders of Soviet leader Josef Stalin, who feared they would lead an uprising that would threaten the 1939 non-aggression pact between the Soviet Union and Nazi Germany.

-30- 1985

#90080u4417 03/21/1990 ~United Press International

(MARCH 21) UPI - Environmentalists are denouncing Senate support of a bill they say will NOT clean up urban smog that now exceeds federal health standards in 101 cities.

In the words of a Sierra Club lobbyist- ''Today the Senate voted to break something that didn't need fixing.''

Senate leaders succeeded in protecting their compromise clean air bill with the Bush administration in voting down several amendments today.

Senators voted down a plan by Massachusetts Democrat John Kerry to preserve the mandatory E-P-A enforcement provisions in the current Clean Air Act. The Senate also refused to require the federal agency to impose smog cleanup plans on cities that do NOT adopt tough enough anti-pollution measures.

The compromise bill basically exempts small pollution sources from controls, despite the fact they make up an estimated 43 percent of all smog-causing emissions nationwide.

Kerry also criticized the compromise bill, saying the current law is stronger.

Egypt's President Mubarak may soon join efforts to release the Western hostages in Lebanon.

The Egyptian leader said today he'll raise the issue in talks with Syria's President Assad.

Syria is the only Arabian ally of the Iranian government, and the 18 hostages now believed held in Lebanon are said to be in the hands of pro-Iranian Shiite Moslem extremists.

Officials claiming to represent the kidnappers have said in recent days the ''atmosphere'' is right for ''solving the issue.''

Assad could be a critical figure in ending the impasse that has made Terry Anderson a hostage for five years.

Mubarak said today- ''If Syria can play a role, then Egypt will do its best.'' He called the release of the hostages- quote- ''a humanitarian issue we must all work for.''

-30- 1960

#90080u4439 03/21/1990 ~United Press International

(MARCH 21) UPI - A congressional report says federal dollars to states during the 1980's flowed into the South and West, while trickling to the Mid-Atlantic and the Midwest.

The report from the Northeast-Midwest Coalition says New England received a steady flow of the government dollars returned to states.

The coalition includes members of Congress from those areas who have joined together to promote common interests.

Michigan Democrat Howard Wolpe says his state is an example of how some

parts of the nation were- quote- ''shortchanged.'' The representative blames a budget trend of massive defense spending and reduced domestic spending.

The report shows defense spending had alot to do with how a region fared, with much of the federal spending in each region involving military projects.

The report tracked the distribution of five-point-seven-TRILLION dollars- about 81 percent of federal outlays during the decade. The money involves direct payments to individuals, such as Social Security and Medicare payments... defense spending, federal civilian and military wages and grants.

A White House decision revealed today may NOT sit well with conservatives.

President Bush says his administration will NOT seek any content restrictions on the federal funding of art.

Montana Democrat Pat Williams announced the decision during a congressional hearing on the re-authorization of the National Endowment for the Arts.

Williams says he's hopeful the decision will put an end to the controvery surrounding federal funding of the endowment. The N-E-A was besieged with protests last year for funding controversial art projects.

The chairman of the N-E-A backed the decision, saying Congress should NOT meddle in the affairs of artistic freedom or free speech.

The N-E-A continues to be bound to turn away proposals that are ''obscene'' as defined by Congress. The Bush administration proposal would have the N-E-A rather than lawmakers defining what art is obscene.

#90080u4743 03/21/1990 ~United Press International

(MARCH 21) UPI - Soviet President Gorbachev has issued a five-point decree limiting the secessionist leanings of the Lithuanian republic. In

the most ominous move, Gorbachev demanded all Lithuanians turn in their firearms and gave Soviet officials the right to confiscate any firearms NOT surrendered within seven days. He called Lithuania's moves toward independence- quote- ''illegal acts.''

President Bush welcomed Polish Prime Minister Mazowiecki to the White House today on a three-day state visit. Bush did NOT guarantee Poland a precise role in the so-called ''two-plus-four'' German re-unification talks, but he did promise that Polish borders and security would be- quoting here- ''totally assured.'' Bush also affirmed that ''Poland must have a voice'' in the talks.

The jury-selection process is reported to be dragging in the racketeering trial of former Philippine first lady Imelda Marcos and Saudi Arabian arms dealer Adnan Khashoggi in New York. Attorneys want to pick a pool of 55 to 65 possible jurors, from which they'll draw the 12-person jury and six alternates. But in two days, only 21 possible jurors have been selected.

A second co-defendant in the drug-trafficking case of former Panamanian leader Manuel Noriega has decided to plead guilty. An attorney for Panamanian Lieutenant Colonel Luis del Cid announced today in Miami that del Cid had reached a plea agreement with prosecutors ''in principle.'' But the attorney did NOT say whether that meant del Cid would testify against Noriega.

-30- 1701

#90080u4757 03/21/1990 ~United Press International

(MARCH 21) UPI - Doctors say Gloria Estefan's chances of recovery are excellent following an accident involving the pop singer's tour bus and two tractor-trailers. Doctors will implant two metal rods near Estefan's spinal cord tomorrow in New York, where the singer was flown today. The lead singer of the Miami Sound Machine was injured yesterday in an accident on a snow-slicked road in Pennsylvania.

The calendar says it's the first day of Spring... but try telling that to Americans dealing with snow and freezing rain. Wet snow made driving a chore in New England... with flurries also falling in the mid-Atlantic states. Temperatures fell below freezing in southern states. And flooding continues to cause trouble in Alabama, where one town has been evacuated and more evacuations are possibly in store.

Egypt's capital apparently is NOT a good place to relax. An Egyptian newspaper quotes a government-sponsored report as saying 62 percent of Cairo residents use sedatives, while 33 percent suffer from hypertension. The report says the problem stems from traffic noise, which in some parts of Cairo exceeds by tenfold the level allowed under health recommendations.

President Bush's distaste for broccoli means 10 tons of the vegetable will be dished out in soup kitchens and similar organizations in the nation's capital. California growers made the donation to a food bank in Washington after Bush revealed he detests broccoli and banned it from Air Force One and his own plate. Asked if there are other vegetables he does NOT like Bush replied- ''Yeah, but I don't want to get 10 tons of them.''

-30- 1784

#90081b0027 03/22/1990 ~Business Wire

LOS ANGELES (MARCH 22) BUSINESS WIRE - The Walt Disney Concert Hall Committee has selected the Los Angeles-based Gemtel Corp. to join them in submitting a proposal to the County of Los Angeles for the development of a luxury hotel to be built on the site of the Walt Disney Concert Hall, future home of the Los Angeles Philharmonic.

An intensive selection process reviewed such criteria as level of service, quality of design, financial strength, and track records. On the basis of these criteria, Gemtel was named as proposed developer of the hotel. ''Gemtel has demonstrated the capability to develop a hotel that will meet the extremely high standards of quality of the Walt Disney Concert Hall as originally envisioned by Mrs. Disney,'' said Fredrick M. Nicholas, chairman of the committee.

Gemtel maintains a portfolio of investment properties that it develops, owns and manages. The company is headed by principals Thomas R. Tellefsen and Lary J. Mielke, who have developed over 75 projects over the past 20 years, including luxury hotels. The company's properties, while vastly different, all demonstrate a sensitivity to the project's environment and a flexibility in working within dramatically different structures. Two of its better known luxury hotels that reflect this sensitivity to market and environment are the Ritz-Carlton Huntington Hotel in Pasadena and the Hyatt Regency Fiji.

Gemtel and its consultants will work with the Walt Disney Concert Hall's architect, Frank Gehry and Associates Inc. of Venice, Calif., to ensure that the hotel fully complements the Walt Disney Concert Hall and all other plans for the site.

Gemtel's proposed plans for the hotel call for 350-400 guest rooms and accompanying restaurants, lounges, meeting space and fitness and business centers. Included in the plans are 20,000 square feet of office space for the Los Angeles Philharmonic.

A world-class restaurant, separate from the hotel, will also be developed by Gemtel. To be operated by an established, recognized restauranteur/chef, the restaurant is designed to attract a prestigious clientel.

Plans for the site include, in addition to the Walt Disney Concert Hall and proposed hotel and restaurant, a chamber music hall; retail shops and galleries, including a Music Center gift shop; a public garden; and parking.

The development of the site, says Richard Koshalek, director of the Museum of Contemporary Art and chairman of the Disney Hall Architecture Subcommittee, brings tremendous promise to downtown Los Angeles. ''The lively blend of commercial and cultural activity of this project promises to enliven the downtown area, creating an accessible and inviting place for all Southern Californians. Finally, the great cultural facilities of downtown Los Angeles will be linked, bringing together the artistic and social life of our city.''

With the assistance of Southern California's business and civic leaders, the Walt Disney Concert Hall Committee is continuing to plan an acoustically first-class concert hall. Plans call for breaking ground in 1990 for the opening of the Walt Disney Concert Hall in the 1994 season.

The construction of a new concert hall and related facilities was made possible by a gift of $50 million from Lillian B. Disney to The Music Center.

MOUNTAIN VIEW, CA (MARCH 22) BUSINESS WIRE - As of Thursday (March 22), Advanced Computing Environments, the company distinguished worldwide for its highly successful annual INTEROP Conference and Exhibition, became known as Interop Inc.

The new name more clearly conveys Interop Inc.'s dedication to education focused on network computing and multivendor interoperability.

Interop Inc. president Dan Lynch explained: ''We found that most of our important audiences, from conference attendees to members of the press, were already referring to us as Interop, because they so strongly associated the company itself with the INTEROP Conference and Exhibition. The name change made perfect sense.''

The company, based in Mountain View, is an educational organization which

focuses on the understanding of computer networking and communications. Seminars, conferences, on-site training forums, and the monthly newsletter ConneXions -- The Interoperability Report -- are only part of the activities Interop. Inc. sponsors to further education in the networking area.

Each year, Interop's activities culminate at the INTEROP Conference and Exhibition which is distinguished by its hands-on approach and emphasis on networking equipment that works. Last year, INTEROP attendance was over 10,000, with attendees from over 40 countries. The INTEROP 90 Conference and Exhibition is scheduled for Oct. 8 to Oct. 12 at the San Jose Convention Center.

#90081b0031 03/22/1990 ~Business Wire

OVERLAND PARK, KA. (MARCH 22) BUSINESS WIRE - Sprint Services, which provides operator services for US Sprint Communications Co., has been selected by the state of Texas to provide telephone message relay service for speech- and hearing-impaired persons.

The award was made on March 21 by the Texas Public Utilities Commission.

''We are excited to bring this new service to Texas and look forward to providing speech and hearing impaired customers with the same high-quality telecommunications service our present customers enjoy,'' said Dan Evanoff vice president and general manager of Sprint Services.

Sprint Services will open the message relay center in Austin, Texas, by Sept. 1. Construction will begin in early April. The center will be equipped with state-of-the-art technology, and will be operational statewide 24 hours a day, seven days a week, 365 days a year.

It will be staffed by Sprint Services customer agents (relay operators), who will be hired from the Austin area. Agents will be specially trained to assist speech- and hearing-impaired persons in communicating over the telephone to persons with normal speech and hearing.

To communicate with the center, speech- and hearing-impaired persons will use a Telecommunications Device for the Deaf (TDD), or other compatible equipment. TDD users will dial a toll-free access number and will be in

direct contact with a Sprint Services relay center agent. The Sprint Services agent will then process the call to the requested number.

Once the call has been placed, the agent will remain on-line to serve as a conduit between the two parties, translating information either verbally to the non-impaired party, or over the TDD system to the speech- and hearing-impaired user.

This process will also work in reverse when a non-impaired person initiates the call. The non-impaired caller will access the Austin center by dialing a toll-free number.

Evanoff says agents will receive extensive training in the areas of deaf awareness and sensitivity, as well as American Sign Language transliteration.

''The role of our customer agents in this process is crucial. Not only will agents be responsible for translating conversations, they also will need to convey actual feelings and emotions,'' Evanoff said.

It is anticipated that Sprint Services' message-relay center may handle up to 175,000 calls per month. All calls routed through the center will be transported over the US Sprint fiber-optic network.

Users of Sprint Services' message-relay center will not be billed for calls placed in their local service area. Long-distance calls, meanwhile, will be discounted 50 percent and will be billed as normal toll-calls between the two parties.

Sprint Services worked closely with the Texas Public Utilities Commission, and a specially appointed advisory committee, to pinpoint the communications needs of the state's speech- and hearing-impaired residents.

Paul Meek, Public Utilities Commission chairman, said four major factors were considered in selecting Sprint Services as the service provider: charge for the service, service enhancements offered, technology sophistication of the network, and proposed date for commencement of service.

''Sprint Services was judged to have submitted the proposal that best met these criteria and best served the needs of the hearing- and speech-impaired communities in Texas,'' Meek said.

Sprint Services and US Sprint are units of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

#90081b0036 03/22/1990 ~Business Wire

ALBUQUERQUE, NM (MARCH 22) BUSINESS WIRE - Albuquerque Auto Auction Inc., New Mexico's only dealer auction, announces the grand opening of its new $7 million state-of-the-art facility.

Located at 3411 Broadway, the auction is owned by Anglo American Auto Auctions Inc., part of the world's largest vehicle auction group. The new facility is part of a two-year, $100 million construction and renovation program underway at many of Anglo American's 23 auctions across the country.

Company executives expect the new facility's tax/compensation/utility package to infuse more than $4 million into the city's economy each year, although the auction's true economic impact is expected to be much greater.

The new auction rests on 52 acres and employs more than 100 people in managerial, administrative, clerical and operational positions. The new site is adjacent to a rail spur, a convenient mode of transportation for sellers of used cars. It is also located close to the city's airport which will attract more out-of-town dealers.

The Albuquerque auction currently handles approximately 600 cars each week. Company executives expect up to a 15 percent increase in the number of cars consigned to the auction, once the facility is fully operational.

The 44,000-square-foot complex features a 22,000-square-foot reconditioning facility, including down-draft paint booths. The paint booths are environmentally safe, protecting painters from VOCs (volatile organic compounds) with air circulation and filtration. Other components of reconditioning include cleaning, metal work and mechanical service and repair.

Currently the auction reconditions between 70 to 75 cars per day, but this number is expected to double with the new facility, according to Ken Osborn, general manager/administration of the auction.

Albuquerque Auto Auction, like Anglo American's 22 other auctions, provides auction and related services to dealers, who use the auctions to buy used cars from other dealers, manufacturers, corporate fleets, leasing and daily rental companies and financial institutions. Clients include the Ford Motor Co. and General Motors, which have factory sales at the auction once a month.

The auction attracts dealers from a number of states west of the Mississippi River, including Illinois, Washington and Texas. It complements Anglo American's other operations in the Southwest, including auctions in Tucson, Dallas, Amarillo and San Diego.

In 1989, Anglo American Auto Auctions Inc., based in Nashville, Tenn., handled more than one million vehicles valued at approximately $4.1 billion.

Anglo American Auto Auctions Inc. is part of the world's largest vehicle auction group. Anglo American operates 23 auctions in the United States and is a wholly owned subsidiary of ADT, a leading service company with substantial operations in North America, Europe and Australasia.

SANTA CLARA, CA (MARCH 22) BUSINESS WIRE - Catalyst Semiconductor Inc. experiencing ongoing, extensive growth in its U.S. and Canadian customer base, has signed a North American distribution agreement with Arrow Electronics Inc., New York.

Commenting on the franchise agreement, Jan Salsgiver, Arrow's vice president of Semiconductor Marketing, said, ''Our Catalyst relationship will allow Arrow to meet our customers' increased demand for leading-edge serial and parallel E2PROMs. Both Catalyst and Arrow are expecting significant benefits and incremental revenues from this relationship.''

According to Krish Panu, Catalyst director of Worldwide Marketing: ''Arrow has an excellent track record selling semiconductors and has a highly technical sales team and a broad range of products that are complementary to the Catalyst line. This synergistic relationship will enhance both companies' positions in the marketplace to service the rapidly growing customer base.''

Arrow's U.S. electronics distribution network encompasses 37 selling locations supported by local warehouses, three primary distribution centers, and more than 1,900 remote on-line terminals.

Catalyst, a privately held company, was founded in 1985. The company's innovative products include CMOS Smart Card Microcomputers, CMOS E2PROMs, High-Speed CMOS EPROMs and CMOS NVRAMs.

SANTA CLARA, CA (MARCH 22) BUSINESS WIRE - Hitachi Data Systems (HDS) Thursday added two new models to its AS/EX series of mainframe computers along with enhancements to the series.

Announced were the AS/EX 33 and AS/EX 44, both of of which are field upgradeable from installed AS/EX Systems.

The AS/EX 33, a uniprocessor, provides a performance increase of approximately 17 percent over the AS/EX 30. The model 44, a dyadic or two-way processor, provides approximately 17 percent more performance than the AS/EX 40. The intermediate models of the AS/EX series (models 10, 20, 25, 30, 33, 35, 40 and 44) feature high-performance, cost-effective environmentals and support for a wide range of operating systems.

''The models 33 and 44 are designed to provide an easy, affordable growth path to installed and future customers,'' said Paul Hastings, vice president of Intermediate Systems Marketing. ''One of our customers' key concerns is future capacity requirements. Today our intermediate level AS/EX processors have a much higher performance growth path than competing systems.

''This announcement will add roughly 17 percent performance to both the largest uniprocessor and our largest dyadic processor,'' Hastings added.

In addition to the new models, HDS also announced that all dyadic intermediate systems models of the AS/EX Series (models 35, 40 and 44) can now be upgraded for maximum memory configurations of 512 megabytes of real storage. Previously the maximum was 256 megabytes.

''The additional memory is of particular interest to those customers anticipating a move to ESA. Our surveys of hundreds of early ESA users and our own evaluations of the architecture indicate that in order to gain maximum performance under ESA additional memory is required,'' Hastings concluded.

In addition, HDS announced that availability of ESA support for its intermediate level systems has been improved by one full quarter to the second quarter of 1990. Originally scheduled for June 1990, initial shipment for ESA support will now occur in April. In addition to ESA, intermediate models of the AS/EX Series now support MVS/370, MVS/XA, VM, VM/XA and VSE under VM.

In conjunction with ESA support, HDS also announced improved granularity in expanded storage for ESA users. Beginning in July, customers can configure their expanded storage in increments of 32 megabytes for intermediate level AS/EX Series models. Previously, expanded storage was only available in 64 megabyte increments.

The AS/EX 33 will be priced at $1,378,000 for a minimum configuration of 16 channels and 32 megabytes of storage. An AS/EX 44 with a minimum configuration of 16 channels and 32 megabytes of storage is priced at $2,625,000. Both new models along with larger memory configurations for the dyadic models will be available in July of this year.

Hitachi Data Systems is a joint venture company owned by Hitachi, Ltd. and Electronic Data Systems Corporation (EDS). HDS markets a broad range of mainframes, peripherals products and services. With products installed in more than 30 countries, HDS has more than 2300 employees worldwide.

PALO ALTO, CA (MARCH 22) BUSINESS WIRE - Hewlett-Packard Co. Thursday announced it will close its Livingston, Scotland, plant and will consolidate its activities at other HP sites.

All 240 people employed at the plant will be given the opportunity to remain with HP.

HP's site in Livingston is responsible for board repair and workstation manufacturing. The repair center, which employs about 120 people, will be moved intact to HP's site in South Queensferry, about 12 miles from Livingston. The manufacturing operations, which also employ about 120 people, are being consolidated with like activities in Boeblingen, West Germany, and Exeter, N.H.

Both consolidations will take place later this year.

Manufacturing employees who choose not to accept jobs elsewhere at HP will be given a generous voluntary-severance package that includes an amount equal to six-months' pay plus half-a-month's pay for each year of service. In addition, they will receive career counseling and other job-related services. HP's South Queensferry site employs about 1,000 people at the Queensferry Telecom Division, Queensferry Microwave Operation and a printed-circuit activity. HP recently completed expansion of the South Queensferry site.

HP acquired the Livingston plant when it purchased Apollo Computer Inc. in May 1989.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

BEAVERTON, OR. (MARCH 22) BUSINESS WIRE - Tektronix Inc. (NYSE: TEK) announced Thursday that it plans to move its operations in Clark County, Wash., to Oregon.

The building and land at the Clark County site will be sold as soon as reasonably possible. Most of the approximately 1,200 employees at the Clark County facility will be transferred to Tektronix' Oregon facilities.

The work that is currently performed at the Clark County site, covering four divisions of the Test & Measurement Group, will be moved to various locations at the company's main campus near Beaverton. Some departments in the Clark County facility will begin moving in the next few weeks. Most of the moves will be completed by the fall of 1990.

Today's announcement does not change the company-wide layoff total of 600 people, which was announced on Feb. 21. Fewer than 50 people now employed in Clark County may be laid off in conjunction with the closing of the Washington facility.

''This is clearly a difficult decision for us,'' commented Richard Knight, Tektronix vice president and general manager of the Test & Measurement Group, ''because it is disruptive to many employees, and because the Clark County operation has been very productive over the years. However, Tektronix today has substantially more space than it needs for its current level of business, and we have to address that. We see opportunities for more efficient operations as a result of having our oscilloscope engineering and manufacturing units in the same location. We also expect to be able to save money because we will not be moving products and parts back and forth between locations.

''This action should not be interpreted as a lack of confidence in Clark

County as a place to do business,'' Knight added. ''We are disappointed that Tek's business needs don't enable us to continue what has been a positive and rewarding local partnership with the community.''

Tektronix plans to set up a program to help find jobs in southwest Washington for laid-off employees and those employees who choose not to commute to jobs in Oregon.

Tektronix purchased its 258 acres of land in Clark County in 1979 and opened its building there in 1982. The building has 488,000 square feet of general purpose space. The site is about six miles east of Vancouver, Wash., and is across the Columbia River from Portland, Ore.

Tektronix serves its customers as a leading manufacturer of electronic equipment and systems in the areas of Test & Measurement, Communications and Visual Systems. Fiscal 1989 sales were $1.4 billion and employment totals about 15,000.

#90081b0069 03/22/1990 ~Business Wire

SEATTLE (MARCH 22) BUSINESS WIRE - Security Pacific Bancorporation Northwest has committed $800,000 in 1990 to launch ''Managing Diversity,'' a major ongoing program to create a better understanding of ethnic, racial and women's issues among its staff.

''Our objectives for this program are twofold. Internally, we believe that by better managing the diversity of our work force and providing additional opportunities for all of our employees at all levels to grow and advance, we will make Security Pacific an even better place to work,'' said John D. Mangels, chairman and CEO of Security Pacific Bancorporation Northwest.

''Externally, a more diverse work force will provide a competitive advantage in the years ahead because we will better represent the demographics of the customer base we will be serving,'' he added.

The ''Managing Diversity'' program is managed by Ruby Okada, vice president and 20-year Security Pacific veteran. She will report to Stanley D. Savage, who will become president of Security Pacific Bancorporation Northwest effective May 1.

The program will begin with training for 2,300 exempt employees in the company's four banks in Washington, Oregon and Alaska, and soon-to-be

Idaho. Conducted by the Anti-Defamation League, the day-long training session will examine employee attitudes about stereotypes and promote better awareness of the cultural, ethnic and other differences among co-workers.

''The training is only a starting point,'' said Okada. ''We realize that attitudes may not change after one day of training. But it will heighten employee awareness of these issues and try to get us to look at things from perspectives other than our own.''

Rapidly changing demographics underlie the bank's commitment to diversity, Okada said. The following statistics help the story:

-- The U.S. population and the work force will grow more slowly than any time since the 1930s. Birth rates for whites will decrease, while those for other groups will increase.

-- The average age of the population and the work force will rise. The pool of young workers entering the labor market will shrink, creating a potential labor shortage.

-- More women will enter the work force. Almost two-thirds of the new work force entrants between now and the year 2000 will be women.

-- Minorities will be a larger share of new entrants into the labor force, representing up to 29 percent of the new entrants between now and the year 2000. This is twice their current share.

-- Immigrants will represent the largest share of the increase in population and the work force since World War I.

''The fact that the work place is changing is a given,'' Savage said. ''The question is, what can we do now to prepare for the changes. Our Managing Diversity program goes beyond compliance with the law, and aims to create a multi-cultural environment that will benefit our employees, our customers and the communities we serve.

''Ultimately, we see a tremendous business advantage as we create and manage a more diverse work force,'' he added.

Another part of the company's managing diversity process is career development. A career development guide has been sent to all management employees in Washington, and will be expanded to Oregon and Alaska soon.

An offshoot of career development is a mentor program that pairs minorities and women with more senior members of management.

''The mentor program is an informal way for minorities and women to gain

first-hand experience and advice from senior officers,'' Okada said.

Core groups also will be part of Security Pacific's diversity effort. These will involve smaller, self-sustaining groups made up of people of different races, genders and levels within the organization who will meet on an ongoing basis to discuss company and other issues.

Company managers already are responsible for ensuring progress in making the company more diverse, according to Savage. For example, job descriptions for all employees will include increased responsibility for supporting diversity programs. Decisions on promotions and salary adjustments will take into account the candidate's diversity/affirmative action record.

''Accountability will be greater at the managerial level than the employee level, but everyone in the company will share the responsibility,'' Savage said.

Security Pacific Bancorporation Northwest is a Seattle-based, multi-bank holding company with assets of $10.2 billion and subsidiaries operating in Washington, Oregon and Alaska. The Bancorporation is an affiliate of Security Pacific Corp., the nation's fifth-largest banking company.

#90081b0083 03/22/1990 ~Business Wire

KANSAS CITY, Mo. (MARCH 22) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) Thursday announced that it expects to report gains in first quarter operating revenues, net income and primary earnings per common share.

The results were achieved despite the effects of unusually mild winter weather in most of the company's service territories.

The company estimated that first quarter earnings per share would be up 12 percent to $.92, versus $.82 in last year's quarter. Operating revenues are estimated to be $281 million, versus $220 million in the prior year's period. Net income is estimated to be $23.1 million compared with net income of $17.6 million in the 1989 first quarter.

Average common shares outstanding increased 11 percent to 22.9 million, from 20.7 million in last year's quarter. The increase is primarily due to an issue of 2 million new shares in a December 1989 public offering.

Richard C. Green Jr., UtiliCorp chairman and president, said the company was able to offset the effect of an extremely warm winter with a first quarter gain on the sale of gas reserve assets, first-time heating season contributions from two new gas utilities and cost saving measures implemented throughout the company.

''UtiliCorp has reacted very well to one of the mildest winters on record '' Green said. ''Like all utilities, our earnings are very much affected by weather patterns. But UtiliCorp is now able to offset the impact of weather with contributions from other sources. This demonstrates once again the value of a broad earnings base.''

In January, weather in the company's gas service territories in the north-central Midwest was 20 to 30 percent warmer than normal and 7 to 8 percent warmer than last year.

UtiliCorp benefitted from a first quarter gain of approximately $5 million due to the sale of natural gas and oil interests in the Gulf Coast. In January, UtiliCorp's PSI subsidiary and a joint venture partner completed the sale of five jointly owned oil and gas properties and production facilities to NERCO Inc.

Proceeds from the transaction have been reinvested by PSI in other gas reserves and production assets.

PSI, based in Omaha, Neb., is one of the nation's major marketers and suppliers of natural gas.

The record first quarter results also were attributable in part to

first-time winter heating season contributions from UtiliCorp's Michigan Gas Utilities division and the recently acquired gas utility unit of UtiliCorp's West Virginia Power division. In May 1989, UtiliCorp acquired the 120,000-customer Michigan utility in a merger transaction with Michigan Energy Resources Co.

In January, UtiliCorp completed the acquisition of a gas system serving 23,000 West Virginia customers from Cabot Corp.

The company also benefitted from continuing cost containment measures implemented throughout the company and, at its gas divisions, aggressive gas purchasing practices and increased marketing efforts.

UtiliCorp, based in Kansas City, provides gas and electric service in eight states through its division, Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities and Kansas Public Service. West Kootenay Power in British Columbia is a Canadian subsidiary. PSI and UtilCo Group are non-regulated subsidiaries specializing in energy and utility related enterprises.

#90081b0099 03/22/1990 ~Business Wire

LOS ANGELES (MARCH 14) BUSINESS WIRE - In a move expected to be followed by other major financial institutions, Coast Savings and Loan Association Thursday announced it will provide insurance protection on various items purchased by personal checks drawn on Coast accounts.

Under Coast Buyer Protection coverage, purchases paid in full by check are protected automatically from loss, damage or theft at no extra charge, subject to certain restrictions. The plan is the first offered by a major California financial institution.

Gerald D. Barrone, president of the $11.2 billion (assets) savings institution, said the new service is designed to give banking and savings institutions a competitive edge against prestige credit cards, which have offered similar programs for several years.

Barrone explained that the protection plan includes two components:

-- Purchase protection covers new retail purchases for a full 90 days from the date of purchase against loss, theft, accidental breakage or fire (beyond any other collectible insurance).

-- Extended warranty protection doubles the manufacturer's original U.S. warranty on new retail products up to one additional year for warranties up to five years. For example, a 90-day warranty extends to 180 days, and a five-year warranty extends to six years.

To file claims, customers can call a toll-free number, 24 hours a day, seven days a week. Purchases, including gifts, are automatically covered and do not need to be registered in advance.

This kind of protection provides customers with a real value by helping them avoid expensive repairs or replacement costs,'' said Barrone.

''For the institution, enhancements such as Coast's Buyer Protection plan encourage customers not only to open checking accounts, but also to use them,'' he added.

Barrone explained that the competition for a family's primary checking account is fierce. Customers are most likely to use additional banking services at the institution where they maintain their primary checking account, he said.

Under the Coast program, the institution pays a nominal per-account premium to Telecredit Marketing Services Inc., a Tampa, Fla.-based subsidiary of Telecredit Inc., Los Angeles. The program is administered by National Electronics Warranty Corp., Arlington, Va.

The plan generally covers merchandise purchased by check, but excludes certain items. Exclusions include: vehicles, coins, dwellings, services, negotiable instruments, art objects, cash, items used for business purposes, and consumables such as food and fuel. Other restrictions apply.

Coast Savings is California's 10th largest savings institution, with 125 offices statewide, and serves about 200,000 checking account customers, Barrone said. He noted that existing Coast checking account customers are covered automatically, and that new customers are protected from the day their accounts are opened.

The program begins Monday, March 26, with newspaper ads promoting the new service beginning this weekend.

CHULA VISTA, CA (MARCH 22) BUSINESS WIRE - Rohr Industries has received a

contract from International Aero Engines (IAE) to provide the engine nacelle system for the McDonnell Douglas MD-90 airliner.

The contract, which is valued at more than $1 billion, is to design, manufacture and support nacelles for IAE's V2500 engine for the MD-90. More than 500 aircraft are covered in the contract, which continues Rohr's role as sole supplier of nacelles for the V2500. Rohr also provides the IAE V2500 nacelle systems for Airbus Industrie A320 and A321 airliners.

The V2500 for the MD-90 is rated from 22,000 to 28,000 pounds of thrust for various versions of the aircraft. McDonnell Douglas currently has orders for 95 MD-90s, with 155 options.

First flight of the MD-90 is scheduled for summer 1993, with entry into revenue passenger service the following year.

''We are pleased to continue our relationship with International Aero Engines for this application and with our long-time customer, McDonnell Douglas,''said Don Purdy, Rohr's vice president, commercial business. ''The technology data base we developed with IAE for the V2500 convinces me we will have a superior product for the MD-90.''

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. The company also manufactures solid-rocket motor casings and nozzles for space programs.

With headquarters in Chula Vista, Rohr has nine facilities in the United States and one in Toulouse, France.

HONOLULU (MARCH 22) BUSINESS WIRE - A&B-Hawaii Inc., a subsidiary of Alexander & Baldwin Inc. (NASDAQ:ALEX), and Aall Hawaii Development Inc. have announced plans to develop a prime high-rise office building in downtown Honolulu.

Requests for proposals from developers are being solicited for the strategically located site, which is in Honolulu's financial district between the historic A&B and C. Brewer buildings. The tower's main entrance and address would be 822 Bishop St., the address of the existing A&B Building.

The project would include four parcels of land totaling 57,597 square feet and bounded by Fort Street Mall and Merchant, Bishop and Queen Streets. It would involve integrating the new high-rise with the A&B and C. Brewer buildings. The Campbell building on Fort Street Mall also may be redeveloped as a part of the project or may provide some of the development's required parking.

The project design objective is to complement and preserve the historical significance of the A&B and C. Brewer buildings without any major exterior alteration, while capitalizing on the excellent location. The final design may involve restoration of the lobby of the A&B Building to its

original two-story configuration to serve as the main lobby for the development.

Buildings located at 126 Queen St. and 125 Merchant St. would be replaced by the new tower.

According to A&B-Hawaii's president and chief executive officer, John C. Couch, a decision on the selection of a developer for the site should be made within the next two months. The high-rise office and retail building is expected to be completed within three years if satisfactory proposals are received, agreements are reached and development approvals are obtained according to plan.

Aall Hawaii Development Inc. is the local affiliate of a business owned by the Monsens, a Norwegian family with substantial shipping-related businesses in Japan. The family has land holdings in Japan, Hawaii and Europe, and owns property in the area to be developed, including the C. Brewer, Campbell, 126 Queen St. and 125 Merchant St. properties.

Directors of the company include Frank J. Manaut, former chairman and chief executive officer of Bancorp Hawaii Inc., and Thomas M. Foley, a Honolulu attorney.

#90081b0123 03/22/1990 ~Business Wire

SAN JOSE, CA (MARCH 22) BUSINESS WIRE - Pacific Western Bank announced a new consumer protection service Thursday that extends manufacturers' warranties and covers against loss, theft and breakage.

Similar to services previously available only with selected major credit cards, Pacific Western Bank is the only bank in California to offer extended warranties and buyer protection when a covered purchase is made with a personal check.

Set to begin April 2, 1990, the service will be offered at no cost to the bank's personal checking account customers. When they purchase any new item except a structure or motorized vehicle, valued up to $50,000, the manufacturer's U.S. warranty will be extended up to one year. For example a 90-day warranty will be extended to six months and a two-year warranty will have a third year added to its coverage.

The buyer's protection part of the service covers new items against loss, theft, damage or fire during the first 90 days following purchase. This part of the service excludes travelers cheques, tickets, cash or its

equivalents, animals, living plants and consumable items as well as structures and motorized vehicles.

Customers of the bank are automatically covered when they purchase a new item by check. Although they should retain manufacturers' warranty cards, receipts and copies of the cancelled check, they don't have to pre-register their purchase. It is only necessary to produce the documentation in the event of a claim.

One of California's major independent community banks, Pacific Western serves Santa Clara, Santa Cruz and Monterey counties. It is also the area's oldest financial institution, having been founded in Santa Cruz in March of 1870. Pacific Western Bank currently has 21 offices and over $1 billion in assets.

EMERYVILLE, CA (MARCH 22) BUSINESS WIRE - Farallon Computing Inc. Thursday announced a technology licensing agreement with Novell Inc. (NASDAQ:NOVL).

The first products to emerge from that agreement will be a series of Ethernet and other network interface cards, the first of which will be shown at MacWorld Expo, which opens April 10, in San Francisco.

Larry Jones, networking product manager at Farallon said, ''This agreement allows Farallon to offer a more extensive family of networking products, based on the proven and respected technologies behind Novell's Kinetics offerings. Farallon plans to tailor this technology to the needs of PhoneNET System customers.

By combining this technology with Farallon hardware and software, we can better achieve our 'eithernet' networking strategy.''

Steve Nelson, director of product marketing for Macintosh products at Novell, said, ''Farallon's product direction represents important areas of growth for the network computing industry. Already well-known as a networking company, Farallon is also a leader in multimedia and groupware applications. These are important directions for Novell's growth as a multi-platform networking company.

''By licensing to Farallon the technology we incorporate in our successful product line, Novell is helping to reduce barriers to connectivity and accelerate the acceptance of network computing in the industry.''

Novell Inc. is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks. Novell had revenue of $422 million for fiscal 1989.

Farallon is the world's leading provider of twisted-pair networks, with more than one million PhoneNET System nodes installed in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use on Macintosh computers.

Farallon products embrace a variety of communications media, including ISDN, analog and digital voice, data, fax and video. The company has more than 160 employees and has headquarters in Emeryville, Calif., with research facilities there and in Lawrence, Kan.

Farallon sells its products worldwide through retail distribution and makes its technologies available through OEMs and relationships with other major vendors.

SCOTTSDALE, AR. BUSINESS WIRE - Interactive Media Technologies Inc. (NASDAQ:IMTX) and Teleste Communication of Finland Thursday announced the signing of a memorandum of understanding for manufacture and distribution of IMT's recently announced IMTX 8000 product, according to R. Glenn Williamson, IMT's chairman, chief executive officer and president.

''As we anticipate our premier unveiling of the IMTX 8000 at MACWORLD in San Francisco on April 10, 1990, I am pleased to announce that IMT and Teleste have finalized an agreement for manufacture and distribution of this unique product,'' Williamson said.

''The agreement specifically calls for Tandberg Educational Inc., a wholly owned subsidiary of Teleste Communication, to have the ability to manufacture yearly up to 30,000 units of the IMTX 8000, the world's first media integration system, for distribution in the educational and corporate training markets worldwide and the European personal computer market, commencing Aug. 1, 1990,'' Williamson said.

''We are also pleased to note that Tandberg shall make, at its expense, all hard tooling and soft tooling necessary for the manufacture of the IMTX 8000. We believe this shows Tandberg's commitment and excitement for the potential of the product.''

The IMTX 8000 is expected to carry a retail price of approximately $7,000 to $10,000.

''We believe that the incorporation of the IMTX 8000 into Tandberg's product line will keep Tandberg at the forefront of the worldwide language laboratory market,'' said Pekka Lehtio, director of Teleste Communication. ''The IMTX 8000 will allow Tandberg to fulfill the worldwide demand for integration of multimedia devices in multimedia learning centers.''

Interactive Media Technologies is a full-spectrum communications corporation specializing in computer-based interactive video products which include proprietary hardware and software systems.

SAN JOSE, CA (MARCH 22) BUSINESS WIRE - Aspect Telecommunications Corp. Thursday announced it has filed a registration statement with the Securities and Exchange Commission with respect to a proposed initial public offering of 2 million shares of common stock.

The offering price of the stock is expected to be between $11 and $13 per share. The offering will be managed by Morgan Stanley & Co. Inc. and Hambrecht & Quist Inc.

The company will offer 1,900,000 shares to the public and certain of its shareholders will offer 100,000 shares. The net proceeds to the company will be added to working capital for general corporate purposes, including the financing of inventories and accounts receivable, and will be used to purchase capital equipment. Aspect will not receive any proceeds from the sale of the common stock being offered by the selling shareholders.

Aspect Telecommunications Corp. develops, manufactures, markets and supports call-transaction processing systems which can improve customer service and reduce operating costs for companies that handle a high volume of telephone calls to conduct sales, support, inquiry and other business transactions with their customers.

The company's initial product, the Aspect CallCenter System, is an advanced architecture automatic call distributor that fully integrates

call processing, voice processing and data-processing technologies. Aspect's products enable companies to route and prioritize incoming calls flexibly, adapt to changing volumes of call traffic, instantaneously access data from connected computer systems, expand system capacity to meet growth in transaction volume, and take advantage of new public telephone network services such as ISDN.

This news release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there by any sales of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

ST. LOUIS (MARCH 22) BUSINESS WIRE - Invitron Corp. (NASDAQ:INVN) announced Thursday that total revenues for the fourth quarter of 1989 were $1.6 million versus $4.8 million in the comparable 1988 period.

The net loss for the fourth quarter of 1989 was $6 million, or 39 cents per share, versus $2.9 million, or 19 cents per share, in the comparable 1988 period.

For the year ended Dec. 31, 1989, Invitron had a net loss of $16.4 million or $1.07 per share, on total revenues of $11.5 million. This compared with a net loss of $14.1 million, or $1 per share, on total revenues of $13.6 million in 1988.

Depreciation and other non-cash expenses totalled $7.1 million and $5.2 million in 1989 and 1988, respectively. In the fourth quarter of 1989 and 1988, respectively, non-recurring, non-cash expenses of $1.5 million and $0.9 million were incurred.

The fourth quarter 1989 expense related to the company's decision to no longer pursue construction of a manufacturing and research facility in West Germany.

The auditor's opinion, issued by Deloitte & Touche in connection with the company's 1989 audited financial statements, stated that the financial statements were prepared assuming that the company will continue as a going concern, but that conditions exist which raise substantial doubt about the company' ability to continue as a going concern, unless it is able to generate sufficient cash flows to meet its obligations and sustain its operations.

Vigorous efforts are underway to seek additional funds for the company with the assistance of an investment banking firm and a Japanese trading company. In addition, the company is seeking to increase its revenues from new and existing customers through providing production services and licensing its production technology and proprietary products.

Also, the company is taking steps to reduce its cash expenditures. These steps will include a 33 percent reduction in staffing levels, reductions in materials and supplies usage, and reductions in discretionary spending.

Invitron Corp. is engaged in the discovery, development and production of biopharmaceuticals. The company is developing proprietary biopharmaceuticals in the areas of wound healing, neurological and connective tissue disease and infection therapy. The company also employs a broad array of skills in the production of mammalian cell-derived biopharmaceuticals for itself and others.

WICHITA, KS (MARCH 22) BUSINESS WIRE - Sage Drilling Co. Inc., the Wichita-based contract drilling and energy company, Thursday reported a net loss of $526,000 for the six months ended Dec. 31, 1989.

In the comparable period of fiscal 1989, Sage had reported a net loss of $513,000.

Total revenues for the six months were $1,882,000 compared to $2,286,000 reported a year earlier. A loss of 69 cents per share was reported for the six months ended Dec. 31, 1989, vs. a loss of 67 cents for the same period of fiscal 1989.

Total revenues for the company's second fiscal quarter ended Dec. 31, 1989 amounted to $893,000 compared to $1,174,000 reported a year earlier. The net loss for the second quarter of fiscal 1990 was $311,000, equivalent to a net loss of 41 cents per share, compared to a loss of $314,000, or 41 cents per share, for the same period of fiscal 1989.

Commenting on the six-month's results, Sage President John R. Bartholomew said: ''Although we showed a significant loss for the six months, we are encouraged by the recent stability of crude oil prices. We are hopeful that price improvements will result in a sustained increase in drilling activity that will help Sage return to profitability.''

KANSAS CITY, MO. (MARCH 22) BUSINESS WIRE - BMA Corp. announced Thursday completion of the previously announced sale of the stock of its independent television station, KDVR-Denver, Colo.

The purchaser is Chase Television Communications Inc., a subsidiary of Chase Enterprises of Hartford, Conn.

W. Thomas Grant II, president and chief executive officer of BMA Corp., said, ''As a result of the sale of KDVR, BMA Corporation has received cash of $12.4 million. In addition, after post-closing adjustments, including collection of receivables, another $2.5 million of pretax cash is expected to be received. We earlier estimated an after-tax gain of approximately $4 million.

''The after-tax gain is now anticipated to be $4.5 to $5 million, depending on final closing adjustments.'' Mr. Grant further indicated that $20.6 million remains from a stock repurchase authorization approved by the board of directors in October l988.

He said that the corporation plans to re-enter the market, from time to time, for the purpose of acquiring BMA Corporation common stock. These shares would be added to treasury and held for general corporate purposes.

TORONTO (MARCH 22) BUSINESS WIRE - The bulk sample program on the Jonpol/T & H Garrison Township joint venture is now complete.

The results confirm a true width of 12 feet and a grade in excess of .25 of gold over a length of 465 feet.

A combination of drifting (5 feet by 7 feet) and "bazooka" core drilling (AXT) from the drift allowed the mineralized zone to be outlined continuously for 465 feet. Total drift length was 485 feet. Combining geology and assay results, the width of the zone has been interpreted.

The width and grade has been listed below using the mine grid system to define the centre of the gold zone and the true width taken perpendicular

to the interpreted zone boundary.

SUNNYVALE, CA. (MARCH 22) BUSINESS WIRE - Monoclonal Antibodies Inc. (NASDAQ:MABS) announced Thursday that it has signed an agreement settling the shareholder class action lawsuit which has been pending in U.S. District Court in San Jose, Calif., since 1987.

The lawsuit was filed on behalf of persons who purchased Monoclonal common stock during the period Sept. 24, 1985 through Aug. 28, 1986.

The settlement agreement does not require any cash payment by the company, although other sources will contribute a total of $1 million in cash to the settlement fund.

As its contribution to the settlement, the company will issue warrants which, if exercised, will entitle the plaintiff class members to purchase an aggregate of 950,000 shares of Monoclonal common stock at a price of $7.50 per share over a ten year period.

As a result of the settlement announced today, the company will record a one-time non-cash charge of $950,000 in the quarter and fiscal year ending March 31, 1990.

The settlement agreement is subject to certain conditions, including final court approval.

Thomas A. Glaze, chief executive officer of Monoclonal Antibodies Inc. said: ''Although the company considers the lawsuit to be without merit, we believe this settlement is beneficial in concluding the lengthy and expensive litigation and in avoiding the attendant risks and substantial cost of a trial.

''It is important to note that the settlement will not involve any payment of cash by the company nor will it affect the company's net worth.''

Monoclonal Antibodies Inc. is a biotechnology company which utilizes monoclonal and polyclonal antibodies for the development and marketing of non-instrument diagnostic test kits for the fertility and infectious disease markets.

DENVER (MARCH 22) BUSINESS WIRE - Forest Oil Corp. Thursday announced that it submitted the high bid for seven tracts at the Central Gulf of Mexico lease sale on March 21.

On five of the tracts it was joined by its partner, Harbert Energy Corp.

Forest participated with Harbert Energy Corp. in the high bids for the following tracts: West Delta 64 and 135; East Cameron 255; West Cameron 505; and South Timbalier 193. Forest has a 66.667 percent interest in these tracts and Harbert has a 33.333 percent. Forest has a 100 percent interest in Ship Shoal 292 and in West Cameron 517.

The bids are subject to acceptance by the Minerals Management Service. The company's share of the high bids, if they are accepted, will be $3,471,465, applicable to 24,999 acres net to Forest in this new offshore Gulf acreage exposure.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal reserves and producing properties are located offshore Louisiana, and in Texas, Wyoming, Oklahoma and Canada. The company's reserves are composed primarily of natural gas.

Forest's common stock is traded on the NASDAQ/NMS System, under the FOIL symbol.

PHOENIX (MARCH 22) BUSINESS WIRE - Pinnacle West Capital Corp. Thursday infused more than $450 million in capital into MeraBank and has been released by three federal agencies from further financial obligations under a keep-well agreement signed when the savings and loan was purchased in 1986, said Pinnacle West Chairman Richard Snell.

On Dec. 6, 1989, the Office of Thrift Supervision, the Federal Deposit Insurance Corp. and the Resolution Trust Corp. agreed to release Pinnacle West from the keep-well agreement once the capital infusion was completed.

The transfer of funds included accrued interest and consisted of approximately $310 million in cash and an unsecured note payable in 12 years for approximately $155 million, culminating months of work that included restructuring $676 million in existing debt.

Snell said that before completing the infusion, Pinnacle West closed an agreement with a consortium of financial institutions to provide permanent long-term financing for the $310 million. Salomon Brothers Inc. of New York served as Pinnacle West's investment banker in the transaction.

Pinnacle West had previously arranged with a group of New York-based banks for interim financing to satisfy the company's agreement with the federal agencies. Those funds were not used, Snell said.

Federal regulators placed MeraBank into receivership on Jan. 31.

On a related matter, Snell said discussions are underway with a number of potential parties interested in acquiring Malapai Resources Co., Pinnacle West's uranium mining subsidiary. He said he hopes a sale can be completed by mid-year.

Phoenix-based Pinnacle West has consolidated assets of more than $7 billion. In addition to Malapai, other Pinnacle West subsidiaries include Arizona Public Service Co., the state's largest electric utility; SunCor

Development Co., a real estate development firm; and El Dorado Investment Co., a venture capital firm.

LAFAYETTE, CA (MARCH 22) BUSINESS WIRE - Bedford Properties Inc. announced Thursday the appointment of Willis Andersen Jr. as senior vice president with responsibility for investment related real estate activities.

Since 1984, Andersen has been executive vice president - Western Region, of Investors Central Management Corp. of San Francisco and ICM Property Investors, a New York Stock Exchange - listed real estate investment trust in New York.

Andersen has had a distinguished career in the real estate investment trust industry, having been president and chief executive officer of RAMPAC where he was employed from 1971 to 1984. He served in 1980-1981 as Governor and President of the National Association of Real Estate Investment Trusts (NAREIT) in Wash. D.C.

He is a member of the Urban Land Institute, the Pacific Union Club of San Francisco and the Pacific Club of Honolulu. He is a graduate of the University of Califronia at Berkeley.

Bedford Properties is one of the leading real estate development and management organizations in the Western United States. Founded by Peter Bedford, the Lafayette, Calif. based Bedford Group has been active in California for 25 years and now maintains operations in 18 states.

In addition to land development, single-family construction and multi-family residential development and management, privately held Bedford is also active in developing industrial and office parks and commercial and retail centers. The company's $2 billion asset portfolio currently contains in excess of 13 million square feet of buildings and improved properties, and over 40,000 acres of land.

In addition, the Bedford Group of Companies includes newspapers, art galleries, hotels, restaurants and a fine arts book publishing company.

LOS ANGELES (MARCH 22) BUSINESS WIRE - The MacNeal-Schwendler Corp. (ASE:MNS) announced Thursday that its board of directors has declared a regular quarterly dividend of 10 cents per share.

At the board's regular meeting on March 21, 1990, the cash dividend was declared payable on June 6, 1990, to shareholders of record on May 25, 1990. The dividend of 10 cents per share represents a 25 percent increase over the previous rate of 8 cents per share.

MacNeal-Schwendler recently reported revenues of $45,016,000 and operating income of $13,037,000 for the year ended Jan. 31, 1990. The company's net income for the year ended Jan. 31, 1990, was $9,832,000, or 82 cents per share.

The MacNeal-Schwendler Corp., headquartered in Los Angeles, markets computer software products for computer-aided engineering (CAE) applications. The company's principal product is MSC/NASTRAN, a sophisticated computer program used by designers and engineers to analyze the strength characteristics and dynamic response of structures or products prior to construction or manufacture.

BEVERLY HILLS, CA (MARCH 22) BUSINESS WIRE - At its regular meeting in Beverly Hills, Calif., on Thursday, the board of directors of Litton Industries Inc. elected Robert H. Lentz advisory director of the Litton board and Norman L. Roberts as a corporate senior vice president and general counsel.

Lentz, who will retire from Litton next week after 35 years of service, had been senior vice president and general counsel of the company since 1979. Roberts was elected a corporate vice president two years ago and had been an associate general counsel since 1986.

Roberts joined Litton in 1968 as assistant counsel at the Guidance and Control Systems division in Woodland Hills, Calif. He was promoted to division counsel the same year and advanced to vice president and counsel for Litton's defense group in 1971.

He was appointed a corporate staff vice president and assistant general counsel in 1979 and associate general counsel in 1986. Two years later he was elected a corporate vice president.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

NEW YORK (MARCH 22) BUSINESS WIRE - James Harmon, chairman and chief executive officer of Wertheim Schroder, announced Thursday that the Amsterdam equity operations of Drexel Burnham Lambert have joined Wertheim Schroder.

A total of 20 people, including 11 equity sales people, were hired, supplementing Wertheim's already strong presence in Europe.

The Amsterdam office was established in 1968, and has a wide range of institutional clients. Office co-managers Jan Mellegers and Herman Zeijlmaker have been with the office since 1982.

Frederic Sapirstein, managing director of Equity Services, comments, ''Wertheim Schroder has long had a dedication to establishing strong ties in Europe. We opened our Paris office in 1964, our London office in 1982, and our Geneva office in 1984.

By expanding into Amsterdam, we will be establishing an important presence in the Netherlands, as well as the Nordic countries -- Norway, Denmark, Sweden and Finland. We are delighted about the addition,'' he continues, ''and feel it is an important component of our strategic growth plans for the 1990's.''

Wertheim Shcroder & Co. Inc., the international investment banking, asset management and securities firm, was founded in 1927. In 1986, the firm broadened its global capabilities and positioned itself for increased international growth by forming a partnership with Schroders plc in which the managing directors of Wertheim Schroder and Schroders plc each own 50 percent of the voting equity of the privately-held firm.

In 1989 the firm formed strategic alliances with three other financial insitituions, Mitsubishi Trust and Banking Corp., the Bank of Boston and Massachusetts Mutual Life Insurance Co., each holding 4.9 percent non-voting stakes in the firm.

#90081b0615 03/22/1990 ~Business Wire

IRVINE, CA (MARCH 22) BUSINESS WIRE - Western Digital Corp. (ASE:WDC) Thursday announced that its 7000-MX, a 32-bit Micro Channel-to-SCSI (small computer systems interface) host adapter introduced at the 1989 fall Comdex trade show, is fully compatible with the PS/2 SCSI host adapters announced by IBM on March 20.

''We believe that IBM announcing SCSI in mainstream personal computer systems will significantly accelerate the acceptance of SCSI as a storage solution,'' said John Burger, director of marketing for high-performance storage products at Western Digital.

''The Western Digital 7000-MX board is expected to gain wide acceptance in the marketplace as a truly IBM-compatible SCSI host adapter.''

Western Digital's Micro Channel adapter, like the IBM products, features a Subsystem Control Block (SCB) protocol that allows true high-performance busmaster operation and hardware-level compatibility. The 7000-MX includes

IBM-compatible A and C BIOSs on the board and optional FASST software drivers for OS/2 with a wide variety of SCSI peripherals.

Additionally, the 7000-MX uses the IBM-designed Intel 82325 chipset for assured register-level compatibility. The adapter is able to support a burst transfer of up to 40 megabytes (MB) per second with a 32-bit Micro Channel bus system using the IBM ''data streaming procedure'' for busmaster operation. For downward compatibility, the 7000-MX can also be installed in a 16-bit Micro Channel expansion slot.

Western Digital's 7000-MX is part of the company's broad family of host bus adapters and drive controllers for high-performance applications utilizing Micro Channel, EISA or ISA busses for both SCSI and ESDI peripherals. By combining the company's 7000-series host bus adapters with Western Digital's high-performance, 3.5-inch SCSI drives, complete turnkey storage solutions can be obtained with 100, 200 and 320 MB capacities.

Western Digital, with headquarters in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry.

The company's storage products unit produces intelligent drives and controllers, while its microcomputer products unit provides communications imaging, systems logic and integrated systems products.

LYNNWOOD, WA (MARCH 22) BUSINESS WIRE - Ralph V. Schapler, chairman and chief executive officer of Pioneer Federal Savings Bank, announced Thursday that the savings bank's board of directors declared a 12 cents per share cash dividend on the savings bank's common stock.

The cash dividends will be payable April 26, 1990, to stockholders of record as of April 12, 1990.

Pioneer Bank converted to stock ownership on July 13, 1989, and trades on the NASDAQ National Market System under the symbol ''PFBK.'' This is the third quarterly dividend the savings bank has paid since becoming a public company and follows a one-for-one stock dividend paid Feb. 20, 1990.

This cash dividend is an increase of approximately 20 percent per share over last quarter's dividend of 10 cents per share (adjusted to reflect

stock dividend paid Feb. 20, 1990).

Pioneer Bank is a federally chartered stock savings bank headquartered in Snohomish County. The savings bank is primarily engaged in the business of attracting deposits from the general public and using these deposits, together with other funds, to make single-family real estate loans. At Dec. 31, 1989, the savings bank had assets of nearly $650 million.

REDMOND, WA (MARCH 22) BUSINESS WIRE - ProCyte Corp. (NASDAQ:PRCY), Thursday reported a net loss of $617,714, or 13 cents per share, for its fiscal year ended Dec. 31, 1989, compared to a loss of $1.4 million, or 40 cents per share, in 1988.

The loss was an expected result of continuing research efforts and the addition of pharmaceutical development capabilities as ProCyte continues its strategy of becoming a wholly integrated pharmaceutical company.

The resulting increase in research and development expenses in 1989 was more than offset by increased contract revenues earned from Schering Corp. interest income, and a $300,000 fee earned from a perspective licensee under an expired option, resulting in a decrease in net loss in 1989 from 1988.

The ProCyte-Schering License and Supply Agreement focuses on the development and marketing of ProCyte's lamin compound for topical human wound healing. Schering is a major shareholder in the company, owning 9.4 percent of the outstanding common stock.

''In November 1989 ProCyte completed its initial public offering of 1,300,000 shares, raising approximately $9.3 million,'' said Joseph Ashley ProCyte president and chief executive officer. Ashley noted that ProCyte ended the year in good financial health, with $12.7 million in cash and cash equivalents.

ProCyte is a development-stage pharmaceutical company with 30 employees based in Redmond. ProCyte continues to broaden its patent position and explore new analogs of the company's core technology, lamin compounds, for digestive ulcers, bone healing, skin health and hair growth.

FRAMINGHAM, MA (MARCH 22) BUSINESS WIRE - Charles River Data Systems Inc. (Framingham, Mass.) and Oracle Complex Systems Corp. (Arlington, Va.), a subsidiary of Oracle Corp., Wednesday announced the completion of a strategic distribution agreement for the Charles River Relational Accelerator.

Through this agreement, Oracle Complex Systems Corp. (OCSC) will provide direct sales, service, and product support for the Relational Accelerator into the commercial and government markets. The agreement extends an earlier GSA (Government Services Administration) distribution contract signed by OCSC and Charles River on October 3, 1989.

The Relational Accelerator is a dedicated database engine that has been exclusively designed to enhance the performance of the Oracle relational database management system (RDBMS) and applications running in the DEC VAX/VMS environment. Its compact profile and economical entry configuration allows deployment in low-end DEC VAX/VMS configurations.

The Relational Accelerator provides a real-time, dedicated data- base engine and disk storage system that transparently processes the ''back-end'' Oracle RDBMS kernal, providing up to 25 transactions per second (TPS) as measured by the TPI benchmark on a MicroVAX III or VAX 8650. Response time increases of 2 to 4 times (or more) are typical; this

increased performance allows an existing application to support an expanded number of simultaneous users.

The Relational Accelerator will be on display at the National Database Exposition and Conference, March 27-29, at the Moscone Convention Center, San Francisco, Calif., at booth 103.

Oracle Complex Systems Corp. is the systems integration subsidiary of Oracle Corp., serving the federal and local government, and commercial markets with high performance information systems. Oracle Corp., headquartered in Belmont, Calif., is the largest suplier of DBMS software and the third largest software and services company in the world.

Charles River Data Systems, a privately held company founded in 1973, has provided over 10,000 real-time computer systems worldwide for customers including Kawasaki Steel, Hughes Aircraft, Chrysler, the U.S. Postal Service, and Datapoint. These systens have earned an excellent reputation for real-time event processing for industrial/scientific control and instrumentation, and for on-line transaction processing applications. The company's unique real-time technology provides the industry's only real-time architecture for the Oracle RDBMS.

NEW YORK (MARCH 22) BUSINESS WIRE - ICM Property Investors Inc. (NYSE:ICM), a real estate investment trust, and Peter B. Bedford, the president and owner of Bedford Properties Inc., a prominent real estate development firm headquartered in Lafayette, Calif., jointly announced Thursday that ICM Property Investors will acquire from Bedford a portfolio of industrial properties in a number of primarily Western locations with an aggregate value that could reach $30 million or more.

Through this transaction, the company will not only diversify its investment portfolio, but also increase its per-share cash flow.

Simultaneously announced was a separate transaction on March 21, in which Bedford purchased all of the outstanding stock of Investors Central Management Corp., the privately-owned, New York-based sponsor and investment manager of ICM Property Investors, retaining its personnel.

The agreement under which ICM Property Investors will acquire the

properties provides that the company will purchase them for a combination of 1 million newly issued shares of ICM Property Investors common stock and notes secured by purchase-money mortgages on the properties acquired.

The values to be assigned to the stock and notes for the purpose of determining purchase prices will be mutually agreed upon by the company and Bedford, subject to an opinion from Merrill Lynch Capital Markets as to the transaction's fairness to the company's stockholders.

In the agreement, ICM Property Investors has also granted Bedford an option to buy the new shares for not less than $10 per share, payable in cash, subject to upward adjustment to comply with the fairness opinion. If Bedford exercises this option, the company will apply the proceeds to the purchase of the properties.

Bedford has given ICM Property Investors access to data on a significant portion of his portfolio of warehouse, light assembly, research and development and other industrial properties, from which ICM Property Investors will select specific properties for acquisition.

The Bedford industrial portfolio is concentrated in the San Francisco Bay Area, but includes properties in the Los Angeles; Seattle; Portland, Ore.; Kansas City and other metropolitan areas.

Each property acquired by ICM Property Investors will be substantially or fully leased and will be currently producing cash flow. The acquisition price negotiated for each property will be subject to an independent appraisal, and in no case will the company pay more for a property than its appraised value.

In over 25 years of development activity, much of it in association with Kilico Inc., a part of the Kemper Group of financial service companies, Bedford has built a coast-to-coast portfolio of properties with emphasis on the West, which are divided among a broad spectrum of property types ranging from land held for future development to hotels, including a substantial component of industrial properties.

It was also reported that the Western office of Investors Central Management Corp., previously located in San Francisco, will be moved to the Bedford Properties headquarters in Lafayette.

Bedford Properties is one of the leading real estate development and management organizations in the western United States. Founded by Peter Bedford, the Lafayette-based Bedford Group has been active in California for 25 years and now maintains operations in 18 states.

In addition to land development, single-family construction and multi-family residential development and management, privately held

Bedford is also active in developing industrial and office parks and commercial and retail centers.

The company's $2 billion asset portfolio currently contains in excess of 13 million square feet of buildings and improved properties, and over 40,000 acres of land. In addition, the Bedford Group of Companies includes newspapers, art galleries, hotels, restaurants and a fine arts book publishing company.

PHOENIX (MARCH 22) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL; PSE:AWA) will introduce the Chairman's Club on April 1, a new program designed to recognize the carrier's most frequent flyers.

Members of the airline's frequent flyer program, FlightFund, who fly a minimum of 40 flight segments or 30,000 actual flight miles during 1990 will automatically become members of the Chairman's Club for 1991. Members of the Chairman's Club will receive a 50 percent mileage bonus on each flight during the year, or a minimum of 1,125 FlightFund miles. In addition, Chairman's Club members will receive free first class upgrade certificates and passes to the carrier's luxury airport lounge, the Phoenix Club, as well as special travel partner offers.

Edward R. Beauvais, chairman and chief executive officer for the airline said, ''With the restructuring of FlightFund, and our desire to make improvements overall, we have created the Chairman's Club to recognize our most frequent flyers. This program provides extra incentives and benefits to customers who display their loyalty by concentrating their travel on America West.''

He continued, ''In addition to the 50 percent mileage bonus on America West flights, free first class upgrades and complimentary passes to our V.I.P. lounge, Chairman's Club members will receive early boarding privileges and priority stand-by.''

Beauvais noted that America West is now offering double miles on all trave to and from the airline's newest city, Boston, through June 15, 1990. ''FlightFund members who reach the Chairman's Club membership level requirement prior to Aug. 31, 1990, will not only receive membership for 1991, but for the remainder of 1990 as well,'' the chief executive officer concluded.

Applications to join FlightFund, and become eligible for Chairman's Club membership are available at ticket counters throughout the America West route system. The airline, recently reclassified as a major carrier, flies coast to coast and to Hawaii with an all Boeing fleet of 89 aircraft including 747s, 757s, 737s and de Havilland Dash 8s. America West, the national champion in on-time performance for 1989 and 1988, will add new service at Bakersfield on April 15 and San Francisco on May 1.

WOODBRIDGE, NJ (MARCH 22) BUSINESS WIRE - Supermarkets General Holdings Corp. announced that the board of directors declared a quarterly stock dividend on its $3.52 cumulative exchangeable preferred stock (''Preferred Stock'') payable April 30, 1990 to stockholders of record on April 16, 1990.

The dividend will be paid at the rate of .0325 shares per share of preferred stock except that no fractional shares will be issued.

The preferred stock exchange agent will aggregate all fractional shares otherwise issuable and sell them in the open market. Preferred stockholders entitled to fractions of such a share will then receive a payment in cash in lieu thereof equal to such holder's proportionate interest in the net proceeds of the sale of all such fractional shares.

WALTHAM, MA (MARCH 22) BUSINESS WIRE - Meditrust (NYSE:MT) announced Thursday that after a review of the financial performance of the company, the board of trustees has voted to declare a dividend for the quarter ending March 31, 1990, of 57.25 cents per share vs. 51.5 cents per share for the same period in 1989.

Shareholders of record on April 30, 1990, will be paid this dividend on May 15, 1990.

This represents the 17th consecutive increase in the company's quarterly dividend. Jonathan S. Sherwin, president of Meditrust, stated that, ''with the completion of our fourth public equity offering in February and the strong financial performance by our portfolio of properties, Meditrust is positioned to continue to achieve its objective of steady dividend growth.''

Meditrust, with headquarters in Waltham, Mass., is the nation's largest health care real estate investment trust, holding investments with 13 different operators of 96 health care facilities in 23 states totaling approximately $675 million of investments.

The company specializes in the sub-acute sector of the health care industry, including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance abuse treatment centers, psychiatric hospitals, and retirement living communities. A.M.A Advisory

Corp., a Delaware corporation, is engaged as the advisor to Meditrust.

PARIS (MARCH 22) BUSINESS WIRE - LVMH Moet Hennessy Louis Vuitton (NASDAQ: LVMHY), the Paris-based international luxury products group, Thursday reported unaudited consolidated net income for 1989 of FF 2,932 FF 5.7740) up 46 percent over the 1988 level.

Earnings per share, based on the weighted average number of shares outstanding during the year, rose by 32 percent to FF 229.41 ($39.73). Earnings per American Depositary Receipt, each representing one-fifth of an LVMH ordinary share, totalled FF 45.88 ($7.95).

The increase in net 1989 sales was 19 percent, to FF 19,635 million ($3,401 million).

Income from operations before net financial expense and taxes, and excluding the contribution of LVMH's shareholding in Guinness PLC, rose by 34 percent.

Owing to current litigation, the 1988 financial statements of the Group's Louis Vuitton subsidiary have not yet been formally approved by that company's shareholders.

The executive board will propose a dividend of FF 62.00 per ordinary share (net of ''Avoir fiscal'' tax credit), up 41 percent over the previous year level. An interim dividend of FF 15.00 was paid on Nov. 30, 1989. The dollar amount of the dividend per ADR will depend on exchange rates prevailing on the payment date.

Reflecting its strategy of limiting volume growth, sales of the champagne and wines segment rose by 6 percent in 1989. Relative stability in cost of goods sold combined with increases in selling prices in France and abroad, led to a 19 percent increase in income from operations.

In the cognac and spirits segment, the strong increase in sales and even stronger growth in income from operations resulted from a 10 percent increase in volume sales and the particularly strong rise in demand for higher-margin older quality cognacs, especially in Japan and southeast Asia. With a 50 percent increase in operating income in 1989, cognac for the first time became the largest contributor to group income from operations.

In luggage, leather goods and accessories, the growth in sales revenues and income from operations at Louis Vuitton Malletier stemmed primarily from a 28 percent increase in sales volume. With 1989 revenues up by more than 50 percent, Loewe International confirmed the return to profitability achieved in 1988.

Comparable levels of sales growth were recorded by all three companies in the perfumes and beauty products segment. Reflecting the success of its Fahrenheit eau de toilette for men, Parfums Christian Dior's income from operations progressed significantly faster than sales. The Parfums Givenchy product assortment was rounded out with the introduction of makeup and skincare lines, whose launch affected the company's income from operations in 1989. Roc maintained its growth in France and internationally.

LVMH Moet Hennessy Louis Vuitton is one of the world's largest companies specializing in luxury products. Its prestige brands include Dom Perignon, Moet & Chandon and Veuve Clicquot champagne; Hennessy and Hine cognac; Louis Vuitton luggage, leather goods and accessories; Christian Dior, Givenchy and Roc perfumes and cosmetics; and Givenchy Couture.

LVMH Moet Hennessy Louis Vuitton ordinary shares, traded on the Paris Stock Exchange, may be accessed on the Reuters Equities 2000 service under LVMH.PA and on Quotron under LVMHF.EU.

#90081b0677 03/22/1990 ~Business Wire

ANAHEIM, CA (MARCH 22) BUSINESS WIRE - Pacific Inland Bancorp (NASDAQ:PIBC) Thursday announced financial results for the fiscal year ended Dec. 31, 1989.

The bancorp reported a consolidated net loss of $488,000, or 38 cents per share, compared with a net loss of $1,176,385, or 91 cents per share, for 1988.

Pacific Inland Bank, the company's principal subsidiary, reported an operating loss for the year of $28,000, compared with an operating loss of $376,000 for 1988. The bank realized an operating profit of $174,000 for the year prior to consolidation of a loss of $202,000 reported by its new PIB Mortgage Co. subsidiary.

The bank recorded a provision to the loan loss reserve of $782,000 in 1989 bringing the allowance for loan losses at year end to $1,825,000, or 3.1 percent of total loans outstanding.

Pacific Inland Bank's subsidiary, PIB Mortgage Co., a new wholesale mortgage banking firm headed by Calvin Watts, originates and services loans in Northern and Southern California. PIB Mortgage Co. incurred start-up and organizational expenses that contributed to an operating loss reported to the bank of $202,000 for the year. Management expects PIB Mortgage, now averaging $15 million in monthly loan originations, to contribute significantly to the bank's earnings in the future.

The bancorp's asset management subsidiary, Trident Investment Management Inc., reported an operating loss of $224,000 on the year. This was due largely to the consolidation and downsizing of Trident in 1989 following the loss of its major pension fund business base in late 1988.

Trident, under the direction of new president and chief executive officer Philip Bourdillon, has changed its marketing focus away from large, geographically diverse pension funds to management of local tax-exempt monies, including employee benefit plans and endowments. Synergies with the bank's Trust Department will also be maximized, according to Bourdillon.

Pacific Inland Bancorp is a financial services holding company with headquarters in Anaheim. The bancorp is comprised of Pacific Inland Bank a business and professional bank based in Anaheim; Trident Investment Management, a registered investment advisor, also based in Anaheim; and PIB Mortgage Co., a wholesale mortgage banking operation with branch offices in San Jose and Anaheim.

FREMONT, CA (MARCH 22) BUSINESS WIRE - GRiD Systems Corp. Thursday introduced European character set handwriting recognition software for the GRiDPAD line of pen interface handheld computers.

The software was demonstrated Thursday to potential buyers at the CeBIT '90 Fair in Hannover, West Germany.

''GRiD developed this enhanced version of our handwriting recognition software for the GRiDPAD to incorporate the special characters required throughout all the major Western European countries,'' said D. Bruce Walter, GRiD senior vice president of sales and marketing.

GRiD also announced plans to start shipping GRiDPAD computers with handwriting recognition software to Denmark, France, The Netherlands, Italy, Norway, Spain, Sweden, U.K. and West Germany this spring.

To facilitate development of additional software for pen interface and handwriting recognition, GRiD is sponsoring an international conference to study handwriting recognition in Santa Clara, Calif., on April 19.

The GRiDPAD is a handheld, notebook-size, MS-DOS computer that uses pen interface technology and recognizes printed handwriting.

GRiD manufactures and markets a comprehensive range of battery-powered laptop computers, industry-standard desktop computers, operating systems, software tools, portable peripherals and electronic mail/networking systems. GRiD, with installed systems in more than one third of Fortune 500 companies, has a world-wide direct sales and support organization. The company also demonstrates products at more than 50 GRiD Systems Centers and sells products through application-specific value-added resellers.

GRiD is located at 47211 Lakeview Blvd., Fremont, Calif. 94538. GRiD also has subsidiaries in the UK (44)(0)372-60266, and in Germany (49)(0)211-498-2971.

GRiD is a wholly-owned subsidiary of Tandy Corp., Fort Worth, Texas. Tandy is a leading manufacturer and distributor of consumer electronics and computers. A New York Stock Exchange company, Tandy has sales in excess of $4 billion annually.

MIAMI (MARCH 22) BUSINESS WIRE - FDP Corp. Thursday announced the financial results for its first quarter, which ended Feb. 28.

Total revenue for the quarter increased $1,920,192 (67 percent) to $4,776,346, compared with $2,856,154 for the comparable period in 1989. The company reported a net earnings of $80,975 (two cents per share) for the quarter vs. a net loss of $296,378 (nine cents per share) for the comparable period in fiscal 1989.

Michael C. Goldberg, chairman, reported that results were positively affected in this first quarter by two factors: 1.) a strong increase in software related sales - up $912,300 (59 percent) to a total of $2,471,100; and 2.) a large increase in the sale of equipment - up $1,130,800 to a total of $1,301,300.

Goldberg also noted that work for the Prudential Insurance Co. of America under a long-term development contract in the Advanced Underwriting area, the expansion into the European market via a major life insurance client in the FDP/MAAS area, the addition of an annual renewable contract with Mass Mutual in the FDP/CLAS area and the continued success of our new PDQ document preparation system in the Pension area were significant items positively effecting first quarter results.

FDP's financial condition remains extraordinarily strong with cash and marketable securities of $13,790,856, a current ratio of 6.2 to 1, no debt and shareholder's equity of $16,748,692.

Miami-based FDP Corp. develops and markets applications software systems for the marketing and administration areas of the pension and life insurance industries.

LONDON (MARCH 22) BUSINESS WIRE - March 22, British Gas (NYSE:BRG)

Thursday repaid the fourth tranche of the 2.5 billion pounds sterling unsecured debenture which was issued as part of the process of privatization.

The payment of 400 million pounds sterling is in line with the announcement made on Jan. 3, 1990, and the details given in the Prospectus.

British Gas is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

DALLAS (MARCH 22) BUSINESS WIRE - EDS and American International Healthcare Inc. (AIH), a subsidiary of American International Group Inc. (AIG), Thursday announced plans to jointly develop and market managed-care information systems for the health insurance marketplace both here and abroad.

The foundation of the alliance is AIH's TOPPS TM, an IBM-based multi-option processing system. TOPPS processes insurance claims for

group health insurers, preferred provider organizations (PPOs) and health maintenance organizations (HMOs).

TOPPS will provide an analytical framework for studying costs associated with using particular providers, the type and frequency of procedures performed, and the patients' use of services. In this manner TOPPS enables employers and other groups to evaluate and manage health-care dollars.

In 1989, U.S. employers paid an average of $2,748 per employee to provide health benefits, a rise of 16.7 percent over 1988, according to a widely cited survey conducted by the consulting firm of A. Foster Higgins & Co. Many industry observers believe the managed health-care delivery system to be the key to effective and long-term health-insurance cost containment.

These initiatives translate to reductions in health insurance costs for both employers and employees.

Under the agreement, EDS will support both existing and new customers and provide system maintenance and enhancements after TOPPS is complete.

AIH's international activity includes Europe, the Middle East, Southeast Asia, the Far East and the Caribbean. Its current customers include national governments, international insurance companies, and private health plans among others.

Based in Rockville, Md., AIH is an international managed health care and consulting company which is wholly owned by AIG. AIG is the leading U.S.-based international insurance organization and the nation's largest underwriter of commercial and industrial coverages. AIG reported 1989 revenues of $14.2 billion.

EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

LUND, SWEDEN (MARCH 22) BUSINESS WIRE - Gambro AB (NASDAQ:GAMBY) announced

Thursday that it has commenced a cash tender offer for all outstanding shares of common stock of Cobe Laboratories Inc. (NASDAQ:COBE) at $37 per share, net to the seller in cash.

The offer is being made by Polo Acquisition Corp., a newly formed, indirect wholly owned subsidiary of Gambro.

The offer is conditioned upon, among other things, there being validly tendered and not withdrawn prior to the expiration of the offer at least two-thirds of the outstanding shares of Cobe on a fully diluted basis. Gambro's offer is not subject to a financing condition.

Gambro has received commitmnets from Skandinaviska Enskilda Banken and PK Banken pursuant to which such banks have agreed, subject to certain terms and conditions, to provide a bridge loan facility of up to an aggregate of $250 million to finance the offer and the merger.

The offer and withdrawal rights will expire at midnight, New York City time, on Wednesday, April 18, unless the offer is extended.

Gambro also said that it expects to file today the pre-merger notification forms with the Federal Trade Commission with respect to the offer.

As previously announced, the offer is being made pursuant to an agreement and plan of merger entered into by Cobe, Gambro and Polo Acquisition Corp. dated as of March 15, which provides for the first step tender offer commenced today to be followed by a merger of the Gambro subsidiary into Cobe. Shares not acquired in the offer will receive $37 per share in cash in the merger.

The board of directors of Cobe unanimiously approved the transaction and recommends that all shareholders accept the offer. The First Boston Corp., the financial advisor to Cobe, has delivered to the board of dirctors an opinion that the consideration to be received by the shareholders of Cobe is fair to such shareholders from a financial point of view.

Prudential-Bache Capital Funding is dealer manager for the offer and D.F. King & Co. Inc. is the information agent.

(MARCH 22) PR NEWSWIRE - BELMAC CORP. (NASDAQ:BEMCC) Thursday issued a media advisory regarding the French Autaurisation de Mise sur le Marche (the French Authorization to Market Agency, A.M.M.) approval of BELMAC's drug Alphanon.

In a press release three months ago the Company was stated that the French A.M.M. would be providing status information on the approval process of Alphanon, a new transdermal drug for use in the treatment of hemorrhoids.

The long-awaited formal review of the registration package was conducted on March 9 in Paris. Included in this review were the results of interim data on 74 patients (of a total 240-patient study) which shows that Alphanon is significantly effective in the treatment of hemorrhoidal bleeding.

This research was conducted in direct response to a request made by the French regulatory agency. Traditionally the A.M.M. provides a written report on the results of their formal review, which BELMAC expects to receive within the next few weeks. BELMAC is prepared to issue a statement within 24 hours of the receipt of this report.

BELMAC CORP., a development stage drug company, has developed Alphanon, which the Company believes is the only non-surgical treatment to stop hemorrhoidal bleeding, which may eliminate the need for surgery.

VANCOUVER, BRITISH COLUMBIA (MARCH 22) BUSINESS WIRE - Robert C. Manion, managing partner of Andersen Consulting in Canada, Thursday announced the creation of integrated Pacific Northwest operations designed to strengthen Andersen Consulting's ability to service major clients in British Columbia Washington and Oregon.

The new regional operations will include Andersen Consulting's existing offices in Vancouver, Seattle and Portland, Ore. and will provide consulting services in systems integration, systems management, change management and strategic services.

Said Manion, ''Increasingly we're finding that our larger clients have sophisticated needs for mission-critical systems which require access to a

pool of consulting specialists larger than you could maintain in one location.''

Andersen Consulting is responding to the need of such larger organizations by creating regional operations in the Pacific Northwest, he said.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954, when it installed the first computer application for commercial use. The organization helps clients use information in all phases of their management activities -- strategic, industry, operations and financial.

Andersen Consulting's worldwide client base has access to more than 18,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting Canada has 545 professionals in 7 locations throughout Canada. Andersen Consulting Canada is a member firm of the Arthur Andersen Worldwide Organization.

HOUSTON (MARCH 22) BUSINESS WIRE - Continental Express, a subsidiary of Continental Airlines, announced Thursday new non-stop service from Dulles to Newark International Airport effective April 12.

The airline will operate five flights Monday thru Friday, with a similar weekend schedule and will offer an introductory fare of $79.00 each way, (limited availability, some restrictions apply). This new service will complement Continental Airlines current 11 departures to New York/Newark from Washington National, and existing Continental Express service from Baltimore.

Thomas C. Barber, president of the eastern region of Continental Express, said, ''We are pleased to offer our customers a choice of three departure airports when traveling the heavily utilized Washington to New York route. Those customers traveling beyond New York can make convenient connections to almost 300 Continental and Continental Express departures from our modern Terminal C.''

Continental Express will serve Dulles with the 46 passenger Aerospatile/Aeritalia ATR-42. This aircraft, valued at over eight million

dollars, represents the leading edge in aviation technology. The ATR-42 features state-of-the-art avionics and jet-like amenities for passenger comfort.

This innovative aircraft, manufactured by the same organization which produces the Airbus A-300, is designed with an EFIS (Electronic Flight Instrument System) cockpit, commonly referred to as a ''glass cockpit,'' due to the replacement of gauges and dials with computerized display screens. The cabin features overhead storage, reclining seats, fold down work tables and a flight attendant for inflight service.

With Continental Express, customers traveling from Dulles to Newark and beyond have access to many resources of the Regional Airline's parent company, Continental Airlines. These include advanced seat assignment, OnePass frequent flyer bonus mileage, participation in price promotions, competitive connecting fares, and convenient connections. Destinations served non-stop from Newark include, San Fransico, Seattle, Aruba, Houston Hartford, Denver, London, Paris, Montego Bay, Bermuda and Los Angeles.

Worldwide, Continental Express serves 95 cities, including eight international, with more than 900 daily departures. In 1989, Continental Express carried over 2.5 million customers and, in 1990 is expected to carry over four million. Continental Express connects over 50 percent of its total passengers to Continental Airlines.

NEW YORK (MARCH 22) BUSINESS WIRE - Siemens Corp. and Quantum Medical Systems Inc., have signed a letter of intent under which Siemens would acquire the Issaquah, Wash., developer of medical ultrasound imaging systems.

Siemens is the world's largest producer of diagnostic imaging systems and medical electronics products, and currently manufactures ultrasound products at its San Ramon, Calif. subsidiary, Siemens Ultrasound Inc.

Siemens recently introduced a new premium cardiology system with color flow imaging. The company also offers a wide range of other ultrasound products for radiology, urology, and gynecology - including an award-winning product for vaginal and fetal exams.

''Ultrasound has become the fastest growing imaging modality in medicine, due to its rapidly improving clinical value and cost-effectiveness,'' said Dr. Peter Grassmann, senior vice president, Siemens AG.

''This acquisition will allow Siemens to greatly enhance its role in medical ultrasound, a sector with fierce international competition,'' Dr. Grassman added.

Quantum is recognized as the pioneer of ultrasound colorflow systems for vascular diagnosis, which dramatically impacted ultrasound imaging in the 1980s.

Quantum markets to vascular surgeons and radiologists, and recently introduced a new ultrasound imaging system, the Quantum 2000, a premium product for radiology. Quantum employs more than 160 people, and has had past annual sales of approximately $18 million.

Siemen's U.S. medical operations employ approximately 7,000 people in the United States. Quantum will become the 10th Siemens medical manufacturing center in the United States producing products and systems for worldwide distribution -- bringing Siemens close to its goal of becoming a net exporter of medical systems from the United States.

In the medical area, Siemens expects this year's orders to approach $1.5 billion in the United States, and $4 billion worldwide. Siemens offers the world's most comprehensive line of medical electronics products.

Financial terms of the agreement were not disclosed.

ANDOVER, MA (MARCH 22) BUSINESS WIRE - Marshalls Inc. has announced the appointment of Jerry Rossi as president, chief operating officer, Rossi was most recently the chairman of May Company's Foley's division.

Prior to Foley's, Rossi was chairman of G. Fox and held various positions with King's and Lechmere. Rossi will be responsible for finance, information services, real estate, shortage control and purchasing.

Marshalls President Francis H. Arnone will assume the responsibilities of chairman and chief executive officer. Arnone will retain direct supervision of stores, merchandise, planning and allocations, sales promotions and human resources. ''These changes allow us to further

strengthen our competitive position, to meet the consumer-focused goals we have set for Marshalls in the 1990s,'' said Arnone.

Marshalls pioneered the field of off-price retailing in 1956, and continues to be the largest volume, most influential chain in creating awareness of how ''brand names for less'' can save consumers money. The company currently operates more than 370 stores nationwide, and plans to open 40 new stores each year for the next five years.

Marshalls is a division of Melville Corp., the New York-based holding company that owns 13 national specialty retail chains.

AUSTIN, TX (MARCH 22) BUSINESS WIRE - Some of the country's best talent in science and education met in Austin this week under the auspices of SEMATECH's Centers of Excellence (SCOE) to discuss ways to recover world leadership in semiconductor manufacturing.

SEMATECH the U.S. semiconductor manufacturing technology consortium, sponsored this second annual meeting for the Centers of Excellence participants from U.S. universities and research centers. The three-day conference, which began March 20, was hosted by the University of Texas.

Attending the meeting were representatives from the Arizona Center of Excellence, which includes the University of Arizona and Sandia National Laboratories.

SEMATECH awarded research contracts in 1988 to the Arizona SCOE to reserach new semiconductor manufacturing equipment and processes. The University of Arizona is conducting research on contamination/defect assessment and control in the manufacture of semiconductors.

The SCOE is working to understand and utilize chemical reactions and electric charge effects to remove gaseous impurities in water, oxygen and inert gases under process flow conditions. This research is designed to help SEMATECH provide American industry with superior semiconductor manufacturing capability.

SEMATECH's primary goal in establishing the Centers is to provide focus for development of manufacturing programs within the graduate schools of U.S. universities, according to Dr. Robert N. Noyce, president and CEO of the consortium.

Selection of the SEMATECH-funded centers is based on the quality of the research programs offered, their relevance to SEMATECH's needs, and the nature of the available program resources. SEMATECH has committed approximately $10 million annually in research contracts to the SCOE program.

The meeting was held to promote interaction and understanding among the universities conducting research for SEMATECH and the communities that benefit from the SCOE program: SEMATECH and its member companies, SEMI/SEMATECH (equipment and material suppliers), the SRC and the government and national labs.

Each SCOE presented an overview of its research program and its accomplishments to date. A highlight this year was student presentations on projects supported by the SCOE program. Also new this year was the attendance of personnel from SEMI/SEMATECH member companies, representing the industry's equipment and materials supplier base.

Their attendance allowed increased interaction among groups focusing on ideas and research and those focusing on applying those concepts to benefit end users.

SEMATECH is a consortium of 14 American semiconductor manufacturing firms dedicated to restoring America's manufacturing leadership in semiconductors. Located in Austin, Texas, half of its $200 million annual funding is provided by its member companies and the remainder by the federal government.

The SRC, located in Research Triangle Park, N.C., was formed by the industry in 1982 to conduct generic semiconductor research at U.S. universities. Since that time, its members have invested more than $125 million in U.S. university research efforts. The SRC is directing SEMATECH's university research efforts and oversees the contracts.

ASHLAND, KY. (MARCH 21) BUSINESS WIRE - Addington Resources Inc. (NASDAQ/NMS:ADDR), a Kentucky-based coal mining concern, Thursday reported higher revenues and lower earnings for 1989.

For the year ended Dec. 31, 1989 total revenues increased 12 percent from $220.8 million to $247 million in 1989, as tonnage shipped rose 8.5 percent to 6.5 million tons. Net income was $8.5 million, compared with $13.3 million in 1988. Net income per share declined from $1.12 in 1988

to 67 cents in 1989.

President, Larry Addington, said earnings declined in 1989 as compared to 1988 primarily because heavy rainfall caused flooding which disrupted coal production and highway construction in the first quarter of 1989, and a strike by the United Mine Workers against the Pittston Coal Co. hampered Addington's operations around mid-1989.

Production has since returned to normal as net income for the fourth quarter of 1989 increased to $3,544,210, or 24 cents per share, compared to net income of $2,230,860, or 19 cents per share for the fourth quarter of 1988. Net income for the fourth quarter of 1988 includes an extraordinary item of $706,049 to write-off capitalized financing costs.

''We're focusing closely on developing our coal mining and landfill businesses; and we expect 1990 to be a very productive year,'' Addington said.

Addington said the company is acquiring additional low-sulfur coal reserves in anticipation of increasing coal production in 1990 and beyond. Additionally, the company is investigating opportunities to develop environmentally superior recycling centers and associated landfills.

To concentrate on the coal and landfill business, the company sold its Addwest Gold Inc. gold-mining subsidiary in January 1990 for an estimated $20 million before-tax profit, as previously reported.

Addington Resources mines coal in Kentucky, West Virginia and Ohio and is engaged in contracting, highway construction operations and sanitary landfill development and operation. Its stock is traded on the NASDAQ National Market System under the symbol ADDR.

STATEN ISLAND, NY (MARCH 22) BUSINESS WIRE - Atlantic Express, Inc. (NASDAQ Symbol: ATEX) Thursday announced it has extended the expiration date of its Class C and Class D Warrants from April 1, 1990 to April 30, 1990.

The expiration date of the Class C and D Warrants was extended in order to allow Warrantholders the opportunity to consider the Company's previously announced Warrant Exchange Offer. The Warrant Exchange Offer, which will be made pursuant to the terms of a registration statement which the Company is currently preparing for filing with the Securities and Exchange Commission, will offer to holders of the Class C and Class D Warrants the right to exchange their warrants for new Class E Warrants at the exchange rate of two (2) Class C or two (2) Class D Warrants for each Class E Warrant.

The Class E Warrant will entitle the holder to purchase one (1) share of Common Stock for a price of $4.50 upon issuance through October 1, 1990

and at a price of $7.00 thereafter through March 30, 1992.

Atlantic Express, Inc. is one of the largest contract bus carriers in New York City with a fleet of 1,400 buses currently transporting approximately 65,000 school children daily. The Company also provides charter and commuter bus transportation services.

Atlantic Express, Inc. operates an entertainment division presently consisting of the Showplace Bowling Center and joint venture interest in a ten-plex theatre complex in Staten Island, NY and an upscale restaurant in Piscataway, NJ. The Showplace center encompasses a 64 lane bowling facility with computerized state-of-the-art equipment, an upscale restaurant, two cocktail lounges and additional retail space.

#90081b0747 03/22/1990 ~Business Wire

SOUTH PLAINFIELD, NJ (MARCH 22) BUSINESS WIRE - CREATIVE LEARNING PRODUCTS, INC. (NASDAQ:CLPI) reported Thursday that it has recently been experiencing significant cash flow problems. The Company attributed such problems primarily to (a) the uncollectability or slow payment of substantial receivables of its Jegou and Others Creative Advertising, Inc. (''J&O'') and Pentacle Communications, Inc. (''Pentacle'') subsidiaries, (b) a decline in sales and operating losses incurred by J&O and Pentacle for the six months ended February 28, 1990, and (c) increased expenses incurred in new product development, improving the packaging of the current Kards for Kids product line, obtaining a license for the Raggedy Ann (a) and Raggedy Andy (a) trademarks (as reported in the Company's Form 10-Q for the quarter ended November 30, 1989) and for advertising and marketing for the six months ended February 28, 1990.

Peter Jegou, Chief Executive Officer of the Company, stated that various measures have been or are being taken to address the situation. In addition to undertaking an accelerated program for the collection of its receivables, the Company and its bank are discussing a restructuring of the Company's long term debt, which was reduced from $1,546,000 as of November 30, 1989, to $1,274,000 as of the date hereof. The Company is diligently working with its financial advisors to obtain additional financing and is seeking a purchaser of J&O. The Company and its principal stockholders have listed for sale two of the three buildings in which the Company operates because the Company believes it can operate more efficiently and at less cost in a single leased facility.

Advertising and marketing expenditures have been substantially curtailed. The number of employees has been reduced from 41 as of November 30, 1989, to 23 as of the date hereof.

Jegou also stated that the Company expects to write-off approximately $350,000 of receivables and $100,000 of obsolete inventory of J&O and Pentacle for the quarter ended February 28, 1990.

Jegou added that the improved and expanded Kards for Kids product line was received with enthusiasm at the trade shows attended by the Company in February and as a result of Kards for Kids' previous sales and marketing efforts. From March 1, 1990 to the date hereof, orders in the aggregate amount of $105,000 have been received as compared with $9,800 for the comparable period in 1989. The majority of the orders for Kards for Kids products are from major financially responsible companies and government agencies with which the Company had previously done test programs or which are expanding their distribution of the Kards for Kids products.

Based upon the increased interest in the Kards for Kids current product line as evidenced, in part, by these orders and the significant expansion of the number of outlets through which such products are distributed, the Company anticipates a substantial increase in sales of Kards for Kids products during the six months ending August 31, 1990.

The Company develops, manufactures, markets and distributes, domestically and internationally, educational products for children including paper activity products, workbooks, stationery and early learning videos.

CREATIVE LEARNING PRODUCTS, INC. Common Stock, Units and Warrants are traded on NASDAQ under the symbols: CLPI, CLPIU and CLPIW, respectively.

(a) The name and depictions of Raggedy Ann, Raggedy Andy and all associated characters are trademarks of MacMillan, Inc.

BARTLETT, TN (MARCH 22) BUSINESS WIRE)--Brother Industries (USA) Inc., the Tennessee manufacturing subsidiary of Brother Industries, Ltd. of Nagoya, Japan, Thursday produced its one millionth American-made typewriter for the U.S. market.

The portable electronic personal typewriter - an AX-250 - which features automatic word-out and line-out - came off the production line at 10:30 a.m. Bartlett Mayor Robert Flaherty congragulated Brother employees and executives in a ceremony at the Brother facility, saying, ''This is a great day for all of us: Brother has been a great partner and good neighbor to Bartlett and we join in this celebration wholeheartedly.''

He added, ''This remarkable achievement stands as proof of both the vitality of Bartlett and of the commitment of Brother to Tennessee and the U.S.''

Len Gilley, administration manager of Brother Industries (USA) said, ''We at Brother are very proud of this achievement and we sincerely thank all of our employees and Bartlett friends who worked so hard to make it happen.''

Other local and state dignitaries attending the ceremony included: Charles Goforth, director of economic development for the City of Bartlett; Dr. T. Hacker, president of the Bartlett Area Chamber of Commerce; and B. Perry, executive vice president of the Memphis Area Chamber of Commerce.

Yesterday, in appreciation of community support, Brother personnel and Bartlett officials dedicated a Japanese garden that is under construction in downtown Bartlett.

The garden, which will be located on the north side of the new city hall, features a stone bridge from Brother's headquarters in Nagoya, Japan. The garden is being built from donations by Brother Industries Ltd., Brother Industries (USA) Inc., and Brother International Corp.

The AX-250 manufactured today is one of the latest portable electronic typewriters Brother is producing for the U.S. market. It features automatic underlining, centering and bold typing.

Brother Industries (USA) Inc. is the largest employer in the Bartlett area. Its sister company, Brother International Corp. (BIC) is the U.S. sales and marketing subsidiary for Brother and is based in Somerset, N.J.

VANCOUVER, B.C. (MARCH 22) BUSINESS WIRE - Energex Minerals Ltd. (TSE:

EGX; NASDAQ: EGEX.F) announces that effective March 31, 1990, Richard C. Atkinson has been appointed as president and chief executive officer to replace Victor H. Bradley who is resigning to pursue other business interests.

Bradley will remain a director of the company. The board wishes to express its thanks to Bradley for his contributions and leadership during the past six months.

Atkinson is a professional engineer with 25 years experience in the natural resource industry. Atkinson was a founding director of Energex and rejoined the Energex board of directors in November of 1989. He previously served as a director of Energex for 10 years and as president and chief executive officer of the company for five years.

The board has also appointed Christine Reynolds as corporate secretary, replacing Ilkka Erme, effective March 31.

Flaring during the past 90 days at the Beregeron No. 1 well located in Live Oak County, Texas, has established that the sand at 8,700 feet has a limited productive potential and, therefore, a decision has been made to attempt to sell the company's interest in the well.

NEW YORK (MARCH 22) BUSINESS WIRE - Republic New York Corp. announced Thursday that the Securities and Exchange Commission yesterday declared effective its registration statement for the offering of its common stock

to eligible depositors of The Manhattan Savings Bank in connection with the proposed conversion merger of Manhattan with Republic's wholly owned subsidiary, The Williamsburgh Savings Bank.

The Republic subscription offering prospectus and Manhattan's proxy statement are being mailed beginning today to the approximately 250,000 Manhattan depositors who will meet April 16 to vote on the proposed conversion merger.

All regulatory approval required in the proposed transaction have been received.

Under the terms of the agreement, Manhattan depositors can subscribe to Republic New York Corp. stock at the lower of $44.69 or market per common share.

The actual number of shares offered, which will depend on an independent appraisal of Manhattan's pro-forma market value and the price of RNYC stock, is expected to be approximately 4.5 million. Upon closing, the net proceeds of the stock offering will be contributed by Republic to the capital of its wholly owned subsidiary, The Manhattan Savings Bank, to be used to support its banking business and to protect its depositors' funds in the Republic tradition.

The conversion merger will result in an institution, with the name The Manhattan Savings Bank, with more than $6 billion in deposits, approximately $500 million in capital and 29 offices in Manhattan, Brooklyn, Queens and Nassau, Suffolk and Westchester counties.

Republic New York Corp., which also is the parent company of Republic National Bank of New York, had assets of $25.5 billion at the end of 1989.

#90081b0776 03/22/1990 ~Business Wire

CAMBRIDGE, MA (MARCH 22) BUSINESS WIRE - Lotus Development Corp. Thursday announced a new release of Lotus Magellan, the award-winning utility software for IBM, Compaq and compatible personal computers.

Since its release in April 1989, Magellan has offered PC users the ability to quickly find, view and use information stored on the hard disk of their DOS-based computers.

The new version adds a wide range of new tools that let users find information more quickly; compress files to free up more hard disk space;

recover deleted files; view a wider range of files, including graphics files; and check for possible file corruption due to a virus. In addition, Magellan 2.0 is fully customizable, allowing users to rearrange function keys or create additional menus to accommodate their individual needs.

''In our first release, we delivered an easy-to-use utility to find and view your files. In Release 2.0, we have added to that foundation all of the most useful utility functions without losing our intuitive user interface,'' said Will Reynolds, general manager for Magellan. ''Now users can get to needed tools like file compression, undelete, backup and compare while still viewing the very files they want to perform an operation on. Magellan is set apart from other PC utilities by its easy, intuitive access to your files and your information.''

Highlights of Magellan 2.0, scheduled to ship in April, include:

--Expanded Search Capability

Magellan 2.0 expands on its revolutionary index-based search technology that allows users to search an entire hard disk for files containing words or phrases in a matter of seconds. In addition, users can now look for exact text strings in smaller groups of files or on floppies without the aid of the index.

--File Compression

Magellan 2.0 incorporates PKZIP, the new industry standard for file compression. Users can select groups of infrequently used files, for example, and shrink them down to 50 percent or less of their original space. These ''zipped'' files can still be searched, viewed as if in their original format, gathered from, even printed, all without touching the compressed file on disk.

--Undelete

Users can now bring back accidentally deleted files at the touch of a function key. Unlike other utility programs, with Magellan a user can see a list of files that can be undeleted and actually view the contents of those files in their native format before deciding if a particular file is the one they're looking for.

--More Viewers, including Graphics

Magellan continues to lead the market in viewer technology, offering users the ability to see files from over 40 applications in their native format. Included for the first time are viewers for popular business graphics files (.PIC and .DRW formats) as well as files from scanners and other

imaging systems (.PCX and .GIF formats). Magellan can also search on text strings in graphics files or attached to image files, providing users with a state-of-the-art image database.

--File Integrity Checking/Virus Detection

Many users are worried about possible corruption of their program files by a virus. Magellan lets users select groups of files (.EXE and .COM files by default) to check for unauthorized changes. This verification can be done automatically at startup or at any time. And Magellan's foolproof method doesn't have to be updated each time a new virus strain is developed in order to detect its presence.

--Backup and Restore

Many users find today's backup programs cumbersome, and as a result they often neglect to protect all their hard work from accidental deletion or disk failure. Magellan's viewing environment provides users with two unique backup capabilities: the ability to view files about to be backed up and then execute backup in a single keystroke; and the ability to see the files on the backup disk, so the user can quickly find what he or she wants to restore.

--Fully Customizable

Users have virtually free rein to rearrange function key commands, as well as create menus and dialog boxes to reflect their preferences. Magellan automatically formats and sizes these custom boxes so that they appear as if part of the original product.

Lotus Magellan 2.0 runs on IBM and Compaq computers and certified compatibles. A hard disk and 512K system memory are required, as is DOS version 2.1 or higher.

The suggested retail price for Magellan 2.0 is $139. Current Magellan users are invited to upgrade for $39. Those wishing to upgrade may call 1-800-TRADEUP for more information and an upgrade kit.

Lotus Development Corp. is the leading developer of application software for personal computers and the leading provider of information services delivered on compact disc.

NOTE: All prices and terms are for the U.S.A. only.

#90081b0783 03/22/1990 ~Business Wire
LONG ISLAND CITY, NY (MARCH 22) BUSINESS WIRE - Recoton Corp. (NASDAQ:RCOT) Thursday announced results for the fourth quarter and year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989 net sales increased to $41,436,000, Recoton's highest yearly sales level to date, up from $39,709,000 in 1988. Net income for the year was $143,000 or 7 cents per share, compared to $861,000 or 40 cents per share in the prior year.

Net sales for the fourth quarter ended Dec. 31, 1989 were $13,290,000 as compared to $13,958,000 for the fourth quarter of 1988. There was a net loss of $150,000 or 8 cents per share in the current fourth quarter. In the fourth quarter last year, the Company reported net income of $453,000 or 21 cents per share. Results for the fourth quarter of 1989 include sales from Recoton's Calibron subsidiary, acquired in September, 1989.

The increase in revenues in the current year is primarily due to the addition of Calibron's sales and continued demand for the Company's line of over 1,000 consumer electronics products. In particular, sales of compact disc and telephone accessories rose during the year.

Net income in 1989 declined for several reasons. Economic conditions led to an industrywide slowdown at the retail level. Recoton responded by increasing expenditures for promotional activities, thus maintaining sales volume and market share. The company also experienced substantially higher bad debt losses due to the insolvency of various retail accounts.

In addition, in 1989 the company experienced extraordinary expenses relating to the unsuccessful pursuit of an acquisition, the phasing out of a subsidiary, and the integration of the two successful acquisitions the company consummated in the later part of the year.

Robert L. Borchardt, president, stated, ''Despite a slowdown in the consumer electronics market in 1989, Recoton achieved a modest increase in sales volume. We attribute this growth to several factors, notably Recoton's successful marketing strategy to provide the broadest line of consumer electronics accessories, including video, audio, home office, telephone and computer products. We introduced several new and innovative products in 1989 to meet the needs of consumers.

''They include a compact disc laser lens cleaner and several camcorder, fax and telephone accessory products. Production of several new products which we expected to begin in the third quarter was delayed to the end of the fourth quarter. These products, which include a state-of-the-art amplified TV antenna and Recoton's Plugaround wireless sound system, received coveted 1989 Consumer Electronics Engineering and Design awards. We have high expectations for sales of these products beginning in the first quarter of 1990.''

Commenting on two acquisitions made in 1989, Borchardt said, ''Acquisition of related companies continues to be an important part of our corporate strategy. In the third quarter, we completed the acquisition of the assets of Calibron, Inc., a manufacturer of stereo headphones and consumer electronic accessories. In addition to broadening Recoton's product offerings in the stereo headphone segment, Recoton is now expanding its U.S. manufacturing at the Calibron facility in Florida.

''In the fourth quarter, we signed an agreement to acquire the assets of All Channel Products, Inc., the manufacturer of the ''Rembrandt'' line of TV antennas and other related products. This acquisition closed at the end of December, 1989.''

Borchardt concluded, ''Recoton will aim to further its position as a leading electronics accessories manufacturer. This will be done through efforts to increase the company's market share at major retailers which offer a full line of accessories and through the development and introduction of innovative proprietary products to accompany and complement new hardware products as they become popular.

''At the same time, we will continue to seek acquisitions of companies that meet our criteria. While we expect that economic conditions in our industry will not improve this year, we are actively taking measures to make sure that the company maximizes its competitive position in the industry through this economic period.''

BUFFALO, NY (MARCH 22) BUSINESS WIRE - Goldome announced Thursday that it has finalized the sale of $390.6 million of securities backed by home equity loans originated by Goldome Credit Corp., the bank's Birmingham, Alabama-based consumer lending subsidiary.

The gain on the sale is in excess of $20 million and will be recorded in the first quarter.

''The sale is part of Goldome's ongoing business strategy and is one of a number of actions the bank will take during 1990 to improve its capital position,'' notes Thomas A. Cooper, president and chief executive officer of Goldome.

Cooper added that the sale will favorably impact the bank's first quarter and will allow Goldome to repay some volatile wholesale borrowings.

The securities, backed by fully amortizing home equity loans, carried a fixed interest rate rather than a floating rate and were rated Aa2 by Moody's Investors Service. The Securities were marketed through Bear Stearns.

Goldome is a consumer banking company with retail bank franchises in New York and Florida.

ATLANTA (MARCH 22) BUSINESS WIRE - Having recently announced plans to greatly expand its service between Los Angeles and San Francisco, Delta Air Lines (NYSE:DAL) Thursday revealed that effective June 1 it will operate hourly flights between Los Angeles and San Francisco from 6 a.m. through 9 p.m.

The new Delta service will feature 17 round-trip flights daily, providing more than 3,400 additional seats in the Los Angeles/San Francisco corridor.

''For a number of years our passengers have asked us to offer a frequent flight schedule between California's two largest cities,'' remarked Whit Hawkins, Delta's senior vice president, marketing.

''We're ready now with excellent new airport facilities in both cities, and our expanded service in the Los Angeles/San Francisco market will stimulate competition and provide the consumer with new options, which in our opinion is a very positive development for California travelers.''

Effective June 1, Delta will operate 105 daily flights from Los Angeles to 28 destinations, and will be offering more flights each day from Los Angeles International than any other airline. In San Francisco, Delta will operate 36 flights daily to eight destinations. In addition to the new Los Angeles and San Francisco service, Delta also begins its first daily nonstop flights between Los Angeles and the New York area on June 1.

''Our new California flights will combine Delta's unique quality of service with the added convenience of hourly flights,'' noted Hawkins. ''Our passengers have asked for quality service on this route and we intend to make it available,'' Hawkins said.

Delta has earned the distinction for the last 16 consecutive years of having the best record for passenger satisfaction among the largest U.S. carriers, according to the records of the U.S. Department of

Transportation.

Additionally, Delta was shown to have posted the best schedule reliability performance in the airline industry in a recent study by a noted security analyst with Salomon Brothers Inc. During the six years covered in the report, Delta was the only carrier to consistently complete 99 percent or higher of its scheduled flights.

PROVIDENCE, RI (MARCH 22) BUSINESS WIRE - David E. Henderson, chairman, president and chief executive officer of Outlet Communications Inc., announced Thursday that the company had completed the sale of television stations WATL-TV, Atlanta; WXIN-TV, Indianapolis; and radio stations WTOP and WASH-FM both of Washington, to Chase Communications of Hartford, Conn.

The net proceeds of the sale will be used to pay $84 million of existing bank debt and the balance will be used to satisfy approximately $10 million of outstanding obligations of the sold stations.

Outlet Communications Inc., a public company trading on the NASDAQ under the symbol OCOMA will continue to operate television stations, WJAR-TV, Providence, R.I., and WCMH-TV, Columbus, Ohio.

NORWOOD, MA (MARCH 22) BUSINESS WIRE - Phoenix Technologies Thursday announced, under an agreement signed earlier this month, that it is producing the complete software and documentation package that is being bundled with Netherlands-based Philips Consumer Electronic's new line of 386SX, AT, and XT desktop and laptop Personal Computer Systems.

Under the agreement, Phoenix's Technical Publishing Services Business unit is managing the manual printing, diskette duplication, and consolidation process. The package, which is customized for Philips, is currently available in French, German and English. The package consists of MS-DOS 4.01, MS-Works 2.0, several Philips-authored manuals and a variety of utilities and games for Philips' new PCD (desktop) and PCL (ultra-slim laptop) series of computers.

Philips joins a growing number of major OEMs that are using Phoenix's publishing service in Europe and North America.

''Our decision to use Phoenix was based on their proven experience as a full-service, high-quality turnkey documentation supplier,'' said Paul Streeter, business unit manager for Philips Consumer Electronics. ''Their program helped ensure that we were one of the first OEMs in the world to ship a branded version of Microsoft Works 2.0.''

According to Phoenix President Ron Fisher, ''We are pleased to be working with Philips to solve their documentation needs from the earliest stages of their launch into the computer systems market. It demonstrates how our unique Technical Publishing Services program can help manufacturers speed the process of bringing MS-DOS, Windows, OS/2, and other Microsoft products to market.''

Phoenix Technologies designs, develops, and markets systems software products for OEMs of personal computers, laser printers and workstations. Phoenix's turnkey OEM publishing program is a value-added service offered to Phoenix's ROM BIOS customers worldwide.

WASHINGTON (MARCH 22) COMTEX - Equitas Group filed a Form 8-K with the SEC stating on March 7, 1990 M.S. Finkel & Co., certifiying accountants for Equitas, delivered a restated financial statement to Equitas.

The restated financial statement is considerably different than that submitted by the company's board of directors for inclusion in its original Form 10 registration statement filed with the Securities and Exchange Commission on May 9, 1989.

The most significant change reflected in the restated financial statements are total assets in 1988 of $5,482,390. This reflects a decrease in total assets of $93,359,841 over the previous statement for the same period.

Equitas states in its 8-K filing that the considerable change reflected in the financial statements are due to the accounting changes and auditing changes of its certifying accountant to adhere to accounting standards and SEC rules and regulations. Equitas says the changes are not a result of a sale by Equitas of any significant assets.

The executive office of Equitas is located at 2929 South Maryland Parkway, Las Vegas, NV 89109 and its telephone number is (702) 734-3636.

WASHINGTON (MARCH 22) COMTEX - The 8-K report filed at the SEC shows on March 14, 1990, Micronetics inc. dismissed its independent auditors of the firm of Lazar, Levine & Co. On that same date, Micronetics employed the certified public accountants of Paul C. Roberts to audit its accounts for the fiscal year ended March 31, 1990. The change was approved by the company's board of directors.

For the previous two years, audits performed by Lazar, Levine & Co. contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

For the fiscal year ended March 31, 1989, however, the previous auditor's audit report did contain certain explanatory paragraphs expressing qualified opinions as to the uncertainty of the company's continuation as a going concern.

WASHINGTON (MARCH 22) COMTEX - The 8-K report filed at the SEC shows in a merger effective March 6, 1990, Winland Electronics Inc. subsumed Playtronics into itself. This was in accordance with a merger agreement between the companies dated Sept. 21, 1989 and amended Dec. 7, 1989.

Upon March 6, 1990, each common share of the no longer extant Playtronics was converted into a right to receive 0.3 shares of Winland. No fractional shares were to be issued under the merger. Instead, Winland agreed to pay Playtronics shareholders $0.375 per share for all fractional share remainders. Winland expects to issue 922,500 shares of its common stock to complete the merger.

The executive office of Winland Electronics is located at 418 South Street, Mankato, MN 56001, and its telephone number is (507) 625-7231.

WASHINGTON (MARCH 22) COMTEX - The 8-K report filed at the SEC shows on March 2, 1990, Somerhaven Corp. acquired all issued and outstanding shares of Forum Energy Corp. Somerhaven issued 8.27 million shares of common stock to Forum shareholders in exchange for the acquisition.

To facilitate the acquisition process, certain non-public shareholders of Somerhaven contributed to capital 313,000 units to Somerhaven for cancellation. Those units consisted of one class A warrant, one class B warrant and one common share each.

Forum Energy and its wholly owned subsidiary, Vapor Combustion Corp., own proprietary rights to a smelter technology.

As a result of the acquisition, certain Somerhaven executive officers and directors resigned.

The executive office of Somerhaven is located at 3070 Bristol Street, Suite 650, Costa Mesa, CA 92626, and its telephone number is (714) 241-1114.

WASHINGTON (MARCH 22) COMTEX - Citing the drop in the share of U.S. international bank assets from 22 percent in 1985 to 15 percent at the end of 1988, a top government regulator said today that structural reform of the entire domestic financial system is needed in order for U.S. banks to be able to compete and prosper on a global scale.

L. William Seidman, chairman of the Federal Deposit Insurance Corp., said that while market share is only one view of competitive strength, the FDIC

is concerned that a declining presence of U.S. banks in international markets "may signal an inability to compete as a result of the regulatory restrictions imposed on their activities."

In order to make the U.S. banking system more efficient and to meet the challenges of the international arena, Seidman is calling for the dismantling of the Glass-Steagall Act and the Bank Holding Company Act. The Glass-Steagall Act, enacted in 1933, imposed a partial separation between banking and securities activities and the Bank Holding Company Act of 1956 further limited the activities of bank affiliates.

The FDIC chairman believes these banking laws should be replaced with a system that provides regulation along functional lines. He cited several advantages to such a plan.

"Not only could banks affiliate with most corporate entities, but those corporate entities could own banks as well," Seidman told a House banking subcommittee. "Another benefit is that functional supervision eliminates costly layers of regulation and supervision. No other country has such a costly regulatory system imposed on their banks."

Seidman acknowledged the most important issue in restructuring the banking industry from the FDIC's perspective as the deposit insurer is the appropriate role of banking safety supervision in the evolving financial services sector.

"We believe this financial restructuring will result in more supervision, particularly for small banks," Seidman said. "This will minimize risk by reducing the kinds of activities deposit insurance can be used for."

Seidman envisions one scenario would involve banks using insured deposits for low risk ventures while high risk undertakings would only utilize uninsured funds. "A customer can choose an insured account and receive a lower rate of interest or select an uninsured account and get a higher return," he said.

With foreign banking institutions playing an increasingly important role in both U.S. and foreign markets, and European banks moving toward consolidation and expansion in anticipation of the 1992 European Community economic integration, Seidman said it is imperative that the U.S. financial system and its regulators think in global terms.

"Their (foreign) growing market share has increased largely at the expense of U.S. commercial banks," Seidman said. "The Glass-Steagall Act and Bank Holding Company Act restrictions limit the ability of U.S. banks to compete on both a domestic and global basis. "They must have the opportunity to compete on even terms with their international competitors."

BEIJING (MARCH 22) - Indirect trade between China and Taiwan is expected to grow by at least 4.4 percent this year over 1989 to breach the four billion U.S. dollar mark, a senior Chinese trade official has said.

An Min, head of the Taiwan trade relations office of the Ministry of Foreign Economic Relations and Trade, was quoted by the China Daily as saying Thursday that a "mainland upsurge" had hit Taiwan businessmen.

Mr. An said indirect trade is expected to surpass four billion dollars this year, up from 3.83 billion dollars in 1989, with a 2.4 billion dollar surplus in Taiwan's favor.

He added that in the last 11 years, trade volume totaled 11.7 billion dollars, with an annual growth rate of 46.6 percent.

"A new investment rush to the mainland is occurring in Taiwan," Mr. An said. He added that total contracted investment by Taiwan on the mainland, although still banned by Taipei, had exceeded one billion dollars in about 1,000 Taiwan-funded projects.

According to incomplete figures, China approved 539 Taiwan-invested projects last year alone with contracts worth more than 400 million dollars, he said.

According to Taiwan figures, about two-thirds of the investment has been in Fujian province opposite the island republic. Investors are attracted by cheap labor, a shared language and culture and Fujian's proximity.

JAKARTA (MARCH 22) - The Indonesian Textile Association (API) has urged the government to end an agreement with Washington regulating textile imports from Indonesia saying it has hampered export growth, the group's

spokesman said Thursday.

Textile trade between Indonesia and the United States should be regulated, at least temporarily, under the Multi-Fibre Agreement (MFA), the group's statement said after an executive board meeting Wednesday.

Indonesia has joined other developing countries to call for an end to the MFA saying that regulations on textile trade should be part of the new round of General Agreement on Tariffs and Trade (GATT) talks.

The API call came following a U.S. embargo this month on exports of men's jeans from Indonesia, automatically imposed under the bilateral agreement whenever exports of a certain category exceed the agreed limit.

API officials said several other categories were also on the verge of surpassing their limits.

A U.S. trade envoy was due to arrive here later Thursday to discuss MFA issues with Indonesian officials, according to the trade ministry.

Officials said cargoes belonging to seven exporters which were shipped before the embargo were now stranded in U.S. ports and would not be released until after the start of the new quota year on July 1.

The agreement allowed only a six percent annual increase in the exports of items subject to quotas.

SEOUL (MARCH 22) - South Korea has settled a dispute with the United States over the local beef market, heading off threatened trade reprisals by Washington, officials here said Thursday.

Officials of the Agriculture and Fisheries Ministry said Washington agreed to let up on its demand for Seoul to further open its beef market to imports, pending the outcome of a joint inspection of local cattle-raising farms.

On the other hand, South Korea agreed to increase its beef import quota by 4,000 tons every year until 1992, with 58,000 tons marked for this year. Quotas for the year 1993 and thereafter will be fixed through negotiations in July 1992.

The joint inspection will start in April and its results will be available in a year, they said.

The agreements were reached following three days of bilateral talks over

the liberalization of South Korean beef market that ended Wednesday in Washington, they said.

Washington promised it would not invoke Super Section 301 of the 1988 U.S. Omnibus Trade Act, under which the U.S. government can curb imports on products from any country deemed to be engaging in unfair trade practices, they added.

Washington had demanded that Seoul present a time-table for ridding its beef market from most of its import restrictions, threatening trade retaliation on South Korean products.

South Korea has rejected the U.S. demand, citing the weakness of its cattle industry, they said.

Seoul is also currently engaged in talks with Australia and New Zealand over beef imports.

The officials said the settlement would help strengthen Seoul's position in talks with the two other countries, which have rejected its call for a joint inspection of local cattle-raisers before presenting a liberalization plan.

South Korea last year imported 33,000 tons of beef from Australia, 12,000 tons from the United States, 2,900 tons from Canada and 1,550 tons from New Zealand.

#90081d2890 03/22/1990 ~French/German News Agency
WARREN, Australia (MARCH 22) - Australian sheep farmers are shearing their 165 million sheep aware that much of this year's wool clip will be stockpiled to keep up prices.

From a peak of 12 Australian dollars (9.04 U.S.) a kilo in April 1988, wool prices have crashed to 8.70 dollars (6.55 U.S.) this year.

They would have tumbled further without the reserve price scheme operated by the Australian Wool Corp., which will borrow up to 2.5 billion dollars (1.9 billion U.S.) this financial year to shore up prices.

Farmers in this western rural district of New South Wales are also battling a drought, high interest rates and a strong Australian dollar.

Further west many farmers are selling their land.

John Campbell, who runs more than 8,000 sheep on his property outside Warren, said he was hoping for a fall in the Australian dollar to help

boost wool returns.

"Sheep and wheat farmers around here are doing it tough because wheat prices are low as well," Mr. Campbell said. "High interest rates are hurting too."

The area around Warren was about to be declared drought stricken, he said.

Already farmers had sent out 50,000 sheep to wander the roads and stock routes in search of feed, Mr. Campbell said.

Farmers further west, in badly drought-affected areas, were taking drastic action with older sheep, he said.

"They are shearing them and shooting them on the (woolshed) board," he said.

As a hedge against falling prices, the Wool Corp. operates a scheme which involves buying enough wool to stop the price plunging below the present floor level of 8.70 dollars a kilo, and then storing the bales until prices rise.

A spokesman for Primary Industries and Energy Minister John Kerin said the government's decision to allow the Wool Corp. to borrow up to 2.5 billion dollars reflected the pessimistic outlook for wool prices.

Munich (MARCH 22) - The West German electronics giant Siemens said Thursday its world group turnover had increased by 16 percent so far in the 1989-90 business year, and profits had grown at approximately the same rate.

At the company's annual shareholders' meeting, Siemens chairman Karlheinz Kaske said that in the five months since October 1, turnover reached 24.6 billion marks (14.4 billion dollars), up 16 percent. New orders rose 12 per- cent to 28.7 billion marks.

''Post-tax profits have continued to develop favourably, which means at about the same pace as turnover,'' Kaske said.

He said Siemens expected new orders during the business year to go as high as 67 billion marks, surpassing last year's 62.9 billion, while turnover could reach 65 billion marks, compared to 61.1 billion marks in the 1988-89 year.

Singapore (MARCH 22) - Singapore companies are joining the rush to get a piece of the action in Eastern Europe amid the sweeping political and economic reforms there, East European officials said Thursday.

The latest venture involves the local conglomerate Haw Par Brothers International, which last month entered into a joint venture with Impex Metal of Poland.

The Singapore-based venture, called Singimpex, will help market metals such as copper and aluminium produced in Poland for distribution in Southeast Asia.

It was also learnt that asset trader United Industrial Corporation is currently studying a project to carry out refurbishment work on old hotels in Uzbekistan in the southeastern part of the Soviet Union.

Polish Commercial Counsellor Z.J. Cieslak described Haw Par's move Thursday as ''an example of growing co-operation between Singapore and Poland.''

Cieslak said another example was the planned visit in April or May by a Polish government delegation to Singapore to negotiate a double taxation treaty with local authorities.

The Soviet Trade Commissioner here, A.N. Nazarov, said his office had received several business proposals from Singapore businessmen following the visit of Soviet Premier Nikolao Ryzhkov to Singapore last month.

''Prospects for hotel and office construction in the Soviet Union are good '' Nazarov added.

LONDON (MARCH 22) - British wines and spirits group Guinness, which controls more than a third of the world whisky market, said Thursday its taxable profit rose 32 percent last year over the 1988 level to 691 million pounds (1.1 billion dollars).

Turnover was up 15 percent at 3.07 billion pounds (5.1 billion dollars) and the group announced a final dividend of 10.9 pence, taking the total for the year to 15.3 pence, up 33 percent on 1988's 11.5 pence.

The results were better than market expectations of profit of between 670 and 685 million pounds, and Guinness shares rose five pence to 675 in early trading in London.

More than 80 percent of the profit was realised outside Britain.

Guinness' 24 percent stake in French luxury goods and champagne group Louis Vuitton Moet Hennessy (LVMH) contributed 102 million pounds to the taxable profit figure.

Guinness said it planned to maintain its LVMH stake at its current level.

#90081d3330 03/22/1990 ~French/German News Agency

PARIS (MARCH 22) - French luxury goods and champagne group Louis Vuitton Moet Hennessy (LVMH) said Thursday its net profit rose 46 percent last year over the 1988 level to 2.9 billion francs (508 million dollars).

Consolidated turnover was up 19 percent at 19.6 billion francs (3.4 billion dollars).

Champagne and wines showed the largest sales for a single sector in the group, up six percent at 5.1 billion francs.

But the steepest rise in sales came in the luggage, leather and accessories sector, up 33 percent to 4.6 billion francs, followed by cognac and spirits, with sales up 24 percent at five billion francs.

The perfume and beauty products division showed a 19 percent rise in sales to 4.4 billion francs.

#90081d4450 03/22/1990 ~French/German News Agency

MAPUTO (MARCH 22) - Mozambique's mineral exports are targeted to reach a total of 4.5 million U.S. dollars in 1990, more than four times last year's level, it was announced here Thursday.

Minerals to be exported include coal, marble, gold, bauxite and worked precious stones.

In 1989 mineral exports totalled about a million dollars, only half the target for the year.

The country's total exports were around 100 million dollars, most of it from shellfish and cashew nuts.

Of the main minerals, production targets were only exceeded in the case of coal in 1989, with production of 62,000 tons at the Moatize coal mines in the northwestern province of Tete, 3.4 percent higher than planned.

Virtually all of the coal - 60,000 tons - was exported.

The ministry of mineral resources is considering closing, at least temporarily, the country's only copper mine, at Mundonguara, in the central province of Manica.

Only 419.9 tons were mined last year, against a target of 1,217 tons, and the copper reserves are nearly exchausted.

In addition there have been mechanical problems with mining equipment, and constant power cuts which have also slowed down production.

#90081d4540 03/22/1990 ~French/German News Agency
MUSCAT (MARCH 22) - Experts from 10 oil-producing states outside the Organization of Petroleum Exporting Countries gathered here Thursday to prepare for a meeting in Muscat Saturday with their OPEC counterparts.

Delegates, joined by representatives from Alaska in the United States and the Canadian province of Alberta, were to examine a report on short-term price trends on the world market prepared by the Omani Oil Ministry, the Omani News Agency reported.

Cooperation between members and non-members of OPEC is essential "not only to ensure economic stability for exporting countries but also that of importers and the world economy as a whole," said Rashad bin Khaled Barwani of the Omani Oil Ministry.

The non-OPEC states represented here are: Oman, Egypt, North Yemen, the Soviet Union, Norway, Mexico, Malaysia, Colombia, Angola and China.

There are 13 members of OPEC.

#90081d5330 03/22/1990 ~French/German News Agency
PARIS (MARCH 22) - The European auto industry would be at a serious disadvantage if it had to open its market tomorrow to Japanese cars, the president of U.S. auto giant Ford warned here Thursday.

Harold Poling said that the European Economic Community (EEC) must give the European industry time to adapt to the new market structure and to redeploy its capital before the market was thrown open.

Free trade was indispensable, but the trade must be fair, Mr. Poling said, adding that 1.6 million Japanese cars were sold in Europe last year, while only 160,000 European cars went to Tokyo.

World over-production on the auto market was likely to be in the order of 8.4 million vehicles this year, almost six million of them in the United States, and the danger was all the greater because Japanese makers were currently installing production capacity of some 200,000 vehicles a year in Europe.

The capacity of Japanese makers producing in Europe would pass the 1.5 million vehicle level in 10 years, leading to a drop in European production equivalent to the closure of a major European producer, he said.

#90081d5340 03/22/1990 ~French/German News Agency

BUDAPEST (MARCH 22) - The Soviet Union has agreed to pay in dollars the equivalent of Hungary's 800 million ruble trade surplus with Moscow last year, the foreign trade ministry said here Thursday.

Under the agreement reached after three days of trade talks here, the Soviet Union is judged to owe Hungary 720 million dollars, at a rate of 0.92 rubles to the dollar.

But Moscow will not pay the money directly to Hungary. It will instead be included in the bilateral trade accounts for 1991 - which will be denominated in dollars, and not in transferable rubles as has been the case in the past.

Hungary is expecting to show a trade deficit with the Soviet Union from next year.

Hitherto trade within the eastern bloc trading alliance Comecon has been denominated in transferable rubles, a unit of account rather than a real currency introduced specifically for this purpose.

The agreement reached Thursday also said that the Soviet Union would provide goods worth 3.7 billion rubles to Hungary this year, including three million rubles' worth of oil, natural gas and raw materials.

Hungary will supply Moscow with goods worth 3.6 billion rubles, 1.6 billion of that in machinery and 1.8 billion in food and consumer goods.

Last year, Hungarian exports to the Soviet Union totalled some 4.8 billion rubles.

#90081d6100 03/22/1990 ~French/German News Agency

BEIRUT (MARCH 22) - Lebanese Christian military leader Michel Aoun vowed Thursday to continue to fight for an "honorable settlement" after a year of battles have left almost 2,000 dead.

"The world can crush us but it will not obtain our signature," he said in an apparent reference to the Arab League's peace plan endorsed in September by Lebanese Christian and Moslem MPs meeting in the Saudi resort of Taif.

Gen. Aoun, who rejected the Taif accord because it failed to call for a Syrian military withdrawal from Lebanon, said on Thursday that he was determined to "fight for an honorable settlement."

He said he had received "negative replies" to his offer to negotiate with the country's Syrian-backed President Elias Hrawi, whose authority Gen. Aoun refuses because the president was elected under the Taif accord.

The general, who refuses to step down as head of a transitional government or give up the command of the army, launched a "war of liberation" last March against some 35,000 Syrian troops deployed over two-thirds of Lebanon.

At least 1,000 civilians were killed in the ensuing six months of fighting.

Latter clashes for control of Lebanon's Maronite Christian area, between the general and the Lebanese Forces militia, claimed more than 800 lives between January 31 and March 3, when a fragile truce took effect.

Gen. Aoun described efforts by a Vatican-sponsored mediation committee to secure a political settlement as "stupid" because they failed to solve Syria's presence in Lebanon, but said he would see the negotiations through.

The inter-Christian fighting was "not really a conflict between the LF and the Lebanese army" but resulted from the Taif accord, which the LF has never endorsed or opposed, he said. It was also the result of an "international plot to remove Christians from the region."

Gen. Aoun added: "We must help one another to surmount the difficulties, which are often psychological," but he accused Mr. Hrawi of putting financial and economic pressure on him and said: "it seems that the others want no peace, no war, no solution."

#90081d6130 03/22/1990 ~French/German News Agency

NUUK, Greenland (MARCH 22) - U.S. oil company Atlantic Richfield (ARCO) and AGIP of Italy said Thursday that they were abandoning their concessions in Greenland after five years of exploratory testing which has cost them 100 million dollars.

The tests revealed promising traces of hydrocarbons but the reserves were not big enough to ensure the profitability of drilling in an inhospitable high-risk region with high production costs, the two companies siad.

Local government chief Jonathan Motzfeldt described the announcement as "sad news" and said it was due to ARCO's financial problems and the fact that reforming Eastern Europe was proving more attractive at the expense of Greenland.

The news marks the end of a dream for Greenland that it would one day achieve economic and political independence from Denmark thanks to oil.

Mr. Motzfeldt said the decision meant that for the first time in 150 years there would be no mining or oil exploration going on in Greenland.

The lead and zinc mines at Maarmorilik in the west are to close in the next few months as the seams are exhausted.

The decision by the oil companies to pull out is all the more worrying as Greenland, an autonomous province of Denmark since 1979 with a population of 55,000 is currently suffering an economic crisis.

Income from fishing has plummeted and the province is only surviving thanks to a 2.5 billion kroner (384 million dollars) handout from the Danish government each year.

"We must find new sources of revenue," Mr. Motzfeldt said.

"We cannot live on fishing and seal hunting alone. It would be a huge lie to pretend otherwise to the people of Greenland."

Biologists are pessimistic about the future of shrimp and cod stocks, the two main maritime resources, and all political parties in Greenland have said they will seek other companies to continue the search for oil.

There is also a proposal to open a gold mine in Kangerdlugssuaq in the east, which is believed to contain reserves worth at least six billion kroner (923 million dollars).

#90081d6150 03/22/1990 ~French/German News Agency

MOSCOW (MARCH 22) - The Soviet Union is to issue a "serious warning" to Israel in the U.N. Security Council against settling Soviet Jews in the occupied territories, Deputy Foreign Minister Yuli Vorontsov said Thursday.

"Israeli plans to use immigrants, including those from the Soviet Union, to populate the occupied territories are at the center of the (Middle East) question because this increases tension in the region," he said.

Tass news agency quoted Mr. Vorontsov as adding at a press conference that "the Soviet Union planned to put forward an initiative in the U.N. Security Council to debate the illegal acts by Israel."

He said the move would constitute "a serious warning to Israel."

Mr. Vorontsov also said he favored having the Security Council adopt a "strict resolution" reminding the Israeli authorities of "the necessity of respecting international conventions and U.N. resolutions."

He said he favored "barring Israel from populating the occupied territories with people who don't live there."

Mr. Vorontsov also said that Moscow planned to take "new initiatives" concerning that Middle East but he did not elaborate.

"For the first time in many years, the conditions are favorable for moving towards a settlement in the Middle East," he said.

He said it was now up to "Israel to make a choice," adding that he hoped it would be "the right choice, in favor of peace."

The Soviet deputy foreign minister said the Soviet Union was maintaining "very close contact" with the United States on the question of reaching a settlement in the Middle East.

He said that the Soviet Union supports the plan drafted by U.S. Secretary of State James Baker for starting a dialogue between Israel and the Palestinians.

"It's a good idea to bring Palestinians and Israelis to the negotiating table," he said, cautioning that "it was only a start on a difficult path."

Concerning air links between Israel and the Soviet Union, he said direct flights by the Soviet carrier Aeroflot to Israel "would not begin in the near future because Israel and the Soviet Union do not have diplomatic relations and no agreement has been signed (on the flights)."

Mr. Vorontosov discussed the question of the settlement of Soviet Jews in the occupied territories with Arab ambassadors here Tuesday.

Israel has said repeatedly that immigrants, including Soviet Jews, are free to choose where they want to live, and that it does not have a formal policy of settling Soviet Jews in the occupied territories.

#90081d6190 03/22/1990 ~French/German News Agency

CAPE TOWN (MARCH 22) - Maverick South African policeman Lieutenant Gregory Rockman, whistle-blower and trade union pioneer, was fired Thursday, police said.

Lt. Rockman leapt to fame during last September's segregated general elections when he branded riot squad officers "wild dogs" for the way they broke up an anti-election demonstration on his beat in Mitchell's Plain Colored township near here.

He was later the star witness in an unsuccessful prosecution of the two officers who led the police charge against demonstrators including an Anglican Church deaconess who said riot policemen whipped her breasts.

Branding some of the police actions "despicable", magistrate A.S. McCarthy on October 12 aquitted the two officers, Major Charles Brazelle and Lieutenant David Roos, on the grounds that they could not be held personally responsible for the excesses of some officers during a legal police operation.

Despite support from South Africa's highest-ranking Colored policeman, Colonel John Manuel, Lt. Rockman was hauled up on disciplinary charges in December for breaking an order not to talk to the press and for refusing a transfer.

#90081d6220 03/22/1990 ~French/German News Agency

PARIS, March 22 (AFP) - A steamcracker operated by Shell Chimie in Berre, southeast France, is to be shut down until June following a leak of flammable toxic gas in February, the company said Thursday.

Shell said that the leak, followed by a fire rapidly brought under control,

took place on February 22. There were no victims. The company did not mention the incident at a March 8 press conference.

Shell said Thursday that the steamcracker had been immediately halted on February 22 and that it had decided to keep it shut down until mid-June for repairs and to determine the cause of the incident.

The shutdown is costing the company about five million francs (877,190 U.S. dollars) a day.

The Berre steamcracker is capable of producing 440,000 tons of ethylene and 220,000 tons of propylene a year, about 20 percent of France's total capacity.

Its closure has sent ethylene prices up from the equivalent of 470 U.S. dollars a ton to 538 dollars a tonne.

#90081d7280 03/22/1990 ~French/German News Agency
HARARE (MARCH 22) - Soviet Foreign Minister Eduard Shevardnadze arrived in Zimbabwe Thursday on the fifth leg of his first visit to Africa.

He flew in from the Mozambican capital of Maputo, where he held talks with President Joaquim Chissano.

The Soviet foreign minister, who has already visited Angola and Zambia as well as attending independence celebrations in Namibia, was met at Harare airport by Zimbabwean Foreign Minister Nathan Shamuyarira.

A spokesman for the Soviet Embassy here said Mr. Shevardnadze would meet Zimbabwe President Robert Mugabe Friday morning, and that their talks were expected to focus on peace efforts in the region as well as bilateral relations and reforms in the Soviet Union and Eastern Europe.

Mr. Mugabe, an avowed Marxist, is a mediator in attempts to end the civil

war in neighboring Mozambique where rebels of the Mozambique National Resistance (Renamo) are trying to toppple the Frelimo government, which has been backed by the Soviet Union since independence from Portugal in 1975.

#90081d7310 03/22/1990 ~French/German News Agency

WARSAW (MARCH 22) - The Polish parliament expressed its support Thursday for what it called "the just aspirations" of Lithuania, which proclaimed its independence from the Soviet Union 11 days ago.

A motion approved in a full session of the Polish parliament described the unilateral declaration of Lithuanian independence as "the natural consequence of the recognition that the Ribbentrop-Molotov pact is null and void."

The Soviet Union annexed Lithuania and two other Baltic states, Latvia and Estonia, in 1940 after the foreign ministers of Nazi Germany and Stalin's government, Joachim von Ribbentrop and Viatcheslav Molotov, signed a non-aggression pact including several secret protocols.

"We hail the return of the Lithuanian people into the family of free nations," the Polish parliament declared, adding that it hoped that "the reconstruction of an independent Lithuanian state will be quick and peaceful."

#90081d7400 03/22/1990 ~French/German News Agency
WASHINGTON (MARCH 22) - With Australian elections just two days away, U.S. President George Bush Thursday said he hoped to take up an invitation from Prime Minister Bob Hawke and visit Australia by the end of the year.

"I'm dying to go to Australia," Mr. Bush said, but he added, "the last thing I want to do is intervene one way or another in the Australian elections."

Polls there point to a close race between the Labor Party and a conservative coalition headed by Andrew Peacock of the Liberal Party.

Mr. Bush, who knows Mr. Hawke well, said he had no immediate plans for a visit.

The president was more cautious on the prospect of going on from Australia to New Zealand, embroiled in a dispute with the United States since Wellington refused five years ago to allow visits by nuclear armed or powered ships and Washington responded by freezing New Zealand out of a tripartite defense alliance with Australia known as ANZUS.

"I'd wait and see how events were at the time," Mr. Bush said of any visit to New Zealand.

"We've had some differences...and so I'll wait to see how that evolved. We have a strong affection for the people there...but I would take a look at where things stood at the time."

#90081d7560 03/22/1990 ~French/German News Agency
NEW DELHI (MARCH 22) - Indian Prime Minister Vishwanath Pratap Singh Thursday said he would adopt a "positive attitude" in recognizing the African National Congress (ANC) and vowed to support its leader Nelson Mandela.

The Press Trust of India (PTI) Thursday reported Mr. Singh as saying he had taken Mr. Mandela, the champion of the anti-aparthied movement, into his confidence and would study proposals to officially recognize the ANC.

Returning after independence celebrations in Namibia, Mr. Singh told reporters aboard his special aircraft that he had extensive discussions with Mr. Mandela in Windhoek and urged him to keep up the pressure on Pretoria.

"Irrespective of party differences and changes in government the policy of

India (towards South Africa) will continue (unchanged)," Mr. Singh was quoted as saying.

India has no diplomatic relations with South Africa, and the prime minister was leading a multi-party delegation at Windhoek.

"I assured him that our response will be like in the past," Mr. Singh said.

RIO DE JANEIRO (MARCH 22) EFE - Ninety people have been arrested for looting in Rio de Janeiro in the past 36 hours, as new economic austerity measures prompted layoffs and prevented Brazilian employers from paying workers, officials said Thursday.

Looters invaded 14 supermarkets in northern and western Rio early Thursday military police said. Forty-two suspects were arrested.

On Wednesday, nine stores were looted and 48 people were detained.

The pillagers were identified by authorities as slum-dwellers who lost their jobs or did not receive wages as a result of the austerity measures.

The austerity plan, decreed Friday by new President Fernando Collor de Mello, includes a 50,000-cruzeiro (dlrs 1,500) limit on withdrawals from bank accounts.

Some employers have failed to pay their workers or dismissed them to conserve operating cash.

But Civil Police Secretary Helio Saboya said some individuals were taking advantage of the situation to instigate the looting.

ANKARA (MARCH 22) XINHUA - TURKEY'S FOREIGN DEBT REACHED 41.2 BILLION U.S. DOLLARS AT THE END OF 1989, THE TURKISH "DAILY NEWS" REPORTED ODAY.

THE PAPER QUOTED TURKEY'S TREASURY AND FOREIGN TRADE DEPUTY UNDERSECRETARY MAHFI EGILMEZ AS SAYING THE RATIO OF TURKEY'S FOREIGN DEBT TO THE GROSS NATIONAL PRODUCT WAS 51.6 PERCENT AT THE END OF 1989.

"WE PLAN TO CUT THE RATIO TO SOME 44 PERCENT THIS YEAR," HE ADDED.

HE SAID THAT 403 MILLION U.S. DOLLARS WORTH OF FOREIGN MILITARY SALES DEBTS HAD BEEN CONVERTED INTO COMMERCIAL DEBTS.

HE SAID MILITARY BORROWING IS NOT INCLUDED IN DEBT ACCOUNTING FOR SECURITY REASONS.

CAIRO (MARCH 22) XINHUA - EGYPTIAN MINISTER OF DEFENSE AND MILITARY PRODUCTION YUSSEF ABU TALEB TODAY DESCRIBED THE MILITARY COOPERATION BETWEEN EGYPT AND SUDAN AS DEEP AND CLOSE.

FOLLOWING A MEETING WITH THE VISITING SUDANESE MINISTER OF STATE FOR DEFENSE AFFAIRS OSMAR MOHAMED AL HASSAN, TALEB SAID EGYPT AND SUDAN HAVE ALWAYS SUPPORTED EACH OTHER.

THE SUDANESE MINISTER OF STATE ALSO SAID COOPERATION BETWEEN THE TWO NATIONS' ARMED FORCES AND MINISTRIES OF DEFENSE WAS "FRUITFUL AND

SERIOUS."

AL HASSAN ARRIVED HERE TODAY ON A FIVE-DAY VISIT TO EGYPT. DURING HIS VISIT, THE SUDANESE MINISTER WILL HOLD TALKS WITH HIS EGYPTIAN COUNTERPART ON COOPERATION IN TRAINING AND EXCHANGE OF MILITARY EXPERTISE.

THE SUDANESE GOVERNMENT FORCES HAVE BEEN FIGHTING WITH THE SUDAN PEOPLE'S LIBERATION ARMY IN SOUTH SUDAN SINCE 1983, WHICH DEMANDS GREATER AUTONOMY AND ECONOMIC REFORM IN THE SOUTH.

EGYPT HAS BEEN TRYING TO MEDIATE A SETTLEMENT OF THE CIVIL WAR IN SUDAN BY HOSTING A PEACE TALK IN CAIRO. EGYPTIAN PRESIDENT HOSNI MUBARAK HAS ALSO HELD FIVE SUMMIT TALKS WITH SUDANESE LEADER OMAR EL BASHIR SINCE LAST JULY IN A BID TO BRING PEACE TO THE WAR-TORN COUNTRY.

HARARE (MARCH 22) XINHUA - ZIMBABWEAN FOREIGN MINISTER NATHAN SHAMUYARIRA SAID THIS EVENING THAT HIS COUNTRY WILL NOT SOFTEN ITS STAND AGAINST SOUTH AFRICA'S APARTHEID POLICY UNTIL APARTHEID IS DISMANTLED IN SOUTH AFRICA.

SPEAKING TO JOURNALISTS AT THE AIRPORT ON HIS ARRIVAL FROM WINDHOEK WHERE HE HAD ATTENDED NAMIBIA'S INDEPENDENCE CELE- BRATIONS, SHAMUYARIRA SAID: "WE WANT TO SEE MORE RESULTS IN SOUTH AFRICA."

HE ACCUSED THE SOUTH AFRICAN PRESS OF BEING HOSTILE TO ZIMBABWEAN PRESIDENT ROBERT MUGABE, SAYING THAT THE SOUTH AFRICAN PRESS HAD MADE UNFAVOURABLE SPECULATIONS ABOUT MUGABE'S ABSENCE IN NAMIBIA'S INDEPENDENCE CELEBRATIONS ALTHOUGH HIS COUNTRY HAD EXPLAINED THAT THE PRESIDENT FAILED

TO TURN UP BECAUSE OF A HEAVY SCHEDULE OF THE ELECTION CAMPAIGN AT HOME.

#90081k0070 03/22/1990 ~Japanese News Agency

TOKYO (MARCH 22) KYODO - HONDA MOTOR CO. SAID THURSDAY THAT IT WILL SELL IN JAPAN ITS 1990 MODEL OF U.S.-BUILT HONDA ACCORD CARS IN APRIL.

HONDA SAID IT WILL MARKET 12,000 TWO-DOOR ACCORD COUPE CARS WITH ENGINE DISPLACEMENT OF 1,997 CC IN FISCAL 1990 STARTING NEXT MONTH.

LAST YEAR, HONDA SOLD IN JAPAN MORE THAN 10,000 OF THIS MODEL, BUILT AT ITS U.S. PLANT IN MARYSVILLE, OHIO.

THE LATEST MODEL, DEVELOPED FOR THE U.S. MARKET BY HONDA R AND D NORTH AMERICA, IS LONGER AND HIGHER THAN CONVENTIONAL ACCORD COUPE. THE DISTANCE BETWEEN WHEEL AXLES IS ALSO LONGER.

RIGHT-HAND STEERING IS ALSO AVAIABLE IN THE NEW ACCORD. PRICES WILL RANGE FROM 2.61 MILLION YEN IN TOKYO TO 2.65 MILLION YEN IN OKINAWA.

TOKYO (MARCH 22) KYODO - JAPAN AND BRITAIN FAILED TO REACH AGREEMENT IN BILATERAL AVIATION TALKS WHICH ENDED HERE THURSDAY, JAPANESE OFFICIALS SAID.

THE TALKS, WHICH STARTED MONDAY, COVERED SUCH ISSUES AS AN INCREASE IN THE NUMBER OF FLIGHTS BETWEEN TOKYO AND LONDON OVER THE SOVIET UNION AND AN OPENING OF JOINT FLIGHT SERVICE BY JAPAN AIRLINES AND CATHAY PACIFIC ON THE SAPPORO-HONG KONG ROUTE.

THE TWO COUNTRIES WILL REOPEN TALKS PROBABLY IN MAY IN LONDON, THEY SAID.

-30- 632

#90081k0103 03/22/1990 ~Japanese News Agency

TOKYO (MARCH 22) KYODO - JAPAN AND THE UNITED STATES BEGAN TWO DAYS OF TRADE TALKS ON AUTO PARTS THURSDAY TO FOLLOW UP BILATERAL NEGOTIATIONS OVER U.S. PRODUCT-BY-PRODUCT ACCESS TO JAPAN'S MARKETS, GOVERNMENT OFFICIALS SAID.

THE TWO-DAY MEETING SEEKS TO ASSESS THE LEVEL OF PROGRESS MADE SINDE THE MID-1987 AGREEMENT ON JAPANESE IMPORTS OF U.S. AUTO COMPONENTS THAT RESULTED FROM SO-CALLED MARKET-ORIENTED SECTOR-SELECTIVE (MOSS) TRADE TALKS, OFFICIALS AT THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY SAID.

THE MID-1987 ACCORD DID NOT SPECIFY A TARGET FOR IMPORTS OF U.S. AUTO PARTS, BUT SOME U.S. AUTO PARTS MAKERS CLAIME THAT JAPAN'S AUTO PARTS MARKET IS CLOSED TO U.S. SUPPLIERS BECAUSE JAPANESE AUTOMAKERS PURCHASE PARTS MAINLY FROM THEIR AFFILIATES.

THE LATEST MEETING ALSO COMES AMID FEARS AMONG JAPANESE GOVERNMENT AND INDUSTRY OFFICIALS THAT JAPAN'S AUTO PARTS MARKET MAY BE CITED BY THE UNITED STATES THIS YEAR FOR POSSIBLE SANCTION AS AN AREA OF UNFAIR TRADE PRACTICES UNDER THE SO-CALLED 301 CLAUSE OF THE 1988 U.S. TRADE ACT.

DURING THE TWO DAYS OF TALKS, JAPANESE OFFICIALS WILL EXPLAIN TO THEIR U.S. COUNTERPARTS A PLAN TO OPEN AN OFFICE DEALING WITH COMPLAINTS ABOUT U.S. EXPORTS TO JAPAN, THE MITI OFFICIALS SAID.

THE JAPANESE WILL ALSO PROPOSE THAT U.S. MAKERS PARTICIPATE IN THE DESIGNING OF JAPANESE AUTO PARTS TO BOOST SALES OF U.S.-MADE AUTO PARTS HERE, THEY SAID.

THE TWO SIDES WILL ALSO DISCUSS JAPANESE EFFORTS TO IMPORT U.S. AUTO PARTS AND U.S. EFFORTS TO BOOST EXPORTS TO JAPAN, THE OFFICIALS ADDED.

OSAKA (MARCH 22) KYODO - SANYO ELECTRIC CO. THURSDAY ANNOUNCED THE DEVELOPMENT OF A SYSTEM CAPABLE OF REFRIGERATING UP TO 10 DEGREES C BELOW ZERO, USING A NEW HYDROGEN-ABSORBING ALLOY.

FIVE DEGREES C BELOW ZERO HAS BEEN THE LIMIT FOR REFRIGERATION USING CONVENTIONAL HYDROGEN-ABSORBING ALLOY SYSTEMS, OFFICIALS SAID. THE OFFICIALS SAID THAT THE NEWLY DEVELOPED SYSTEM WOULD PROBABLY BE UTILIZED IN A FEW MORE YEARS IN REFRIGERATORS AND AIR-CONDITIONERS.

THE NEW SYSTEM IS A CLEAN TYPE WHICH DOES NOT USE CHLOROFLUORCARBON (CFC). IT HAS THE ADDED BENEFIT OF BEING QUIET SINCE IT DOES NOT NEED A COMPRESSOR, THE OFFICIALS SAID.

THEY SAID THE ALLOY IS A BLEND OF RARE EARTH METALS. THE ALLOY ABSORBS HYDROGEN GAS UP TO 1,000 TIMES ITS CUBIC VOLUME AND ABSORBS ENERGY WHEN RELEASING THE HYDROGEN.

THE KEY TO THE NEW SYSTEM LIES IN FINDING THE OPTIMUM BLEND OF COMPONENTS IN THE ALLOY, THEY SAID.

#90081p0020 03/22/1990 ~PR Newswire

MENLO PARK, CA (MARCH 22) PR NEWSWIRE - Take to the skies to save the world in "Thunderbirds," Activision's newest title for the Nintendo Entertainment System (NES). With outstanding play control, detailed splash screens and secret power-ups, "Thunderbirds" is one of the best top-down flying games for the NES.

The "Thunderbirds" are members of the elite International Fighting Force, an organization that keeps the world safe for democracy. Mr. Tracy is leader of the "Thunderbirds," and together with his five sons, they take on missions around the world to seek and destroy their arch rival, Hood. Hood has demanded that the Thunderbirds relinquish control of their aircraft, vehicles that have been individually designed to navigate under ground or water, in the air and through outer space. If the "Thunderbirds" do not comply with his evil wishes within 60 days, Hood will generate a meteor shower from his secret power source and destroy the earth.

In Activision's "Thunderbirds," players become any of the five sons, navigating one of four aircraft to locate and destroy Hood's power source. Possible power source locations appear on a map of the world and the "Thunderbirds" are dispatched to destroy them. At each location, players must battle Hood's ruthless air and ground patrols in some most unforgiving terrain. The top-down view and vivid graphics allow players to blow the enemy away in true arcade fashion. Each battle gets progressively difficult, yet provides players with secret power-ups that

extend life spans, additional firepower for weapons and orbiter ships that help destroy the enemy. The elimination of each enemy location generates a graphic reward screen and brings the "Thunderbirds" closer to finishing off the villainous Hood.

This game is based on a 1970s television show of the same name, that featured marionettes and model aircraft. Activision's "Thunderbirds" will be available in September and is expected to retail at $39.95. Located in Menlo Park, Activision publishes video game cartridges for the Nintendo Entertainment System, Nintendo Game Boy, Sega Master System and Atari 2600/7800. Activision Video Games are distributed exclusively by MEDIAGENIC. MEDIAGENIC shares are traded under the NASDAQ (National Market System) under the symbol MGNC.

LOS ANGELES (MARCH 22) PR NEWSWIRE - Kaufman and Broad Home Corp. (NYSE: KBH), a major home builder and commercial real estate developer, today reprted higher revenues and earnings for its first quarter ended Feb. 28, 1990.

Net income rose to $13.3 million, up 16 percent from $11.5 million in the first quarter of 1989. Revenues totaled $315.7 million, up 70 percent from $185.6 million in the prior year's period. Primary earnings per share decreased 5 percent, to $.40 from $.42, as a result of the company's higher average common shares and common share equivalents outstanding in the 1990 first quarter.

Kaufman and Broad's single-family home building divisions, located throughout California, in the greater Paris, France, metropolitan area and Toronto, delivered 939 units in the first quarter of 1990, a 3 percent decrease from 970 in the first quarter of 1989. The average selling price for these units increased 18 percent, to $178,300 from $150,900 in the prior year's period. California deliveries in the 1990 first quarter

totaled 658 units compared to 674 in the 1989 first quarter.

The company's commercial development activities, all located in France, contributed $110.2 million to revenues in the 1990 first quarter, more than triple the $24.5 million reported in the 1989 first quarter. Significant revenue contributions from Atlantique Montparnasse and Washington Plaza, both major commercial office development joint ventures in Paris, accounted for most of the increase.

Looking forward, Kaufman and Broad's net housing orders during the first quarter of 1990 totaled 1,137 units, down 21 percent from 1,434 in the first quarter of 1989. At Feb. 28, 1990, the end of the first quarter, the company's residential backlog stood at $297.1 million, down 15 percent from $349.0 million in the prior year's period. During the first three weeks of March, however, net orders in California climbed 48 percent over the comparable 1989 period, increasing the company's backlog by more than $46 million.

Los Angeles-based Kaufman and Broad Home Corp. is the largest single-family home builder in California and the third largest in France. The company also develops commercial office properties and a variety of residential investment properties in the greater metropolitan Paris area.

CAMBRIDGE, MA (MARCH 22) PR NEWSWIRE - Florida State University and Thinking Machines Corporation today jointly announced the installation of the world's largest and most powerful Connection Machine R system at the Supercomputer Computations Research Institute (SCRI) at Florida State University. The configuration includes 65,536 parallel processors and 2 GBytes of main memory.

"For many scientific problems, the Connection Machine is the world's most powerful supercomputer, period," said Professor Joseph E. Lannutti, director of SCRI. "It will give our scientists a tremendous advantage in their research." The Institute was established in 1984 with U.S. Department of Energy (DOE) support. It has internationally recognized research programs in High Energy Physics, Geosciences, and Materials Science.

"We are dedicated to maintaining a world class research environment at F.S.U.," said Robert M. Johnson, vice president for research. "The Connection Machine enhances our research environment and keeps us at the leading edge of high performance computing."

Thinking Machines Vice President John Mucci said, "we are particularly pleased by the growing acceptance of the Connection Machine system by America's Supercomputer Centers. The Centers are in the vangard of where supercomputing is going in the 1990s."

Thinking Machines Corporation was formed to apply parallel processing techniques to the growing number of data-intensive computing applications encountered in business and science. Since announcing its Connection Machine R system in 1986, the company has grown to become the second largest supercomputer supplier in the U.S., with 10 percent of the world's installed base. Thinking Machines is headquartered at 245 First Street, Cambridge, Massachusetts 02142.

DAVIS, CA (MARCH 22) PR NEWSWIRE - Calgene Inc. (NASDAQ: CGNE) today

announced the appointment of Dr. William Knipe, formerly of Northrup King Co., to director of its Alfalfa Research Program. Robert M. Goodman, Calgene's executive vice president for research and development, said that "Bill Knipe's appointment is the culmination of an international search. We have been looking for top leadership.

Bill Knipe has one of the strongest track records in commercial alfalfa breeding, and is an outstanding leader who knows the business, the marketplace, and the crop."

Calgene's alfalfa breeding program extends to three research sites, all of which will be closely linked to the biotechnology effort at corporate laboratories. Calgene scientists already have successfully transformed and regenerated several alfalfa lines using recombinant DNA and tissue culture transformation techniques. Agronomically valuable traits are now being introduced into several high quality commercial alfalfa varieties from the company's breeding program.

The Calgene alfalfa breeding program supports the Plant Genetics Inc. alfalfa business that was acquired in June 1989 in the merger of the two companies. Phil Willsey, general manager of Plant Genetics and vice president of Calgene, commented, "The appointment of Bill Knipe signifies Calgene's strong commitment to the future of alfalfa research and development and the future of this important crop. We intend to maintain our dominance in western markets and establish a strong position in the Midwest with PGI(TM) alfalfas. Bill Knipe will be a key participant in executing our strategy."

Calgene is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. Crops marketed by Calgene's operating subsidiaries include alfalfa, canola (edible rapeseed), cotton, potato tubers, and tomato. Serving these markets are Calgene's operating subsidiary companies: Plant Genetics Inc., Ameri-Can Pedigreed Seed Co., Calgene Chemical, Stoneville Pedigreed Seed Co., and NobleBear Inc.

BALTIMORE (MARCH 22) PR NEWSWIRE - Chesapeake Bulk Stevedores Inc. announced that it has been hired by Federal Pacific Ltd., owner of the M/V Federal Rhine, to berth and unload the ship at Chesapeake's facilities at Sparrows Point, Md.

Andrew J. Colyer, executive vice president of Chesapeake Bulk Stevedores, said the Federal Rhine was originally destined for Philadelphia with a

cargo of iron ore briquettes that were to be delivered to Bethlehem Steel Corp. plants in Pennsylvania and Indiana. The ship was diverted to Curtis Bay in Baltimore after its cargo became ignited and began to burn slowly.

Colyer said the ship arrived at 10:30 p.m. Wednesday at a dock and unloading facilities that are leased by Chesapeake Bulk Stevedores from Bethlehem's Sparrows Point plant.

"The contents of one hold have been smoldering for several days," Colyer said, "and we are unloading it here to alleviate the problem." Unloading began at midnight, he said, and, by 9 a.m. today, about 1,000 tons had been successfully removed. Removal of the ship's cargo was expected to take about three to four days, Colyer said.

He said that a heavy clam shell bucket unloader is being used to remove the cargo, which is being placed on the ground and allowed to cool. The cargo will then transported by truck to railroad facilities.

CHICAGO (MARCH 22) PR NEWSWIRE - Navistar International Corporation (NYSE: NAV), and its principal operating subsidiary, Navistar International Transportation Corp., announced today a new organization structure to meet the competitive challenges of the 1990s, strengthen Navistar's focus on the medium and heavy truck business, and take advantage of growth opportunities in the mid-range diesel engine and service parts business. The changes are effective immediately.

James C. Cotting, 56, becomes chairman and chief executive officer of both Navistar International Corporation and Navistar International Transportation Corp. He has served as chairman and CEO of the parent company since April 1986.

Neil A. Springer, 51, is now president and chief operating officer of both companies. Springer previously was chairman and chief executive officer of the operating subsidiary.

Navistar's operating groups will report directly to Springer. The company's staff departments, including a new quality management position, will report to Cotting.

Other key assignments announced today include: Gary E. Dewel, 48, formerly vice president and general manager, parts operations, has been named group vice president, marketing, sales and distribution. Dewel will be responsible for these functions for both medium and heavy trucks and

service parts.

Mark D. Schwabero, 36, previously senior vice president, manufacturing, truck group, is now group vice president, operations, with responsibility for truck manufacturing, engineering, quality and reliability, materials management, manufacturing services, and first time yield.

Dennis Webb, 42, who has been serving as senior vice president, product and business planning, has been named group vice president, product and business planning. His expanded responsibilities include product planning, advanced product analysis, strategic planning, product development cycle, marketing research, long-range forecasting, process management, scheduling and sales analysis.

John R. Horne, 52, will continue to direct Navistar's diesel engine and foundry operations as group vice president and general manager. Horne previously was vice president and general manager of this unit.

Those Navistar executives reporting to Cotting include John J. Bongiorno, 52, now group vice president and general manager, financial services. He had been vice president and general manager and continues as president of Navistar's wholly-owned finance subsidiary, Navistar Financial Corporation.

Dean P. Stanley, 54, previously vice president, corporate technology, assumes additional duties as vice president, quality management and technology. With his expanded responsibilities, Stanley will focus on cross functional efforts throughout the company to improve the quality of Navistar's products, services, systems, and procedures.

Continuing in their present positions are: Robert A. Boardman, 42, senior vice president and general counsel of International Transportation Corp.; Roxanne J. Decyk, 37, senior vice president, dealer planning and development; John M. Sheahin, 47, senior vice president, employee relations and administration; and Robert C. Lannert, 50, vice president and treasurer.

And, Robert I. Morrison, 51, vice president and controller; John MacLean, 40, vice president, materials management; Michael Clayton, 43, vice president, international operations and development; Brian B. Whalen, 49, vice president, public affairs; George B. Stone, 54, director, internal audit; and Gregory Lennes, 42, corporate secretary for the operating subsidiary.

Navistar is the leading producer of medium and heavy trucks in North America and the worldwide leader in the production in mid-range diesel engines.

ALLENTOWN, PA (MARCH 22) PR NEWSWIRE - Robert A. Major, former senior vice president - Operations for American General Finance, Inc., has been elected president and chief executive officer of Chrysler First.

Major succeeds James M. Browne who retired from the company Feb. 1, 1990, after serving as president and CEO for 15 years.

In addition to his executive duties at Chrysler First, Major will serve as a member of the Chrysler Financial Corporation Board of Directors. He will report to John P. Tierney, chairman of Chrysler Financial.

Tierney described Major as a proven executive who has already made his mark in the consumer finance field.

"He brings an outstanding 18-year record of accomplishments to his new position," Tierney said. "We are very pleased to have him joining the Chrysler First executive team."

Major became senior vice president of American General Finance on June 1, 1988, when the company acquired Manufacturers Hanover Consumer Services, Inc. He had been executive vice president of Manufacturers Hanover Consumer Services at that time. At American General, he was responsible for 450 consumer finance and 180 thrift offices in the U.S. and Puerto Rico.

Major spent the first 15 years of his career in consumer finance with Household Finance Corporation, where he rose from management trainee to vice president and division general manager of the company's Household Retail Services subsidiary.

Born June 25, 1946, in Melrose, Mass., Major was graduated from New York University at Stony Brook in 1972 with a B.A. degree. He earned an M.B.A. from the Keller Graduate School of Management in Chicago in 1986.

From November 1966 to September 1969, Major served in the U.S. Army, attaining the rank of first lieutenant. His military service included a tour of duty in Vietnam from September 1968 to May 1969.

Chrysler First, one of four major operating units of Chrysler Financial, has 2,700 employees and 234 offices in the U.S. and Canada. Headquartered in Allentown, the company provides consumer financing, inventory financing to durable goods manufacturers, distributors and dealers, and secured commercial property loans. At the end of 1989, the company was servicing $7.1 billion in gross receivables.

HOUSTON (MARCH 22) PR NEWSWIRE - Granada BioSciences, Inc. (AMEX: GBI), a Texas-based biotechnology and genetic engineering company, today announced it has opened its first laboratory in the United Kingdom to produce cloned dairy embryos.

According to David G. Eller, Granada chairman, the facility is part of a five-year exclusive agreement with the Milk Marketing Board of the United Kingdom which is expected to generate revenues of approximately $135 million.

"This is the first venture to commercially employ Granada's advanced embryo technology," Eller said. "We expect to see similar opportunities developing in other parts of the world over the next 18 months."

The laboratory in Stamfordham, New Castle upon Tyne, is applying cloning technologies to bovine embryos of superior dairy genetics as the Milk Marketing Board seeks to improve the United Kingdom's dairy herds, Eller said. The contract calls for Granada to produce a total of 80,000 pregnancies from cloned dairy embryos with select genetics from U.S. and English purebred stock.

Granada BioSciences is the only company in the world capable of commercially producing bovine clones. Industry experts believe they have a two-year lead in this field.

The Milk Marketing Board is chartered by Parliament to manage the marketing of the country's milk and milk products. Government-owned, it is the fourth largest food company in Europe and the 50th largest business in the United Kingdom. The Milk Marketing Board is also the largest supplier of bull semen, insemination services and embryo transfer services in the United Kingdom.

The company has embryo transfer centers in Texas, California, Indiana, and Wisconsin. At Granada's Hanford, Calif., facilities the company has been cloning elite embryos from Holstein donor cows that are identified to be the genetically superior 1 percent of the breed, thereby producing identical copies of top milk producers.

Granada pioneered embryo transfer technology in the 1970s and extended its R&D activities to include cloning in the 1980s. The company produced the world's first cloned bovine triplets in 1986 and successfully produced eight identical calves from a single embryo in 1987.

HOUSTON (MARCH 22) PR NEWSWIRE - Tanknology Corporation International used the dedication of its new manufacturing and corporate headquarters facilities today to announce plans to substantially increase its fleet of tank testing units to meet one of America's greatest environmental challenges.

In the 18 months since it was established, Tanknology has become the largest underground storage tank (UST) testing company in the world. The company, which has six district offices around the country, as well as in Canada and Europe, owns a patented leak-detection technology and has structured itself as a full service company.

Last week VacuTect(TM), Tanknology's patented system, became the first to meet the Environmental Protection Agency's (EPA) new standards for tank testing systems. In fact, VacuTect scored 100 percent accurate in meeting EPA's criteria for leak detection according to a report published by MidWest Research Institute, a private contractor commissioned by EPA to develop acceptable protocols for tank testing systems.

EPA estimated that 10 to 25 percent of America's three-five million USTs are leaking, and that clean-up will cost nearly $70 billion.

"Tanknology is one of the finest examples of a sound solution to a very complex problem that I have ever seen," said Tony Coelho, former majority whip for the House of Representatives and newly elected member of Tanknology's board of directors. "Congress can pass all the environmental laws it want to, but it would be wasting its time if the know-how wasn't available to make these standards attainable."

"It's important to note that VacuTect is non-volumetric and is therefore not subject to the pitfalls which have plagued volumetric testing in the

past," reports Tanknology founder and president, Tom Bogle.

There are currently 31 testing units in operation full time, and the company plans to deploy additional units on a monthly basis, according to Robert Waltrip, Tanknology's chairman of the board. "Having our own manufacturing and training capability gives us the flexibility to expand at a rapid rate, given the continued overwhelming demand for this service."

Though a relative newcomer to the tank-testing business, Tanknology has already signed contracts with major oil companies, including Exxon, Chevron and Mobil, and major convenience stores such as Coastal Marts. The U.S. Army, U.S. Postal Service, and truck and bus rental fleets, as well as airports around the country are typical of Tanknology's customers.

#90081p0052 03/22/1990 ~PR Newswire

HANNOVER, WEST GERMANY (MARCH 22) PR NEWSWIRE - GE Information Services (GEIS), owner and operator of one of the world's largest teleprocessing networks, announced today at the Hannover Fair CeBIT'90 that its GEnie online information service can be accessed in three European countries -- Germany, Austria, and Switzerland -- via GEIS network services distributors.

The GEnie service, which became operational in late 1985, is one of the fastest growing online information services with more than 191,000 individual subscribers throughout the United States and Canada and in Japan.

Bill Louden, general manager of the GEnie service, said: "We are very pleased to be able to make local access to the GEnie service available for the first time in three European countries. This new local European access to the GEnie service, via our local distributors, is being provided in response to the many requests we have had from European PC enthusiasts."

The cost to access the GEnie service in these three countries will be $18/hour U.S. for non-prime time access and $27/hour U.S. for prime time access. The non-prime time rate applies to usage Monday through Friday from 6 p.m. to 8 a.m. local Europe time at the user's location, and all day on weekends and designated holidays.

The GEnie service offers PC enthusiasts a variety of online services, including access to news and information, business and financial services, travel services, shopping services, personal computing support areas, professional services support areas, reference information, communications

products, and both individual and multi-player games. Except for certain U.S. financial and shopping services, most of these services will be available to European subscribers to the GEnie service.

For further information on subscribing to the GEnie service in Germany, Austria and Switzerland, please call the following telephone number in Cologne, Germany: 02233 - 6091. For further information on subscribing to the GEnie service in the U.S. and Canada, please call 1-800-638-9636.

GE Information Services, a division of General Electric Company, USA (NYSE: GE), is headquartered in Rockville, Md., USA.

NOTE: GEnie is a service mark of General Electric Company, USA.

LAGUNA HILLS, CA (MARCH 22) PR NEWSWIRE - Advantage Life Products Inc. (NASDAQ: ADVT), retail distributors of CigArrest Smoking Cessation products and Smoking Alternative Gum, has announced that MGM Grand Air has decided to carry CigArrest Gum permanently on all flights to hand out to their smoking passengers.

CigArrest Gum has been tested on MGM since the Airline Smoking Ban went into effect Feb. 25 and has received tremendous response from smoking passengers. Ken Gann, vice president of customer service at MGM, remarked "Our customers have responded extremely well to the product in the first two weeks and we're planning to make it a permanent item on all flights."

Host, the largest operator of airport/hotel gift shops in the country, has agreed to carry CigArrest Gum in their more than 200 airport/hotel gift shops nationwide. The initial $50,000 order will stock Sea-Tac, Minneapolis/St. Paul, Ontario International and Anchorage International airports.

Complete Host distribution will soon expand sales to major terminals including JFK/New York, LAX/Los Angeles and Boston. CigArrest Gum is the only smoking alternative available to the 20 million per month smoking air travellers and is also carried in all W.H. Smith gift shops serving such major hubs as O'Hare, Atlanta, Kansas City, Pittsburgh, St. Louis and Las Vegas.

ROCHESTER, NY (MARCH 22) PR NEWSWIRE - Rochester Telephone Corp. announced today that it has completed the acquisition of the St. Croix Telephone Co. of New Richmond, Wis. St. Croix is Rochester Tel's fourth telephone subsidiary in Wisconsin and its 14th in the Midwest.

St. Croix Telephone serves about 5,300 access lines in a territory located 40 miles northeast of Minneapolis. It also owns New Richmond Cable, which serves 1,200 customers, and is a limited partner in a cellular operation in the Rural Service Area that includes its territory.

St. Croix will continue to operate as a separate company within the Rochester Tel organization, with no changes in operations or personnel planned.

Rochester Tel exchanged shares of its common stock for all the outstanding stock of St. Croix Telephone. No purchase price was disclosed.

With the addition of St. Croix, Rochester Tel now serves about 25,000 access lines in Wisconsin.

Rochester Tel's principal operating territory is a six-county area in Western-Central New York State. It operates four other telephone companies in New York, five in Pennsylvania, five in Illinois, three in Michigan and two in Indiana. Four other acquisitions, in Illinois, Wisconsin, Kansas and Alabama, are pending. When these transactions are completed, the company will be serving more than 650,000 access lines.

Rochester Tel also owns three unregulated subsidiaries: RCI Long Distance a regional long distance carrier; Rotelcom Network Systems, which provides competitive telecommunications equipment and services; and Rochester Tel Mobile Communications, which manages its Rochester cellular operation.

#90081p0059 03/22/1990 ~PR Newswire
NEW YORK (MARCH 22) PR NEWSWIRE - Slattery Group Inc., (NASDAQ: SGIB) announced today that the company will commence shortly a cash tender offer for all of its outstanding shares of common stock for $30 net per share in cash. There are 1,452,629 common shares outstanding.

The board of directors late yesterday approved the offer following the recommendation of a special independent committee previously formed by the board to consider various options with respect to the disposition of the company and/or its remaining assets following the sale in August, 1989 of its former heavy construction subsidiary, Slattery Associates, Inc. The special independent committee had retained Landeburg, Thalmann & Co., Inc. an independent investment banking firm, and independent counsel to assist it in evaluating such options.

As a result of the sale of Slattery Associates, Inc., the company was left with a substantial amount of cash and short-term investments and certain contingent assets and liabilities which may not be settled for a number of years. The board determined that the offer would present an attractive opportunity to the company's shareholders because, among other things, it would allow them to fully divest their interest in the company without having to wait a number of years for the company's contingent assets and liabilities to be settled. Among other things, in order to allow the other shareholders to fully divest their interest in the company, Getty Petroleum Corp., which owns approximately 40 percent of the common stock of the company, agreed not to tender any of its shares pursuant to the company's offer.

Kimco Development Corporation, which owns approximately 9 percent of the common stock of the company, and all of the company's officers and directors have indicated that they intend to tender all shares held by them pursuant to the offer.

Details of the offer will be available shortly. Bear, Stearns & Co. Inc. is the dealer manager and D. F. King & Co., Inc. is the information agent for the offer.

#90081p0062 03/22/1990 ~PR Newswire
NEW YORK (MARCH 22) PR NEWSWIRE - ICM Property Investors Incorporated (NYSE: ICM), a real estate investment trust, and Peter B. Bedford, the

president and owner of Bedford Properties, Inc., a prominent real estate development firm headquartered in Lafayette, Calif., jointly announced today that ICM Property Investors will acquire from Mr. Bedford a portfolio of industrial properties in a number of primarily Western locations with an aggregate value that could reach $30,000,000 or more. Through this transaction, the company will not only diversify its investment portfolio, but also increase its per-share cash flow.

Simultaneously announced was a separate transaction on March 21, 1990, in which Mr. Bedford purchased all of the outstanding stock of Investors Central Management Corporation, the privately owned, New York-based sponsor and investment manager of ICM Property Investors, retaining its personnel.

The agreement under which ICM Property Investors will acquire the properties provides that the company will purchase them for a combination of 1,000,000 newly issued shares of ICM Property Investors common stock and notes secured by purchase-money mortgages on the properties acquired. The values to be assigned to the stock and notes for the purpose of determining purchase prices will be mutually agreed upon by the company and Mr. Bedford, subject to an opinion from Merrill Lynch Capital Markets as to the transaction's fairness to the company's stockholders.

In the agreement, ICM Property Investors has also granted Mr. Bedford an option to buy the new shares for not less than $10.00 per share, payable in cash, subject to upward adjustment to comply with the fairness opinion. If Mr. Bedford exercises this option, the company will apply the proceeds to the purchase of the properties.

Mr. Bedford has given ICM Property Investors access to data on a significant portion of his portfolio of warehouse, light assembly, research and development and other industrial properties, from which ICM Property Investors will select specific properties for acquisition. The Mr. Bedford industrial portfolio is concentrated in the San Francisco Bay Area, but includes properties in the Los Angeles, Seattle, Portland (Ore.) Kansas City and other metropolitan areas.

Each property acquired by ICM Property Investors will be substantially or fully leased and will be currently producing cash flow. The acquisition price negotiated for each property will be subject to an independent appraisal, and in no case will the company pay more for a property than its appraised value.

CONTACT: Arthur W. Viner, chairman and president of ICM Property Investors, 212-986-5640; Patrice M. Kozlowski of Georgeson & Co., 212-440-9865, for ICM; or James Caudill, 415-984-6236, or Robert Polzoni, 415-984-6269, both of Ketchum Public Relations, for ICM.

LUMBERTON, NC (MARCH 22) PR NEWSWIRE -Southern National Bank's Trust Division is among the top performers in the country at managing equity funds, according to CDA Investment Technologies, Inc., a Silver Springs, Md. company that monitors investment performance.

The Lumberton, N.C.-based company ranked among the nation's best in 1989 in producing high returns on its employee benefit fund, an investment fund that consists of pension and profit-sharing contributions from North and South Carolina companies.

"I am extremely proud of our performance," said Phillip Floyd, director of Trust Services. "This is good news for our trust clients."

Southern National's 33.9 percent return in the employee benefit equity fund finished in the top 10 percent of all bank managed investment funds. The equity fund, which placed 30th out of 306 funds rated by CDA Investment, is part of the company's $360 million trust portfolio.

Stock selection for investment by the fund is based on major trend analysis, said Rees Jenkins, vice president and senior trust officer for Southern National's trust investment department.

"After a stock passes the fundamental screening, it is judged for its probability of advancing in the near future," he said. "We look at economic trends and invest in stocks we believe will have appreciation over the longer term."

Southern National (NASDAQ-NMS: SNAT), with $3 billion in assets, is the sixth largest bank holding company in North Carolina and the fifth largest in South Carolina. Its corporate network includes 142 branches in 72 cities across the Carolinas.

MT. HOLLY, NJ (MARCH 22) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) announced today its signing of an agreement with United Media and General Information Inc. for the world's first publication of the No. 1 national best seller "The World Almanac and Book of Facts" in hand-held electronic form.

"The World Almanac and Book of Facts" contains more than 1 million up-to-date facts plus comprehensive coverage of the year's leading stories. It provides a wealth of information ranging from election returns, economics, astronomy and entertainers to U.S. history, nations, vital statistics and sports. "The World Almanac and Book of Facts" has sold more than 52 million copies and is published by Pharos Books of

United Media.

"Publishing of 'The World Almanac' in electronic hand-held form reflects another milestone in Franklin's publishing program of making the most popular and successful reference works available in this new medium," said Marc Jaffe, executive vice president of Franklin's Database Acquisition & Development Group.

"Our ability to search the 'Almanac' by any word, phrase, subject or category will result in significantly expanded utility and richness for this already comprehensive work," said Jaffe.

David Hendin, publisher of "The World Almanac" and United Media senior vice president, commented, "We are delighted that 'The World Almanac' is going electronic with Franklin. This will take the world's bestselling almanac to a new level of usefulness."

Franklin Electronic Publishers Inc., formerly Franklin Computer Corp., is headquartered in Mt. Holly. Franklin, the creator and leader of the electronic reference product category, publishes a line of electronic dictionaries, thesauruses, phonetic spelling correctors, bilingual products and electronic bibles including the popular Spelling Ace(R), Wordmaster(TM), Language Master(TM), and new Spanish Master/ Maestro Ingles(TM), bilingual dictionary.

MORRIS TOWNSHIP, NJ (MARCH 22) PR NEWSWIRE - Allied-Signal Aerospace Company announced today that Time Air Inc., a Canadian regional airline, has selected the company's Bendix/King Traffic Alert and Collision Avoidance System (TCAS), for its fleet of 20 aircraft. Terms of the contract were not announced.

"Time Air has selected the Bendix/King TCAS system primarily for its excellent track record in product support, and for the ability of Time Air to service Bendix/King avionics in house," said Les Staite, Manager, Avionics/Electrical, for Time Air.

TCAS is a federally mandated collision avoidance system that operates independently of ground based radar stations. It informs pilots of the location of transponder-equipped aircraft in their vicinity, alerts them to potential threats and issues vertical course correction advisories if the situation warrants.

The federal government has ordered that all aircraft flying in U.S. airspace and carrying more than 30 passengers be equipped with collision avoidance systems by the end of 1993.

"With the Time Air contract Allied-Signal now has commitments for nearly 3,250 shipsets of TCAS equipment worldwide," said Robert M. Handley, director of marketing for the Bendix/King Air Transport Avionics Division in Ft. Lauderdale, Fla. "More than a dozen airlines around the world have announced their selection of our TCAS system, representing nearly 60 percent of the announced world market."

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive and engineered materials.

#90081p0075 03/22/1990 ~PR Newswire

DETROIT (MARCH 22) PR NEWSWIRE - The Sisters of Mercy Health Corporation (SMHC) has signed a letter of intent to sell Mount Carmel Mercy Hospital to The Detroit Medical Center (DMC), owner of seven local hospitals including Grace Hospital in northwest Detroit. This announcement was issued today in a joint statement by Michael J. Madden, executive vice president of the SMHC Eastern Michigan Region, and David J. Campbell, acting president of The DMC.

Operations and staff at Mount Carmel and Grace would be merged and the unified organization located in the Mount Carmel facility, Campbell said.

According to Madden, the decision to sell is based on the fact that northwest Detroit's population has declined and can no longer support four hospitals (Mount Carmel, Grace, Sinai and Providence). "This overbedded area resulted in decreased utilization of services," Madden said. "That, combined with sharp cuts in reimbursement from Medicaid and other payers, resulted in a $10 million loss at Mount Carmel last year."

Madden said that The DMC is committed to continuing many of the programs and services Mount Carmel offers the community. "We wanted to collaborate with a health-care system committed to serving northwest Detroit," he said. "The DMC intends to combine, rather than replace, our hospitals' services to ensure that the health-care needs of this community continue to be met. They are interested in preserving the programs that mean most to the people in this area.

According to Campbell, "Current plans are to have a management contract in place at Mount Carmel on July 1, and to transfer ownership by April 1, 1991.

Campbell said that Mount Carmel will need to be renovated to accommodate Grace's large obstetrics service before a relocation is completed. "The Mount Carmel site was selected because of its modern plant, which underwent renovations in the '70s and '80s," he explained.

Mount Carmel, located at Outer Drive and Schaefer, was built in 1939 and is licensed for 587 beds. It is owned by the Sisters of Mercy Health Corporation, which owns 18 hospitals in three states and is based in Farmington Hills, Mich. SMHC is a subsidiary of Mercy Health Services, one of the largest health-care systems in the nation and owned by the Religious Sisters of Mercy.

Grace Hospital, located at Seven Mile and Meyers, was opened as the northwest unit of Grace Hospital in 1942 and is licensed for 402 beds. It is part of The Detroit Medical Center, the largest health-care system in Detroit, which includes Harper Hospital, Hutzel Hospital, Children's Hospital, Detroit Receiving Hospital and University Health Center, Huron Valley Hospital and Rehabilitation Institute.

The DMC also has a network of ambulatory care centers and services in addition to extensive linkages to private medical staff practices, including Detroit Industrial Clinic, Memorial Medical Center, Woodland Medical Group and Hutzel Health Center.

TORONTO (MARCH 22) PR NEWSWIRE - Reuters today introduced Finance Link, a new software product that provides an easy-to-use and cost-efficient way for financial analysts and corporate financial managers to retrieve international market data for use with standard PC spreadsheet packages.

Developed by Reuters Historical Information Division, Finance Link offers PC access on a per-project or "ad hoc" basis to current and historical price data on some 120,000 instruments, including: equities, bonds, options, indices, mutual funds, foreign exchange rates, and money market interest rates.

Finance Link permits users to establish data requests off-line, using information directories at the PC level, before signing on to the Reuter database for data retrieval and downloading.

"Financial analysts at securities firms, banks and investment houses are seen as the key market for Reuter Finance Link," said David Keith, vice president/numeric products, Reuters Historical Information Division.

"However, we are also aiming Finance Link at corporations in which, typically, financial officers, strategic planners, and mergers and acquisitions managers require access to the kind of broad universe of market data that Reuters can provide, but whose need is on a daily, weekly or monthly basis rather than an instantaneous one," added Keith.

Finance Link, which runs on IBM(A) personal computers and compatibles, offers a variety of user-friendly features. These include: PRN, WKS, or WKI format spreadsheet downloading, error checking, help windows, PC-resident data directories of all security identifiers and descriptions.

Finance Link is available now in North America and will be made available later this year worldwide.

Reuters Holdings PLC (NASDAQ: RTRSY) supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 162 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of 1,268 journalists, photographers and cameramen. Reuters distributes information via some 199,706 video terminals and teleprinters, and directly into clients' computers.

DALLAS (MARCH 22) PR NEWSWIRE - EDS and American International Healthcare Inc. (AIH), a subsidiary of American International Group, Inc. (AIG), announced plans to jointly develop and market managed-care information systems for the health-insurance marketplace both here and abroad.

"Strategically this alliance represents the largest known wedding of resources between the information technology and managed health-care industries," according to AIH President Tom Ramey. "The information system we will market as a result of this union promises to have significant impact on the way that employers -- and perhaps governments -- choose to spend their health benefits dollars."

The foundation of the alliance is AIH's TOPPS(TM), an IBM-based multi-option processing system. TOPPS processes insurance claims for group health insurers, preferred provider organizations (PPOs) and health maintenance organizations (HMOs).

TOPPS will provide an analytical framework for studying costs associated with using particular providers, the type and frequency of procedures performed, and the patients' use of services. In this manner TOPPS enables employers and other groups to evaluate and manage health- care dollars.

In 1989, U.S. employers paid an average of $2,748 per employee to provide health benefits, a rise of 16.7 percent over 1988, according to a widely cited survey conducted by the consulting firm of A. Foster Higgins & Co. Many industry observers believe the managed health-care- delivery system to be the key to effective and long-term health- insurance cost

containment. These initiatives translate to reductions in health-insurance costs for both employers and employees.

"Not only does an alliance with EDS provide AIH with desired resources to fully develop, market and support the system for the managed care market," said Bob Waid, president, EDS Health and Benefits Division, "but it positions EDS firmly in the global managed health-care information-technology market. An enhanced TOPPS will supplement EDS' current product offerings and will be especially attractive to HMOs."

Under the agreement, EDS will support both existing and new customers and provide system maintenance and enhancements after TOPPS is complete.

AIH's international activity includes Europe, the Middle East, Southeast Asia, the Far East and the Caribbean. Its current customers include national governments, international insurance companies, and private health plans among others.

Based in Rockville, Md., AIH is an international managed health care and consulting company which is wholly owned by AIG. AIG is the leading U.S.-based international insurance organization and the nation's largest underwriter of commercial and industrial coverages. AIG reported 1989 revenues of $14.2 billion.

EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

DETROIT (MARCH 22) PR NEWSWIRE - Blue Cross and Blue Shield of Michigan (BCBSM) took an important first step toward rebuilding its financial strength by restoring an estimated $250 million to reserves in 1989, while cutting operating expenses for the second straight year, President and Chief Executive Officer Richard E. Whitmer announced today.

At the same time, Whitmer reported that current rate increases are at their lowest levels in three years for many customers, especially small business owners.

"We still have a long way to go before we reach full financial strength, but BCBSM has made substantial progress in the past 12 months," he said.

He cited two examples:

-- Underwriting of health-care claims produced a financial gain for the first time in six years -- $206 million in 1989.

-- Net investment and other income of $65 million was a record. Total reserves were only $29 million at the beginning of 1989 as the company came out of a financial downturn.

"Our reserves are now at $279 million, but they still are nearly 30 percent below the target level of $391 million based on the formula in state law that governs us," Whitmer said.

"Additions to reserves will slow down this year. We expect them to be approximately $93 million," he said.

Year-end information given the board of directors on Wednesday indicated that 1989 net operating expenses for BCBSM and its Blue Care Network of health-maintenance organizations (HMOs) were down nearly $21 million on top of more than $40 million in reductions in 1988.

Administrative cost controls were an important factor in increasing reserve levels and maintaining a competitive position in 1989, but cuts can only go so deep, Whitmer said. Expenses are expected to increase this year.

Whitmer reported that current rate increases for most employer groups are running under 10 percent after two years of near or above 20 percent.

The BCBSM board of directors voted Wednesday to dissolve Health Service Company, the holding company which coordinated the Blue Care Network of health-maintenance organizations. This will allow BCBSM and its HMOs to offer customers the benefits of more efficient administration, enhanced marketing and better integration of products, programs and policies.

#90081p0083 03/22/1990 ~PR Newswire

DALLAS (MARCH 22) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) is a partner in a North Sea gas well that tested at a combined rate of 41 million cubic feet of gas per day (MMcf/D) and nearly 2,700 barrels of condensate (BCPD) from two zones in the Kilda Field.

The appraisal well No. 16 on Block 16/26 encountered a greater pay zone,

reduced water saturation and improved rock properties in this Lower Cretaceous reservoir. These results improve considerably the reserve outlook and economic potential of the Kilda Field. The well flowed 22 MMcf/D and 1,750 BCPD from the lower zone and 19 MMcf/D and 1,900 BCPD from the upper zone. In each case the flow rates were limited by the capacity of the test string. The Kilda Field was discovered in the mid-1970s. Additional wells are expected to be drilled to further appraise the field's potential before the partners make a development decision.

Oryx U.K. Energy, a wholly owned subsidiary of Oryx Energy Company, holds a 15.50 percent working interest in Well No. 16. Chevron U.K. Limited is the operator with a 33.17 percent interest; eight other companies have the remaining working interests.

Also contained on the block is the Alba Field, an oil field in the shallower Eocene reservoir. The Alba Field was discovered in 1984 and is at a late stage of appraisal.

Dallas-headquartered Oryx Energy is the largest independent oil and gas producer in the world, with assets in excess of $5 billion and proved oil and gas reserves of more than one billion equivalent barrels.

#90081p0087 03/22/1990 ~PR Newswire

PALO ALTO, CA (MARCH 22) PR NEWSWIRE - John Zarras has been named vice president-system operations for Emery Worldwide, responsible for all aircraft, line-haul trucking and U.S.-based hub operations for the company.

In the newly created position, Zarras, 50, oversees Emery Worldwide's fleet of 98 cargo aircraft and more than 100 line haul trucks, as well as international sortation hubs in Dayton, Ohio; Westover, Mass., and Poughkeepsie, N.Y. Zarras is based in Dayton.

The new position brings together for the first time all of these transportation operations under one executive. According to Donald G. Berger, president of $1.2-billion Emery Worldwide, that consolidation will enable the company to streamline its international delivery system.

Under the "Schedule Integrity" program, launched in January, Emery Worldwide has revamped its flight schedule to free up airplanes for reserve duty, eliminating rerouting of aircraft.

Before assuming his new post, Zarras, a 28-year industry veteran, was

Emery Worldwide's vice president-freight operations from April 1989 to the present. He directed operations at the company's "Starbase" hub in Dayton as well as Emery's hub in Indianapolis, as part of its Express Mail and Priority Mail contract with the U.S. Postal Service. The operations of both hubs are included in his new position.

Zarras joined CF AirFreight, the former subsidiary of Consolidated Freightways, Inc., in 1987. He headed CF AirFreight's Indianapolis hub before moving in April 1989 to Dayton following the merger between CFAF and Emery Air Freight Corp.

Emery Worldwide delivers any size or weight shipment -- including envelopes, parcels and heavy freight -- to any business address in the world. The carrier provides same day, next day a.m. and p.m., and second day delivery in the United States and Canada, and door-to-door and airport-to-airport service for international shipments.

Emery Worldwide, based in Palo Alto, is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4-billion diversified transportation company with businesses in long-haul and regional trucking, air freight ocean container freight and intermodal rail service.

CONTACT: Jim Allen of Emery Worldwide, 415-326-1700, or Will Thoretz of Manning, Selvage & Lee, 212-213-7175, for Emery Worldwide.

NEW YORK (MARCH 22) PR NEWSWIRE - The New York Times Company Magazine Group announced today the formation of a new advertising sales and marketing unit. It will offer advertisers marketing partnerships through innovative group buys and value-added access to the group's magazine, book and video products.

The new unit will focus initially on the development of special marketing opportunities with the group's women's magazines: Family Circle, McCalls's, Decorating Remodeling, Child, and the Family Circle Great Ideas series. These magazines reach over one-third of all adult women in the nation.

William T. Kerr, president of The New York Times Company Magazine Group, announced the unit will also create alliances and added-value opportunities by linking advertisers with other magazines in the Magazine Group, including sports and leisure publications aimed at the upscale male audience. The unit will work with The Times Company newspapers and television stations to create multimedia packages to support advertisers' marketing objectives.

Kerr said the responsibility for managing the advertising sales and marketing unit has been assigned to Charles H. Townsend, president and chief operating officer of The Family Circle, Inc.

Townsend, in turn, announced two key appointments related to the unit. Harry Myers, 58, will direct the new initiative as group vice president of advertising sales and marketing. Myers most recently served as president and publisher of Scientific American magazine. He has been group publisher for Knapp Communications Corp.'s Architectural Digest, Home, Geo, and Bon Apetit, and publisher of Meredith Corporation's Apartment Life/Metropolitan Home.

Helen Seligman, a former senior vice president and director of media services at McCann-Erickson in Detroit, will be a director of advertising sales and marketing. Most recently, she has been a consultant to the magazine group.

The New York Times Company magazine group publishes Family Circle; McCall's; Decorating Remodeling; the Family Circle Great Ideas series; Child; Golf Digest; Golf Shop Operations; Tennis; Tennis Buyer's Guide;

Cruising World; Sailing World; Snow Country; Golf World; Golf World (U.K.); Golf World Industry News (U.K.); Golf Illustrated Weekly (U.K.), and Golf Digest Sverige (Sweden).

CHICAGO (MARCH 22) PR NEWSWIRE - Robert B. Covalt, president of Morton International's (NYSE: MII) specialty chemicals group, today announced a reorganization of the company's adhesives and coatings business as a result of its pending acquisition of Whittaker Corporation's adhesives and coatings business.

The coatings businesses of Morton's and Whittaker's will be combined under Stephen A. Gerow, who is joining Morton as executive vice president -- coatings. Gerow had been group vice president of Parker Amchem, a division of Henkel.

Robert J. Currell, presently vice president marketing and product development for Whittaker's coatings business, will join Morton after the Whittaker transaction closes and become senior vice president for Morton Industrial Coatings, the former Whittaker coatings business.

Dieter W. Jungclaus will be joining Morton as vice president in charge of the powder coatings business. Jungclaus had been a division general manager with Lord Corporation.

Thomas S. Russell will be executive vice president -- adhesives, with responsibility for all packaging and industrial adhesives, including Whittaker's adhesives when the transaction is completed. Russell is presently corporate vice president of administration.

William T. Schram, currently vice president finance and administration for the specialty chemicals group, will become senior vice president with responsibility for advanced materials, water based polymers and thermoplastic polyurethanes. Schram's promotion will be effective later this spring.

Russell and Schram are assuming Neal G. Reddeman's operating responsibilities. Reddeman will continue as executive vice president of specialty chemicals performing special assignments until his retirement.

Also promoted at this time is Edward F. Waszak to senior vice president for engineering, safety, health and environmental activities within the specialty chemicals group.

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

MURRAY HILL, NJ (MARCH 22) PR NEWSWIRE - The BOC Group today announced plans to place BOC Health Care and its existing businesses -- Anaquest, Glasrock Home Health Care, Ohmeda, and Viggo-Spectramed -- into a separate management and legal entity.

The organizational changes were made in part to redirect an dstrengthen management focus in the more rapid growth of the health care business worldwide.

The BOC Group plans to accomplish these steps over the next 12 months and expects this to lead it to seek a public market in the equity of its health care activities as business and stock market conditions exist.

The management team for BOC Health Care, Inc. will be based in Murray Hill. Desmond O'Connell Jr., formerly group managing director of The BOC Group, has been appointed president and chief executive of BOC Health Care Inc. He will relocate from Britain to the United States and relinquish his other operational responsibilities within the group.

W. Dekle Rountree Jr. will continue as executive vice president and is appointed chief operating officer. The four division presidents will continue to report to him.

"Establishing BOC Health Care as a separate entity within The BOC Group will enable us to be more vigorous in our pursuit of growth, both from within and through acquisitions, joint ventures, and other alliances," explained O'Connell.

BOC Health Care, Inc., through its group of companies, manufactures and markets a variety of critical care products and services worldwide. Its equipment, therapies, and pharmaceuticals are used in operating and recovery rooms, intensive care units, and private homes. Each of its four health care businesses -- Anaquest, Glasrock Home Health Care, Ohmeda, and Viggo-Spectramed -- is a market leader.

The BOC Group -- based in Windlesham, England, and Murray Hill -- is an international corporation with operations in more than 50 countries around the world. Its principal businesses are industrial gases, health care products and services, and high vacuum technology. The BOC Group's other businesses include Airco, Transhield, and Edwards High Vacuum.

TROY, MI (MARCH 22) PR NEWSWIRE - Ovonic Imaging Systems, Inc. ("OIS") (OTC: OVONC) announced today that it has granted a license to a major electronics company for its amorphous silicon scanning sensor technology which can be utilized in facsimile machines, document scanners and other imaging applications.

Under the terms of the license agreement, OIS granted a worldwide royalty-bearing, nonexclusive license to the electronics company for manufacture and sale of amorphous silicon sensors. OIS is hopeful that the royalty payments will be meaningful, but there can be no assurance as to the expected return to the company. The license agreement also provides for an initial payment of several hundred thousand dollars, which has already been received. In addition, OIS received $1 million in 1986 pursuant to an earlier agreement which under certain conditions may have been reimbursed. The new agreement reduces this obligation to $150,000.

Dr. Zvi Yaniv, OIS president, stated, "OIS' main focus is on the development of its active matrix liquid crystal flat panel display business. However, our sensor technology has considerable potential which we intend to realize by working with other companies."

OIS is developing its proprietary display technology primarily for avionic and military applications and is also continuing its joint development of commercial liquid crystal color television displays with Samsung Electron Devices Co., Ltd.

OIS develops electronic displays and scanning systems. Currently, OIS is focusing its proprietary display technology on avionic and military applications in order to become a leading U.S.-based manufacturer of flat panel displays.

MILWAUKEE (MARCH 22) PR NEWSWIRE - Value Merchants, Inc. (NASDAQ-NMS: VLMR), formerly Wisconsin Toy Company, Inc., Milwaukee- based toy wholesaler and operator of Toy Liquidators, Toys Unlimited and Everything's A $1.00 retail stores across the United States, announced today that it had achieved record sales and profits for both the fourth period and fiscal year which ended Feb. 3, 1990.

The company recently changed its fiscal year end from Feb. 28 (29) to the Saturday ending closest to Jan. 31 of each year. Prior period financial results have therefore been restated to reflect this change.

The firm stated that fourth period revenues were $33,290,000 compared to $18,912,000 for the same period for last year. Net income for the period was $3,342,000 or $0.68 per share, compared to $1,843,000 or $.40 per share last year.

For the 1990 fiscal year which ended Feb. 3, 1990, Value Merchants Inc. announced net sales of $72,851,000, a new high and a 39 percent increase when compared to the $52,586,000 achieved in the restated fiscal year ended Jan. 30, 1989. Fiscal 1990 net income was $4,348,000 or $.92 per share, both new records, compared to $3,598,000 or $.77 per share for the restated fiscal 1989.

In making the announcement, Chairman of the Board Phillip Cohen and President Steven J. Appel stated that the results were a fitting start for the newly named company and represented a gratifying completion of the firm's stated fiscal growth and profit plans for the 1990 fiscal year. "We had a successful year. We added 28 toy stores; acquired Everything's A $1.00; had successful results at Heck's Department Stores, where we provided toys for the Christmas season; we initiated the Christmas Only Stores with excellent results; and we brought in a new chief operating officer. We have also changed our name to more accurately reflect the national scope of our business and the expansion of our retail operations

to include a wide variety of merchandise provided at substantially reduced prices," Cohen and Appel stated.

The company restated its intention to open 29 new toy stores in fiscal 1991 in geographic areas where there is strong economic growth and where it has experienced high store sales in its existing stores. In addition, it has plans to open 34 new Everything's A $1.00 stores in regional outlet malls primarily in the southeast and southwest.

"The future of Value Merchants Inc. will be based on providing value to the consumer and utilizing our experience and our understanding of the fundamentals of the marketplace. We believe we are financially strong, deep in management, relevant in the marketplace, committed to service, staffed by quality employees, growth oriented and profit motivated," Appel stated.

BOULDER, CO (MARCH 22) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL) the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today announced encouraging results of recently completed in vitro testing of its anti-cancer BRM, ImuVert(R).

In a comprehensive series of investigations undertaken by a private California firm, ImuVert was evaluated in a human tumor-based assay system.

The company today also confirmed that in this in vitro system ImuVert has now been shown to kill and, in fact, prevent the growth of various tumor cells extracted from human patients.

Over 150 individual human tumor specimens were assayed for the degree of cell killing when treated with ImuVert. These results were compared with those obtained when the same cells were tested with interleukin-2, interferon alpha, and tumor necrosis factor. ImuVert showed significant tumor killing activity against a number of major human tumors including breast cancer, chronic lymphocytic leukemia and ovarian cancer. In addition, these specimens demonstrated a greater degree of sensitivity to ImuVert than to cytokines such as interleukin- 2, interferon gamma or tumor necrosis factor.

These important observations will be reported at the upcoming American Association for Cancer Research (AARC) meetings to be held in Washington in May 1990. Having completed this testing, Cell Technology is currently considering initiating human clinical trials to determine whether positive assay results may correlate with clinical responses when patients diagnosed with certain types of cancer are subsequently treated with ImuVert.

Dr. Michael J. Andrews, vice president-clinical and regulatory affairs, noted, "ImuVert has now been shown in these in vitro studies to be clearly active against a variety of human tumors. We believe that if this assay system can be validated for use in clinical trials, we may be able to more accurately predict tumor responses to ImuVert. Utilizing ImuVert in conjunction with this type of assay screening could substantially advance our progress."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

#90081p0108 03/22/1990 ~PR Newswire

SAN FRANCISCO (MARCH 22) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) has announced the settlement of a lawsuit against Santa Fe Energy Co., 4900 California Ave., Bakersfield, Calif.

Under terms of the consent decree lodged yesterday in Fresno in the U.S. District Court, Eastern District of California, the company will correct violations of the federal Clean Air Act at its oil recovery facility on the South Belridge Oil Field, Kern County, and pay a penalty of $201,000.

Santa Fe Energy operates its facility under a Prevention of Significant Deterioration (PSD) permit, issued by EPA to maintain air quality in the Kern County area. The company violated permit conditions which required installation of continuous emission monitoring systems for nitrogen oxide pollution on the facility's steam generators. In addition, Santa Fe Energy did not submit quarterly reports detailing excess emissions, as required in the permit.

"The penalty of $201,000 is among the largest EPA has collected in the nation for violations of permitting requirements under the Prevention of Significant Deterioration program," said David P. Howekamp, director of the air and toxics division of EPA's western regional office.

"The settlement is particularly significant because of the large number of sources operating under this program in the San Joaquin Valley," Howekamp added. "This enforcement action sends the message that EPA expects every source of pollution to comply with all of the requirements to which they agreed in their permits."

#90081p0110 03/22/1990 ~PR Newswire

TOLEDO, OH (MARCH 22) PR NEWSWIRE - The one-millionth Jeep(R) XJ was

driven off the Toledo Jeep Assembly line this morning to depart for California. Production of the XJ under the model names of Cherokee and Wagoneer began in June 1983. Since that time, the XJ has become the most successful line in the 49-year history of Jeep vehicles.

"This 1990 Jeep Cherokee Limited milestone vehicle really exemplifies the success story of the model," said Martin R. Levine, general manager of the Jeep/Eagle Division of Chrysler Corporation (NYSE: C).

"It's a four-door version, just as 85 percent of all XJ models produced in the last six and a half years have been. It has Selectrac, our shift-on-the-fly, full-time, four-wheel-drive system, and four-wheel anti-lock brakes, both pioneered and perfected on Cherokee and Wagoneer. Its 6-cylinder, 177-horsepower engine provides more power than any domestic or imported competitor in its class.

"Simply put, it's Advantage Jeep. "And finally," he added, "it's headed for the affluent California coast -- continually one of our strongest markets."

The Jeep XJ has been not only a technology leader in the sport utility industry, but a sales leader for a rather unique crowd. For the 1989 model year, Jeep Cherokee/Wagoneer was the No. 1 nameplate among vehicles with a median price of more than $20,000 -- ahead of Cadillac DeVille/Fleetwood, Lincoln Town Car and all Mercedes Benz and BMW models.

"While sales are important, we take greater pride in how the XJ has influenced the evolution of the sport utility industry," said Levine. "In the early '80s, sport utility buyers were, for the most part, truck buyers. Today, most Cherokee and Wagoneer buyers consider their Jeep vehicle as an alternative to a passenger car."

The demographics of the Jeep XJ buyers reinforces that evolution. The average buyer is 40 years of age, earns $59,000 and is college- educated.

"The Cherokee Limited driven off the line today signifies the leadership of Jeep vehicles in the sport utility industry throughout the 1980s and as we enter the '90s," said Levine. "However, while this 1 million milestone is appreciated and acknowledged, we're intent on satisfying our loyal customers by ensuring that there's only one Jeep."

DETROIT (MARCH 22) PR NEWSWIRE - GMAC Financial Services announced today

the following executive changes, which are effective April 1, 1990.

Carol J. Knorr has been named director of plans. Ms. Knorr has been regional manager with headquarters in Detroit.

Jack R. Barrett Jr., previously regional manager with headquarters in Denver, succeeds Knorr as Detroit regional manager.

Knorr joined GMAC in Cincinnati in 1966. After serving in various supervisory positions in the sales and credit departments there and in Hartsdale, N.Y., she transferred to the staff administration department in the company's headquarters in 1980. Knorr was named assistant control branch manager in Indianapolis in 1981 and two years later returned to the company's headquarters, serving in both the staff administration and branch operations departments. She was promoted to control branch manager of the Detroit West Side branch in 1986 and transferred in the same capacity to the Detroit East Side branch in 1988. Knorr has been Detroit regional manager since February 1989.

Barrett joined GMAC in Parkersburg, W.Va., in 1960 after attending the University of Cincinnati. He served in various capacities in Parkersburg Charleston and Wheeling, W.Va., as well as Greentree, Pa., and Miami, before being appointed branch manager in Biloxi, Miss., in 1976. He was promoted to assistant control branch manager in Atlanta two years later. He transferred to the company's headquarters in 1979 as a member of the staff administration department. He was promoted to control branch manager in Nashville, Tenn., in 1981. Barrett has been Denver regional manager since 1984.

EL PASO, TX (MARCH 22) PR NEWSWIRE - Tony Lama Company, Inc. (NASDAQ: TLAM) and Equus Investments II, L.P. announced today that by mutual agreement they have terminated the agreement of merger under which the company would have been acquired by Equus, a publicly held leveraged buyout fund, and certain members of the company's current management.

The termination was approved by the Tony Lama board of directors after the recommendation of its termination by the special committee of the board.

Tony Lama Jr. stated, "The special committee and the board deemed it to be in the best interests of our shareholders to terminate the merger agreement so the board can evaluate the company's options."

Tony Lama's principal business is the design, manufacture and marketing of

medium-to-high priced western boots and leather accessories under its "Tony Lama" and "Larry Mahan" trademarks.

#90081p0118 03/22/1990 ~PR Newswire

PASADENA, CA (MARCH 22) PR NEWSWIRE - Avery International Corp. (NYSE: AVY) today announced net income of $20.4 million for the first quarter ended Feb. 28, 1990, or $.46 per share, compared to $20.3 million, or $.46 per share in the same quarter a year ago. Sales increased 4 percent to $431 million from $414 million in 1989. Excluding currency effects, sales increased 5 percent and net income 2 percent.

Charles D. Miller, chairman and chief executive officer, said the modest sales growth compared to the same quarter last year reflects slower growth in several of the company's key industrial markets. "In the United States, slower markets affected our automotive businesses and our tag and ticket businesses which serve retail department stores. In Europe, business difficulties at two key customers in France negatively affected our European diaper-tape business and our specialty materials business started the year below targeted performance."

On the positive side, Miller said, "In the U.S., our roll paper and films materials businesses, and our office products business, achieved solid sales and profit results for the quarter. In Europe, our automotive business remains strong. Additionally, we are seeing continued improvement in our French label business and the U.S. industrial label business. Sales and plant construction for our roll paper materials business in Europe are on target.

"Looking ahead, we expect the uncertain economic environment will continue worldwide. Full-year sales and earnings are expected to improve over last year. During this period of slower industrial growth, we continue to place strong emphasis on product innovations and effective control of costs and assets," Miller said.

Avery, headquartered in Pasadena, is a leading worldwide manufacturer of self-adhesive base materials, labels, tapes, office products and specialty chemicals. The company has approximately 11,700 employees in more than 150 manufacturing facilities and sales offices located in 25 countries.

NEW YORK (MARCH 22) PR NEWSWIRE - Robert W. Pittman has been named president and chief executive officer of Time Warner Enterprises, it was announced today by J. Richard Munro and Steven J. Ross, co-chairmen and co-CEOs of Time Warner Inc. (NYSE: TWX).

Reporting to Time Warner's co-CEOs, Pittman will be involved with strategic and business development. His responsibilities also will include Time Warner Enterprises' entrepreneurial ventures.

Said Ross: "We've had a long and productive relationship with Bob. He oversaw the creation of MTV, VH-1, and Nick at Nite for Warner Communications; re-launched Nickelodeon; and as chief operating officer and later CEO, he made MTV Networks the most profitable basic-cable network company in the country at that time. We're delighted to welcome him back."

Added Time Warner President N.J. Nicholas, Jr.: "With Bob in place at Time Warner Enterprises, along with Art Barron as chairman concentrating on international business opportunities, Time Warner Enterprises is well positioned to develop and expand the many assets of Time Warner."

Arthur R. Barron, recently appointed chairman of Time Warner Enterprises, said: "I have known Bob Pittman and admired his creative talents for several years. I look forward to working alongside Bob in expanding Time Warner's businesses."

Since September 1989, Pittman has been executive advisor at Time Warner. He previously had worked for Warner Communications Inc. from 1979 to 1985. At WCI's Warner Amex Satellite Entertainment Co., he was instrumental in developing The Movie Channel, a pay-television service, and creating MTV: Music Television. From 1983 to 1985 Pittman served as chief operating officer, and from 1985 to 1987 he was president and CEO of MTV Networks, the successor company to Warner Amex Satellite Entertainment, which operates MTV, Nickelodeon, Nick at Nite, and VH-1.

In 1987, Pittman co-founded, with MCA Inc., Quantum Media, Inc. QMI created and produced network and syndicated TV series and home video and invested in media and broadcast properties.

Pittman serves on the board of Electronic Arts and the National Advisory Council of the National Multiple Sclerosis Society and is chairman of the board of trustees of the New York Shakespeare Festival. He was born Dec. 28, 1953, in Jackson, Miss.

Time Warner Enterprises is the business and strategic development unit of Time Warner Inc.

PITTSBURGH (MARCH 22) PR NEWSWIRE - Equitable Resources (NYSE: EQT) said today that it will begin implementation of its previously announced stock repurchase program.

The program allows for repurchase of up to 400,000 shares in 1990, equivalent to approximately 2 percent of the 21 million common shares outstanding. Equitable officials said the program will serve to reduce the dilutive effect of options to be exercised under the company's stock option plan, and also will enable it to meet the conversion requirements of its remaining 9-1/2 percent convertible debentures.

BIRMINGHAM, AL (MARCH 22) PR NEWSWIRE - HealthSouth Rehabilitation Corp. (NYSE: HRC) announces the addition of a new outpatient medical rehabilitation facility in Santa Rosa, Calif.

According to Richard M. Scrushy, chairman of the board, president and CEO,

the facility will be called HealthSouth Sports Medicine & Rehabilitation Center.

"The acquisition of this location marks HealthSouth's first entry into the California market, bringing the number of states we operate in to 21 and the number of outpatient facilities to 31," said Scrushy.

The center will specialize in sports medicine, industrial medicine (work capacity assessment and work hardening), general orthopaedic care, back injury rehabilitation and physical therapy.

With the addition of this facility, HealthSouth now operates 45 locations in 21 states. In its nationwide network of facilities, representing 1,400 beds and an employee base of more than 3,000, HealthSouth has provided services to more than 100,000 people and has logged more than a million outpatient visits since the company's founding in 1984.

MIAMI (MARCH 22) PR NEWSWIRE - Eastern Airlines and the Air Line Pilots Association have reached an interim agreement that provides somewhat less than half the cost reductions the company needs to emerge from bankruptcy. The pact may facilitate expedited mediation under National Mediation Board Chairman Joshua Javits, leading to permanent full-cost reductions.

The company emphasized that the more complete and long term cost reductions are necessary for its successful emergence from Chapter 11. If expedited mediation is not successful in leading to such an arrangement Eastern said it will have to promptly seek Bankruptcy Court permission to achieve full cost reductions on a long term basis.

Under the interim agreement, which the company attributed to Chairman Javits, certain pay and benefit reductions would remain in place until July 1, or until one of three other events occur:

(1) a new permanent agreement is reached;
(2) the expiration of a National Mediation Board (NMB)-declared 30-day cooling off period at which time the company is free to implement its full cost reduction; or

(3) the Bankruptcy Court issues an order allowing the company to implement its full cost reductions under Section 1113 of the Bankruptcy Code.

Eastern agreed it would refrain from seeking court relief through Sunday, March 25.

The parties have been negotiating under auspices of the NMB since last September and for the past two weeks under the direction of NMB Chairman Joshua Javits. But talks between the company and the union have actually been going on for 33 months.

The contract at issue expired June 1988, more than 20 months ago. Its provisions, however, remain in effect in accordance with the Railway Labor Act until the end of a 30-day cooling off period which can be declared by the NMB.

Companies in Chapter 11 are allowed to file under Sectin 1113 of the U.S. Bankrupcty Code. That provides for a contract resolution within 52 days, while negotiations continue under Bankruptcy Court supervision. By contrast, NMB processes have no statutory deadlines until a 30-day cooling off period is declared.

NEW YORK (MARCH 22) PR NEWSWIRE - The Trustees of HRE Properties (NYSE: HRE) declared a reduced quarterly dividend of $.25 per share at their regular meeting today. This is $.20 per share less than the regular $.45 per share dividend, which they expect to restore three months from now.

President and chief executive officer Charles J. Urstadt said "The board's decision to reduce this quarter's dividend to $.25 per share from its regular rate of $.45 per share is primarily a result of defense costs forced on HRE by the Kimco-Orentreich Group's attempt to take over the Trust. We expect that these costs are behind us, and beginning next quarter, we plan to restore the dividend to its regular level barring renewed takeover action or other unforeseen adverse occurrences."

The dividend declared represents the eighty-second consecutive quarterly dividend since the Trust began operations in 1969. It is payable April 20, 1990 to shareholders of record April 2, 1990.

HRE Properties is an equity trust providing investors a means of participating in ownership of income-producing properties.

NEW YORK (MARCH 22) PR NEWSWIRE - James A. Bickler, CLU, has been appointed executive vice president-marketing of All American Life Insurance Company, a wholly owned subsidiary of USLIFE Corporation (NYSE: USH). The announcement was made today by Gordon E. Crosby, Jr., chairman of the board, president and chief executive officer of USLIFE.

In his new position, Bickler will be responsible for the recruitment and appointment of profile general agents and marketing organizations, and the development of the company's life insurance field marketing.

In making this announcement, Crosby stated: "The appointment of Jim Bickler to this key senior marketing position at All American Life is further evidence of USLIFE's strong commitment to the life insurance industry. He brings to our company 25 years of life insurance experience and expertise which will benefit both USLIFE and the field force."

James A. Bickler began his career in 1965 in the life insurance sales department of Occidental Life. He was named "Agency Man of the Year" in 1965 and 1966. From 1967 through 1972, he served as assistant branch manager.

In 1972 he was named branch manager and by 1978 he increased his agency's production from 164th in ordinary premium to 28th within the Transamerica-Occidental Life agency system. In 1979 he was appointed regional vice president with responsibility for all production, productivity and expenses in twelve central division states. In 1983 he was given additional responsibility for New England.

In 1984, Bickler joined Kemper Life Insurance Company as vice president-sales and marketing. In that capacity, he was responsible for all production results, sales promotion and marketing programs. Bickler remained employed with Kemper until late 1989.

Bickler is a graduate of Northern Illinois University where he earned his Bachelor of Science degree in 1963. He received his Chartered Life Underwriter (CLU) designation in 1974. Also, he received his LUTC designation and served as an instructor in the program from 1967 through 1971. He is past president of both the DuPage County Life Underwriters Association and the Milwaukee Association of Life Underwriters.

DETROIT (MARCH 22) PR NEWSWIRE - General Motors reaffirmed its long-standing commitment to minority-owned and -operated suppliers in the United States by purchasing a record $1.15 billion of goods and services from them during 1989, according to Donald A. Pais, GM vice president in charge of the Materials Management Staff.

"I am pleased to report that 1989 marked the fourth consecutive year that GM's purchases from minority suppliers and carriers averaged $1 billion or more," Pais said.

GM established its Minority Supplier Development Program in 1968 to carry out the corporation's pledge to help minorities achieve economic equality, Pais said. It is the largest and most extensive activity of its kind in the nation.

"Our operating groups and divisions made great efforts during the 1980s to increase the participation of minority-owned firms in our supplier community," Pais said. "Today, every GM vehicle produced in the U.S. contains parts supplied by a minority company."

Noting these accomplishments, he said GM was honored to receive awards in 1989 from the Michigan Minority Business Development Council, the State of Michigan Commission on Spanish Speaking Affairs, and the National Minority

Business Council for its efforts in supporting minority businesses.

"GM's cumulative purchases from minority suppliers since the inception of the program amount to almost $7 billion," added Pais. "That's more than what any other private company has done, and is second only to U.S. government expenditures."

GM's goal, Pais pointed out, is to encourage business participation among all minority groups and to assist minority enterprises in meeting the challenges of the increasingly competitive business environment.

"Our suppliers should be commended for the efforts they have made," Pais said. "The GM Minority Supplier Development Program would not be the success that it is without the tireless efforts of the men and women who own and operate these companies. They deserve recognition -- they are setting positive examples across this country every day.

"We are committed to continuous improvement of the GM Minority Supplier Development Program. Development is the key word in this program, and we intend to maintain and extend our leadership position in this area through the 1990s and beyond."

CHICAGO (MARCH 22) PR NEWSWIRE - Chicago-based UNR Industries, Inc. (NASD: UNRI) announced today that William F. Andrews has been appointed president and chief executive officer. Andrews will begin his duties April 2.

Since September of 1989, until joining UNR, Andrews has been president of Massey Investment Company, a Nashville, Tenn.-based private investment company.

Prior to joining Massey, from 1986 to September 1989, Andrews was chairman president and chief executive officer of Singer Sewing Machine Co. From 1958 to 1986, Andrews was at Scovill, Inc., rising to become president and chief operating officer in 1979, and chairman and chief executive officer from 1980 to 1986. Under Andrews' tenure, Scovill had annual revenues of $850 million, and six diversified businesses with 86 plants in 22 countries.

In making the announcement, William S. Leavitt, chairman of UNR, stated, "We are very pleased to have someone with Mr. Andrews' diversified operating background and outstanding leadership skills."

Andrews is a member of the board of directors of Navistar, Southern New England Telephone Co., and Correction Corp. of America.

RICHMOND, VA (MARCH 22) PR NEWSWIRE - S&K Famous Brands, Inc. (NASDAQ: SKFB) today announced both record sales and earnings for the fourth quarter and for the fiscal year ended January 27, 1990.

For the fourth quarter, net income grew to $1,473,000 up 30 percent from $1,135,000 for the same period last year; earnings per share advanced to $0.62 per share from $0.55 per share a year ago. Sales for the quarter increased 20 percent to a record $22,196,000 from sales of $18,552,000 for the previous year's quarter. In addition, the Company's fourth quarter comparable store sales increased more than five percent.

Sales for the year reached an all-time high of $60,972,000 which is 16 percent above sales of $52,437,000 a year ago. For the fiscal year ended January 27, 1990, net income reached record levels advancing 27 percent to $2,736,000 or $1.25 per share as compared with the previous year of $2,158,000 or $1.05 per share.

Net income this year included an extraordinary gain of $110,000 or $0.05

per share resulting from the excess of insurance proceeds over the net book value of assets lost during Hurricane Hugo in September 1989.

All per share data for the fourth quarter and the year ended January 27, 1990 reflect the increased weighted average number of shares outstanding resulting from the Company's sale of 300,000 additional shares of common stock in August 1989. Company Chairman Stuart C. Siegel stated, "We are pleased to show healthy earnings per share growth despite the 15 percent increase in the number of shares outstanding."

"Reporting exceptional financial results is not unusual for our Company," said Siegel. "We have reported increased sales and earnings for several years and are proud to have surpassed the $60 million sales mark."

S&K now operates 91 stores in 19 states. During 1989, the Company opened 19 new stores, nine of which were in Illinois, Michigan and Wisconsin. Siegel remarked, "Initial results from these stores indicate a very positive sales trend for the new locations opened during 1989."

The Company also announced that it has completed the doubling of the size of the distribution center. Mr. Siegel stated, "The distribution center expansion was finished on time and below budget. It became fully operational on February 1, 1990, and provides us with the capacity to receive, store and ship merchandise to support our future planned expansion for many years to come."

S&K Famous Brnads, Inc., one of the fastest-growing menswear retailers in the country, was founded in 1967.

HOUSTON (MARCH 22) PR NEWSWIRE - Stewart & Stevenson Services, Inc. (NASDAQ: SSSS), a leading manufacturer of diesel and gas turbine powered equipment, announced record earnings for the fiscal year ended Jan. 31, 1990. Annual sales totaled $604.9 million, representing a 28 percent increase over sales of $473.7 million for the prior year. Net earnings for the year were $27.3 million or $1.93 per share, representing a 31 percent increase over net earnings of $20.8 million or $1.51 a year ago.

"We are pleased with the company's 1989 performance. This makes the third consecutive year that sales growth exceeded 27 percent and net earnings growth surpassed 31 percent. While both operating segments of the company experienced marked improvement, we are particularly encouraged by the performance of our distribution operation which experienced a 23 percent increase in sales and 113 percent increase in operating profit," said C.

Jim Stewart II, chairman of the board.

The engineered power systems division, which builds diesel and gas turbine powered equipment, had a sales gain of 31 percent and 26 percent improvement in operating profits.

NEW YORK (MARCH 22) PR NEWSWIRE - Kidder, Peabody International announced today that it has formed a strategic alliance with Benito Y Monjardin S.V.B., a privately held investment banking and securities firm in Madrid. In the agreement, which was signed today, Kidder, Peabody will acquire a 25 percent stake in Benito Y Monjardin, and will sell portions of that interest to GE Capital, a unit of the General Electric Company, and to So.Pa.F., Kidder's Milan-based affiliate. Terms of the transaction were not disclosed.

Benito Y Monjardin is one of the leading investment houses in Spain. Founded by Juan Monjardin and Enrique Benito, its primary activities include equity underwriting and corporate finance; equity sales to both domestic and foreign customers; fixed income sales and trading; asset management; mergers and acquisitions and merchant banking.

Commenting on the transactions, Michael A.M. Keehner, president of Kidder, Peabody International in New York, said, "We are extremely pleased to be associated with a firm of Benito Y Monjardin's caliber and reputation. We anticipate that this strategic alliance will enhance our capabilities in Spain, and will provide Benito Y Monjardin with access to the United States, Japan and other parts of Europe where we are active."

Juan Monjardin, chairman of Benito Y Monjardin, noted, "We are pleased to be linked to Kidder, Peabody. This affiliation will enable us to offer our clients access to new markets, sophisticated technology and deal expertise. In addition, as a result of this partnership, we are the strongest broker/dealer in Spain, as measured by capital base, and this will enable us to participate in significantly larger transactions."

In October 1988, Kidder, Peabody took a 5 percent stake in So.Pa.F. and a 25 percent stake in its securities subsidiary PASFIN. At that time, Kidder announced a strategy to enter the European market by forming alliances with leading local merchant banks in selected countries. Kidder Peabody and So.Pa. F. have already entered into a number of joint merchant banking transactions, and have been cooperating in the areas of M&A, asset management, and equity distribution since becoming alliance partners. It it anticipated that So.Pa.F. and Benito Y Monjardin will also cooperate directly in certain of these areas.

NEW HYDE PARK, NY (MARCH 22) PR NEWSWIRE - Uniforce Temporary Personnel, Inc. (NASDAQ: UNFR) today announced record-breaking 1989 revenues and earnings figures. Revenues climbed to an all-time high of $110,449,206 for the year ending Dec. 31, 1989, surpassing 1988 revenues of $101,016,947 by 9.3 percent. Net earnings in 1989 exceeded 1988 levels by 26.4 percent, rising from $3,072,653 to $3,883,475 in 1989. Earnings per share were $.84 in 1989 vs. $.67 in 1988. The 1989 earnings include a one-time tax benefit of $410,000 ($.09 per share).

Commenting on the company's 1989 financial achievements, John Fanning, president and chief executive officer, noted: "As the decade of the '80s closed, Uniforce sales and earnings results continued to reflect the success of our company's strategic focus and the shared commitment of our licensees and headquarters personnel. The outset of a new decade requires us to meet competitive challenges through technology and innovation, while retaining our steadfast commitment to the basics of our business.

The company, under its trade name, Uniforce Temporary Services, is a national network of 108 predominately licensed offices providing temporary personnel in the general and automated office, marketing, accounting, technical, records management, hospitality and light industrial service categories.

NEW YORK (MARCH 22) PR NEWSWIRE - The board of directors of Alexander & Alexander Services Inc. (A&A) (NYSE: AAL) today adopted amendments to the company's preferred share purchase rights plan.

The amendments provide that after a person or group acquires beneficial ownership of 10 percent or more of the company's voting shares, each of the rights (other than those held by the 10 percent holder, which become void once such holder reaches the 10 percent threshold) becomes a right to acquire, upon payment of the $85 exercise price, shares of the company's Series A junior participating preferred stock ("preferred shares") having a market value (as defined in the rights plan) equal to twice the exercise price (i.e., $170 of preferred shares for $85).

The amendments also provide that if a person or group acquires 10 percent, but less than 50 percent, of the company's voting shares, the board may exchange each right (other than those held by the 10 percent holder) for one one-hundredth of a preferred share. The board may redeem the rights until the time that any person or group has acquired 10 percent or more of the company's voting shares.

"The amendments are intended primarily to enhance the board's ability to act in the best interests of all the shareholders," reported T.H. Irvin, A&A's chairman and chief executive officer. "If someone should seek to obtain a position of control or substantial influence over A&A, or propose to acquire the company, we would like to have that person negotiate with the company's board of directors," he noted.

"While the board believes A&A should continue as an independent entity, neither the rights plan nor these amendments are intended to prevent an offer or an acquisition of the company on terms that are in the best interests of the company and its shareholders," Irvin added.

A&A Services Inc. is a global insurance brokerage, risk management and human resource management consulting company serving clients from offices in more than 70 countries.

HOUSTON (MARCH 22) PR NEWSWIRE - Kettle Restaurants, Inc. today announced a net profit for the quarter ended Feb. 1, 1990, of $65,000, or $.06 per share, compared with a net profit for the quarter ended Jan. 26, 1989, of $223,000, or $.10 per share.

Total revenues decreased 2.3 percent to $10.6 million for the quarter compared to the same period the prior year, primarily due to a decrease in industrial catering revenues of 65.1 percent to $354,000. Restaurant revenues increased 5.1 percent to $7,038,000 for the quarter ended Feb. 1, 1990 compared to the same period the prior year as weighted average sales per restaurant increased 8.9 percent; however, this increase was offset, primarily, by the reduction in the number of stores remaining in ongoing operations.

The company presently has no locations under construction and said it anticipates not adding any units to the system during the current fiscal year.

Kettle Restaurants, Inc. is principally engaged in the operation and franchising of 24-hour full-service family oriented restaurants. The restaurants offer a wide selection of moderately priced menu items for all meal periods, with an emphasis on popular breakfast items. Kettle and its franchisees operate 187 restaurants in 17 states, primarily in the Sunbelt region.

#90081p0188 03/22/1990 ~PR Newswire
WASHINGTON (MARCH 22) PR NEWSWIRE - Economic growth is the key to political strength, Allen E. Murray, chairman and chief executive officer of Mobil Corporation (NYSE: MOB), said today, "but the realization has been slow in coming -- especially to some of our political leaders."

At a George Washington University luncheon honoring him as "CEO of the Year," Murray said today's unfolding drama in Eastern Europe underlines the central role of economic viability in world politics.

"The economic attraction of the free-market system accomplished in weeks what military might would never have dared to attempt," he said. He asserted that U.S. lawmakers undermine the country's economic strength by failing to create an atmosphere that encourages American investment here

and abroad.

As an example of misguided lawmaking, Murray cited the spate of legislation that would bar offshore exploration for oil and gas off much of America's coast, except for portions of the Gulf of Mexico.

"Such legislation is a prime example of mixing apples and oranges," he said. "What happened off Alaska was a tanker accident, and the industry and the Congress have both acted to prevent similar accidents and to improve our reaction should one occur. But a ban on additional exploration will only increase future tanker traffic, not reduce it. If this country can't find additional domestic sources of oil, imports will have to rise -- and imports reach this nation by ship."

The economic argument also goes unheeded by the legislators, he said. "Oil found and produced in this country creates American jobs, profits for American companies, and tax revenues for the U.S. Treasury. Why should we send these jobs, profits, and tax monies overseas?"

As another example, he said the foreign tax credit, originally intended to prevent U.S. multi-national companies against double taxation of income earned abroad, "has been nibbled to pieces," placing American companies at a disadvantage with foreign multi-nationals. "The general result has been higher taxes on American multi-nationals than on the foreign competition," he said.

In conclusion, Murray emphasized that "We have to focus our officials' minds on the true source of this country's strength and its influence. We have got to force them to consider the economic effects of the laws they pass."

LONDON (MARCH 22) PR NEWSWIRE - Thirty-eight British companies and divisions recently met here with managers from U.S.-based McDonnell Douglas Corp. (NYSE: MD) and Bell Helicopter Textron to explore potential for their involvement in the U.S. Army's LH helicopter program.

"As a result of our London visit, quite a number of the British companies who briefed us will be receiving requests for proposals for LH work this spring," said Allen C. Haggerty, executive vice president and director of the McDonnell Douglas/Bell Helicopter Textron "SuperTeam."

"The SuperTeam will be sending RFPs to companies across the U.S. and overseas to form the strongest possible multinational industry team," Haggerty said.

The LH program is the largest new helicopter program under way anywhere in the world and is the U.S. Army's top priority aviation program. The LH will team with the AH-64 Apache helicopter on the battlefield. Prime mission of the LH will be armed reconnaissance. It also will be called upon for ground attack and air combat.

McDonnell Douglas Helicopter Co., of Mesa, Ariz.; McDonnell Aircraft Co., of St. Louis, Mo.; and Bell Helicopter Textron, of Fort Worth, Texas, are competing as the SuperTeam for a U.S. Army contract to develop and build 2,096 LH helicopters. Full-scale development contract award date is January 1991.

SuperTeam representatives spent a week in London attending hour-long capabilities presentations by the 38 U.K. companies. The team's staff is identifying promising British engineering concepts and manufacturing technologies for potential use in the full-scale development and production phases of the LH program.

McDonnell Douglas and Bell were briefed by British aerospace companies with products ranging from aircraft structures to radars, avionics, actuators, canopies, composite materials and other aircraft components.

The LH is being designed to be as technologically advanced as the most modern fixed wing combat aircraft. It is expected to set new rotary-wing standards for airframe, flight controls, mission equipment, targeting systems, weapons, rotor dynamics and engines.

SuperTeam analyses project that LH helicopters will be many times more effective than the Vietnam era rotorcraft they will replace in the U.S. Army inventory and will be billions of dollars less expensive to operate over their service lives.

#90081p0195 03/22/1990 ~PR Newswire

DALLAS (MARCH 22) PR NEWSWIRE - The Southland Corporation and its long-time business partners, Ito-Yokado Co., Ltd. and 7-Eleven Japan Co., Ltd., today announced the signing of a definitive agreement whereby Ito-Yokado and 7-Eleven Japan will acquire the majority of Southland's common equity. The stock purchase is contingent on, among other things, a successful restructuring of Southland's outstanding public debt of approximately $1.8 billion and of its outstanding preferred stock.

Southland and its partners have entered into a stock purchase agreement that contemplates the restructuring of Southland's existing debt and preferred stock and provides for the infusion of new equity by Ito-Yokado and 7-Eleven Japan through their purchase from Southland of new shares representing approximately 75 percent of the shares of Southland's common stock for $400 million in cash.

Southland officials said the restructuring of the existing debt and preferred stock is critical because of changing industry conditions which have strained the capital structure of Southland. The company has already announced that without a successful restructuring of its debt, it will face a significant liquidity crisis. In addition, Southland's bank group has required the company to submit a restructuring plan prior to May 31.

As part of the exchange offers, Southland will solicit the consent of the holders of the existing debt securities to amend their indentures to, among other things, delete certain restrictive covenants.

In accordance with the agreement, Southland will also solicit the consent of holders of its 15 percent cumulative exchangeable preferred shares to permit the mandatory redemption of each share of such preferred stock in exchange for one newly issued share of its 13-1/2 percent cumulative exchangeable preferred shares, liquidation value $1.05 per share, maturing in 2007 and one-third of a newly issued share of Southland common stock. Dividends on the new preferred shares will be payable in additional new preferred shares. The new preferred shares will be exchangeable, at the option of Southland, into a new issue of subordinated debt of Southland with economic terms substantially similar to the new preferred shares. Southland said it intends to redeem the existing preferred stock promptly after consummation of the exchange offers and the obtaining of preferred stock consent.

Southland is the world's premier convenience retailer, with approximately 7,000 7-Eleven and other convenience units supported by the five Southland distribution centers, as well as the Southland Foods division's six food centers. In addition, areas licensees and affiliates operate more than

5,900 7-Eleven stores in the United States and 21 foreign countries. The company was taken private in a leveraged buyout in 1987 by the Thompson family, who founded and built the store empire.

KEARNY, NJ (MARCH 22) PR NEWSWIRE - Goody Products, Inc. (NASDAQ: GOOD) today reported results of operations for the year ended Dec. 31, 1989.

Net sales for the year increased slightly to $220,908,000 compared with 1988 sales of $218,443,000. The company incurred a net loss for 1989 of $5,439,000 or $.83 per share, compared with 1988 net earnings of $4,863,000 or $.75 per share, which included a non-recurring gain on the sale of the assets of the Southeastern Box Co. subsidiary of $904,000 or $.14 per share.

Fourth quarter 1989 sales declined to $40,669,000 versus $43,414,000 for the comparable three-month period a year earlier. Goody incurred a net loss of $7,784,000, equal to $1.19 per share for the 1989 fourth quarter compared with a net loss of $5,070,000 or $.78 per share in the fourth quarter of 1988.

In commenting on the results, Leonard Goodman, chairman and CEO of Goody Products, said that while Goody historically loses money in the fourth quarter due to seasonal reasons, the fourth quarter 1989 loss was exacerbated by a number of factors including lower than anticipated sales due to general softness in the retail sales environment. Also, the results of operations were adversely impacted by a greater than normal provision for obsolescence of approximately $1.95 million; lower levels of production due to an inventory reduction program which resulted in lower absorption of factory overhead costs and higher cost of sales; charges related to professional fees, environmental matters and litigation; and a $1.5 million provision for consolidation of certain manufacturing and

warehousing operations.

Goody Products, Inc. is engaged in the design, manufacture and marketing of a wide variety of hair accessories and owns and operates three additional consumer products subsidiaries and divisions: Opti-Ray, a designer and marketer of high quality fashion sunglasses; Ace Comb, a manufacturer of premium quality combs, and Pretty Neat Products, a producer of plastic cosmetic organizers.

ST. LOUIS (MARCH 22) PR NEWSWIRE - Two new directors have been nominated for election to the board of directors of Anheuser-Busch Companies, Inc. (NYSE: BUD). They are Andrew B. Craig III, chairman, president and chief

executive of Boatmen's Bancshares Inc., and Lewis T. Preston, chairman of the executive committee and a director of J.P. Morgan & Co., Incorporated.

Craig, 58, began his career in banking in 1957, with Manufacturers and Traders Trust Co. in Buffalo, N.Y. He was president and CEO of Manufacturers and Traders before leaving in 1983 to join BancOhio National Bank in Columbus, Ohio, as president. Craig joined Boatmen's, as president, in 1985, becoming CEO in 1988 and chairman in 1989.

Craig is active in many St. Louis cultural and service organizations, including the Boy Scouts, the Arts and Education Council, United Way, the Salvation Army, the St. Louis Symphony, Civic Progress, Washington University and Barnes Hospital. He also is a member of the Chamber of Commerce of the United States and the St. Louis Regional Commerce and Growth Association, and serves on the boards of the Automobile Club of Missouri and the Petrolite Corp.

Craig did his undergraduate work at Cornell University and the University of Buffalo, from which he received his B.A. He also received graduate training in banking at Rutgers University in New Brunswick, N.J. and Columbia University in New York.

Preston, 63, has been with Morgan since 1951. After heading the company's London office and serving as executive vice president in charge of international banking, he became vice chairman of the board and a director of both J.P. Morgan & Co. and its subsidiary, Morgan Guaranty Trust Co. of New York, in 1976. At the same time, he also became a member of the corporate office, the senior Morgan policy and planning body.

Preston became president of the two companies in 1978, and chairman in 1980. He stepped down as chairman on Jan. 1, 1990.

Preston is a graduate of Harvard College. He is a director of General Electric Co., the British Petroleum Co., Plc., and L'Air Liquide, as well as the Urban Foundation. In addition, he is a trustee of the Alfred P. Sloan Foundation and a vice chairman of The Business Council, and is active with the American Committee of the New York University Center on Japanese Business, the New York City Employment Committee, and the Bretton Woods Committee.

The nominations will be voted on at the annual meeting of shareholders of Anheuser-Busch Companies, Inc. in St. Louis on April 25, 1990. Two current directors will retire from the board at that time. They are Armand C. Stalnaker, professor of management, Washington University School of Business, and former chairman of General American Life Insurance Co., and Fred W. Wenzel, chairman of Kellwood Co. Stalnaker and Wenzel will serve as advisory members of the board following their retirement.

#90081p0201 03/22/1990 ~PR Newswire

ROCKY MOUNT, NC (MARCH 22) PR NEWSWIRE - Rocky Mount Undergarment Co., Inc. (NASDAQ: RMUC) today reported net earnings of $958,000 ($.29 per share) for its fiscal year ended December 31, 1989 compared to a net loss of $657,000 ($.22 per share) in 1988. The 1989 earnings include a gain of $1,814,000 from the sale of the Company's menswear division in June 1989.

The sale of the menswear division has put the Company in a strong liquid position, accompanied by reduced financing costs and increased net worth. The Company's strategy for 1990 will be to capitalize on its strong liquid position, further develop current product lines and expand by synergistic acquisitions with the mission and goal of superior quality products, fair price and service.

In January 1990, the Company rejected an offer for its women's and children's operations. The Company has chosen to rebuild by launching a sleepwear division, "Blossoms Nite-T's," which commenced operations in September 1989. The Company is seeking acquisitions in related products and has retained a design studio to assist in updating designs and marketing concepts for the Blossoms (TM), Hang Ten (R) and Capezio (R) brands.

Net sales were $26,088,000 in 1989 compared to $41,893,000 in 1988. The decrease in sales is directly attributable to the sale of the menswear division and greater competition in the Company's ongoing women's underwear business.

For the fourth quarter of 1989, sales were $3,713,000, compared to $11,666,000 reported for the comparable year ago period which included menswear sales of $7,161,000. Net loss for the fourth quarter of 1989 was $602,000 ($.19 per share) reflecting the lower sales volume and certain year end provisions for income taxes and terminated asset sale negations. Net loss for the 1988 fourth quarter was $810,000 ($.26 per share).

The Company manufactures and markets ladies' sleepwear and basic and fashion underwear for women and children.

AUSTIN, TX (MARCH 22) PR NEWSWIRE - Some of the country's best talent in science and education met in Austin this week under the auspices of SEMATECH'S Centers of Excellence (SCOE) to discuss ways to recover world leadership in semiconductor manufacturing.

SEMATECH, the U.S. semiconductor manufacturing technology consortium, sponsored this second annual meeting for the Centers of Excellence participants from U.S. universities and research centers. The three-day conference, which began March 20, was hosted by the University of Texas.

Attending the meeting were representatives from the Florida Center of Excellence, which includes the University of Florida in Gainsville, the Florida Institute of Technology in Melbourne and the University of South Florida in Tampa.

SEMATECH awarded research contracts in 1989 to the Florida SCOE to research new semiconductor manufacturing equipment and processes. The Florida SCOE will focus its research on the development of a predictive design-for-manufacturing (DFM) system that will result in high-yield semiconductor manufacturing. DFM is a management strategy aimed at developing processes and products that work that first time and have rapidly increasing yields.

The research plan is based on SEMATECH's need for advanced tools to use in developing its Phase 3 process. The Phase 3 process is intended to provide American industry with superior semiconductor production capability.

SEMATECH's primary goal in establishing the Centers is to provide focus for development of manufacturing programs within the graduate schools of U.S. universities, according to Dr. Robert N. Noyce, president and CEO of the consortium. Selection of the SEMATECH-funded centers is based on the quality of the research programs offered, their relevance to SEMATECH's needs, and the nature of the available program resources. SEMATECH has committed approximately $10 million annually in research contracts to the SCOE program.

The meeting was held to promote interaction and understanding among the universities conducting research for SEMATECH and the communities that benefit from the SCOE program: SEMATECH and its member companies, SEMI/SEMATECH (equipment and material suppliers), the SRC, and the government and national labs.

SEMATECH is a consortium of 14 American semiconductor manufacturing firms dedicated to restoring America's manufacturing leadership in semiconductors. Located in Austin, Texas, half of its $200 million annual funding is provided by its member companies and the remainder by

the federal government.

WASHINGTON (MARCH 22) PR NEWSWIRE - Overall, there has been tremendous improvement in the intertidal water and shoreline conditions in Prince William Sound and the Gulf of Alaska, C.M. Harrison, executive vice president of Exxon Company U.S.A., said today.

"However, there are some areas which need additional cleaning, and Exxon will be performing that task this summer," he added.

Harrison's comments were made in testimony to the Subcommittee on Water, Power and Offshore Energy Resources of the House Interior and Insular Affairs Committee.

Exxon's 1990 cleanup will focus on techniques that are least intrusive to the recovering environment while achieving the desired results, he explained.

"Guidelines for planning this summer's clean-up program were submitted by Exxon to the Coast Guard on March 15 for approval. After receiving results of shoreline surveys conducted by federal and state agencies and Exxon in April, a detailed summer work program will be prepared," Harrison said. Overall, repopulation and growth in previously oiled areas are occurring, and resource recovery can be expected to rapidly occur, he said.

"Those resources that are most important to the economy, such as fisheries do not appear to have been damaged. Short-term effects were dealt with through the claims process."

Tourism is expected to be virtually unaffected this year since the visible oil is largely gone and the scenic beauty remains, he said.

Recent surveys show a good diversity of wildlife, and significant numbers have returned to the impacted area. "However, there are some identified resources which need to be carefully studied for potential restoration," Harrison stated, "for example: shellfish taken from a mussel bed inside a portion of Windy Bay, which exhibited elevated hydrocarbon concentrations; and the eagles, which are fewer in number and perhaps more heavily impacted."

Harrison emphasized that Exxon believes a natural resource damage assessment process is most effective when the parties cooperatively work together to access the damage and restoration possibilities.

Exxon remains interested in working with the trustees if a satisfactory framework can be developed for a cooperative approach and the opportunity exists for mutually agreed solutions, he said.

#90081p0206 03/22/1990 ~PR Newswire

DEARBORN, MI (MARCH 22) PR NEWSWIRE - In less than a year -- and at a time when some of its competitors are just entering the race -- Ford Motor Company (NYSE: F) is enjoying life in the fast lane of the quick oil change business as its 100th Motorcraft/Fast Lube outlet is put into operation.

Launched nationally in April 1989, Motorcraft/Ford Fast Lube caters to customers with a convenient, inexpensive way to get a complete oil change and chassis lubrication with original manufacturer parts -- all in 15 minutes or less with no appointment necessary.

In addition, the Ford or Lincoln-Mercury dealer also performs a safety inspection on the car and a computerized check to see if there are any outstanding recalls on the vehicle -- service which is performed at no cost to the owner and not available at other quick oil change outlets.

"What we're offering is peace of mind," said Ken Myers, Ford Parts and Service marketing manager. "In addition to convenience and speed at a competitive price, customers will have their car or truck worked on by a Ford-trained service technician who will use original manufacturer parts and accessories, including Motorcraft oil and Motorcraft filters from Ford."

Quick oil change outlets began in the early 1980s. By the middle of the decade, they numbered more than 3,000 and it is projected that by 1992 there will be more than 6,000 quick oil change outlets in the United States.

"This market is influenced by two important factors -- convenience and speed," Myers added. "That's why dealers are guaranteeing that the oil change, lubrication and safety inspection will be completed in 15 minutes."

The Motorcraft/Ford Fast Lube pilot program began in June 1988 at five dealerships in the Chicago area. By March 1990, 100 dealers across the country had enrolled in Fast Lube, and that number is expected to be well over 200 by the end of the year.

Myers noted several dealer benefits from the program, in addition to

increased service business.

"Our market research shows that dealer service gets high marks for technical competence, but it is perceived as not being fast and convenient " Myers said.

"We feel the Fast Lube outlets not only will help change that image, but they will actually increase the productivity of the dealer service area. The program helps make better use of the existing service area in the dealership, and frees highly skilled service technicians to work on more difficult jobs."

Myers said that the feedback from both dealers and customers has been very positive. "In less than a year's time, we've found we have a winner on our hands," he explained. "And that's good news for our customers and our dealers."

LONDON (MARCH 22) PR NEWSWIRE - Guinness PLC today announced group profit before tax of 691 million pounds sterling for the year ended Dec. 31, 1989 -- an increase of 32.6 percent over the 521 million pounds in the previous year. Turnover, on continuing operations, increased by 15 percent to 3,073 million pounds. Basic earnings per share have increased by 33 percent to 51.3 pence from 38.5 pence in 1988.

The board recommended a final net dividend of 10.9 pence per share (14.5p gross), to be paid on May 21 to those shareholders on the register at the close of business on April 27, 1990. The total dividend for 1989 is 15.3p (20.4p gross), an increase of 33 percent over the previous year. Over the last two years, dividends have risen by two- thirds.

Over 80 percent of group profits originated outside the United Kingdom. The Asia/Pacific and European regions were particularly strong, with profits up 48 percent and 28 percent, respectively. Overall, performance of overseas markets helped lift Guinness' UK exports by 12 percent in 1989 to reach 718 million pounds, a substantial contribution to the UK's balance of payments.

Further significant investment has been made in LVMH, but interest cover, at nearly 8.7 times, remains strong. Cash flow from operations amounted to 417 million pounds, an increase of 33 percent over 1988.

The balance sheet includes a revaluation of properties in the spirits and brewing divisions, which showed a surplus of 202 million pounds.

LOS ANGELES (MARCH 22) PR NEWSWIRE - Logicon Inc. (NYSE: LGN) has received two contracts totalling $14 million for follow-on work related to enhancements to an Automated Target Tie-Up (ATT) system for the U.S. Air Force Strategic Air Command (SAC) and the Joint Strategic Target Planning Staff.

ATT is an automated decision-making system enabling Air Force mission planners to assign targets to manned aircraft and air-launched cruise missiles. Contracting for the program is handled by the Defense Nuclear Agency. Logicon developed the system for SAC in the late 1980s.

The company received an $8.55 million contract, running through February 1992, for software maintenance. This maintenance includes ongoing improvements to the generalized networks, more user control through the database, as well as selected additional capabilities.

A second contract for $5.44 million calls for continued development of new planning capabilities, including incorporating additional weapon systems such as the Advanced Cruise Missile, and developing a new database system that will support multiple projects related to strategic planning.

Work will be performed at Logicon facilities in San Pedro, Calif., and Omaha, Neb.

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

SAN FRANCISCO (MARCH 22) PR NEWSWIRE - James P. Irving has been elected vice president of human resources for Chevron U.S.A. Inc., the domestic oil and gas subsidiary of Chevron Corporation. Irving succeeds Charles H. Mackdanz, who will assume the position of general manager of organization, development and compensation for Chevron Corp. (Mackdanz succeeds J. Kent Murray, recently named president of Chevron Research and Technology Company.)

Irving joined the company in 1968 as a research engineer with Chevron Oil Field Research Co. (COFRC) in La Habra. After a series of positions of increasing responsibility with COFRC, Irving was named manager of planning with the corporation's management planning and development staff in 1978. Following later engineering assignments, Irving became vice president, production research for COFRC in 1983. In 1985 he became president of COFRC. He assumed his present position as general manager of production for Chevron U.S.A.'s Central Region, exploration, land and production, in 1987.

Before joining Chevron, Irving worked as a research engineer for the Jet Propulsion Laboratory at the California Institute of Technology. He holds a bachelor's degree in chemical engineering from Notre Dame, a master's degree in chemical engineering from Northwestern and a doctorate in engineering and applied science from Yale.

Mackdanz joined Chevron in 1960. He has held various management positions in human resources in Denver, Salt Lake City and San Francisco. In 1979

he was appointed the assistant to the president of Chevron U.S.A. He then served as manager of the company's stock and savings plans, and was the manager of the corporation benefits staff. He had been the vice president of human resources for Chevron U.S.A. since 1985.

Mackdanz holds a bachelor's degree in chemical engineering from Washington State University.

HOUSTON, (MARCH 22) PR NEWSWIRE - Wyoming-California Pipeline Company (WYCAL), a subsidiary of The Coastal Corporation (NYSE: CGP), will hold an open season for shippers interested in contracting for firm or interruptible natural gas transportation services on its pipeline. WYCAL, an interstate pipeline to be built from Wyoming to California, will conduct the 45-day open season from March 28 through May 11, 1990.

WYCAL has received blanket certificate authority from the Federal Energy Regulatory Commission (FERC) to provide transportation services on an open-access basis. On March 19, 1990, WYCAL requested FERC authority to interconnect its pipeline system with the intrastate pipeline facilities of Pacific Gas and Electric Company and Southern California Gas Company just inside the California border. Construction on the pipeline should begin this fall, with an expected in-service date in late 1991.

Transportation request forms can be obtained by contacting Kenneth O'Connell at 719-520-4771.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining marketing, coal and chemicals and independent power production.

MENLO PARK, CA (MARCH 22) PR NEWSWIRE - Donald C. Baron, Arthur L. Chait and Louis Fried have been promoted to vice presidents of the International Business Consulting Group at SRI International.

Donald C. Baron is responsible for the International Operations Division. With major SRI offices in London, Paris, Frankfurt, Tokyo and Singapore, Baron's division is involved in a broad range of strategic, systems and industry-focused consulting projects for corporations and government entities worldwide.

Prior to joining SRI, Baron was with the International Institute of Management, Berlin, Capital Research and Management Company, and Boeing Aircraft Company. Baron received his B.S.E. from the University of Michigan, a master of science in management from M.I.T. and a doctorate in Finance from Stanford University.

Arthur Chait is responsible for leading the Technology and Strategy Consulting Group, which provides consulting in strategy development, innovation and technology management transfer. In his new role, Chait will be working with SRI staff in Europe, Asia and the United States to address strategy and technology issues worldwide.

Before joining SRI, Chait was with the UK-based PA Consulting Group, Booz Allen & Hamilton and Dresser Industries. He holds a bachelor of science in Engineering from Rutgers and a masters of business administration from the University of Pittsburgh. He is Chapter President of the Technology Transfer Society, a member of the American Management Association, the American Ceramic Society, the Planning Forum and Keramos.

Louis Fried will oversee the Information Technology Consulting Group, which provides business consulting, competitive analysis, product planning

and design services to suppliers and users of information technology, products and services. Fried's group assists in the design of technologies and system architecture design as well as develops artificial intelligence applications.

SRI International provides research, development and consulting to business and government worldwide.

SALEM, NH (MARCH 22) PR NEWSWIRE - Hadco Corporation (NASDAQ: HDCO) announced final plans today to expand its manufacturing capacities for multilayer printed circuit board blanks with an 11 million dollar addition to their Owego, N.Y. manufacturing facility. The expansion includes increasing the existing plant by 32,000 square feet and providing 115 new jobs.

Jon F. Kropper, president and CEO of Hadco stated, "The expansion of the

Owego, N.Y. facility is part of Hadco Corporation's continuing efforts to better serve the changing needs of our customers. The capability of producing a high volume of multilayer blanks in Owego will allow us to better control quality, costs and delivery to our customers."

Kropper added, "Hadco has been pleased with the performance of the Owego Division over the past 10 years. This major investment will make the Owego facility a truly full service supplier. The expansion in New York reflects our confidence in the Owego workforce and the availability of labor in the surrounding area to meet our growing employment needs."

An expansion of this magnitude could not have been accomplished without the assistance of several parties. "We are particularly impressed with the ready response and cooperation of the DED in Binghamton. Jack McGuire the regional director, and his staff, directed us to the appropriate state programs that will enable us to achieve our expansion goals. We at Hadco would like to thank the New York Urban Development Corporation, Tioga County IDA and other parties involved in this project for their assistance," said Kropper.

New York State Governor Mario M. Cuomo in a simultaneous announcement said "A basic goal of our economic development strategy is to encourage businesses to expand withing the State." He added "Hadco's decision to expand in Tioga County represents a vote of confidence in New York State and in the skilled workers of the Southern Tier." The govenor concluded, "The Hadco project will help the local economy and help our State sustain its competitive leadership in a critical high technology field."

Groundbreaking will be scheduled for April of 1990 with completion by the spring of 1991. A formal groundbreaking announcement is forthcoming.

#90081p0247 03/22/1990 ~PR Newswire

FINDLAY, OH (MARCH 22) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) has completed the purchase of buildings and related property in Albany, Georgia from Bridgestone/Firestone, Inc.

The buildings comprise approximately 1.8 million square feet of office, manufacturing and warehouse space situated on 325 acres of land. The facility was previously operated as a tire manufacturing and distribution center by Firestone Tire & Rubber Company, but was closed in 1986. No tire manufacturing equipment was involved in the purchase.

Cooper plans to install its own technology for the manufacturing of tires

upon completion of some building modifications and repairs. The company is also considering an opportunity to develop the facility into a fully automated distribution center to serve its customers.

The timetable for initial production is expected to take approximately one year, following a plan similar to the one developed for the start-up of the Tupelo, Mississippi facility which was acquired and opened in 1984.

In making the announcement of the purchase, William S. Klein, vice-president-operations, stated, "There is a lot of work ahead of us in the installation of the advanced tire manufacturing equipment and training of the initial employee teams. We will be building one of the most modern tire plants in the world, and every step is going to be carefully planned and executed. When we bring the Albany plant on stream it will make a big contribution to our overall productivity and manufacturing efficiency."

The purchase price and estimated costs related to initial startup are not being released. The company is financing the acquisition and capital investments through current earnings and debt placement.

In 1989 Cooper Tire & Rubber Company sales were $866.8 million with earnings of $58.2 million. Long-term debt amounted to $65.7 million and represented only 12.6 percent of total assets amounting to $519.9 million.

Cooper Tire & Rubber Company is headquartered in Findlay, Ohio and has tire plants in Findlay, Texarkana, Arkansas and Tupelo, Mississippi. The company was founded in 1914 and serves customers in the replacement tire industry throughout the world.

PRINCETON, NJ (MARCH 21) PR NEWSWIRE - Ingersoll Newspapers, Inc. (INI) announced today that it will commence on Thursday, March 22, 1990, tender offers and consent solicitations for the 13 percent senior subordinated reset notes due 1997 of Community Newspapers, Inc. (CNI) and the subordinated discount debentures due 1997 of CNI. Pursuant to the offers, INI is offering to purchase up to 80 percent of the outstanding principal amount of CNI's reset notes for 55 percent of their principal amount and to purchase 51 percent of CNI's discount debentures for 25 percent of their principal amount (approximately 28 percent of their accreted value at March 21, 1990). Accrued interest will not be paid on securities purchased pursuant to the offers.

Holders of reset notes or discount debentures who tender their securities will be required to consent to certain proposed amendments to the

indentures relating to such securities, including the elimination or amendment of certain covenants and other provisions. Consents given in connection with the tender of securities will be used only if such securities are accepted for purchase in the offers. The effectiveness of the proposed amendments to each indenture requires the consent of holders of 51 percent of the outstanding principal amount of the related securities.

Under the indentures of the securities, the securities purchased by INI pursuant to the offers will continue to be outstanding, and interest will continue to be paid on such securities in the same manner as interest is paid on the securities not purchased by INI.

The offers will each expire at midnight on Friday, April 20, 1990. Withdrawal rights under the offers will expire at midnight on Wednesday, March 28, 1990. The proration period for the offers will expire at midnight on Friday, April 6, 1990. Securities tendered after expiration of the proration period will, if purchased, be purchased in the order in which they are tendered until INI has purchased the amounts of each of the securities sought by the offers.

The offers are subject to a number of conditions including, among other things, the receipt of sufficient financing to consummate the offers, 51 percent of the aggregate principal amount of each of the reset notes and the discount debentures being tendered and not withdrawn, the tender of sufficient consents to the proposed amendments to the indentures and INI being satisfied that such amendments will become effective upon the acceptance for payment of securities under the offers. Each offer is also conditional on the consummation of the other offer.

CNI has outstanding $125,000,000 principal amount of reset notes and $114,853,000 principal amount of discount debentures (approximately $103,464,000 of accreted value at March 21, 1990). CNI and INI are each holding companies for a number of newspaper publishing operations, and are affiliates.

WASHINGTON, DC (MARCH 22) PR NEWSWIRE - The following news release was issued by the National Security Industrial Association in Washington, D.C.:

Stanley C. Pace, Chairman of the Board and Chief Executive Officer of General Dynamics Corporation, will accept the 1989 James Forrestal Memorial Award from the National Security Industrial Association and will speak at the 36th Forrestal Dinner on March 22, 1990 (tonight) at the Sheraton Washington Hotel, Washington, D.C.

The award commemorates James Forrestal, Secretary of the Navy during World War II and later the first Secretary of Defense, who was instrumental in the establishment of NSIA in 1944. President Dwight D. Eisenhower was the recipient of the first Forrestal Award in 1954.

The Association's choice of Mr. Pace for this year's award emphasizes Forrestal's concept that a continuous and close working relationship between government and industry is essential to the nation's security. This concept was employed with exceptional effectiveness by Mr. Pace during his 36 years in the defense industry where he has been a dynamic champion of the American system and a dedicated proponent of a strong national security.

NSIA is a 46-year-old, not-for-profit, non-political national association of some 440 industrial, legal, educational and research organizations of all types and sizes, representing all segments of the defense industry.

#90081p0276 03/22/1990 ~PR Newswire
WASHINGTON (MARCH 22) PR NEWSWIRE - At 2 p.m. EST today, Kevin M. Blakely deputy comptroller for special supervision, Office of the Comptroller of the Currency (OCC) declared Miami National Bank, Miami, insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver.

Miami National Bank was chartered in 1955. As of Dec. 31, 1989, it had total assets of $46 million.

Beginning in 1980, the bank greatly expanded its loan portfolio with funding from above market rate deposits. As a result, loan problems became substantial. Loan and operating losses also increased. Operating losses were increased primarily because of an expensive sale and leaseback of the head office and expensive leases for branches. In 1984 the OCC

obtained commitments from the board of directors to undertake measures to correct the bank's problems. As a result, the bank's total assets were reduced by about 50 percent. Loan problems were somewhat stabilized, but overhead costs were still too high to allow for profitable operations. When current ownership acquired the institution in 1987, attempts were made to reduce overhead and to concentrate on trade-related lending. Although overhead was somewhat reduced, new capital was never infused and losses continued, resulting in insolvency.

The FDIC is expected to release additional information later today.

#90081p0281 03/22/1990 ~PR Newswire

SEATTLE (MARCH 22) PR NEWSWIRE - Boeing Commercial Airplane Group today proposed a phased expansion of its Everett, Wash., facility that would add

more than four million square feet of office, production and warehouse space if all the projects are carried out.

It could be the largest expansion at that plant since 1978 when a four-year program added nearly 2.5 million square feet.

The city of Everett will prepare an environmental impact statement (EIS) for this project. The city will be responsible for ensuring the project receives complete environmental review.

If approved, the project is scheduled to begin in the spring of 1991 and continue in phases at the Everett Division's 1,000-acre site. Full development of the proposal could take 10 years or more.

"How fast we expand depends on market factors and production requirements " said William L. Shineman, vice president-general manager of the Everett Division. "At the moment, orders are pressing the limits of our manufacturing capability in Everett.

"The upgrade will help the Boeing Co. retain its leadership in the commercial airplane market, have an efficient production flow and maintain a high quality, safe and effective working environment for its employees," he said.

The expansion calls for construction or enlargement of manufacturing and office buildings, as well as additional ground support space for commercial airplane production. Employee parking areas and landscaping are also included in the plan. Optional provisions would add new paint hangars, expand the flight line and construct a new clean, seal and paint building for finishing the interior of the wings and fuselage sections.

According to Shineman, the planned expansion will meet current demands and accommodate future orders for 747 and 767 airplanes.

CORPUS CHRISTI, TX (MARCH 22) PR NEWSWIRE - Corpus Christi Mayor Betty Turner joined Delta Air Lines (NYSE: DAL) today in announcing that Delta will inaugurate service here on July 1.

"Today is a day long anticipated by both Delta and Corpus Christi, and we're excited about bringing Delta's service to this new Texas destination " said Dave Anderson, Delta's district director - marketing. "Delta's service will offer convenient flights throughout the day to Dallas/Fort Worth, Delta's second largest hub where on July 1 we will offer over 250 flights daily to 67 nonstop destinations.

"Corpus Christi passengers are sure to enjoy Delta's Dallas/Fort Worth Terminal 4E facilities, widely-known as 'Easy Street' for its convenience of one-terminal connections from our 31 gates," he added.

Delta's schedule will offer three round-trip flights daily, featuring the 107-seat Boeing 737 aircraft. The schedule is as follows:

Corpus Christi to Dallas/Fort Worth

DEPARTS	ARRIVES
6:15 a.m.	7:35 a.m.
11:00 a.m.	12:15 p.m.
4:45 p.m.	6:00 p.m.

Dallas/Fort Worth to Corpus Christi

DEPARTS	ARRIVES
8:30 a.m.	9:45 a.m.
3:00 p.m.	4:15 p.m.
8:35 p.m.	9:50 p.m.

Delta, one of the world's largest airlines, operates the youngest aircraft

fleet of the nine largest U.S. carriers. Delta also leads the industry in passenger satisfaction. Of the nine largest U.S. airlines, Delta has received the fewest number of passenger complaints per 100,000 passengers flown since 1974, according to U.S. Department of Transporation records.

Delta and The Delta Connection carriers serve over 260 cities in the United States, Great Britain, West Germany, France, Ireland, Japan, Korea, Taiwan, Thailand, Canada, Mexico, Bermuda and the Bahamas. On July 1 Delta will begin service to Amsterdam, and the airline has announced plans to seek routes to Italy and Russia.

DETROIT (MARCH 22) PR NEWSWIRE - U.S. automakers will assemble an estimated 140,253 cars this week, up 3.3 percent from last week's actual count of 135,731, Ward's Automotive Reports announced today.

Same-week 1989 saw car output of 127,502 during a shortened work week because of last year's Good Friday observance. Average daily build this week is estimated at 28,050 compared to year-ago's rate of 31,875 cars per day.

Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 1,309,338 units, trailing year- ago's build of 1,767,333 by nearly 25.9 percent.

General Motors Corp.'s Wentzville, Mo., plant remained closed this week, retooling for production of the 1991 Park Avenue. The plant will reopen

Monday, March 26, and will continue to build Pontiac Bonneville and Olds 88 models. Weekend overtime is slated at Orion and Flint, Mich., and Janesville, Wis.

All Ford Motor Co. plants are up and running, with daily overtime reported at Wixom, Mich.; Atlanta; Chicago; and Kansas City, Mo. Weekend overtime is scheduled at Wixom.

Chrysler's St. Louis car plant continues to operate at only one shift. Ward's said U.S. truck production will be an estimated 89,490 units, compared to last week's count of 83,285. This compares with year-ago's count of 71,642. Average daily truck build for this week is estimated at 17,898 vs. same-week 1988's rate of 17,910.

U.S. truck production for calendar year 1990 through the end of this week is estimated at 835,704 vs. year-ago's 1,070,178, said Ward's.

All domestic truck plants are up and running this week, with daily overtime reported at Ford's Twin Cities, Minn.; Louisville, Ky.; and St. Louis plants. The Louisville plant has also slated weekend overtime. General Motors has planned weekend truck output at plants in Baltimore; Flint and Pontiac (East), Mich.; and Moraine, Ohio. The Pontiac West plant will add S-10/S-15 pickup production next week. In addition, the plant will continue to produce S-10/S-15 SUV models.

Of this week's estimated U.S. car output, GM accounts for 43.0 percent; Ford, 25.7 percent; Chrysler, 11.2 percent; Honda of America Manufacturing Inc., 6.7 percent; Mazda Motor Manufacturing (U.S.A.) Corp., 3.1 percent; Nissan of America Manufacturing Corp., 1.7 percent; New United Motor Manufacturing Inc., 2.9 percent; Toyota Motor Manufacturing U.S.A. Inc., 3.2 percent; Diamond-Star Motors Corp., 2.2 percent; and Subaru-Isuzu Automotive Inc., 0.3 percent.

ARLINGTON, VA (MARCH 22) PR NEWSWIRE - Bell Atlantic (NYSE: BEL) today filed a request with the Justice Department for permission to offer improved videotex gateway service.

The relief sought by Bell Atlantic would make its Gateway service easier for consumers to use and more attractive to businesses that offer electronic services.

Bell Atlantic Gateway service allows people with computers to reach a wide variety of electronic services such as home shopping, dining and travel guides, and medical and investment news.

Two years ago, the court administering the Modification of Final Judgment -- the decree that broke up the Bell System -- partially eased the decree prohibitions on information services, allowing telephone companies like Bell Atlantic to offer limited gateway services. Bell Atlantic began offering Gateway service, subject to those restraints, in January 1989.

Bell Atlantic's Gateway service is available to customers with personal computers and modems in Washington, the greater Philadelphia area and areas served by the Diamond State Telephone Company in Delaware.

Philadelphia-based Bell Atlantic Corporation is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware) and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia and Washington.

The corporation is also the parent company of businesses that provide

mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

BRAINTREE, MA (MARCH 22) PR NEWSWIRE - The Stop & Shop Companies today announced that effective March 23, 1990, George M. Granoff has resigned his position as president and chief operating officer of its Bradlees Discount Department Stores business. Lewis G. Schaeneman, Jr., chairman and chief executive officer of the Stop & Shop Companies, the holding company for Bradlees and the Stop & Shop Supermarket Company, and chairman & CEO of Bradlees, will assume the presidency of Bradlees.

Several changes in Bradlees' senior management have also been announced. Barry Berman has been named senior vice president, merchandising and marketing for Bradlees. Berman is currently vice president of marketing, perishable sales and procurement for the Stop & Shop Supermarket Company. Norman Chalphin, vice president/director of stores for Bradlees, has been named senior vice president stores and operations. Berman and Chalphin will report to Lewis G. Schaeneman, Jr., chairman & chief executive officer of the Stop & Shop Companies.

Berman has been with the corporation since 1967. He began his career as internal auditor in corporate financial controls. He has held numerous positions including market manager for the supermarket company; sales manager for the manufacturing company; bakery sales manager; and vice president of advertising and marketing services for the supermarket company. He was named vice president of marketing, perishable sales and procurement for the supermarket company in 1985. Herbert Douglas, vice president, general merchandise manager (hard lines); Fred Gelfand, vice president and director of marketing; and John Gounaris, vice president, general merchandise manager (soft lines), will all report to Berman.

Chalphin began his career with Bradlees in 1974 as a store manager in training at the company's Vineland, N.J., location. He served as market manager for southern New Jersey; regional manager, New York/New Jersey; and director of stores for the New York/New Jersey and mid-Atlantic regions. In 1985, Chalphin was named regional manager of Bradlees' Greater Philadelphia Region; and regional manager of the Eastern New England Region in 1988. He was named vice president/director of stores in 1989. Bradlees' regional vice presidents, Hicks, Kelsey and Lancor, and Macklin, vice president stores operations, will continue to report to Chalphin. Peter Vagi, vice president, store design and engineering, will now report to Chalphin.

The Stop & Shop Companies operates 130 Bradlees Discount Department Stores and 119 Stop & Shop Supermarkets.

#90081p0317 03/22/1990 ~PR Newswire

RIVERTON, WY (MARCH 22) PR NEWSWIRE - U.S. Energy Corp. (NASDAQ: USEG) and its subsidiary Crested Corp. (NASDAQ: CBAG) announced today that it has been informed by Kennecott Corp. that the board of directors of Kennecott's ultimate parent corporation, the RTZ Corp. PLC of London has approved a revised Letter Agreement concerning the further exploration, development and production of a major uranium mineral properties. The properties are owned in various percentages by U.S. Energy and Crested (the "USE Parties"), and are located in south-central Wyoming.

John L. Larsen, president of U.S. Energy and chairman of Crested, said, "We are pleased to be associated with the Kennecott Corporation, one of the most highly respected, large mining companies in the United States in the development of this world-class uranium resource." He continued, "with the demand for over 250 million pounds of uranium oxide that must filled in this decade to fuel over a 110 nuclear energy plants operating in the United States, our domestic utilities must start to fill these requirements in the near future or possibly face a shortage of uranium oxide. If this does happen, the utilities will have to pay much higher prices for uranium." Larsen further commented, "this is not a uranium mine, but a Mining District. Two mines are presently planned on the properties, which have sufficient uranium resources to produce 10 million pounds of uranium annually and could be expanded if market conditions warrant."

On Jan. 15, 1990, the USE Parties entered into the initial Letter Agreement with Kennecott, a wholly owned indirect subsidiary of the RTZ Corp., for Kennecott to acquire a 50 percent interest in the properties. Under the revised Agreement, Kennecott will pay the USE Parties $15 million, of which $6 million will be received before March 22, 1990 and the balance of $9 million will be due at closing on June 1, 1990 subject to certain conditions. This Agreement was approved by the board of directors of U.S. Energy and Crested on March 19, 1990.

Larsen added, "The revised Letter Agreement with Kennecott benefits all parties and represents a significant step towards the development of several major uranium mines. Under the revised Agreement, Kennecott will fund 100 percent of the first $50 milion of work expenditures and capital contributions toward mine development, which will initially involve the "Jackpot" property, owned solely by U.S. Energy in the Green Mountain

area. Kennecott will also pay the USE Parties $30 million out of 30 percent of its incremental operating margins from production from the individual properties, attributable to price realizations over $24 per pound (1990 dollars) and an additional $15 million dollars from 30 percent of Kennecott's share of incremental operating margins, attributable to price realizations over $27 per pound (1990 dollars)," he concluded.

A joint venture, equally owned by Kennecott and the USE Parties, will be formed, and the properties will be conveyed to the venture, which will be controlled by Kennecott through a management committee. The USE Parties will be the initial operator of the project.

The board of directors of U.S. Energy and Crested have adopted a method of apportioning the initial consideration of $15 million, on a ratio of 84 percent for U.S. Energy and 16 percent for Crested. Financial economic analyses were provided to the boards for their consideration to arrive at this ratio. The Jackpot uranium deposit contains a drilled resource of more than 50 million pounds of uranium oxide which heavily weighed the ratio percentage in favor of U.S. Energy. Plans are for this deposit to be the first property to be put into production. This appointment does not, however, change the distribution of cash flow to U.S. Energy and Crested out of production from their respective property interests.

LOUISVILLE, KY (MARCH 22) PR NEWSWIRE - Unprecedented consumer demand for Kentucky Fried Chicken's new Hot Wings, with sales running at nearly double the highest rate in earlier test markets, are straining supplies and bringing a temporary halt to national advertising.

HOT WINGS are crispy, marinated and breaded chicken wings with spicy seasoning. The new product was introduced nationally two weeks ago and quickly outstripped the sales rates and projections based on earlier successes in seven test markets across the country. As a result, Kentucky Fried Chicken is suspending national advertising of the product until supply can catch up to demand.

"The good news is that consumer demand is unprecedented, the bad news is that supply isn't," said Kentucky Fried Chicken spokesman Gregg Reynolds.

"We're absolutely thrilled with the outstanding consumer demand for our new product," Reynolds said. "We've never seen a new product catch the public's fancy so completely as HOT WINGS. But we're asking our customers to have patience if their favorite KFC restaurant is temporarily short on product."

"I didn't think it was possible to have too much business," the spokesman added, "but I was wrong. We're beating the bushes to increase our supplies and telling our R & D people that if any chicken growers have six-wing chickens, now's the time to bring them to market."

Kentucky Fried Chicken operates or franchises some 8,000 restaurants on six continents.

#90081p0322 03/22/1990 ~PR Newswire

CORAL GABLES, FL (MARCH 22) PR NEWSWIRE - An international consortium led by Texaco has made a new discovery of crude oil in a wildcat well off the northwest coast of Angola, it was announced today by C. Robert Black,

president of Texaco Latin America/West Africa.

The wildcat, known as Bagre-1, is located seven miles offshore on Block 2, a one-million acre tract. The discovery flowed at a combined rate of more than 13,488 barrels of oil per day of 34.6 -to 36.8-degree API gravity crude from five zones between 9,130 and 9,640 feet in a cretaceous dolomite reservoir. The well was drilled to a total measured depth of 11,086 feet in 72 feet of water. Bagre-1 is the consortium's latest oil discovery in Block 2. The wildcat is located 7.5 miles south of the Raia Field, which was discovered in June 1988, and is currently in the preliminary development stage. Both fields are about 200 miles north of the capital city of Luanda. The development potential of the discovery is under evaluation.

Operations in Block 2 are conducted under a production-sharing agreement which was entered into with Sociedade Nacional de Combustiveis de Angola (SONANGOL), the state oil company of Angola, in 1980. Since that time, the consortium has been producing the Essungo and the Cuntala Fields in the northern part of the block. In the far southern part of the block, production began in late 1987 from the Lombo East, Tubarao, Sulele West and Sulele South Fields.

An operating subsidiary of Texaco serves as operator of Block 2 and holds 20 percent interest. Sociedade Nacional de Combustiveis de Angola (SONANGOL) is the concessionaire and holds a 25 percent interest, while Total Angola (TOTAL) and Petrobras Internacional S.A. (BRASPETRO) each hold a 27.5 percent interest.

#90081p0323 03/22/1990 ~PR Newswire

FRESNO, CA (MARCH 22) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) reported record sales and earnings results for the fourth quarter period ended Feb. 3, 1990.

Fourth quarter net income increased 48 percent to $5.8 million from $3.9 million for the year earlier fourth quarter period. "Net income for the quarter was further reduced by $287,000 for an extraordinary loss incurred by the company related to earthquake damages to our Santa Cruz store, thus bringing our final quarterly net to $5.5 million," stated Joe Levy, chairman and chief executive officer.

Sales for the fourth quarter increased 28.6 percent to $93.4 million from $72.6 million for the prior year quarterly period. Same store sales for the quarterly period increased 12.9 percent. Quarterly per share earnings before extraordinary loss increased 50 percent to 72 cents per share from

48 cents for the year earlier fourth quarter.

Joe Levy stated that "these sales and earnings results are indicative of the fact that our department store base is relatively immature as a result of our rapid expansion during the past three years. While the newer stores tend to drain profits during the first nine months of the year, significant operating leverage is achieved during the fourth quarter, such that the newer stores are quite profitable. Certainly as these stores continue to mature and as the population base continues its rapid expansion in our market areas the seasonality of our operating results should be somewhat diminished.

"During 1989, we opened three new department stores, a new distribution center and closed one store due to the earthquake. This all occurred within a 90-day period and certainly created an eventful year.

"Our focus for 1990 will be to digest our recent expansion activities with particular focus given to improving our distribution process and gross margin return on investment. The new 420,000-square- foot distribition center was certainly a drain on profits in 1989 and will continue to negatively impact operating results until it becomes fully operational.

"We plan to reach 90 percent efficiency in the building by July 1. This facility will then handle our distribution needs for years to come.

"While the fourth quarter was highly promotional in the retailing industry our gross margins actually improved. Our goal will be to continue to focus on narrowing our assortments while taking advantage of selected buys and offering additional value to our customer. Some major buying opportunities continue to exist, and we plan to pursue them. I believe 1990 will present some exciting opportunities for regional retailers, and we look forward to the challenges which will accompany these opportunities " added Levy.

Gottschalks is a regional department store chain, currently operating 22 department stores and 31 specialty apparel stores in the Cental Valley and Central Coast areas of California. Gottschalks offers moderate to upper moderately priced brand-name fashion merchandise, and is in it 85th year of continuous family management.

#90081p0335 03/22/1990 ~PR Newswire

HOUSTON (MARCH 22) PR NEWSWIRE - Continental Airlines has unveiled its "look of the 90s," a new upscale corporate image that symbolizes the airline's continuing worldwide commitment to customer service excellence.

Continental's 6,200 flight attendants are now outfitted in classically tailored navy blue uniforms with gold braid trim. In addition, first class flight attendants on transoceanic flights will now wear white dinner jackets during meal service. The new high-quality uniforms, which have a total $5 million price tag, were developed by a special flight attendant task force.

"The very professional look we're revealing today is indicative of Continental's ongoing commitment to offering our customers a quality product," said Continental Chairman Frank Lorenzo.

Continental's new look of the 90s caps a series of dramatic improvements by the airline in service and operational performance. All 25,000 of its customer-contact employees have graduated from the Quality Service Institute, which opened last spring. Since that program started, compliments received by the airline have skyrocketed while complaints have dropped to all-time lows.

Continental also improved in every operational performance category, year-over-year from 1988 to 1989, including on-time arrivals. That trend is continuing in the first quarter of 1990.

Present at the uniform unveiling was Continental's most senior flight attendant, Denver-based Johnnie Murphy, wearing a 1980s Continental uniform. Murphy has 36 years with the airline. Continental Inflight Quality Assurance Manager Ernestine Pina Sandoval modeled a 1950s uniform from the era of Continental's DC-3 service, while members of the airline's most recent flight attendant graduating class modeled the various elements of the new uniform. Still other Continental flight attendants wore uniforms from the 70s and 80s, as well as from Texas International, signifying the evolution of the airline's public image.

MIAMI (MARCH 22) PR NEWSWIRE - Burger King Corporation announced today that Fredy M. Dellis has been named president, Burger King International. Dellis, 44, was formerly president, Hertz International and executive vice president, Hertz Corporation.

In his new capacity, Dellis will be responsible for Burger King Corporation's international expansion strategy and the day-to-day operations of the more than 700 Burger King restaurants in 35 countries outside of the United States. Dellis will be based in Miami and will report to Barry J. Gibbons, chief executive officer, Burger King

Corporation.

"We are delighted to have Fredy join our team," said Gibbons. "His 20 plus years of international operations experience will help bring added leadership and innovation to the execution of our international strategy," added Gibbons.

In his former position with Hertz Corporation, Dellis was responsible for international activities including rent-a-car operations, car leasing and dealership business.

Dellis, a native of Belgium, was educated in France (Sorbonne and IDRAC) and commenced his career with the Hertz Corporation in 1969. He has worked in Finance, Marketing and Operations and has been based in seven different countries.

Burger King Corporation was acquired by Grand Metropolitan in January 1989. One of the United Kingdom's largest international companies, Grand Metropolitan is a world leader in the food, drinks, and retailing businesses. U.S. subsidiaries also include The Pillsbury Company, Alpo Pet Foods, Carillon Importers, Heublein, Inc., The Paddington Corporation, and Pearle, Inc. Burger King Corporation and its franchisees operate more than 6,000 restaurants in 36 countries worldwide. In Fiscal Year 1989, the company had systemwide sales of $5.7 billion.

AUGUSTA, GA (MARCH 22) PR NEWSWIRE - Bankers First Federal Savings and Loan Association of Augusta, Ga. and First Federal Savings and Loan Association of Thomson-Washington, Ga. announced the signing of a definitive agreement providing that First Federal of Thomson will acquire the physical assets and assume the deposits of the Waynesboro office of Bankers First Federal.

At March 20, the Waynesboro branch of Bankers First Federal had deposits of approximately $26.0 million.

The transaction must be approved by regulatory authorities. The boards of directors of Bankers First Federal and First Federal of Thomson have approved the transaction.

H.M. Osteen Jr., chairman and chief executive officer of Bankers First Corp., commented, "The sale of the Waynesboro Branch is part of our restructuring plan to sell branch banking facilities in communities that

are outside of our primary markets."

Michael Evans, president of First Federal of Thomson, stated: "We are extremely pleased to enter the Waynesboro, Burke County market. We believe in the future of this area and the people that reside here." First Federal Savings and Loan Association of Thomson-Washington is headquartered in Thomson, Ga.

Bankers First Federal Savings and Loan Association is a wholly owned subsidiary of Bankers First Corp. (NASDAQ: BNKF) a financial services company principally serving the Augusta, Athens, Rossville, and Savannah, Ga. markets with 37 banking offices and 33 automated teller machines. #90081p0343 03/22/1990 ~PR Newswire

LOS ANGELES (MARCH 22) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) said today that it is seeking a buyer for its consumer finance subsidiary, NOVA Financial Services, and has retained Goldman, Sachs & Co. to identify potential buyers and evaluate bids.

The unit, one of the top 10 consumer finance companies licensed in California, provides unsecured and secured consumer loans through 64 offices in California, six in Colorado and one in Hawaii. Founded in 1984 as First Interstate Financial Services, NOVA has 360 employees and loans outstanding of nearly $420 million.

First Interstate President Edward M. Carson said the decision to sell NOVA was consistent with the corporation's long-term strategy to refocus on its core banking business, which is building banking relationships with customers.

"NOVA is an extremely effective organization," said Carson. "However, being a consumer finance company, it does not accept deposits nor does it lend depositors' money. Therefore, NOVA's banking relationships are one-way lending relationships. As such, it no longer fits within our overall strategic objectives."

George E. Anderson, president and chief executive officer of NOVA, stated that First Interstate intends to sell NOVA as an ongoing business. Because of this, he expects that there will not be a reduction in staff.

"One of the strengths of this company is its sales force," said Anderson. "In just six years since this company's founding, we have developed into a sales-oriented organization that will be an asset to any prospective buyer."

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate nearly 1,200 full-service offices in 21 states. These offices serve five million households in more than 650 communities, including seven of the 10 fastest growing metropolitan markets in the U.S. Other offices serve U.S. and international customers in 19 countries.

CALGARY, Alberta (MARCH 22) PR NEWSWIRE - NOVA Corporation of Alberta (NYSE, Montreal, Toronto: NVA) has received inquiries in recent months from other corporations seeking purchase of or merger with NOVA's Rubber Division.

NOVA'S Rubber Division constitutes the global synthetic rubber business which was part of the Polysar Limited acquisition of 1988. NOVA had intended to continue owning this business unit but has decided that it will now investigate other possibilities because of the strength of interest expressed. NOVA has engaged Morgan Stanley & Co. Incorporated to organize evaluation of the best possible transaction.

Terms of any transaction would be negotiated only if the value offered is fully attractive and would be subject to approval by NOVA's Board.

Because of the possibility of future negotiation, NOVA will not comment on the potential values.

JACKSONVILLE, FL (MARCH 22) PR NEWSWIRE - St. Joe Paper Company and the

Alfred I. duPont Testamentary Trust announced today that the trust sold 5,031,250 shares of St. Joe common stock to the public through a group of underwriters led by Salomon Brothers Inc. The public offering price was $45.75.

In connection with such offering, St. Joe also announced that it had effected a 350-for-one stock split, effective at 4 p.m. today, and a change in the par value of its common stock from $100 par value per share to no par value. St. Joe stated that the common stock will begin trading on the New York Stock Exchange on Friday, March 23, 1990, under the symbol "SJP."

The company, headquartered in Jacksonville, is engaged in five separate business segments, with most of its operations in Florida. These include the integrated manufacture of linerboard and corrugated containers, the operation of two railroads, the management and development of company-owned real estate holdings, the cultivation, harvesting and processing of sugar cane into raw sugar and the provision of telecommunications services.

PITTSBURGH, (MARCH 22) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) today commenced an offer to exchange shares of its common stock for any and all of its 3 million outstanding warrants for the purchase of common stock (the "warrants").

Subject to the terms and conditions of the offer, the corporation will exchange 0.23 shares of Mellon Bank Corp. common stock for each warrant validly tendered and accepted in the exchange.

The exchange offer will expire at midnight Eastern Standard Time on April 18, 1990, unless extended. The shares of common stock to be issued pursuant to the exchange offer will be delivered promptly following the expiration date.

The warrants were issued in 1988 in connection with the corporation's recapitalization program. Each of the warrants entitles the holder to purchase one share of the corporation's common stock at an exercise price of $25 per share, subject to certain adjustments, until August 7, 1994. The closing price of the common stock was $25 per share on March 22, 1990.

In the absence of the exchange offer, 3 million shares of common stock would be issued if all of the currently outstanding warrants were exercised. Assuming 100 percent participation in the exchange offer,

690,000 shares of common stock would be issued, and all of the warrants would be extinguished.

Smith Barney, Harris Upham & Co. Inc. is acting as dealer manager in connection with the exchange offer. Copies of the prospectus supplement, the related prospectus and letter of transmittal for the exchange offer may be obtained through the dealer manager at 415-955-1698 (collect calls will be accepted) or the corporation at 800-245-1094 (outside Pa.), or 800-872-3019 (inside Pa.).

With assets of $31.5 billion at Dec. 31, 1989, Mellon Bank Corp. is one of the nation's 20 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

OCALA, FL (MARCH 22) PR NEWSWIRE - Mid-State Federal Savings Bank (NASDAQ-NMS: MSSB) announced today that a special meeting of shareholders has been scheduled for May 24, 1990, to consider the proposed acquisition of Mid-State Federal by First Florida Banks (NASDAQ: FFBK). Mid-State Federal shareholders of record on April 6, 1990, will be entitled to vote at the meeting.

Mid-State Federal also announced that it has agreed to revise the structure of the proposed transaction at First Florida Banks' request to allow Mid-State Federal's branch offices to become branch offices of First Florida Banks' national bank subsidiary immediately upon completion of the acquisition. The revised structure takes advantage of a provision in the recent federal legislation which permits a thrift institution to be merged directly with a commercial bank subsidiary of a bank holding company if certain conditions are met. One of the necessary conditions is that the thrift institution have tangible capital of less than 4.0 percent of total assets if the merger will occur prior to Aug. 10, 1990. As Mid-State Federal has tangible capital in excess of 4.0 percent, the acquisition cannot be completed under the revised structure until after that date. Mid-State Federal is presently hopeful that the acquisition can be completed by Sept. 30, 1990. However, the transaction is subject to a number of conditions, including the prior approval of applicable regulatory authorities, and the possibility exists that delays in the completion of the transaction could occur. In view of the restructuring of the transaction, the date upon which either party may terminate the

definitive agreement has been extended to March 31, 1991, or, if certain further changes in the structure of the transaction should become necessary, six months after all regulatory applications have been filed.

Mid-State Federal Savings Bank is a publicly held, federally insured and federally chartered stock savings bank with its common stock traded in the national over-the-counter market under the symbol MSSB. With its home office in Ocala, Fla., the thrift has assets in excess of $1 billion and operates 26 branch offices within a five county area in West Central Florida.

MAYWOOD, NJ (MARCH 22) PR NEWSWIRE - National Community Banks, Inc. (NASDAQ: NCBR), the holding company of National Community Bank of New Jersey, announced today as a result of the continuing decline in New Jersey's real estate market, the bank's non-performing loans are expected to increase from $75 million at Dec. 31, 1989 to approximately $96 million at March 31, 1990.

The holding company further announced that in light of uncertainties resulting from declining real estate values, management has concluded that it would be prudent to increase the size of the bank's loan loss provision during 1990 to protect against unforeseen contingencies that may arise. For the first quarter of 1990, management anticipates that the loan loss provision will approximate $11.5 million as compared to $1.4 million in the first quarter of 1989.

The holding company indicated that as a result of the increase in the provision for loan losses in the first quarter, management anticipates that first quarter earnings will be less than the first quarter of 1989. Commenting on the impact, President and Chief Executive Officer Robert M. Kossick stated: "Despite the effects of the decline in the real estate market, the overall strength and financial condition of our bank remain sound. We expect our first quarter results to reflect a meaningful profit and to permit continuation of our normal dividends."

NCB indicated that its first quarter report will contain further explanation of these developments.

SCARBOROUGH, ME (MARCH 22) PR NEWSWIRE - Hannaford Bros. Co. (NYSE: HRD) today announced that it will restore immediately all Shop 'n Save label orange juice to its supermarkets in Maine, Vermont, New Hampshire, Massachusetts and New York. Hannaford's decision to return the product to the shelves of its 75 supermarkets is based on the findings of the investigation conducted by the Maine Department of Agriculture and the company's own internal investigation and testing.

On Saturday, March 17, Hannaford ordered the immediate removal of all Shop 'n Save orange juice from Hannaford supermarket shelves when a consumer alleged that a half gallon orange juice carton purchased in Westbrook, Maine, contained two sewing needles. The Maine Department of Agriculture concluded today that this was "an isolated incident" and that "the product which was voluntarily removed from sale may be returned to the shelves at the company's discretion.

"We are extremely pleased that the findings of the Department of Agriculture mirror those of our own internal investigation," commented Hannaford's president and chief operating officer Hugh G. Farrington. "The health and safety of our customers is Hannaford's first priority. We work extremely hard to ensure the high quality and integrity of our products. As with any food safety issue, we do not return any product to the shelves without a decision from the appropriate state and federal agencies indicating that the product does not constitute a health risk to the public."

"Given the findings of the investigations, we are confident that the Westbrook matter is an isolated incident and that our product is free of contamination and safe for consumption. The product will be on sale again today," concluded Farrington.

Hannaford Bros. Co. is northern New England's largest retail food distributor with over $1.5 billion in annual sales and over 13,000 employees in Maine, New Hampshire, Vermont, Massachusetts, and New York. Retail sales are made through the company's 75 supermarkets operating under the names Shop 'n Save, Martins, and Sun Foods. Hannaford also operates 41 wholly owned retail drug stores under the Wellby Super Drug name.

#90081p0381 03/22/1990 ~PR Newswire

WASHINGTON (MARCH 22) PR NEWSWIRE - Jerry M. Hunter, general counsel of the National Labor Relations Board, today announced a $13 million settlement resolving a four-year labor-management dispute between the Firearms Division of Colt Industries in Connecticut and Local 376 of the United Automobile Workers union.

Under the agreement, Colt's Manufacturing Company will pay $10 million to the NLRB, which will distribute it to employees of the company. In addition, the company will offer jobs to approximately 700 former employees of the Firearms Division of Colt Industries. Finally, the parties agreed to settle other related matters totalling $3 million.

The cases arose in 1985, after the Firearms Division and the union, which has represented the employees of the Firearms Division at plants in Hartford and West Hartford since 1948, were unable to reach agreement on a new collective-bargaining agreement covering wages and working conditions for those employees. In January 1986, approximately 1,000 employees then working for the Firearms Division engaged in a strike, which an administrative law judge of the NLRB concluded on Sept. 7, 1989, was caused and prolonged by unfair labor practices committed by the Firearms Division. As part of the settlement, this division is being sold to Colt's Manufacturing Company.

In announcing the agreement between the parties, General Counsel Hunter said: "This $13 million settlement is the largest in which the National Labor Relations Board has been involved since its inception in 1935. It results from the outstanding efforts of our Hartford Regional Office, as well as the commitment of the company and the union to work together to reach a settlement of this lengthy labor-management dispute."

NLRB Regional Director Peter B. Hoffman of Hartford represented the agency in negotiating the agreement, which complies with the judge's recommended order and resolves other pending cases involving the union and the former employer of the discriminatees.

#90081p0382 03/22/1990 ~PR Newswire

PORTLAND, OR (MARCH 22) PR NEWSWIRE - Fred Meyer Inc. (NASDAQ: MEYR) announced today results for its 1989 fourth quarter (13 weeks) and for the year ended Feb. 3 (53 weeks).

Net sales for the 1989 fourth quarter rose to $672.9 million (13 weeks) over the $568.4 million (12 weeks) reported in the fourth quarter of the prior year. Comparable store sales increased 5.1 percent for the quarter

on a 12-week comparable basis.

Income from operations for the 1989 fourth quarter was a loss of $35.1 million, versus the $25.2 million income reported in 1988's fourth quarter. Excluding the effect of the restructuring charge, as described in the company's March 20 press release, 1989 fourth quarter income from operations was $14.2 million.

Net income in 1989's fourth quarter decreased to a loss of $23.0 million from the $15.3 million income reported a year ago. Earnings per share decreased to a loss of 93 cents for the fourth quarter of 1989 based on 24,698,000 shares outstanding, compared with net income per share of 62 cents for the prior year's quarter based on 24,646,000 shares outstanding. Excluding the effect of the restructuring charge, 1989 fourth quarter net income would have been $8.0 million, or 33 cents per share.

For the 1989 fiscal year, net sales rose to $2.28 billion (53 weeks) over the $2.07 billion (52 weeks) reported in the same period for 1988. Comparable store sales increased 4.5 percent in 1989 over the prior year on a 52-week comparable basis.

Income from operations was $0.8 million for 1989, compared to $66.2 million in 1988. Without the effect of the restructuring charge, 1989 income from operations was $50.1 million.

Net income for 1989 decreased to a loss of $6.8 million from the $36.7 million in net income reported a year ago. Net earnings per share for 1989 were a loss of 28 cents based on 24,801,000 shares outstanding, compared with net income per share of $1.50 in 1988 based on 24,470,000 shares outstanding. Net income for 1989 would have been $24.2 million, or 98 cents per share, when excluding the restructuring charge.

Frederick M. Stevens, chairman of the board and chief executive officer, said, "While 1989 has been a difficult year from an earnings perspective, we have taken a number of strategic steps this year to align the company to compete more effectively over the long-term. Important steps we have taken included the reorganization of our management structure, the settlement of the labor disputes we experienced this past year, and the acceleration of new store construction and remodeling plans. In addition, our plans to replace or close non-performing stores will free up capital that can be reinvested in areas that provide greater returns to shareholders.

"As reported on March 20, we are also taking a $49.3 million pre-tax restructuring charge for conversion of our management information system hardware from Honeywell to IBM, and for costs and non-cash charges being reserved in connection with the company's program for remodeling, replacing and closing stores," Stevens said.

Stevens said that fourth quarter results were adversely affected by competitive non-food market conditions, characterized by heavier than normal markdowns and increased sales promotion costs. He also noted that the company's fourth quarter comparable store sales performance of 5.1 percent came on top of a 12.3 percent increase in the fourth quarter of 1988.

The company stated that increased insurance costs, primarily related to workers compensation and general liability claims, higher than anticipated store labor costs, and costs associated with opening two new multidepartment stores and five remodels reduced fourth quarter earnings. These increased costs were partially offset by a large decrease in the company's LIFO reserve for the fourth quarter. LIFO was down from $5.7 million in 1988's fourth quarter, to $0.5 million in 1989's fourth quarter.

The company's interest expense in the fourth quarter increased primarily due to increased borrowings to finance its new store construction and remodel program, and higher than planned inventory levels.

Fred Meyer Inc., headquartered in Portland, Ore., is a leading regional retailer of a wide range of general merchandise, food, apparel, fine jewelry and home improvement products. The company employs more than 20,000 people and currently operates 125 stores, including 95 large multidepartment stores in Oregon, Washington, Utah, Idaho, Alaska, Montana and California."

TULSA, OK (MAR. 22) PR NEWSWIRE - Hawkins Energy Corp. announced today that it has completed negotiations to acquire Pro-Sales & Equipment Services, an Oklahoma City-based company that specializes in the purchase, remanufacture and sale of gas compressors. Through its wholly owned subsidiary, Equity Compressors Inc., Hawkins Energy provides gas compression and compressor leasing services to the industry.

The assets of Pro-Sales were acquired for future issuance of 176,666 shares of Hawkins Energy common stock plus cash of $179,500. In 1989, revenues of Pro-Sales were in excess of $2.5 million (unaudited). Approximately 25 percent of that revenue came from business conducted with Equity Compressors Inc. The primary benefit of the acquisition to Equity

Compressors Inc. is expected to be the continued availability of the business expertise of the Pro-Sales management and the access to low-cost remanufactured compressor equipment.

Tom Ostrye, president of Hawkins Energy, said, "The acquisition of Pro-Sales by Equity Compressors should significantly enhance Equity Compressors' full service capability in the compressor leasing business."

Hawkins Energy was recently organized after limited partners in 10 Hawkins Exploration oil and gas drilling partnerships approved the exchange of their partnership units for stock in the newly formed company. Equity Compressors Inc. was previously a wholly owned subsidiary of Hawkins Oil & Gas Inc. and was acquired by Hawkins Energy as part of the same exchange offer. Hawkins Energy will focus on several aspects of the natural gas business, including production, compression, transportation and marketing.

In addition to the leasing business of Equity Compressors, Hawkins Energy has interests in over 200 producing wells with gas equivalent proven reserves of approximately 9 billion cubic feet as of Dec. 31, 1989.

Hawkins Oil & Gas Inc., the largest shareholder of Hawkins Energy, remains a closely held private company involved in the operation, production and acquisition of oil and natural gas wells.

PHILADELPHIA (MARCH 22) PR NEWSWIRE - ICC Technologies, Inc. (NASDAQ: ICGN) announced today that negotiations with potential sources of financing have to date been unsuccessful. The company previously disclosed in its quarterly report for the quarter ended Sept. 30, 1989, that it was negotiating for financing from several sources, but that there could be no assurances that such financing would be obtained.

The company further disclosed that the failure to obtain such financing would have a material adverse effect on the company's operations. Since the company has to date been unsuccessful in obtaining such financing, the company intends to file for bankruptcy under Chapter 7 of the U.S. Bankruptcy Code, which filing is expected to occur shortly.

#90081p0395 03/22/1990 ~PR Newswire

NORTHVALE, NJ (MARCH 22) PR NEWSWIRE - The MEM Company Inc. (AMEX: MEM), a leading manufacturer of toiletries, reported net sales of $25,399,199

for the fourth quarter ended Dec. 31, 1989 as compared with $23,780,978 for the final quarter of 1988.

After a charge of $1,900,000 pre-tax, or $1,026,000 and 39 cents per share after-tax for asset write-downs, layoffs and restructuring at Aristocrat Leather Products, the company posted a net loss for the final quarter of $1,650,508, or 63 cents per share. This compares with a loss of $477,498, or 17 cents per share for the same period last year.

For the year, the company reported sales of $74,312,412 and a net loss, including the restructuring charge, of $1,558,633, or 59 cents per share. For the prior year net sales were $70,882,772, with a net loss of $438,880 or 16 cents per common share.

In line with 1989 results, the company reduced its quarterly dividend to 5 cents per share payable to holders of record March 30, 1990 on May 14, 1990. For the previous quarter, the dividend was 10 cents per share.

Gay A. Mayer, president and chairman of the company, noted that the results for the final quarter reflected a generally difficult period for MEM as well as the toiletries industry. He commented, "MEM's Love's Baby Soft teenage fragrances enjoyed substantial growth during 1989, while our Tinkerbell and Dirtbusters products continued to perform as the industry leader in children's toiletries.

"Although the consumer climate continues to be one of uncertainty, we believe the company will be competitive in 1990, reflecting continued spending for our traditional brands including English Leather and our newly introduced Fathom cologne for men."

NEW YORK (MARCH 22) PR NEWSWIRE - Passengers flying to Europe on Trans World Airlines now will be able to take advantage of a special promotional offer with European Car Reservations (ECR) allowing a passenger to rent a car for five days while paying for only two.

Besides the three free days, passengers will receive unlimited mileage on a standard transmission economy car.

The five day promotional rate varies by country. Sample rates for five days are as follows: London - $36, Germany - $45, Switzerland - $48, Italy - $75 and France - $78.

In addition, passengers can take advantage of TWA's exclusive low daily rates. In London, for example, rates start at $18 per day with unlimited mileage or passengers can rent midsize or luxury cars and in some countries, even vans. TWA passengers also have the flexibility to return their car to any ECR location within the same country, at no additional charge.

To be eligible, passengers must purchase a round-trip ticket to any TWA trans-Atlantic destination and present their boarding pass when they receive their car. To make reservations, passengers should contact their travel agent or call 800-535-3303 and request "TWA's Europe Wheels Offer."

TWA serves 24 cities throughout Europe, the Middle East and Africa.

BEAVERTON, OR (March 22) PR Newswire - FPS Computing (NYSE, PSE: FLP) today announced conFORm, an automatic parallelizing FORTRAN compiler with supporting development utilities for its Model 500EA line of supercomputers. conFORm uses state-of-the-art parallelization techniques from Kuck and Associates, long known for their advanced software architectures. To speed program development, FPS Computing has also developed program debuggers that trace concurrent program execution.

Automatic parallelization technology enables the engineer or scientist to take full advantage of the peak performance of the Model 500EA computer system, without lengthy training. For those to whom the computer is a means to an end, this is a refreshing change from laborious 'do-it-yourself' code conditioning. With conFORm, single job performance can be improved by 80 to 90 percent with little or no user intervention.

Advanced users may use assertions and directives, conforming to the emerging Parallel Computing Forum (PCF) standard, to further tune their programs' performance.

ConFORm is the latest addition to the comprehensive set of software development tools available to Model 500EA users. Besides automatic parallel code generation, FPS Computing supplies parallel debuggers that enable the user to track programs in single- or multi-threaded execution. These tools contribute to better productivity in program development. conFORm is complemented by the full suite of enhanced Unix software development tools supplied by the company. conFORm and the parallel debugging tools are available now.

The Model 500EA Expandable Architecture is the industry's most flexible, cost-effective supercomputer. With configurable, upgradeable, scalar/vector combinations, the Model 500EA provides a superior platform for long-term growth and expansion, value now and into the future.

Kuck and Associates is a leading supplier of automatic optimizing software and vector/parallel numerical libraries that enable scientists and engineers to exploit advanced computer architectures. Founded in 1979, Kuck and Associates is located in Champaign, Ill.

FPS Computing has the largest installed base of high performance computing equipment in the industry. The firm designs, manufactures and markets high performance computing solutions for scientific, engineering and technical applications. The FPS Computing product line includes UNIX supercomputers, matrix supercomputers, and array processors. Founded in 1970 as Floating Point Systems Inc., FPS Computing is headquartered in Beaverton, Ore.

STAMFORD, CT (MARCH 22) PR NEWSWIRE - The special meeting of stockholders of Savin Corporation (NYSE: SVB) was held today to vote on eight proposals whose approval was recommended by the board of directors.

The shareholders voted to pass four proposals: to reduce the par value on all classes of stock, to permit the company to pay dividends on its Series A preferred stock in common stock, to increase the number of authorized shares of Series C preferred stock from 11,192,000 to 14,000,000 and to change the 1986 stock option plan: to increase the common stock issuable to 40 million shares and to permit non-qualified options to be granted to directors who are not also employees of the company.

The meeting was adjourned for one week (March 29, 1990) pending the vote by the common shareholders on four remaining proposals: to approve the payment of dividends in kind on the Series C preferred stock, the grant of common stock options to certain directors, the grant to HCS Technology N.V. of an option to purchase 3 million shares of Series C preferred stock and if the previous proposal is not approved, the issuance to HCS up to $10 million of common or preferred C stock.

These latter proposals require approval of 66-2/3 percent of the total outstanding shares of the common stock, excluding HCS, Colorocs, their associates and affiliates.

Savin Corporation, founded in 1959, distributes a full line of office copiers and facsimile products through a North American network of over 380 dealers and ten company-owned branches at more than 600 selling and servicing locations.

Savin also markets certain products in Europe through the HCS/Savin joint venture. Savin is the only distributor of copier products in North America offering the customer a choice of toner technologies.

HOUSTON (MARCH 22) PR NEWSWIRE - Baroid Corp. (NYSE: BRC) today announced that it has entered into a new four-year $125 million bank credit agreement for Baroid Drilling Fluids to replace the company's existing bank credit agreement.

The agreement is with Chase Manhattan Bank, N.A. (NYSE: CMB) as agent, and will provide for (A) a $50 million term loan to finance the company's recently completed acquisition of the minority interest in Titanium Metals Corp. of America (TIMET), and (B) a $75 million revolving credit/letter of credit facility.

The revolving credit/letter of credit facility is expected to be used primarily by the company's petroleum services operations. Other participants in the facility are Texas Commerce Bank, as co-agent; First City, Texas; Banque Paribus; Bank of America; and Bank One, Texas.

Baroid Corp. is a worldwide supplier of petroleum services and equipment, and titanium metals which are widely used in the aerospace industry.

NEWTOWN, PA (MARCH 22) PR NEWSWIRE - Aero Services International, Inc., a Pennsylvania-based aviation services company, announced today that on March 21, 1990, it obtained a favorable ruling from federal district court in New Orleans to permit Aero to continue with plans to hold its meeting of shareholders on March 29, 1990, in New Orleans.

The federal district court additionally granted Aero's request for a preliminary injunction, which precludes a shareholders' meeting purportedly called for the same date by Ronald Nowling, a dissident shareholder.

Nowling had sought to call a meeting of Aero shareholders for March 29 and subsequently filed a lawsuit in Louisiana seeking to enjoin any meeting of the shareholders of the company until certain issues regarding voting rigths were resolved. On March 5, 1990, Robert L. Starer, a shareholder and director of the company, filed documents with the Securities and Exchange Commission indicating that he may have formed a group with Ronald Nowling and his wife, the dissident shareholders.

In addition to ruling that the company was entitled to a preliminary injunction against the Nowlings and Starer preventing them from proceeding with the rival shareholders' meeting, the federal district court also concluded that the Louisiana Control Share Acquisition Act does not apply to the company.

The court also found that the Nowlings and Starer were in privity with each other, thereby entitling the company to the additional relief that it sought, including preventing Starer and the Nowlings from seeking to apply the Control Share Act and from issuing any other notices regarding shareholder meetings of the company that do not comply with the company's by-laws as well as state and federal laws.

The federal district court in New Orleans concluded that the interest of the shareholders of the company as well as the public interest would be served by the issuance of a preliminary injunction in favor of the company and further ruled that it appeared likely that the company will prevail on the merits of this lawsuit. As a result of the company's success, its shareholders' meeting will proceed as schedule on March 29, 1990.

Aero Services International, Inc. operates fixed-base operations (FBO) at 18 locations across the nation. FBOs provide corporate and other general aviation aircraft handling and storage, ancillary customer services, aircraft maintenance and repair, and the subleasing of hangar and office space.

CONTACT: Larry A. Ulrich, president of Aero Services International, 215-860-5600, or Lory Roston of Lory Roston Associates, 212-877-8590, for Aero Services International.

LOS ANGELES (MARCH 22) PR NEWSWIRE - MAXXAM Inc. (AMEX: MXM), a FORTUNE 500 company whose subsidiaries are chiefly engaged in aluminum production, lumber and real estate development, announced today that it is relocating its corporate offices from Los Angeles to Houston. The move is expected to be completed by Sept. 1, 1990.

At the same time, the company announced that its president, Dr. William C. Leone, 65, will retire from his position, effective Sept. 15, 1990. It is anticipated that MAXXAM's Chairman and Chief Executive Officer, Charles E. Hurwitz will succeed Leone as president.

Hurwitz said that the transfer of administrative, financial and management personnel is designed to achieve greater administrative efficiency by combining operations with MAXXAM offices in Houston.

Hurwitz said that MAXXAM has arranged severance packages and outplacement services and assistance for individuals who are not transferring to Houston.

Leone will continue as a consultant to and director of the company and certain subsidiaries, concentrating on policies relating to MAXXAM's real estate and forest product businesses, and he will continue on the Executive Committees of MAXXAM, Kaiser Aluminum & Chemical and Pacific Lumber.

MAXXAM is engaged in aluminum operations through Kaiser Aluminum & Chemical Corp., a fully-integrated aluminum producer and a subsidiary of KaiserTech Limited. KaiserTech Limited is a wholly-owned subsidiary of MAXXAM.

Forest product operations are conducted through MAXXAM's wholly-owned subsidiary, The Pacific Lumber Co., and real estate management and development operations are conducted through several wholly owned subsidiaries.

MAXXAM common stock is traded on the American, Pacific and Philadelphia stock exchanges under the ticket symbol "MXM."

SAN FRANCISCO (MARCH 22) PR NEWSWIRE - Pacific Bell and Compression Labs Inc. (NASDAQ: CLIX) (CLI) today announced a joint marketing agreement under which the telecommunications company will offer complete

videoconferencing systems.

Under the agreement, Pacific Bell's Video Communications Services will offer a wide variety of the company's digital transmission services in conjunction with CLI's complete line of videoconferencing systems. In addition, Pacific Bell will serve as customers' single point of contact for service and repair.

"Videoconferencing is proving invaluable in increasing productivity in a wide variety of organizations," said Parrick. "Videoconferencing allows people to get together face to face and make decisions literally at anytime of the day or night. As a result, major projects often can be completed in a fraction of the time.

Among Pacific Bell's transmission services that will be utilized in constructing its Video Communications Services are High Capacity Digital Service, known generically as T-1 service (1.544 Megabits per second); CenPath, a switched digital data service for its CENTREX business communications systems by combining two 56-Kilobits-per-second channels; and CENTREX IS (Integrated Systems), the company's recently introduced Integrated Services Digital Network offering.

CLI's line of modular Gallery videoconferencing systems, which are equipped with CLI's high-bandwidth Rembrandt or low-bandwidth Rembrandt II/06 codecs, provide all of the features commonly required for videoconferencing, including cameras and monitors for simultaneous viewing of people and visual aids, high-quality sound systems, graphics units and easy-to-use room controllers. CLI codecs, which digitize and compress video signals for transmission over digital transmission networks, provide unsurpassed picture quality.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified telecommunications corporation based in San Francisco.

CLI is the market leader in full motion, color video conferencing systems for use by business, government and education.

LONG BEACH, CA (MARCH 22) PR NEWSWIRE - The Wells Fargo Foundation and the Long Beach Unified School District have entered into a unique partnership to create a model elementary school.

Alvarado Elementary School, which is now under construction on the slopes of Signal Hill and will be the newest school in the state of California,

has been selected as the site for a Foundation- sponsored endeavor, called the Education for the Future Project. The project will be underwritten by a Foundation grant of $200,000, to be paid over two years. When the school opens in September 1990, Alvarado is expected to have 650 students and a newly formed teaching staff.

The concept for the Education for the Future Project was developed by the Pacific Telesis Foundation and incorporates key recommendations of the California Business Roundtable's plan to restructure K-12 schools.

The Education for the Future Project will be directed by Barbara Barnes and Associates, an Irvine-based educational consulting firm. The program's first year, which will begin in September 1990, will be used for planning, according to Giugni. Teams of teachers, administrators and selected parents will together identify the most important issues facing the school, he said.

The Wells Fargo Foundation, which is providing 100 percent of the funding for the project, was founded in 1978 and is funded by Wells Fargo Bank, California's third largest commercial bank.

LONG BEACH, CA (MARCH 23) PR NEWSWIRE - Southland Communications (NASDAQ: SCII) reported a 32 percent increase in revenues from $1,416,908 for the quarter ending Jan. 31, 1989, to $1,869,854 for the quarter ending Jan. 31 1990. The company's operating income increased from $507,664 to $586,153 in the same period, a 15.6 percent increase. The company's net loss was $259,275, equal to $(0.18) per share compared to $323,129, equal to $(0.27) per share for the same period. Operating expenses include depreciation expense of $352,465 in the first quarter of 1989 compared to $402,946 in the first quarter of 1990.

Selling, general and administrative expenses during the first quarter of 1990 were 34.4 percent of net rental revenue compared to 41.1 percent of net rental revenue for the first quarter of 1989. The drop is due primarily to the continued progress in adding more subscribers to the company's customer base. The company's subscriber base increased from approximately 35,000 to approximately 50,000 for the same period, a 43 percent increase.

The company had 2,344,928 shares of common stock outstanding as of Jan. 31 1990.

Southland Communications Inc. does business as National Paging, providing electronic paging services for individual and business subscribers in 50 states.

SAN DIEGO (MARCH 23) PR NEWSWIRE - United States District Court Chief Judge Gordon Thompson today heard the motion by Imperial Corporation of America (NYSE: ICA) (ICA) for a temporary restraining order to prevent the Resolution Trust Corporation (RTC) from placing Imperial Savings Association (ISA) into receivership, pending a hearing on ICA's motion for a preliminary injunction.

The motion for the preliminary injunction was filed yesterday by ICA, parent of ISA until it was placed into conservatorship Feb. 23, along with a complaint seeking the removal of the conservator, RTC, which was appointed by the Office of Thrift Supervision (OTS). The complaint also challenges the constitutionality of certain provisions of the Federal Institutional Reform, Recovery and Enforcement Act of 1989 (FIRREA), which allegedly caused ISA to go from solvency to paper insolvency.

As a result of yesterday's filing, Judge Thompson issued a 24-hour temporary restraining order to prevent the RTC from imposing a receivership on ICA pending today's hearing.

At the hearing this afternoon, the RTC agreed not to put ISA into receivership until the court ruled on the preliminary injunction motion which will be heard on Friday, March 30.

In a separate proceeding before the United States Bankruptcy Court today, the RTC agreed not to seize any of the cash in accounts of ICA and its subsidiaries deposited in Imperial Savings. The RTC further agreed not to take any action with respect to other assets of ICA or its subsidiaries without first giving two days notice to ICA and its bankruptcy counsel to enable them to seek court protection against the proposed action.

MOSCOW (MARCH 22) UPI - Josef Stalin's executioners killed 15,131 Polish officers and policemen in the Katyn Forest massacre of 1940, a Soviet newspaper said in an article based on previously secret KGB archives.

The expose in the weekly Moscow News Wednesday was the first published admission of the systematic slaughter in the Russian region that has soured Soviet-Polish relations for five decades. The story contradicted previous Soviet claims that Adolf Hitler's Gestapo agents committed the World War II killings.

An official Soviet-Polish commission studying the Katyn massacre has not issued any findings.

''15,131 men had kind of disappeared to nowhere,'' the Moscow News said.

''A study of the whole complex of (KGB) materials affords a conclusion: The Polish officers and policemen were shot between April and May (1940) by the operative detachments of the NKVD,'' the predecessor of the present-day KGB intelligence agency, it said.

In the first such trip ever allowed by Moscow, hundreds of Poles traveled to Katyn Forest Oct. 30 and wept for their slain fathers and husbands during a prayer service at the massacre site.

Virtually all Poles and most Western historians have long said Soviet agents killed 4,443 Polish officers, and that the fate of nearly 11,000 others who disappeared was unknown.

But the Moscow News article, based on extensive research into closed KGB archives by Soviet Academy of Sciences historian Natalya Lebedeva, said Stalin's henchmen killed all 15,131 Poles held in three camps for prisoners of war.

Stalin ordered the Poles killed because he feared they would lead an uprising and upset the 1939 secret pact he signed with Hitler, Lebedeva said.

The ''secret protocol'' between the two dictators, part of a public non-aggression pact, let Germany take over Poland and gave the Red Army free reign in the northern Baltic region annexed by the Soviet Union in 1940.

''Stalin, whose self-esteem had been wounded by the defeat in the war with Poland of 1920, felt a special dislike for the commanding staff of the Polish army,'' Lebedeva said.

''Having liquidated the Polish state and registered it through a treaty with Germany in September 1939, he was wary of those who might join the fight for a rebirth of their country,'' she said.

During the civil war that followed the 1917 Bolshevik Revolution, Red Army

troops swept through the Ukraine and into Poland in 1920, but the Polish army repulsed their march to Warsaw in a bitter defeat for the communists.

Nazi soldiers found the mass grave in Katyn Forest in February 1943, each corpse with a bullet hole in the back of the head.

The Soviet Union has claimed that Nazis carried out the slaughter in autumn 1941 while taking the nearby city of Smolensk, but the Poles say Stalin's agents killed their officers and policemen long before the German occupation of the region 250 miles southwest of Moscow.

Another reason for the massacre, Lebedeva said, was that Stalin needed the space in the prison camps holding the Polish officers for some of the 60,000 Estonians, Latvians and Lithuanians he was deporting from the Baltics as part of his subjugation of the northern region.

One KGB document ordered that all letters sent to the Polish POWs be burned.

The document referred to the slaughtered Poles as ''the gone.''

#90081u0134 03/22/1990 ~United Press International

MANILA, Philippines (MARCH 22) UPI - A Filipino general claimed in testimony that a U.S. Air Force officer and former first lady Imelda Marcos were behind the December coup attempt that almost toppled President Corazon Aquino.

Brig. Gen. Alejandro Gallido said Wednesday that he was ordered by Aquino's government to infiltrate the conspiracy. Gallido also said he received messages from coup plotters while he was attending a party at the residence of U.S. Ambassador Nicholas Platt.

The U.S. Embassy said a statement about the claims would be released soon and the White House had no immediate comment.

The United States provided air cover over Manila during the first days of the Dec. 1-9 coup attempt, which Philippine officials said saved Aquino from being ousted by the mutinous soldiers who attempted the coup.

Gallido said in a sworn statement to the justice department released Wednesday that U.S. Air Force Col. Harold Magleo told him during a secret meeting that he worked for U.S. intelligence and was ''in favor of the overthrow of Aquino and the return of the Marcoses.''

Gallido also said he received a call from Imelda Marcos on Sept. 5 and that she promised the mutineers $450,000 if they succeeded in ousting

Aquino and restoring her ailing husband, Ferdinand Marcos, to power.

The former dictator, who was ousted in a popular uprising 1986, died in exile in Hawaii on Sept. 28.

Gallido quoted the U.S. Air Force officer as saying he would deliver weapons, including Stinger missiles, to the mutinous soldiers from sources outside the United States for a fee of $20 million.

Gallido, who is retiring as chief of the southern Luzon command on April 1 did not say if the weapons were actually delivered.

At least 119 people were killed and more than 500 were wounded in the December coup attempt, the sixth and most serious since Aquino took power four years ago.

Gallido said he was one of five officers asked by the military high command to infiltrate the conspiracy. He made the sworn statement in connection with rebellion charges filed on Monday against six opposition politicians and businessmen.

Gallido also implicated six politicians, including Aquino's estranged cousin, Eduardo Cojuangco, and Air Force Brig. Gen. Luther Custodio in the coup bid. Custodio is facing murder charges in connection with the 1983 assassination of Aquino's husband, Benigno Aquino.

Imelda Marcos is on trial in New York for allegedly stealing $100 million from the Philippine treasury and investing it in the United States.

(MARCH 22) UPI - Art lovers around the world are mourning Sunday's theft from the Gardner Museum in Boston. But some art experts say one of the stolen works may NOT be an authentic Rembrandt. They say the painting may be the work of an artist who painted in Rembrandt's studio. The question of authenticity is relevant to the painting's value in today's pricey market.

Environmentalists are NOT happy with Wednesday's Senate decision regarding the Clean Air bill. Senators voted 53-46 against forcing the Environmental Protection Agency to impose tough anti-smog plans on cities that do NOT adopt tough anti-pollution measures. Environmental groups say the compromise bill does NOT ensure speedy cleanup of urban smog.

The provisional Romanian government took steps Wednesday to halt bitter ethnic rioting that has left six people dead and more than 300 others injured in Tirgu Mures. The government has promised more than two-Million ethnic Hungarians separate schools and newspapers in their native tongue.

(MARCH 22) UPI - The U-S-backed Salvadoran government has rescinded its

demand that leftist rebels stop all military actions that directly or indirectly affect civilians before peace talks can resume. The government now says all preconditions to negotiations have been removed and it's up to the rebels as to when talks continue.

The nation's best-known maker of kosher food may NOT have been engaging in kosher behavior. That's according to federal prosecutors who allege the B. Manischewitz Company of New Jersey conspired to fix the price of ''kosher for Passover'' matzo. Matzo is the unleavened bread Jews use to commemorate the escape from Egypt more than three-thousand years ago.

In Jacksonville, Florida, a legally blind woman scored a hole-in-one on a golf course last weekend and then repeated the feat the next day. 74-year-old Margaret Waldron says- ''It hasn't sunk in yet.'' The amazing feat occurred at the Amelia Island Plantation course as Waldron's husband, Pete, and two club members watched.

WASHINGTON (MARCH 22) UPI - A 10-year-old government project to help Americans learn about energy reported Thursday that most students lack the knowledge they need ''to be informed consumers and make wise choices about complex energy issues.''

A random survey of 25,000 students in fourth through 12th grade this year found they had ''great difficulty'' with basic concepts, said the National Assessment Committee of the National Energy Education Development Project.

For example, only about a tenth of all students had a rough idea of how much electricity costs, and most of those in grades four through eight did not know coal is America's most abundant fossil fuel or that nuclear power involves the splitting of uranium atoms and the release of heat.

''Even with increased science requirements, only a handful of schools in each state are producing truly energy-educated graduates,'' said Gerard Katz, project director.

''While kids love to talk about things like solar cars, they really don't have the practical knowledge they need to discuss the realities of the next 10 to 20 years.''

The project, created by a 1980 congressional resolution, operates in 32 states, involving 5,000 schools. It receives state, federal and coroporate funds but says it does not advocate particular energy sources over others.

The survey, conducted at member schools, will be used by participants at a conference being held this week in the Washington area to ''create

standards for energy literacy and education that can be achieved over the coming decade,'' said Sen. Mark Hatfield, R-Ore., assessment committee chairman.

The study concluded ''that while most students characterize themselves as energy savers, few demonstrate sufficient knowledge of the scientific or economic aspects of energy they need to be informed consumers and make wise choices about complex energy issues facing citizens.''

Among the findings:

-A tenth knew electricity costs 8 cents a kilowatt hour, enough to power a TV for 10 hours, while a third thought it was eight to 20 times more expensive.

-Two-thirds did not know it takes more energy to heat and cool a house than to provide it with hot water, lights or refrigeration.

-Only a fifth know the major use of coal in America is to make electricity.

-Most did not know 10 percent of America's energy comes from renewable sources such as solar, wind, geothermal and hydroelectric power. Thirty-eight percent thought renewable sources were more important.

-A majority believe it will take government action to get people to separate trash for recycling.

-A quarter support government fuel efficiency standards for cars.

-Thirty-six percent favor using nuclear power to produce electricity.

-Students were split on whether to allow exploration and development of petroleum sources in Alaska and offshore.

-Two-thirds said the nation's security is threatened by the current reliance on foreign oil for up to half of America's supply.

#90081u0274 03/22/1990 ~United Press International

(MARCH 22) UPI - The St. Louis Blues, fighting to hold on to first place in the Norris Division, lost an 8-6 shootout with the Edmonton Oilers Wednesday night, but became part of history when star forward Brett Hull scored his 70th goal of the season.

Hull is only the sixth NHL player to score 70 goals in a season, joining Phil Esposito, Wayne Gretzky (who scored 70 or more four times), Jari Kurri, Mario Lemieux (twice) and Bernie Nicholls.

Hull scored at 17:17 of the second period after Peter Zezel won a faceoff in the Edmonton zone. The goal pulled St. Louis to within 6-5.

After the game, Hull was unable to enjoy the record because of the loss.

''It doesn't matter, you've got to win hockey games,'' said Hull. ''We've lost four in a row and it's just not good enough, the way we're playing.''

The Blues still hold a one-point lead for first place in the division, but the second-place Chicago Blackhawks have two games in hand.

The Oilers put the game away in the third period. Vladimir Ruzicka scored his second of the contest at 7:15 and Mark Messier added his 44th for an 8-5 lead at 18:23.

The victory kept Edmonton four points ahead of Winnipeg in the race for second place in the Smythe Division.

Edmonton Coach John Muckler was relieved that the team's struggling power play, which connected three times, was the key to the Oilers' slump-snapping victory.

''The powerplay played very well,'' said Muckler. ''We scored three power-play goals, we moved the puck very well, Ruzicka and Rexi (Reijo Ruotsalainen) played very well on the points tonight and we got some movement in front of the net which created some good chances for ourselves.''

-- AROUND THE NHL --

Elsewhere in the NHL, the NY Rangers tied Toronto 5-5, Hartford whipped Quebec 4-1, Buffalo stopped Calgary 5-4 and Winnipeg edged Montreal 3-2.

RANGERS 5, MAPLE LEAFS 5

At New York, Daniel Marois scored his second goal of the game with eight seconds left in regulation to create the tie. With Toronto skating six-on-four, Marois beat Ranger goaltender Mike Richter to the stick side. Mike Gartner scored his 41st of the season and his seventh in seven games with the Rangers.

WHALERS 4, NORDIQUES 1

At Hartford, Conn., Pat Verbeek scored his 41st and 42nd goals to power the Whalers. Mike Hough scored the only goal for Quebec, which has won only once in its last 11 games.

SABRES 5, FLAMES 4

At Buffalo, Ken Priestlay scored the winning goal at 3:58 of the third period to give the Sabres the triumph. The victory ended Calgary's nine-game unbeaten streak and moved Buffalo three points behind first-place Boston in the Adams Division.

JETS 3, CANADIENS 2

At Winnipeg, Pat Elynuik's second goal of the game, his 30th of the year, snapped a 2-2 deadlock in the third period and lifted the Jets. Montreal dominated the first period, outshooting Winnipeg 14-5, but the Jets received outstanding goaltending from Bob Esssena.

MANHEIM, Pa. (MARCH 22) UPI - Wissahickon Spring Water Co. Wednesday ordered a four-state recall of some of its bottled spring water after trace amounts of a toxic solvent were found in samples from its Manheim plant, officials said.

The recalled bottles, packaged Feb. 6 and distributed in Pennsylvania, New Jersey, New York and Connecticut, contain the chemical toluene, a toxic solvent used in high-octane fuels and explosives, the company said.

Company officials did not say how many bottles were affected by the recall.

Independent labs and the health departments of New York state and Suffolk and Nassau counties found amounts of toluene exceeding state safety standards in eight samples taken from dated bottles, company President James Land Jr. said.

The detected amounts, 11 to 17 parts per billion, are more than the 5 PPB maximum allowable in New York but less than the federal government standard of 2,000 PPB for drinking water, Land said.

''The (Environmental Protection Agency) standard suggests that federal authorities see this as a safe level of exposure in a product of our type '' Land said. ''Nevertheless, to maintain our own high product standards and to act conservatively in the interests of our consumers, we are voluntarily recalling all one-gallon bottles of spring water produced at the Manheim facility on that day.''

The southeastern Pennsylvania company has begun daily testing at its Manheim facility and is trying to isolate the cause of the contamination, Land said.

The daily tests and the tests conducted on water bottled since Feb. 6 have detected no contamination, Land said.

Affected bottles were sold under the brand names Super A Spring Water, Shoprite Spring Water, Foodtown Spring Water and Wissahickon Mountain Spring Water and carry the serial numbers 0206911, 0206913 or 0206914.

The recall comes as the French makers of Perrier mineral water replenish their stock of 160 million bottles, voluntarily pulled from supermarket shelves around the world Feb. 14 because of trace benzene contamination.

The contamination, first discovered in Perrier's U.S. supply, was blamed on the company's failure to change filters on equipment that extracts the water from its natural source at Vergeze in southern France.

In a March 6 news conference, Perrier pledged itself to a new quality control program and said fresh bottles of the bubbly beverage would be back on sale in early April.

#90081u0315 03/22/1990 ~United Press International

WELLINGTON, New Zealand (MARCH 22) UPI - Two strong earthquakes shook northern New Zealand Thursday, but no damage or injuries were reported, officials said.

The quakes, measuring 6.2 and 6.7 on the open-ended Richter scale, were centered at sea near New Zealand's remote Kermadec island group, about 600 miles northeast of New Zealand.

The islands were uninhabited, except for a few personnel staffing a meteorological observation station, and there were no reports of damage or injury, officials said.

The first quake was felt in New Zealand early Thursday and measured 6.2 on the Richter scale. The second temblor occurred shortly after midday and measured 6.7. Officials at Wellington's seismology bureau said the temblors were unrelated and did not indicate a pattern or future quake activity.

A quake of 6.0 to 6.9 on the Richter scale has the potential to cause severe damage.

The temblors were felt most in Gisborne, a city of 30,000, located 500 miles north of the capital Wellington.

Residents said there was a ''rolling motion'' for several seconds.

The second temblor was felt slightly in Wellington and caused some anxious moments for those who felt it.

Seismology officials said the quakes were the third and fourth in the area this year measuring above 6 on the Richter scale, compared to only one of such magnitude last year.

(MARCH 22) UPI - A Greyhound spokesman says one of the company's buses was hit by gunfire in San Antonio, Texas, Wednesday evening, but NO one was hurt. The spokesman says the driver and passengers were unaware of the gunfire until a scheduled stop 75 miles away in Austin. There have been more than a dozen gunfire attacks on Greyhound buses since some nine-thousand employees struck the carrier March 2nd. Greyhound has been hiring non-union drivers, and the strikers say many of the replacements have little or NO training to drive buses.

The Senate Wednesday night rejected a non-binding resolution for the White House to recognize an independent Lithuania. The Bush administration had expressed concern that the resolution would complicate delicate diplomatic negotiations in Lithuania. Many Senate members say they support independence for the Baltic republic, but they note this may NOT be the time to speak out on the issue.

Bangladesh has been rocked by violent clashes between members of opposing political parties and police. Five people have died and hundreds of others have been injured during an eight-day strike protesting allegations of vote rigging. Opposition parties say the ruling government has fixed local council elections. 61-Million voters are expected to cast ballots during 10 days of staggered elections that began one week ago.

The threat of AIDS apparently does NOT discourage college sex. Researchers in Rhode Island say a recent survey of 132 women indicates their sexual behavior has NOT changed all that much from that of female college students in the 70's. The researchers say although more women are asking their partners to use condoms, they still are willing to engage in various types of sex or to have multiple partners.

#90081u0390 03/22/1990 ~United Press International

(MARCH 22) UPI - Doctors in Melbourne, Australia, say a one-week old infant is in stable condition following surgery Wednesday to place his heart back inside his chest. Doctors at Royal Children's Hospital say the baby boy was born with his heart outside his body because of an incompletely formed rib cage. Dr. Roger Moore says the boy has ''passed some significant milestones,'' but still is a long way from being out of danger.

An environmental group has placed the Klamath River in Oregon at the top of its list of rivers endangered by mining, flood-control dams and hydro-electric projects. Says Kevin Coyle- acting president of the non-profit group American Rivers- quote- ''There are some rivers that are so outstanding they ought to be off limits. Other endangered rivers include California's American River, and New Jersey's Passaic River.

Tom Swiss originally paid 350 dollars for Chloe, a two-and-a-half-year-old Lhasa Apso. But by the end of a bitter custody battle with his wife, Swiss had shelled out more than nine-thousand dollars for the dog. In Chicago, a Cook County Circuit judge awarded Swiss full custody of the pet Wednesday. Swiss says of his ex-wife- ''I bought her a mink coat. That was her reconciliation gift. A dog is man's best friend, a fur coat is woman's.''

#90081u0391 03/22/1990 ~United Press International

(MARCH 22) UPI - Maybe the Philadelphia 76ers have learned something from watching the faltering New York Knicks, who have fallen out first place in the Atlantic Division by losing to teams they should have beaten.

The Sixers played host to the second-year expansion team Miami heat, who were missing their leading scorer at the opening tip and lost their second leading scorer before halftime.

The Sixers showed no mercy, chilling the Heat 118-97 Wednesday night.

''This was a tough game to get motivated for but it's the kind you have to win,'' said Charles Barkley, who had 19 points. ''Everybody chipped in.''

Every 76er who got into the game scored, led by Hersey Hawkins, who had a game-high 25 points.

''It was a game we had to win because we want to build our lead,'' Hawkins said. ''We have guys coming in, playing hard and doing what they're supposed to do. That's what we need down the stretch.''

The Philadelphia bench continued to contribute to the 76ers' success, personified by the effort of Bob Thornton, who played 21 physical minutes, scoring five points, grabbing a pair of rebounds and making two steals.

Miami lost center Rony Seikaly and his 17 points per game to a stomach virus, and Glen Rice, its second-leading scorer, went down with a hip injury in the first half.

Billy Thompson and Tellis Frank led the Heat with 16 points apiece.

''I thought we battled and played hard,'' said Miami Coach Ron Rothstein, whose team has lost four in a row. ''We really competed. We had a lot of good shots that didn't go down, which is not all that unusual for us. But I thought we made a game of it anyhow, in spite of the final score.''

-- AROUND THE NBA --

Elsewhere in the NBA: Washington pounded New Jersey 136-106, Chicago overcame Atlanta 99-89, Boston stopped Cleveland 123-114, Charlotte upset Phoenix 115-114 in overtime, Utah tripped the L.A. Clippers 118-102, Sacramento topped Minnesota 90-84, and Indianapolis powered past Milwaukee 112-96.

BULLETS 136, NETS 106

At Landover, Ledell Eackles scored a career-high 40 points lead Washington.Eackles and Bernard King each scored 10 points in 23-6 run that gave the Bullets a 33-18 edge after one quarter. New Jersey lost its eighth straight and 21st in a row on the road.

BULLS 99, HAWKS 89

At Atlanta, John Paxson scored 11 of his 15 points in the fourth quarter and Michael Jordan added 27 to lead the Bulls. Atlanta led 78-73 entering the final period, but the Bulls fought back to tie the score at 87 with 3:22 left in the game and outscored the Hawks 12-2 in the final 2:31.

CELTICS 123, CAVALIERS 114

At Boston, Larry Bird notched his eighth triple-double of the season with 25 points, 10 rebounds, and a season-high 16 assists and the Celtics snapped Cleveland's five-game winning streak. It was Bird's 52nd career triple-double during the regular season. Craig Ehlo topped Cleveland with 27 points.

HORNETS 115, SUNS 114 (OT)

At Phoenix, Dell Curry hit two long jump shots, one a three-pointer, and grabbed a key rebound in the final two minutes of overtime to propel Charlotte. Phoenix got a final chance, getting possession with 9.2 seconds but Eddie Johnson's jumper bounced high off the rim and Curry grabbed the rebound.

JAZZ 118, CLIPPERS 102

At Salt Lake City, Karl Malone led all scorers with 28 points as Utah broke open a close game in the fourth quarter. The Jazz went on a 20-6 run to move out to a 107-92 advantage with 2:23 remaining. The Clippers, led

by Winston Garland's 23 points, dropped their third straight on the road.

KINGS 90, TIMBERWOLVES 84

At Sacramento, rookie center Pervis Ellison scored a career-high 18 points and grabbed eight rebounds for the Kings. Minnesota suffered its 21st consecutive road loss.

PACERS 112, BUCKS 96

At Indianapolis, Chuck Person scored 27 points to lead an assault by Indiana's frontcourt starters as the Pacers picked up their second straight victory. Alvin Robertson scored 31 points and had 5 assists for Milwaukee.

#90081u0481 03/22/1990 ~United Press International

CANBERRA, Australia (MARCH 22) UPI - A leading public opinion poll Thursday found growing disenchantment with the ruling Labor Party and indicated minor parties could play a major role in Australia's fourth national election in seven years.

Ahead of Saturday's national balloting, the authoritative Morgan Gallup Poll showed the opposition Liberal-National Party coalition narrowly leading Labor for the first time in the campaign, adding new importance to second-preference votes.

The poll said minor parties, such as the Australian Democrats and assorted ''green'' environmental groups, could hold the key to the election, which has focused on economic issues and was expected to be close.

The final poll before voting had the Liberal-National Party coalition in front with 40.5 percent of the vote, narrowly leading Labor's 39.5 percent. It said the Democrats' support has swollen to an all-time high 15 percent, with 5 percent for the greens and other independents.

Australian elections are conducted under a complex preferential voting system in which voters must give numerical preferences to all candidates on the ballot in each contest. As candidates receiving the least number of primary votes are eliminated, their second preferences are distributed to other candidates and become primary votes, until one candidate receives a majority.

The poll results provoked a passionate plea from Prime Minister Bob Hawke - who is seeking a record fourth term - to minor party supporters to direct their second preferences to Labor.

In his last major speech of the campaign, Hawke, 61, said the second preferences of greens and Democrat voters should be directed to Labor on economic, social justice and environmental grounds, as well as practical considerations.

''What I do emphasize is this reality ... that when people (who vote for the greens or Democrats) wake up on March 26 there will either be a Labor or a Liberal-National Party government in Canberra. There won't be a Democrats' government. There won't be a green, independent, government,'' Hawke said.

Polling booths close Saturday at 6 p.m., but because preferences cannot be distributed before postal and absentee votes are counted, the final result may not be known until next week.

Opposition leader Andrew Peacock, 51, a former foreign minister, has

pledged to deregulate the wage system with free enterprise bargaining and workplace contracts, fight inflation by cutting government spending, eliminate the capital gains tax and encourage a shift to private health insurance.

Hawke and Peacock have promised substantial tax cuts and offered their own cures for Australia's ailing economy, which currently faces overseas debts totaling a record $138 billion, an expected record current account trade deficit of $20 billion, spiralling interest rates around 20 percent and unemployment running at 6.5 percent.

The Democrats, with seven senators, already hold the balance of power in the Senate, to which all legislation must go for ratification. Voting for the Senate is under a proportional representation system that favors minor parties.

But the Democrats currently are attempting to broaden their electoral base by winning seats in the House of Representatives and are fielding candidates in all marginal seats.

Australians will elect 148 members to the House of Representatives, in which Labor currently holds 83 seats, the Liberals 47, the Nationals 18, giving Labor an 18-seat majority.

Voting is mandatory for Australia's 10.6 million registered voters. Failure to cast a ballot carries a $15 fine.

#90081u0508 03/22/1990 ~United Press International

(MARCH 22) UPI - Three bullets hit a Greyhound bus traveling south of St. Louis early Thursday, the 16th incident of sniping at buses since a nationwide strike against the nation's largest intercity bus line began nearly three weeks ago.

The shooting followed a similar incident Wednesday and the company's announcement that Greyhound has expanded passenger service to about half the routes it operated before some 9,000 workers walked off their jobs March 2.

The latest shooting occurred about 1:20 a.m. CST Thursday, when a bus carrying 19 passengers was struck by three rounds of gunfire on Interstate 55 south of St. Louis, said Greyhound spokesman George Gravley.

''Two shots hit the windshield and one hit the driver's side of the bus,'' Gravley said. No injuries were reported and the shooting was being investigated by police, officials said.

Another bus was hit by a bullet in San Antonio, Texas, Wednesday evening. No one was injured and the driver and passengers were unaware of the shooting until a scheduled stop 75 miles away in Austin, the Greyhound spokesman said.

''Apparently the driver thought a rock had hit the bus,'' Gravley said.

An off-duty Travis County sheriff's deputy noticed a bullet hole in the passenger door's outer window and told the driver, Gravley said. The bullet did not penetrate the inner pane of the double-paned window, police said.

Elsewhere in Texas Wednesday night, a report of a serious Greyhound bus accident proved a hoax.

''More than likely it was strike-related, although we're not sure,'' said R.C. Nelson, night supervisor at the Greyhound terminal in Tyler. ''We don't know who's responsible, but that's a pretty bad prank to pull.''

Several ambulances, a helicopter, sheriff's deputies and a Department of Public Safety trooper were dispatched to the reported accident scene 13 miles east of Tyler on State Highway 31 about 7 p.m. CST.

A bus, carrying 50 people on Interstate 81 in Virginia, was hit by three shots fired from a passing car Tuesday night, but no one was injured, police said. A passenger said she saw three blue flashes after a car passed the bus.

Greyhound has reported 16 buses shot at since the strike began.

A Greyhound bus bound for Los Angeles was pelted with rocks in Las Vegas, Nev., Wednesday and a female passenger was injured by broken glass. No one was was arrested and it was not known whether the attack was strike-related.

Greyhound, the nation's largest intercity carrier, has hired more than 1,000 non-union replacement drivers since the strike began. The move has angered the union, which claims many of the replacements have little or no bus-driving experience.

The service expansion announced Wednesday by Frank J. Schmeider, Greyhound's president and chief operating officer, mostly involved routes in the Boston-Washington corridor and brought total service to about 46 percent of pre-strike levels.

Since negotiations broke down last weekend in Tucson, Ariz., both sides have been contacted by federal mediators hoping to restart talks. But no direct talks are scheduled, and both sides are reported far apart on the

issues.

Jim Power of the Federal Mediation and Conciliation Service said talks may reconvene in separate meetings, but he did not know when that might be.

''What the mediators are probably doing at this point is exploring the possibility of separate sessions at some point,'' Power said.

He said it is difficult for mediators to tell whether the two sides are now any closer than when the strike began.

''I don't think there's anything you could say that is specific. At least now there is some understanding as to what the differences are,'' Power said.

Wages and benefits have been among the chief hurdles in the strike involving the majority of Greyhound's 6,300 unionized drivers and 3,000 other union employees.

Late last year, Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year. Union members, citing a 22 percent pay cut they took when the company was sold to a group of Dallas investors in 1987, rejected the offer.

#90081u0512 03/22/1990 ~United Press International

TOKYO (MARCH 22) UPI - The U.S. dollar's steady rise against the Japanese yen sent the Tokyo Stock Exchange plummeting Thursday, with the key Nikkei Average falling below 30,000 yen for the first time in 15 months.

A 1,000-yen recovery in afternoon trading saved the market from suffering the second-steepest loss since the global ''Black Monday'' collapse of October 1987.

The Nikkei Average of 225 selected issues, which set the second-worst fall of 1,836.07 yen in panic selling in the morning, rallied in the afternoon to close at 29,843.34 yen, down 963.85 yen, still the seventh-sharpest fall on record.

It was the first time since December 1988 that the average had fallen below 30,000 yen.

The Nikkei has lost 9,072.53 yen, or 23.3 percent, of its value since it rose to a record high of 38,915.87 yen Dec. 29.

TOPIX, or the TSE Index of all listed major shares, lost 100.01 points to 2,173.17, for the second-worst fall following a record 307.27 point plunge

in the wake of ''Black Monday.''

The dollar rose 1.18 yen to close at 154.83 yen despite a discount rate increase by the Bank of Japan Tuesday and massive central bank intervention.

The Bank of Japan raised the official discount rate, the rate most banks use to determine their interest rates, by a full percentage point to 5.25 percent in hopes of cooling inflation and calming the wild financial markets.

The bank had been expected to increase interest rates in mid-February, and many analysts said the delay signaled weak leadership in the government.

Foreign exchange dealers said the central bank was believed to have sold at least $1 billion in a desperate attempt to halt the yen's fall.

An estimated 580 million shares changed hands, compared with 613.08 million shares Tuesday. The market was closed Wednesday because of a national holiday.

''The government is concerned about the recent developments on the financial market,'' government spokesman Misoji Sakamoto told a news conference. ''The fundamentary factors of the Japanese economy remains strong and international policy coordination to stabilize the foreign exchange market was reconfirmed at the recent U.S.-Japan summit.''

Sources in the ruling Liberal Democratic Party said Finance Minister Ryutaro Hashimoto is scheduled to confer Friday with his U.S. counterpart, Treasury Secretary Nicholas Brady, in Los Angeles on various topics, including bilateral trade friction and measures to check the dollar's rise against the yen.

Bank of Japan Gov. Yasushi Mieno told the lower house of Parliament Thursday that the yen's recent fall was excessive and predicted the yen will recover soon.

#90081u0544 03/22/1990 ~United Press International

TAIPEI, Taiwan (MARCH 22) UPI - Li Yuan-zu, President Lee Teng-hui's running mate, was elected vice president by the National Assembly Thursday, ending several turbulent weeks of election politics and protests.

More than 3,000 student protesters began dispersing early Thursday after 53 student representatives met with President Lee to discuss their demands for political reform.

The students, who had camped for six straight days at the Chiang Kai-shek Memorial Hall in Taipei, decided to set up a foundation to continue pushing for reform.

Lee promised to present a timetable for reform at his inauguration May 20 and to hold a forum on national affairs about the same time. He was elected to his first full six-year term Wednesday.

Election officials said 602 of the 642 voting members of the National Assembly cast ballots for the 67-year-old Li, the official candidate of the ruling Kuomintang.

The main opposition party, the Democratic Progressive Party, did not field a candidate because it did not have enough assembly members to make an endorsement.

Protesters are calling for an overhaul of the National Assembly, which is dominated by members elected in mainland China 40 years ago and kept in office to bolster the government's claim to be the sole, legitimate ruler of all China.

Li, secretary-general to the president, was a virtual unknown before Lee picked him as his running mate, passing over political heavyweights, including Premier Lee Huan.

#90081u0548 03/22/1990 ~United Press International

RALEIGH, N.C. (MARCH 22) UPI - North Carolina State basketball coach Jim Valvano will be asked to resign because of academic problems of his players and a pattern of problems with campus police, a report said Thursday.

The News and Observer of Raleigh quotes unnamed sources as saying new evidence has surfaced about academic problems within the Wolfpack basketball program.

The newspaper had no comment from Valvano, who could not be reached by UPI early Thursday.

At an emergency meeting of the university's board of trustees Tuesday, Interim Chancellor Larry Monteith released a report about a widespread lack of academic progress by some basketball players during Valvano's 10-year tenure.

Monteith also showed the board a report on previously unreleased complaints filed by campus police that show a pattern of some basketball players getting into trouble, the sources told the newspaper.

No specific details on the academic problems or police complaints were mentioned in the published article.

The newspaper's sources said university negotiator Howard Manning asked for one week to get Valvano's resignation. The trustees agreed not to release the negative information about the academic problems if Valvano resigns, but added the information would be made public if he does not resign.

An investigation last year by the University of North Carolina system

found academic policies had been ''bent'' to accommodate basketball players, but found no evidence to support allegations made by sports author Peter Golenbock.

In the book ''Personal Fouls,'' Golenbock alleged some Wolfpack basketball players maintained eligibility when failing grades were changed and positive drug test results hidden.

The investigation led to a probe by the NCAA that ended with the disclosure of eight NCAA violations within the basketball program, including players selling complimentary game tickets and game shoes.

The team was placed on two years of probation and banned from the NCAA tournament this season. Valvano was stripped of his title as athletics director when the University of North Carolina Board of Governors said no one could be a head coach and an athletics director.

The university and Valvano have been negotiating for several weeks to end the coach's career at N.C. State, however Valvano has a buyout clause in his contract that requires the university to pay him $500,000 if he is terminated for any reason other than a felony conviction or involvement in a major NCAA violation.

Last month, former Wolfpack cager Charles Shackleford, now with the New Jersey Nets, admitted he took cash payments from two men while he was at N.C. State.

However, Shackleford denied accusations made by an anonymous person to ABC News that the money was to pay players to shave points - to play poorly on purpose so scores could be manipulated to benefit gamblers.

ABC News interviewed a man who claimed he was a member of the 1987-88 Wolfpack team and that Shackleford paid him and two other players to shave points.

New Jersey authorities refused to indict anyone in their investigation of the allegations because of insufficient evidence.

#90081u0550 03/22/1990 ~United Press International
(MARCH 22) UPI - Spring's icy introduction to the Northeast kept New Englanders skiing and digging out Thursday from a late-season snowstorm, while clear skies in the South helped flood-stricken homeowners recover their damaged belongings.

More light snow fell on Vermont, adding to a generous white cover that has spruced up slopes but caused scattered power outages since Tuesday.

Utility crews continued efforts to restore electricity to areas blacked out by the storm.

Up to 38 inches of snow was reported at Vermont's Killington ski area, while two other resorts, Jay Peak and Pico Peak, recorded 26 inches.

Among those who had a scare in the storm on the first full day of spring was Gov. Madeleine Kunin, whose car spun out on Interstate 89. Neither Kunin nor her Vermont State Police driver were hurt.

All of New England saw sun and cold temperatures Wednesday, but a warming trend was expected to push the mercury into the 50s in many areas Thursday. Clouds were expected to roll in, west to east, throughout the day.

Forecasters said snow would return to Vermont and northern New Hampshire and Maine by day's end.

High pressure dominated the weather across the Southeast, bringing clear to partly cloudy skies and springlike temperatures across the region.

Flooding marred the warm sunny weather in southern Alabama, Georgia and the Florida Panhandle, as high water that plagued areas farther north earlier in the week continued moving south.

Floodwaters kept hundreds of residents out of their homes, and officials estimated damage in several communities would cost millions of dollars.

Overnight temperatures ranged from the high 30s in Birmingham to the high 60s in Miami.

Isolated thunderstorms popped up in northwest Arkansas as a cold front moved through Arkansas early Thursday.

Warm air pushed by high pressure over the southeastern United States produced 80 degree-plus temperatures Wednesday in New Mexico, Texas, Louisiana, and parts of Oklahoma and Arkansas. Presidio and Lajitas, Texas both reported 91 degrees. The reading of 76 degrees in Albuquerque, N.M., tied a record high.

Cloudy skies prevailed through the Midwest and upper Great Lakes, with flurries reported in Sault Ste. Marie and Upper Peninsula, Mich. Fog enveloped most of northern Michigan, where temperatures were around freezing.

Clear and cold conditions were dominant over Pennsylvania, Maryland, West Virginia and southern New Jersey, with light rain falling over northwestern Pennsylvania. Temperature lows in the 20s and 30s were

reported throughout the region.

High cloudiness from a weakening Pacific front spread inland over the northern two-thirds of California. The front appeared to be turning northward toward Oregon, Washington state and southern British Columbia.

Skies were mostly clear throughout Idaho, but a minor low-pressure trough was spreading into the state, bringing cooler air. An increase in cloudiness and a chance of showers were expected by early Friday.

Occasional snow and colder temperatures hit Montana east of the divide, with gusty northerly winds to 30 mph spreading south.

#90081u0564 03/22/1990 ~United Press International

(MARCH 22) UPI - The dollar hit a three-year high in Tokyo today. At the close of the morning session, the dollar soared to 155-point-20 yen... causing stocks to plummet. The Nikkei stock average fell to its lowest point since November 28th, 1988.

An oil leak caused a six-hour shut-down of the trans-Alaska oil pipeline yesterday. The Alyeska Pipeline Service Company says a small amount of crude oil came out of a cracked valve.

Federal drug director William Bennett says Minnesota's lenient marijuana laws will encourage criminals to move to the state. He says NO other state gives a suspended sentence for possessing 100 pounds of marijuana. Bennett told a joint meeting of the Minnesota House and Senate yesterday... in his words... ''watch out.''

The Federal Railroad Administration says a smaller percentage of railroad workers tested positive for drugs after serious rail accidents last year than in any of the three previous years of testing. Three percent tested positive in 1989, compared with five-point-six in 1988.

Panama has announced a series of steps that are designed to curb money-laundering by Panama's banks. Vice President Guillermo Ford announced a series of proposed laws at a Washington news conference yesterday. He says 230 bank accounts have been frozen because they may belong to drug traffickers.

Officials in Nevada City, California, are mining their sewers. The town swarmed with gold prospectors more than a century ago. But officials' ambitions are NOT that high. They hope to find at least one valuable old coin. The sewer lines needed cleaning anyway.

#90081u0565 03/22/1990 ~United Press International
BANGKOK, THAILAND (MARCH 22) UPI - The military Thursday denied U.S. allegations that Thai officials are involved in drug trafficking from Burma, saying Thai and Burmese military leaders have agreed to cooperate in combatting narcotics.

Lt. Gen. Naruedon Dejpradiyuth, spokesman for the Supreme Command, denied charges that recent expansion of Thai-Burmese border trade and corruption among Thai officials were adding to the drug-smuggling problem.

The allegations were made this month in testimony before U.S. Congress by Melvin Levitsky, assistant secretary of state for international narcotics.

''Corruption poses a significant problem in Thai enforcement efforts,'' said Levitsky, who is scheduled to visit Bangkok next week.

He said ''cross-border links for trade and security purposes promote ties with groups who also smuggle narcotics.''

Naruedon demanded that the United States provide evidence to support the charges.

''This sort of accusation is unacceptable. We need evidence in order to investigate this,'' he said.

The area of northern Thailand that borders the opium-growing hills of Burma is controlled by the Thai Third Army, which has been accused of helping in the construction of an opium trafficking road into Burma and allowing some smuggling activities.

Naruedon said Thai Army Chief Gen. Chavalit Yongchaiyudh discussed narcotic problems with Burmese leader Gen. Saw Maung on his visit in Rangoon last week.

''Gen. Saw Maung said that Burma is making efforts to fight opium growing '' Naruedon said.

He said Burma was fighting opium growing by encouraging farmers to switch to legal crops.

''This ensures that the volume of opium production will decrease,'' Naruedon said.

He said Thailand will assist Burma to supervise and suppress drug production and trafficking inside Burma.

However, Naruedon said, Burma also faced difficulties in policing areas

dominated by powerful opium warlords and ethnic insurgent groups.

''We cannot assist them in those areas either,'' he said.

Levitsky charged that the Burmese military, which seized power in 1988, has been ''accommodating'' the activities of notorious opium warlord Khun Sa, also known as Chang Si Fu.

On March 13, a grand jury in New York indicted Khun Sa for involvement in attempts to smuggle nearly 3,500 pounds of high-grade heroin to the United States from September 1986 to February 1988.

Burma has insisted it is not protecting Khun Sa, but said any attempt by the United States to seize the narcotics trafficker by force would be viewed as an infringement of Burma's sovereignty.

The U.S. Drug Enforcement Administration estimates that 40 percent to 50 percent of the heroin reaching the United States comes from the ''Golden Triangle'' area - the borders of Burma, Thailand and Laos come together.

Burma is believed to have produced more than 2,600 tons of opium last year.

#90081u0585 03/22/1990 ~United Press International

DALLAS (MARCH 22) UPI - Southland Corp., parent company of the 7-Eleven convenience store chain, announced Thursday it will sell 75 percent of the world's largest convenience chain to its business partner in Japan.

Ito-Yokado Co., Ltd., Japan's largest retailer, said in Tokyo that it will purchase three-fourths of Southland Corp. for $400 million.

The transaction is the latest in a recent string of high-profile Japanese purchases of American assets.

The Japanese company described the purchase as a friendly rescue of a failing American company and said it will begin an immediate financial restructuring of Southland with the aim of ''preserving the worldwide tradition of 7-Eleven.''

The purchase of 7-Eleven by a Japanese company follows last year's purchase of Columbia Pictures by Sony Corp. and Mitsubishi's purchase of controlling interest in Rockefeller Center.

The two earlier purchases touched off a controversy over whether Japanese ownership of American assets is good or bad for the United States.

President Bush and Prime Minister Toshiki Kaifu have said the purchases

are good for both countries because they bring the nations together and add needed capital to the U.S. economy.

Ito-Yokado said in an eight-page statement the purchase of 7-Eleven is different from earlier Japanese purchases and should be welcomed in the United States.

''Ito-Yokado's restructuring support for Southland is not the same as Japanese takeovers of American companies or Japanese investment in U.S. real estate,'' the statement said.

''This action is taken to aid a company which has been our friend and business partner for a long time,'' the statement said. ''The aim is to preserve the tradition of 7-Eleven worldwide, and we are convinced this step will serve to deepen cooperative relations between the United States and Japan.''

The 7,000 7-Eleven units represent the largest convenience store chain in the world, Southland officials said.

The purchase is conditioned on the success of Southland's exchange of $1.8 billion in junk bonds for newly issued stocks and bonds, the statement said.

''With this purchase and the subsequent restructuring, we aim to solve the financial problems of Southland, improve the management, expand business opportunities and insure the continuation of 7-Eleven as America's No. 1 convenience store company,'' the statement said.

''We have had a long and healthy business relationship with Southland and understand the financial problems it is going through and the need to restructure the company,'' the statement said.

Ito-Yokado is the owner of 7-Eleven Japan and the largest Japanese retailer in terms of earnings and second in sales.

Ito-Yokado is based in Tokyo with 138 stores mostly in the Tokyo area and had $8.3 billion in sales in 1989.

#90081u0592 03/22/1990 ~United Press International

BRUSSELS, BELGIUM (MARCH 22) UPI - NATO Secretary-General Manfred Woerner ''in the coming months'' will visit Moscow, a trip that would make him the first NATO chief to officially visit a Warsaw Pact capital, it was announced Thursday.

Woerner, head of the North American Treaty Organization, accepted an

invititation to go to Moscow from Soviet Foreign Minister Eduard Shevardnadze.

The visit will occur ''in the coming months at a time to be arranged,'' a NATO statement said.

No NATO secretary-general has ever made an official visit to a Warsaw Pact capital since the Western military alliance was formed in 1949.

Shevardnadze visited NATO last December, becoming the first Warsaw Pact foreign minister to do so, and informally invited Woerner to Moscow. The visit was formalized through diplomatic channels.

It has not yet been determined whether Woerner will also meet with Soviet President Mikhail Gorbachev, NATO officials said.

Since Shevardnadze's historic visit to Brussels following the President Bush-Gorbachev Malta summit in December, the foreign ministers of Czechoslovakia and Poland have also met with Woerner at NATO's sprawling headquarters.

NATO sources said Woerner had also accepted invitations to soon visit Prague, Czechoslovakia, and Warsaw, Poland.

As Polish Foreign Minister Krzysztof Skubiszewski got into his car at NATO after a meeting with Woerner this week, his last words were, ''See you in Warsaw.''

Woerner, a former West German defense minister, has launched an intensive campaign in recent months to portray NATO as a political alliance, not solely a military pact, and a crucial player in a new European security order.

''The Cold War is over,'' Woerner said. ''We're not threatening to anyone.''

(MARCH 22) UPI - Two more Greyhound buses hit by gunfire... Ronald Reagan testifies again on tape today... President Bush downplays the Lithuanian crisis... and singer Gloria Estafan is set for back surgery. Those stories and more, next from U-P-I.

Bullets have hit two more Greyhound buses.

Gunfire hit a Greyhound bus this morning... the 16th sniping at a bus since a nationwide strike against Greyhound began nearly three weeks ago.

NO one aboard the bus was hurt.

A bus was hit by three rounds of gunfire while traveling on Interstate 55 south of St. Louis. Greyhound spokesman George Gravley says two shots hit the windshield and one hit the driver's side of the bus.

The driver and 19 passengers aboard the bus were NOT injured.

Last night in San Antonio, a bus was struck by a bullet. NO one was hurt. The driver and passengers were unaware of the shooting until a sheriff's deputy noticed the bullet hole at a scheduled stop 75 miles away in Austin.

Near Tyler, Texas, last night, a report of a serious Greyhound bus accident proved to be a hoax. Greyhound spokesman Gravley says the report more than likely was strike-related. In his words... ''We doN'T know who's responsible, but that's a pretty bad prank to pull.''

Several ambulances, one careflight helicopter, sheriff's deputies and a Department of Public Safety trooper were dispatched to the supposed crash scene.

Greyhound, meanwhile, announced that it has expanded its passenger service network to about 46 percent of the routes it operated before about nine-thousand workers went on strike March 2nd.

#90081u0647 03/22/1990 ~United Press International

(MARCH 22) UPI - Jurors in the Iran-Contra trial of former national security adviser John Poindexter will resume viewing videotaped testimony this morning from former President Reagan.

During several hours of taped testimony yesterday, Reagan said at least 124 times that he remembered NOTHING about key parts of the scandal that rocked the final two years of his administration.

Reagan also said he NEVER ordered aides to lie... and denied authorizing the destruction or shredding of White House documents.

Reagan is the first defense witness in Poindxter's trial for his part in the Iran-Contra affair. Poindexter is charged with five counts of lying to Congress and obstructing its investigation of the scandal.

Members of the jury of five men and seven women were initially attentive to Reagan's taped testimony then their attention seemed to drift. They rarely laughed at Reagan's jokes, but appeared more interested when prosecutor Dan Webb began cross-examination.

The seven hours and 40 minutes of testimony was recorded last month in Los Angeles. A transcript has been released.

Secretary of State Baker goes to South Africa today for a day of talks in Cape Town with President de Klerk and black leaders.

Baker met yesterday in Namibia with black nationalist leader Nelson Mandela, who told Baker that today's talks could send the wrong signal to Pretoria. Mandela fears that Washington and other nations are easing economic sanctions against South Africa because of de Klerk's recent racial reform efforts.

But Baker will keep his appointment with de Klerk and encourage South Africa to dismantle apartheid. Baker says he believes that- in his words- ''efforts are being made in good faith to move the process forward in South Africa.''

Preliminary talks on political power-sharing in South Africa have been scheduled to begin April 11th between the government and black leaders.

Mandela, Baker and scores of other international dignitaries were in Namibia to celebrate the southern African nation's independence after more than a century of South African colonial rule.

#90081u0650 03/22/1990 ~United Press International

(MARCH 22) UPI - U-S leaders are playing it cool as the tension grows hotter between the Soviet Union and Lithuania.

President Bush said last night he has NO reason to doubt Soviet assurances that they will end the conflict with secession-minded Lithuania peacefully.

Bush said he had spoken to Secretary of State James Baker by telephone about his talks Tuesday with Soviet Foreign Minister Eduard Shevardnadze. Their meeting produced a Soviet commitment to resolve the crisis in Lithuania ''through dialogue.''

The Senate last night responded to lobbying from presidential aides and rejected a NON-binding resolution for the White House to recognize an independent Lithuania.

The resolution lost on a 59-36 vote... even though many senators support independence for the Soviet republic. However, many agreed it is NOT the proper time for the Senate to speak out on the issue.

Senate Republican leader Robert Dole said national security adviser Brent Scowcroft told him the administration feared the resolution would

complicate delicate diplomatic negotiations on Lithuania.

Lithuanian President Vytautas Landsbergis accused Soviet President Mikhail Gorbachev of ''meddling'' yesterday.

The accusation followed Gorbachev's order that all citizens in the Baltic republic turn in their guns. Gorbachev also ordered the K-G-B to increase control of Lithuania's border... and commanded officials to guarantee the upholding of the Soviet Constitution.

#90081u0770 03/22/1990 ~United Press International

TIRGU MURES, Romania (MARCH 22) UPI - Signs of normalcy appeared in Tirgu Mures Thursday after two days of ethnic rioting but the Transylvanian city remained under emergency rule with troops and tanks guarding the main square.

Shoppers lined up to buy fresh bread as bakeries opened for the first time in several days and a number of stores also opened for business.

Clusters of ethnic Hungarians and Romanians continued to mill around the central square under the watchful eyes of government troops but there were no reports of violence.

The interim government revised the official death toll from Tuesday's ethnic clashes, saying three people were killed, not six as reported Wednesday.

''Two died in clashes and one was hit by a car on the city outskirts,'' the official news agency Rompres said. It said 298 people were wounded, including 36 who remained hospitalized.

Thirty-eight people were arrested for their part in storming the headquarters of Tirgu Mures offices of the Hungarian Democratic Union on Monday, the incident that triggered Romania's worst ethnic unrest since World War II, Rompres said.

Wednesday, the provisional government moved to quell the unrest by acceding to several controversial demands by the country's 2 million ethnic Hungarians.

Deputy Prime Minister Gelu Voican, speaking to about 1,000 ethnic Hungarians in Tirgu Mures Wednesday night, promised separate schools for the minority along with streets signs and newspapers in the Hungarian language.

But within hours of the speech, some city residents were predicting a new

wave of violence, saying the concessions would infuriate Romanian nationalists.

''I'm afraid to go to work tomorrow,'' said Gesella Genyeseszgy, a 29-year-old engineer. ''I think the government's declaration will create another state of tension.''

The western province of Transylvania, where most of Romania's 2 million ethnic Hungarians live, has seen a resurgence of Hungarian nationalism since the December revolution that toppled communist dictator Nicolae Ceausescu and ended a decades-old policy of forced assimilation.

Army tanks and troops patrolled Tirgu Mures Wednesday after a night of clashes between rival groups of demonstrators who fought with iron bars, axes and clubs in Transylvania's worst ethnic unrest since World War II.

A spokesman for the Mures County provisional government confirmed six people were killed in the fighting and 294 wounded, 36 of them seriously, the official news agency Rompres said. At least 318 have been wounded since the bitter ethnic rioting erupted Monday.

Ethnic Hungarians staged a 24-hour strike in Mures County Wednesday to protest anti-Hungarian violence and held mass demonstrations in two other Transylvanian cities, but there were no reports of further violence.

Voican announced the provisional government's concessions during a speech to about 1,000 ethnic Hungarians who had staged an all-day rally in the Tirgu Mures main square. He also promised the crowd safe conduct home after some Hungarians said they feared they would be beaten by gangs of Romanian nationalists.

Army checkpoints were set up along all roads leading into Tirgu Mures, an industrial center in the picturesque Upper Mures valley about 200 miles northwest of Bucharest. But there were reports that groups of Hungarians and Romanians were streaming toward the city through the forests.

Hungarian tourists returning from Tirgu Mures told Budapest Radio the city was surrounded by troops. Armored cars were deployed outside all public buildings and helicopters circled above the downtown area, they said.

Stores in the downtown shopping district were closed, and bread was scarce Budapest Radio said.

The violence followed a week of escalating tension over Hungarian demands for cultural autonomy, including schools in their native language and Hungarian-language books and newspapers.

#90081u0832 03/22/1990 ~United Press International
(MARCH 22) UPI - The dollar's steady rise against the Japanese yen sent stock prices plummeting Thursday on the Tokyo Stock Exchange with the key Nikkei Average falling below the 30,000 level for the first time in 15 months.

A 1,000-point recovery in late afternoon trading saved the market from what could have been its second biggest loss since the Black Monday collapse of October 1987.

The blue-chip Nikkei Average of 225 selected issues, which had been down 1,836.07 points in the morning, rallied late in the day to close at 29,843.34, down 3.13 percent or 963.85 points for its seventh largest decline on record.

It was the first time since December 1988 that the average had fallen below the 30,000 level.

The Nikkei Average has lost 9,072.53 points, or 23.3 percent of its value, since its record high of 38,915.87 Dec. 29.

The broader-based Tokyo Stock Exchange Index of all listed major shares tumbled 100.01 points to 2,173.17 for its second largest decline, compared with the record 307.27 point plunge on Black Monday.

Declines hammered advances 931 to 70, with 44 issues unchanged.

An estimated 580 million shares changed hands, compared with 613 million shares Tuesday.

The market was closed Wednesday for a national holiday.

Elsewhere in Asia, stocks continued their climb on the Hong Stock Exchange in active trading despite the decline in Tokyo.

The key Hang Seng Index, which surged 46.89 points Wednesday, climbed another 21.75 points to 2,948.67.

Prices closed slightly lower in moderate trading on the Singapore Stock Exchange amid investor worries over interest rates and the sharp decline in Tokyo.

The key Straits Times Industrial Index, which gained 8.14 points Wednesday dipped 2.28 points to 1,569.91. The narrower All Singapore Index slipped 0.57 points to 429.09.

Turnover amounted to around 94.4 million shares, up from the 75.4 million

shares changing hands Wednesday.

In Australia, stock prices closed lower on the Sydney Sharemarket as trading was dominated by the plunging Tokyo stock market.

The All Ordinaries Index, which fell 8.3 points Wednesday, lost 20.9 points to 1,566.8. The All Industrials Index fell 37.1 points to 2,390.6 and the All Resources Index dropped 8.3 points to 933.7.

#90081u0846 03/22/1990 ~United Press International
DAYTON, OH (MARCH 22) UPI - Pete Rose's lawyers are negotiating with federal prosecutors to enter a plea on his alleged failure to report income, the Dayton Daily News reported in a copyright story Thursday.

Sources told the newspaper the lawyers are trying to clear the way for Rose to enter a plea on two felony tax charges contained in a bill of information.

Rose, 48, could enter the plea as early as next week, the sources said.

If the plea is accepted by a federal judge, Rose might avoid a lengthy trial, as well as the more serious charge of tax evasion. It also holds the potential of sparing Rose testimony by former associates about his alleged gambling, the newspaper said.

Rose, baseball's all-time hit leader, was suspended from baseball last August after he admitted to placing bets with illegal bookmakers. He was the Cincinnati Reds' manager at the time.

He is eligible to apply for reinstatement after one year.

The Dayton story is the latest to detail Rose's possible tax problems. On Wednesday the Cincinnati Post quoted unnamed federal sources as saying Rose's lawyers are trying to keep Rose out of jail in connection with a federal grand jury investigation of the ex-baseball star's taxes.

The Post's report attributed to unspecified federal sources said Rose's ''lawyers are quietly trying to keep him out of prison.''

The newspaper reported its sources also said Rose's attorneys ''already may have gained some leverage ... because federal prosecutors are

considering foregoing income tax evasion charges in favor of a (lesser) charge of failure to report income.''

A federal grand jury has been investigating Rose's taxes for nearly a year and a report from the grand jury is expected soon, perhaps next week.

With the plea agreement, Rose would probably appear in U.S. District Court in Cincinnati only to enter a plea and about six weeks later for sentencing.

The income Rose allegedly failed to report is said to be from gambling and the sale of his baseball memorabilia.

A bill of information is a formal charge brought by prosecutors when a defendant waives his right to first have a case reviewed by a grand jury.

Rose's Cincinnati lawyer, Robert Pitcairn Jr., declined to discuss the case. D. Michael Crites, U.S. Attorney for the Southern District of Ohio, also declined comment.

Rose has repeatedly denied claims he bet on baseball.

In an Aug. 17, 1988, affidavit, agent Lowell Wood of the Internal Revenue Service, said Rose's ''bets averaged $2,000 per game on four to eight games per day, approximately four days per week'' in early May 1987.

Rose said he and his lawyers have been cooperating with the grand jury investigation.

WASHINGTON (MARCH 22) UPI - The number of initial claims for state unemployment insurance benefits climbed by 15,000 to 358,000 for the week ending March 10, the Labor Department reported Thursday.

The revised figure for the previous week held steady at 343,000 initial claims, the department's Employment and Training Administration announced.

The government also reported that during the week of March 3 the unadjusted rate of insured unemployment increased to 2.9 percent from 2.8 percent, with 2,973,000 workers claiming state benefits, an increase of 25,700.

#90081u0876 03/22/1990 ~United Press International
WASHINGTON (MARCH 22) UPI - The United States and Soviet Union agreed on terms for a new grain agreement Thursday that requires the Soviets to buy 10 million metric tons of grain a year, up 1 million tons, but gives them flexibility in meeting the goal, the Bush administration announced.

The agreement in principle was reached at the end of the second round of negotiations, an unusally speedy conclusion, although chief negotiator Julius Katz had been optimistic of an early resolution.

The two superpowers have relied on long-term grain agreements since the mid-1970s when huge Soviet grain purchases caught the United States off guard and emptied its grain bins.

''This agreement represents a welcome advance in relations between the United States and the Soviet Union,'' said trade ambassador Carla Hills and Agriculture Secretary Clayton Yeutter.

The Soviet Union is the No. 1 market for U.S. grain exports.

The five-year pact calls for the Kremlin to buy 10 million tons of wheat, feed grains, soybeans and soybean meal a year.

The Soviet Union would be obligated to buy 4 million tons of wheat and feed grains annually but it would be allowed to substitute up to 750,000 tons of one commodity for the other during a year. However, in the five-year life of the agreement, wheat and feed grain purchases must average four-million tons a year.

The administration said the agreement means U.S. farmers are assured of a market for 20 million tons each of wheat and feed grains, plus 10 million tons that could be composed of wheat, feed grains, soybeans or soybean meal.

The current grain agreement expires at the end of this year. Negotiations on what would be the fourth pact began last December, a few days after the shipboard summit between President Bush and Soviet leader Mikhail Gorbachev at Malta.

Under the current agreement, the Soviet Union is obligated to buy 9 million tons of U.S. grain annually, including 4 million tons apiece of corn and wheat.

The first grain agreement was written in 1975 but did not take effect until 1976. Even when President Carter suspended grain trade with the Kremlin in 1980 because of the Soviet invasion of Afghanistan, the Soviet Union was allowed to buy the grain specified in the grain agreement.

In 1988, negotiators were unable to agree on terms for a new agreement, so they extended the 1983 pact for 15 months.

Last year, the Kremlin bought a record 21.7 million tons of corn and wheat - the two commodities covered by the grain agreement. The grain had a

value of nearly $3 billion.

So far this fiscal year, the Kremlin has purchased 13.8 million tons of corn and wheat.

In recent weeks, Soviet financial problems have prompted concern among U.S. businessmen and Soviet officials publicly said they wanted to reduce the volume of grain that is imported. U.S. analysts have forecast the Soviet Union will import 38 million tons of grain this marketing year, despite an abundant 1989 crop.

The last major Soviet grain purchase was Jan. 19.

U.S. wheat organizations, who have watched wheat sales lag behind last year's pace, expressed concern recently that wheat could be ignored if the Kremlin was given flexibility in meeting its tonnage requirements.

#90081u0884 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - President Bush Thursday declared a major disaster exists in the state of Alabama due to damage caused by severe storms and flooding earlier this month and ordered federal recovery aid.

Bush's order makes funding available to supplement the needs of effected individual and local governments in Coffee County. The storms and flooding struck the southeastern part of the state beginning March 15.

The assistance will be coordinated by the Federal Emergency Management Agency (FEMA) and can include temporary housing, grants, low-interests loans to cover uninsured property losses and other programs to help residents and businesses recover from the disaster.

FEMA, meanwhile, is conducting damage surveys in other areas and additional counties may be designated for assistance when the assessments are completed.

#90081u0889 03/22/1990 ~United Press International

MINNEAPOLIS (MARCH 22) UPI - The city attorney's office dropped plans to prosecute three Northwest Airlines' pilots accused of flying after drinking, deferring to federal officials.

Mitch Rothman, assistant city attorney, said Wednesday that Capt. Norman Prouse, First Officer Robert Kirchner and Second Officer Joseph Balzer could face up to 15 years in prison under federal charges while the maximum penalty under city charges would be 90 days.

''The federal penalty would be much more significant and appropriate,'' he said.

The three men were arrested when their flight from Fargo, N.D., arrived in Minneapolis with 91 passengers on the morning of March 8. Two blood tests were taken, at 9:30 a.m. and 10:30 a.m., and their licenses were revoked the next day.

Sources said Prouse, 51, had a blood alcohol concentration of .12 to .13 percent, while Kirchner and Balzer had concentrations of .06 or above.

The federal law sets .10 percent or more as a presumption of intoxication.

Northwest fired them last week but attorneys said the pilots plan to appeal their license revocations before the National Transportation Safety Board next month and their dismissals through the Air Line Pilots Association.

The Cass County state's attorney in Fargo was to announce Thursday whether he would charge the pilots.

The Minneapolis city attorney's office decided not to prosecute after federal lawyers expressed an interest and representatives of the two offices discussed the case during the day.

City Attorney Robert Alfton said Prouse purchased 17 rum and cola drinks in a Moorhead, Minn., bar the night before the flight and Kirchner and Balzer bought five or six pitchers of beer between 5:30 and 10:30 that night.

Alfton said Prouse stayed at the bar until 11:30 p.m., but said he did not know if Prouse drank the 17 drinks himself.

Officials in Hennepin County revealed late Wednesday that a mistake was made during the blood alcohol testing at Hennepin County Medical Center.

Medical Center Administrator Daniel McLaughlin said the three men had their arms swabbed with an alcohol-soaked pad before blood was drawn. Proper procedure requires swabbing with a non-alcoholic agent.

A memo from McLaughlin to C.F. Richards, senior associate adminstrator of the hospital, said the error apparently does not effect the results because the test can distinguish between the types of alcohol in beverages and rubbing alcohol.

Bruce Hanley, an attorney representing Balzer, said he will consult with experts to determine if the use of an alcohol swab could have affected the blood test results.

#90081u0904 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - First lady Barbara Bush will represent the United States at the inaugural of Costa Rican President-elect Rafael Angel Calderon on May 8, aides said Thursday.

Calderon met with Bush earlier this week at the White House.

It was the first time the president's wife has been part of an official delegation to formel inauguration ceremonies of a foreign head of state.

The Bushes' daughter Dorothy Le Blond was a member of a delegation that attended ''Throne Day'' in Morocco last month.

In recent years it has been customary for presidents to assign members of their families to attend foreign ceremonies.

Former President Ronald Reagan sent his wife Nancy to events involving royalty and his daughter Maureen, who had a post at the United Nations, also was on several delegations to ceremonial functions abroad.

Former President Jimmy Carter sent his wife Rosalynn and his mother, the late ''Miss Lillian'' Carter, on similar missions.

#90081u0911 03/22/1990 ~United Press International

BERKELEY, CA (MARCH 22) UPI - There was a sit-in, a smoke-in and a demonstration Wednesday against the government of El Salvador at the University of California campus at Berkeley.

''It's been sort of potpourri,'' said UC spokesman Tom Devley. ''There's a wide range of issues involved.''

The biggest problem for the university was a sit-in by a coalition of groups at a conference room in California Hall in the administration building. Campus police late Wednesday removed and cited 56 people who

took over the room to bring attention to a wide range of demands on minority issues, ranging from admissions and faculty tenure to bi-sexual and gay rights.

University police said those arrested after the building closed for the day were cited for trespassing and released.

Earlier, a smoke-in by a group advocating the freedom to puff marijuana was held at Sproul Plaza with no incidents.

''It's been sort of a rite of spring day at Berkeley,'' said Devley, adding that the demonstrations were all peaceful.

#90081u0947 03/22/1990 ~United Press International

BEIJING (MARCH 22) UPI - A senior Chinese official said Thursday 3.5 million rural workers lost their jobs last year as a result of China's continuing austerity program.

Agriculture minister He Kang, speaking to reporters at a news briefing held by the ongoing session of the National People's Congress, China's nominal legislature, said 1 million of the workers were laid off due to a nationwide slowdown of capital construction.

The remaining 2.5 million were workers in rural enterprises who lost their jobs when their factories stopped production, He said.

Formerly the fastest-growing sector of China's economy, rural enterprises have been hit hard by the country's program of economic retrenchment.

The program's tight money policies and preferential treatment for large state enterprises have left rural factories hurting for cash and raw materials, forcing 3 million to close down or merge with other enterprises according to official statistics.

Premier Li Peng said Tuesday the government would gradually ease its austerity program which has created widespread production halts and unemployment even as it achieved its goals of trimming record inflation and slowing breakneck growth.

In keeping with the current government policy of reemphasizing agriculture He Kang said agricultural credit will be increased this year by $2.1 billion, of which 10 percent to 20 percent will go to rural enterprises.

He said 30 percent of rural workers who lost their jobs will return to farming and 20 percent will find work in small businesses.

The state will allocate $640 million to mobilize the remaining 50 percent to work on irrigation and agricultural development projects.

He also stressed the need for strict population control if China is to meet its agricultural target of 500 million tons of grain by the year 2000 a 100 million-ton increase over current levels.

China's arable land decreases at a rate of 500,000 acres per year as its 1.1 billion population continues to grow, He said.

''For each person born, we need another 880 pounds of cereals. Population should be kept below 1.25 billion by 2000. I'm confident, but not blindly optimistic, because this will be hard work,'' He said.

He adamantly denied that Li Peng's statements on strengthening the social service system and the collective economy implied a return to China's radical commune system.

''Farmers still work contracted land and if they produce more, they earn more. Each according to his work,'' He said.

''It's by no means a return to the commune system,'' he said.

Land reforms begun in 1978-79 allowed farmers to keep produce and grain beyond state quotas for private sale. The so-called ''contract responsibility system,'' adopted nationwide, has doubled rural incomes over the past decade.

DALLAS (MARCH 22) UPI - The bankrupt Hunt brothers of Dallas have relinquished control of Penrod Drilling Corp. and its prized fleet of 40 offshore drilling rigs because trustees for the family's interests were unable to work out a compromise with lenders.

Oil industry analysts said the development, which leaves Penrod in the hands of creditors, is expected to touch off an intense bidding war for control of the drilling rigs, some of the most modern in the industry.

The trusts for Nelson Bunker, Lamar and Herbert Hunt issued a brief two-sentence release Wednesday saying that further investment in Penrod would be inadvisable due to irreconcilable differences with other stockholders and management.

Penrod has been having trouble meeting loan payments of $25 million to $30 million due March 31. The Hunts relinquished their 50 percent interest in Penrod in lieu of making the first principal payment of $537 million in debt.

News reports Thursday said the Hunts forfeited their interest in Penrod in exchange for the banks agreeing to list a lien against future earnings of Placid Oil Energy, the Hunts' exploration company.

The action left Penrod under the control of a partnership lead by Fort Worth investor Richard Rainwater, Energy Service Co. of Houston, R.D. Smith and Co., a securities firm specializing in financially troubled companies, and five banks, Manufacturer's Hanover Trust, Bankers Trust Co. of New York, Citibank, Royal Bank of Canada and Bank of Nova Scotia.

The banks were expected to sell their interests to contract drillers.

BEIJING (MARCH 22) UPI - A senior Chinese official said Thursday 3.5 million rural workers lost their jobs last year as a result of China's continuing austerity program.

Agriculture Minister He Kang, speaking to reporters at a news briefing held by the National People's Congress, China's nominal legislature, said 1 million of the workers were laid off due to a nationwide slowdown of capital construction.

The remaining 2.5 million were workers in rural enterprises who lost their jobs when factories stopped production, he said.

Once the fastest-growing sector of China's economy, rural enterprises have been hit hard by the country's program of economic retrenchment.

The program's tight money policies and preferential treatment for large state enterprises have left rural factories hurting for cash and raw materials, forcing 3 million to close down or merge with other enterprises

according to official statistics.

Premier Li Peng said Tuesday the government would gradually ease its austerity program, which has created widespread production halts and unemployment even as it achieved its goals of trimming record inflation and slowing breakneck growth.

In keeping with the current government policy of re-emphasizing agriculture, He Kang said agricultural credit will be increased this year by $2.1 billion, of which 10 to 20 percent will go to rural enterprises.

The agriculture minister said 30 percent of rural workers who lost their jobs will return to farming and 20 percent will find work in small businesses.

The state will allocate $640 million to mobilize the remaining 50 percent to work on irrigation and agricultural development projects.

He also stressed the need for strict population control if China is to meet its agricultural target of 500 million tons of grain by the year 2000 a 100 million-ton increase over current levels.

China's arable land decreases at a rate of 500,000 acres per year as its 1.1 billion population continues to grow, He said.

''For each person born, we need another 880 pounds of cereals. Population should be kept below 1.25 billion by 2000. I'm confident, but not blindly optimistic, because this will be hard work,'' He said.

He adamantly denied that Li Peng's statements on strengthening the social service system and the collective economy implied a return to China's radical commune system.

''Farmers still work contracted land and if they produce more, they earn more. Each according to his work,'' He said.

''It's by no means a return to the commune system,'' he said.

PITTSBURGH (MARCH 22) UPI - The national recycling rate for steel beverage cans increased substantially in 1989, the Steel Can Recycling Institute

said Thursday.

The rate was 21.6 percent last year, up 15 percent from 1988, a year in which the rate included both steel food and beverage cans, a spokesman said.

Kurt Smalberg, president of the institute, said the new beverage can recycling rate indicated the steel can was making strong gains in the nation's recycling programs.

CAPE TOWN, SOUTH AFRICA (MARCH 22) UPI - In the highest level contact between the United States and South Africa in 12 years, Secretary of State James Baker urged South African President Frederik de Klerk Thursday to go forward in an ''irreversible process'' to abolish apartheid.

At the hourlong meeting Baker and de Klerk discussed two major obstacles to the lifting of economic sanctions against the white minority government: the end of a 45-month state of emergency and the release of all political prisoners.

De Klerk said he was working toward a system in which all South Africans had equal votes and were represented at all levels of government.

He stressed, however, that such a system would include ''proper protection of minority rights.''

Baker described the talks as ''very interesting, candid and constructive.''

Asked if he regarded Baker's presence in the country as a reward for recent reforms, de Klerk said, ''We are not looking for rewards.'' He said however, he regarded the visit as ''a great honor for South Africa.''

Earlier, a black leader who went to prison with Nelson Mandela urged Baker not to ease pressure on South Africa until the white minority government dismantles apartheid and ''has no way of going back.''

Baker came to South Africa to commend reformist de Klerk for his efforts to break up the institutional policy of racial separation and to encourage such steps as releasing all political prisoners.

But in an initial meeting with leaders of the anti-apartheid African National Congress and other black groups, he received a polite but firm rebuff for his mission to de Klerk.

Govan Mbeki, 69, who went to prsion with Mandela for his opposition to

apartheid, and eight other black leaders met with Baker at a palatial hillside U.S. diplomatic residence and told him his meeting with de Klerk is not helpful.

''We are not happy with the fact the secretary has come to consult with the South African government,'' Mbeki said.

''Our message to the American government and the American people is to continue to impose pressure on South Africa and not to relax at all until such time as the position of the South African government has no way of going back,'' Mbeki said.

Baker's meeting with de Klerk is the highest level contact between the United States and the white minority government since Secretary of State Cyrus Vance met with President P.W. Botha in 1978.

Baker smiled in rejecting the criticism of his meeting with de Klerk.

''We shoud encourage a continuation of the type of steps that South Africa should take. It (the talks) is not a reward. It is using whatever influence we have to encourage the South African government to move forward to dismantle apartheid and to a multi-party democracy,'' Baker said.

The message delivered to Baker by the black leaders was the same he received from Mandela on Wednesday in what was termed ''positive'' talks in Windhoek, Namibia.

Mandela, who spent 27 years in prison until de Klerk ordered his release last month, told Baker on Wednesday the talks could indicate the United States and other nations are easing their economic sanctions against South Africa because of de Klerk's reform efforts.

''We do not think that there has been any fundamental change in the policy of the national government,'' Mandela told reporters.

Mandela, Baker and scores of other international dignitaries were in Namibia to celebrate the southern African nation's independence after more than a century of colonial rule.

''There is nothing which Mr. de Klerk has done up to now which would require a change of strategy on the part of the international community,'' Mandela said.

''And the fact that the foreign secretary of a superpower now visits Mr. de Klerk can create a great deal of confusion, specifically that the nationalist government has done something which requires a change of attitude on the part of the international community. We regard that as

regrettable.''

Baker appeared not to be disturbed, even by a last-minute change in which he visited Mandela at his residence instead of the black leader going to the U.S. ambassador's residence. Mandela requested the change because his schedule was running late after a meeting with Soviet Foreign Minister Eduard Shevardnadze.

#90081u1061 03/22/1990 ~United Press International

BRUGES, BELGIUM (MARCH 22) UPI - German unification will be ''a first step toward closer European integration'' and will not create any insuperable problems for the European Community, a senior EC official said Thursday.

''German unity will not hinder the process of European integration,'' said Martin Bangemann, EC commission vice-president, in a speech at the College of Europe, an institute for post-graduate studies on European law and institutions.

''If anything, the opposite will be the case. When German unity is achieved, the rigid bloc mentality, which has split Europe in two for so long, will have been overcome for the first time.

''Dismantling of the German-German frontier is also a first step toward closer European integration,'' Bangemann said.

He said incorporating East Germany ''will not create insuperable problems for the Community'' and will not overstretch it financially.

Community revenue will increase when East Germany becomes a member, incorporation of East Germany will take some time so all financial claims will not become effective immediately, and during that transitional period West Germany will meet most of the adjustment costs, he said.

''The German-German economic and currency union will not adversely affect the continuing process of integration in the Community either,'' he said.

''The German mark will remain a strong and stable currency. As a result, interest rates are more likely to fall than to rise. The stability of the European Monetary System is not, therefore, jeopardized by German currency union,'' Bangemann said.

The European Monetary System - EMS - links the currencies of nine EC countries within close fluctuation margins. Under present plans the currencies of the other three member states - Britain, Greece and Portugal - should join EMS in the first stage of Economic and Monetary Union starting July 1.

The second and third stages of EMU, for which no starting dates have been set yet, would eventually lead to a single EC currency and a European central banking system.

''Once the German mark is introduced as legal tender in the German Democratic Republic, a second German economic miracle will take place there,'' Bangemann said.

''Firms from the Federal Republic are already on their starting blocks, eager to be well-placed at the outset to take advantage of this lucrative market.

''Productive plants in the GDR may be outdated and infrastructures deficient but the willingness of the people to work is enormous. Those who invest in the GDR now will reap the benefits for the expansion that will take place in the years ahead.

''I would welcome it if as many firms as possible from the Community seized this opportunity,'' he said.

Bangemann said a neutral Germany ''would be a dangerous solution. For it would uncouple Germany from the rest of Europe and would drive it into isolation once again.

''Small countries can perhaps remain neutral but never an economic giin the middle of Europe.

''Neutrality always rests on a perception of enemies. We must not perpetuate such perceptions, but overcome them,'' he said.

#90081u1064 03/22/1990 ~United Press International

PHILADELPHIA (MARCH 22) UPI - A police officer who returned to active duty after a heart transplant died exactly one year after he got his new lease on life, police said Thursday.

Philadelphia Highway Patrolman Michael Rash, 30, died at 6:30 p.m. Wednesday at Temple University Hospital, officials said.

The cause of death had not been determined but police officials said his heart recently had showed signs of rejection.

''He was a nice guy,'' said highway Patrolman James McGraph, who worked with Rash. ''I knew his father when his father was a highway cop.''

Rash was diagnosed with idiopathic cardiomyopathy, a degenerative heart

disease, in August 1988. The cause of the disease is unknown and usually is fatal. The only cure is a heart transplant.

Temple University Hospital put Rash on a priority list for a transplant in December 1988. He was expected to live only two more weeks when the family of a brain-dead 19-year-old, who was injured in a fall, agreed to donate the boy's heart.

The transplant took place on March 21, 1989, and by mid-May he was back behind a desk at the Seventh Police District.

In September he went back on the beat full time, riding motorcycles and patrolling in unmarked cars, often working in high-crime areas on the night shift.

''He wanted it badly, to return to duty and we were very supportive in his return to duty,'' said Kenneth Rocks, vice president of the Fraternal Order of Police.

Rocks said Rash, father of a two toddlers, was the only police officer in the nation to return to hazardous street duty after receiving a new heart.

''It took a lot of courage on behalf of the medical people, on behalf of the city of Philadelphia to allow him to return to duty. It was something Mike wanted very, very much,'' said Rash. ''He was working up to the end.''

Last year, the police union named Rash Special Patrol Officer of the Year.

Capt. Francis Kerrigan, Rash's commanding officer, described him as ''an outstanding, outstanding young officer.''

''He could very well have taken a pension and he just wanted to be back doing what he loved to do,'' he said.

Kerrigan said Rash's father, ironically, died of a heart attack while on highway patrol about 10 years ago.

TOKYO (MARCH 22) UPI - Japan sent 491 Chinese nationals, some in tears, back to China by boat Thursday in the largest deportation of Chinese refugees who streamed into Japan during last year's political unrest in China.

''Our understanding is they came here for economic related purposes,'' said Taizo Watanabe, the Foreign Ministry's chief spokesman. ''They had been living in China and were not under political suppression.''

The Chinese, 450 men and 41 women who had been kept in detention centers since their arrival in Japan, were loaded onto a chartered Chinese boat at the port of Nagasaki by 220 police and several immigration authorities. Protesters demonstrated nearby.

Japan has refrained from harshly criticizing China following the crackdown on pro-democracy demonstrators last June and has refused to give refugee status to the 1,763 mostly Chinese boat people who arrived in Japan last May.

Japan deported 301 Chinese nationals on Dec. 21 and intends to deport a total of 1,236 of the boat people, Watanabe said.

The 491 Chinese and one infant born in Japan in January boarded the Chang Bai ship and departed for Fuzhou City, Fujian Province, at 5 p.m., a Foreign Ministry official said.

Japan has agreed to accept a small number of Vietnamese refugees but not Chinese.

The refugees arrived saying they were Vietnamese but were later confirmed to be Chinese.

A Chinese man was crying as he left a detention house to board the ship, the Kyodo news service reported from Nagasaki.

Several Japanese protesters opposed to the deportations demonstrated outside the detention center in Omura, north of Nagasaki.

''It is an extremely dirty move to send those people back,'' said Yaeko Takeoka, a Japanese lawyer who represents a Chinese man who is seeking political asylum in Japan after he hijacked a plane from China in December.

''The Japanese government is not interested in democracy or human rights '' Takeoka said. ''They are only interested in what profit they can extract from China.''

The Japanese government sought and was given assurances from Beijing that the refugees were Chinese citizens and were not under political suppression, the Foreign Ministry spokesman said.

''We have confirmed they have been in China and have no political background,'' Watanabe said.

The Japanese government said it also has been assured by the Chinese that the refugees will not be mistreated once they are returned.

Takeoka said the assurances of the Chinese government cannot be trusted.

''We do not know what happens to them when they are returned,'' she said. ''We have heard they may be put in labor camps but it is kept a secret.''

#90081u1101 03/22/1990 ~United Press International

LONDON (MARCH 22) UPI - Czechoslovak President Vaclav Havel said Thursday his country has stopped exporting a plastic explosive that is a key weapon in international terrorist arsenals, but estimated Libya has enough of the virtually undetectable substance to last for the next 150 years.

Havel, speaking at a press conference on the second day of a three-day visit to Britain, also advised Moscow to show sensitivity and foresight in its dealings with Lithuania, which is trying to secede from the Soviet Union.

Havel said Czechoslovakia, which manufactures Semtex plastic explosive, sought an agreement with other nations that produce plastic explosives to restrict sales of the material to industrial users.

''Semtex is a product of Czechoslovakia that does not have a good reputation,'' he said. ''We have ceased exports.''

Investigators have said Semtex was the probable explosive planted by extremists aboard a Pan Am Boeing 747 jet that exploded Dec. 21, 1988, over the Scottish town of Lockerbie, killing 270 passengers and residents.

Havel said the former communist government had supplied 1,000 tons of Semtex to Libyan leader Col. Moammar Gadhafi, which Czechoslovakia could not get returned.

''Yet 200 grams (7 ounces) of Semtex is enough to blow up an aircraft,'' he said. ''Libya has enough to last 150 years.''

Gadhafi is alleged to have supplied Semtex to the Irish Republican Army, which has used the explosives in its violent campaign against British rule in Northern Ireland.

Havel said Prague had stopped manufacturing odorless Semtex, which is near impossible to detect, and wanted other producer nations to agree to create only detectable products sold solely for industrial purposes.

''The absurd thing is that Czechoslovakia did not even make money on Semtex,'' said Havel, who believed his nation had often been blamed for the supplying plastic explosives produced elsewhere.

He said ''orders from on-high'' directed the country to sell it, but he did not specify further. One of his aides said Prague ''supplied Semtex to all Warsaw Pact countries and not at market prices.''

Havel was asked about what advice he would give Soviet leader Mikhail Gorbachev in dealing with a mounting confrontation over Lithuanian demands for independence.

''I would advise them to be sensitive and to have foresight and to look at this problem from a long-term point of view,'' he said. ''I am confident that this can be accomplished without bloodshed.''

The president said he had told British Prime Minister Margaret Thatcher on Wednesday that German unification would be ''the sort of engine that would propel the unification of the whole of Europe.''

But Havel also warned that German unity must not occur at the expense of fear in other countries.

Havel also on Wednesday had lunch with Queen Elizabeth II at Buckingham Palace and launched the East European Forum, an organization aimed at encouraging creative exchanges.

He is scheduled to hold discussions with British Foreign Secretary Douglas Hurd, meet leading businessmen and literary figures, and attend a play before his Friday departure.

(MARCH 22) UPI - VIDEO REVIEWS:

MOVIES

''Dead Poets Society'' - Robin Williams plays it straight, and plays it great, as John Keating, the rebel English teacher who cracks the stifling conformity and tradition of a '50s New England boys school, urging his students to think for themselves, to ''Seize the day! Make Your lives extraordinary!'' Keating's kids do indeed seize the day, meeting their teacher's challenge with all-out enthusiasm, upsetting the school's old

guard in the process and changing their lives forever. Williams, nominated for Best Actor in the upcoming Academy Awards, gives a witty, forceful yet restrained performance - very restrained for him - as the kind of teacher we all wish we had, a Mr. Chips off the old block, and yet he is basically a star in a non-starring role. The real stars are the boys - notably Robert Sean Leonard, Gale Hansen, Josh Charles and Ethan Hawke. Nominated for Best Picture, it's an exceptional, intelligent, realistic film that says a lot about the right things. 1989. 128 minutes. Touchstone Home Video. Rated PG. $89.95.

''Queen Of Hearts'' - Jon Amiel's captivating, operatic family saga is a tale of romance and revenge bracketed between the opening scene's dazzling bravado and something out of ''The Sting'' at the finale. The film sets its fairy tale tone early, in a picturesque Italian village where young lovers Rosa (Anita Zaria) and Danilo (Joseph Long) stage a cliffhanger escape from their parent-ordained fates and flee to London where they open a cappucino cafe. All does not always go well, though, and lurking menacingly in the background is Rosa's spurned suitor, Barbariccia the butcher (Vittorio Amandola), waiting his chance to humiliate Danilo and reclaim Rosa. While brisk and imaginative, the film tends to drift rather pointlessly at times. Still, it's a winner, one ''Queen of Hearts'' that's a sure trump. 1989. 112 minutes. MCEG/Virgin Home Entertainment. Rated PG. $89.95.

''Cookie'' - Cookie is a wildly independent Brooklyn teenager (played with gum-popping zest by Emily Lloyd) who comes to the aid of her racketeer father in this tasty little comedy caper. After finishing a 13-year prison stretch, ''Dapper'' Dino Capisco (Peter Falk) sets out to get his money back from a chisling ex-partner while avoiding a federal attorney determined to get him back behind bars. Cookie wants no part of Dino, whom she hardly knows, but reluctantly lends a hand when someone tries to kill him and, with an unexpected spurt of inherited resourcefulness, saves the day. Dianne Wiest plays Gino's fluttery ex-wife and Jerry Lewis is one of the mob bosses. 1989. 93 minutes. Warner Home Video. Rated R. $89.95.

''Best Of The Best'' - The five-member U.S. karate team is preparing for what could be a matter of life-and-death: they're a rag-tag bunch going against a ferocious band of Koreans who do more than just break boards and one of our guys even admits he's afraid. Unlike other recent martial arts releases, this one stresses teamwork blended with individual feelings and, in its own way, is not bad at all. There are some familiar trappings one must go up against the man who killed his brother in the ring, but it reaches for the unfamiliar as well and does so with a talented cast that includes Eric Roberts, James Earl Jones, Sally Kirkland, Louise Fletcher and Phillip Rhee. 1989. 95 minutes. SVS. Rated PG-13. $89.95.

''Shocker'' - Mad killer Horace Pinker, who slaughters whole families for kicks, gets a lot madder when they try to electrocute him. Instead of

dying, he just gets his battery recharged and goes on killing in this violent Wes Craven horror flick. Only teenager Jonathan Parker (Peter Berg), through a series of macabre dreams, is able to keep tabs on Pinker (Mitch Pileggi), who like the bad alien in ''The Hidden'' can move from one body to another. Some interesting special effects, but the film, drawing heavily from Craven's ''A Nightmare On Elm Street,'' could have used more juice. 1989. 111 minutes. MCA Home Video. Rated R. No suggested retail price.

VIDBITS

''Lethal Weapon 2,'' ''Parenthood'' and ''Indiana Jones And The Last Crusade'' are still America's favorite video movie rentals, according to Billboard Magazine ... With the May 24 release of ''Back To The Future Part II,'' the marketing arm of MCA Home Video adds a familiar name to its logo: Universal. The move to MCA/Universal Home Video, the company says, is to take advantage of ''one of the handful of motion pictures studios known worldwide'' ... Paramount Home Video has something new and something old among its May 17 releases. Eddie Murphy's ''Harlem Nights'' highlights the ticket, which also includes four new-to-video westerns, among them ''The Covered Wagon,'' a 1923 silent complete with organ soundtrack ...

#90081u1139 03/22/1990 ~United Press International

EAST BERLIN (MARCH 22) UPI - East Germany's Social Democratic Party said Thursday it was now willing to hold informal talks with the Christian Democrats, the winners of Sunday's elections, in an effort to reach agreement on the formation of a broad-based coalition government.

Markus Merkel, the SDP's deputy chairman, told a news conference the party was standing by its decision not to join in a grand coalition if the center-right German Social Union (DSU) was included in it.

He said the SDP wanted to join in informal talks with the Christian Democrats in a bid to see if there was enough common ground which would enable them to hold more formal negotiations.

The Social Democrats, who had been favored to win a clear majority, instead won a disappointing 21.9 percent of the vote in the elections, the first free poll in East German history.

The SDP has been heavily criticized by the West German government for seeking to impose tough terms on its entry into a coalition. Their stance could possibly slow down the pace of reunification.

But Merkel insisted the SDP stood by its objections to the Leipzig-based

DSU. He said during the election the DSU engaged in a smear campaign against his party.

''As political opponents we were placed in the same category as the PDS (former Communist Party), and we were even labeled as pigs at times,'' Merkel said.

He denied his party was in danger of being politically sidelined if it refused to soften its tough attitude toward the center-right German Social Union.

The Social Democrat's deputy parliamentary floor leader, Reichard Schneider, said his party wanted to play a role in building a unified country and a free democracy and ''in view of the severe problems of our country we see the need to conduct informal talks with the CDU without further delay.''

But he said the SPD ''would continue to be guided by the desire to take on a joint responsibility for the country.''

On Wednesday, the leaders of the victorious three-party conservative Christian Democrat alliance flew to the West German capital of Bonn for a meeting with Chancellor Helmut Kohl to discuss their next move. Kohl's party openly supported the alliance in the election.

The conservative alliance took 48.15 percent of the vote in, just short of an absolute majority.

The conservatives established contacts with the small East German liberal alliance earlier this week after the SDP rejected suggestions it participate in a broad coalition. A liberal-conservative coalition would still not have the two-thirds majority needed to push through constitutional changes needed to pave the way for unity with West Germany.

The establishment of a new East German government could be further complicated by claims that about 10 percent of the newly elected 400-seat Parliament is comprised of members of the once-feared secret police of the hard-line communist leadership ousted last fall.

Werner Fischer, who heads a commission in charge of dismantling the secret police, known as Stasis, said in an interview published Wednesday by the West German Express daily that Stasis members were probably involved with the Alliance for Germany, the communists and numerous pro-democracy groups.

NEW YORK (MARCH 22) UPI - Latest metal market prices as quoted Thursday

by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.00-73.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 140.00 c-lb.

Lead, common, U.S. primary producers 60.00-65.00 c-lb.; U.S. non-primary (secondary) producers 59.00-60.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.55-$4.90 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $130.00-135.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $496.25-$502.00; dealer-approx., $494.00-$495.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $98.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $99.83 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 298.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 78.00-83.75 c-lb.

#90081u1160 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Moderate Democrats, beginning new effort to move the party to the center and recapture the White House, announced a series of principles Thursday they hoped would convince voters Democrats once again represented mainstream America.

Heading to a three-day New Orleans conference, top members of the

Democratic Leadership Council - a group made up of mostly conservative and moderate party officials - said it was essential the party make a renewed push to change the public's perception that it was too liberal.

''As a child, I was always taught that the middle of the road was a very dangerous place to be because you always get run over,'' said Sen. John Breaux, D-La. ''In politics, I've found that the middle of the road runs right through middle America.''

A main purpose of the set of principles and the New Orleans conference, stressed Sen. Sam Nunn, D-Ga., the head of the group, was to ''stimulate discussion and move our party more and more to the mainstream.''

However, by design, the principles are vague and avoid directly dealing with such sensitive issues as taxes and abortion.

For example, while declaring that government ''should respect individual liberty and stay out of our private lives and personal decisions,'' the document does not mention abortion by name so as not to alienate any segment of the party.

Likewise, the group avoided endorsing higher taxes to cut the deficit, although it did specifically call for a more progressive tax system.

Taxes, however, are expected to be a main topic in New Orleans, where the estimated 900 officials attending the conference will likely debate both the plan from Sen. Daniel Moynihan, D-N.Y., to cut the Social Security tax as well as the far-reaching proposal from Rep. Dan Rostenkowski, D-Ill., to cut the deficit through a combination of spending cuts and tax increases.

Rep. Barbara Kennelly, D-Conn., said she was confident that if average Americans read the principles, they would agree with them and realize that the party moderates ''know what they found they found wrong with us in 1984 and 1988 and how we have resolved'' to change it.

Those principles were also praised by House Speaker Thomas Foley, D-Wash., and Senate Democratic leader George Mitchell of Maine as being acceptable to most party members.

While the moderate party elements are meeting in New Orleans, the Democratic National Committee will be gathered 700 miles to the north in Indianapolis.

There, the committee members - most of whom are not elected officials - plan to change the party's delegate selection rules and act on several resolutions, including one that would endorse a version of Moynihan's Social Security proposal.

A possible flash point in New Orleans could come Saturday during a speech by Jesse Jackson, whose liberal proposals often run directly contrary to the moderates' agenda.

''Jesse Jackson will state his own views,'' said Nunn. ''We feel we need to debate where we differ with him.''

''I don't think one person speaks for black America anymore than one person speaks for white America,'' Nunn added.

To underscore that point, a featured speaker in New Orleans will be Virginia Gov. Douglas Wilder, the first black elected governor, who has become a party favorite by pushing the theme that Democrats need to join a ''new mainstream.''

While Wilder is speaking in New Orleans, his chief political operative, Virginia Democratic Chairman Paul Goldman planned in Indianapolis to push a resolution calling on party members to not bloody the party's 1992 nominee once the primary season is complete.

Although the resolution does not mention Jackson by name, it is directed at the type of behavior he exhibited during the 1984 and 1988 presidential races.

LONDON (MARCH 22) UPI - The government said Thursday Britain's trade deficit for February was $2.24 billion, a $960 million reduction from the previous month largely due to reduced imports.

London's International stock exchange showed its approval of the figures, gaining 17.4 points to 2267.7 by late afternoon on the Financial Times 100 Index. The British pound held steady at $1.5935 after Wednesday's plunge which had reflected disapproval of the 1990 budget.

The Central Statistical Office said about 30 percent of the drop in the trade deficit was due to fewer imports of diamonds and precious stones.

Analysts said the January figure was exceptionally high because of atypical trading patterns, but the February statistics gave a more realistic picture of Britain's trading position.

''The figures are satisfactory without being sensational,'' said John Sheppard, an economist at the S.G. Warburg & Co. Ltd Investment Bank. The deficit figure''actually shows a return to the real trend after the erratic figures in January rather than showing an actual improvement,'' he said.

Geoffrey Dennis, Chief International economist for James Capel Bankers Ltd., said the figures were reassuring, but warned that other economic indicators were gloomy.

''Although there's been an improvement from January, the extrapolated figures for the year show a trade deficit of about 20.5 billion ($33 billion), compared with 20.9 billion ($33.65 billion) for 1989,'' he said. ''It still looks bad.''

#90081u1228 03/22/1990 ~United Press International
WASHINGTON (MARCH 22) UPI - Attorneys for the Justice Department Thursday filed an emergency motion to stay a federal judge's ruling that former thrift regulator M. Danny Wall was appointed unconstitutionally.

The motion, filed in U.S. Court of Appeals for the District of Columbia Circuit, seeks a stay of execution on Wednesday's decision by U.S. District Court Judge Royce Lamberth, that the appointments of Wall and his temporary successor, Salvatore Martoche, were improper.

Government attorneys said the ruling threatens to throw the government's $166 billion thrift bailout into chaos.

Lamberth granted a preliminary injunction prohibiting the Office of Thrift Supervision from taking action against Olympic Savings and Loan Associaiton, of Berwyn, Ill., until a new OTS director is nominated by President Bush and confirmed by the Senate.

Attorneys for Olympic had argued that Wall was not properly appointed to head the OTS because he was never confirmed by the Senate. Government attorneys said the ruling would be devastating to the government's effort to heal the ailing thrift industry.

John Lanigan, Olympic's chief executive officer, hailed the ruling as a ''great decision'' and said it gives his company more time to put together a financing package that will allow the thrift to comply with federal capital standards. Federal regulators had been on the verge of seizing Olympic.

Government attorneys said by ruling in favor of Olympic, Lamberth could open a floodgate for the 200 thrifts seized by the agency to argue that the OTS, Wall and agency employees wre not qualified constitutionally to handle their cases.

Lamberth's decision is related only to Olympic and he said he is not ''closing the door on the OTS'' or invalidating all actions taken by Wall or Martoche.

''Although this may lead to a great deal of litigation and place OTS operations in some confusion, the clear violation of (Olympic's) constitutional rights and the public's interest in protecting the Constitution outweigh these harms to the public interest,'' Lamberth said in his opinion.

The Olympic case has been watched closely by the savings and loan industry.

After Lamberth issued a temporary restraining order against OTS in the Olympic matter earlier this month, Franklin Savings Association, the largest thrift in Kansas, already seized by regulators, sought similar relief.

Attorneys for Imperial Corp., in San Diego, Calif., said late Wednesday they are preparing to file a lawsuit challenging the OTS seizure last month of its thrift operations.

Any disruption in the government's thrift bailout is likely to be short term, although a recently announced plan to speed up the resolution of failed thrifts will probably be slowed, said Bert Ely, a thrift industry consultant.

''My sense is the long-term impact of this is not going to be that great '' Ely said. ''In the short term it causes a lot of grief. It puts things in limbo.''

Hours before Lamberth's ruling was released, the government detailed its plan to accelerate the pace of its thrift resolution program. L. William Seidman, chairman of the Federal Deposit Insurance Corp. said he expects to sell 140 failed thrifts by June 30.

Much of this activity will be slowed, Ely said, until the Senate confirms a permanent head for the OTS, which could take as long as four months.

''Everybody is going to go running into court,'' he said.

The White House has tapped Timothy Ryan, a former Labor Department attorney, to head the OTS pending completion of a background investigation. Ely said Ryan could face a tough time in his Senate confirmation hearings.

''Ryan's nomination will become a political football,'' Ely said. ''It gives the Democrats a chance to embarrass the administration.''

#90081u1267 03/22/1990 ~United Press International
LONDON (MARCH 22) UPI - The pilot of a British Airways Boeing 747 took emergency action last month to avoid an El Al jumbo jet that strayed off course near Iceland, averting a disaster between the two aircraft carrying hundreds of passengers, officials said Thursday.

Officials gave no reason for the delayed announcement of the Feb. 13 incident over international waters south of Iceland, but said an investigation was under way.

Sidur Darson, a civil aviation official in Iceland interviewed by telephone, said the Israeli El Al Boeing 747 strayed about 60 miles off course while cruising at 33,000 feet en route to New York.

The British Airways 747 was on the correct flight path for its destination of Chicago when its pilot saw the El Al jet about to cut across his path, prompting him to take unspecified emergency action, he said.

British aviation officials said the planes came within 650 feet of each other and were both flying at about 500 mph.

A British Airways spokesman said about 200 passengers were aboard the London-based aircraft but that none ''were affected or inconvenienced'' by the measures.

Darson said Icelandic authorities were assisting British and Isreali officials in their inquiries.

#90081u1268 03/22/1990 ~United Press International
WASHINGTON (MARCH 22) UPI - President Bush refused Thursday to step into

abortion debates raging in legislatures nationwide, saying his own position against abortion should not influence what is decided by those now arguing for tougher restrictions.

Bush, talking with reporters on the South Lawn after a tree planting ceremony, made his remark when asked about legislation pending in the Boise, Idaho, state Legislature, where senators were readying to vote on a bill that would give Idaho one of the most restrictive abortion laws in the nation.

''My position, I feel strongly about it and I'm not going to change it,'' Bush said. ''But that matter should be debated out there, as it is being, and those people should decide that - that's what the whole federal system is about.''

Bush, whose position on the controversial question of abortion rights has shifted to a more hard line over the past decade, took the opportunity to reiterate that he is against abortion except in cases of rape, incest or where a mother's life is at stake.

''I have not changed my position at all,'' the president said.

But he clearly refused to back the moves by anti-abortion activists in Idaho and elsewhere, who hope the tougher bills will become a vehicle for the Supreme Court to strike down it's 1973 Roe vs. Wade decision, which declared it is a woman's right to seek an abortion without limits by the government during the first three months of pregnancy.

Last July, the high court gave the states greater authority to restrict abortion, but stopped short of toppling Roe.

Since that time, advocates on both sides have taken to the streets and to the voting booth, and state legislators have rushed to enact new and tougher anti-abortion laws. While some of those lawmakers ran into walls of protest and others lost their jobs in elections, new restrictions have been passed.

Even as Bush spoke, legislators in Annapolis, Md., also were in the throes of a weeklong filibuster concerning legislation to liberalize state abortion laws, allowing abortions in most circumstances.

And in Guam, a bill signed into law Monday by the territorial governor created the most restrictive U.S. abortion statute. It prohibits abortions except when the woman's life is in jeopardy. Victims of rape or incest, regardless of age, could not have an abortion unless their life is at stake.

The high court has two cases pending dealing with the abortion rights of

teenagers, but the cases are on the legal periphery of the issue and the court may be unwilling to use them to overturn Roe.

#90081u1277 03/22/1990 ~United Press International

BELGRADE, YUGOSLAVIA (MARCH 22) UPI - Nearly 400 young ethnic Albanian schoolchildren were stricken with stomach problems in Kosovo province Thursday and riot police intervened to prevent ethnic clashes as rumors spread the students had been poisoned.

Kosovo Prime Minister Jusuf Zejnulahu told reporters in the provincial capital of Pristina, 190 miles south of Belgrade, a team of doctors was trying to ascertain the cause of the ailment.

Dean Alus Gashi of the Pristina Medical Faculty said about 370 youngsters were hospitalized and others were sent home after examination.

''We have taken blood and urine samples to determine the cause of their problems. Teams of doctors from Belgrade arrived to help us,'' Gashi told reporters in Pristina according to Belgrade Radio.

About 1,000 schoolchildren in secondary schools in Podujevo, 20 miles north of Pristina, complained about symptoms similar to poisoning Thursday morning, Kosovo officials said. Teachers and residents mobilized a fleet of automobiles to drive them to Pristina's University Medical Center.

More than 2,000 ethnic Albanians, many of them with their hands raised in ''V'' for victory signs, gathered lined the streets outside the Medical Center as autos drove in from Podujevo. Paramedics waited there with stretchers to rush the ill into clinics.

''None of those taken to the hospital is on the danger list,'' said Zejnulahu.

Emergency measures have been in effect in Kosovo in the past year with troops and tanks along with paramilitary police units patrolling the restive province to maintain peace and order and prevent clashes between ethnic Albanians and Serbians.

Since Jan. 24, more than 30 ethnic Albanians have been killed in clashes with police and more than 300 people, including 130 policemen, have been injured.

In Podujevo, rumors spread among ethnic Albanians that ''somebody poisoned the air in schools,'' and groups of angry Albanians assaulted and beat up at least 15 Serbs, Belgrade Radio said.

Albanians took the beaten Serbs to the police. Another large groups of ethnic Albanians raided the Podujevo Communist Party headquarters breaking furniture and window glasses.

Riot police in the early afternoon dispersed angry ethnic Albanians to prevent further ethnic clashes with Serbs, the radio said.

Kosovo has about 1.7 million ethnic Albanians and 200,000 Serbs, who are a majority in multi-national Yugoslavia of 23 million people. Kosovo is part of Serbia, the largest of Yugoslavia's six republics.

Ethnic Albanians want more autonomy from Serbia.

Pro-democracy groups of ethnic Albanians have urged the Albanian majority to refrain from violent demonstrations and urged communist authorities to open a dialogue. Serbian officials refuse to talk with Kosovo opposition groups, accusing them of ''separatism and terrorism.''

#90081u1292 03/22/1990 ~United Press International
WASHINGTON (MARCH 22) UPI - President Bush reassured Polish Prime Minister Tadeusz Mazowiecki on Poland's role in talks on German unification Thursday, but said ''a nuance of difference'' stands in the way of a treaty securing its borders.

Emerging from the White House after two days of talks with Bush, Mazowiecki expressed confidence that Poland ''will take part in everything that will affect and concern ourselves'' in six-party negotiations on unification.

At the same time, he again insisted on a formal Polish-German treaty - to be initialed before unification and reaffirmed afterward - to guarantee Poland's borders against any future territorial claims by a resurgent

Germany.

Seeking to nail down what he has criticized as ambiguous assurances from German leaders, Mazowiecki said the lone remaining hurdle ''is to persuade both our German partners that it needs to be done swiftly and firmly.''

''We do not see any major reason why that should not happen,'' he said.

Bush, speaking to reporters a short time later, said the border question, rooted in historical suspicions and centering on land Poland acquired from Germany after World War II was a matter for the Poles and Germans to resolve.

''We may have a nuance of difference here,'' he said, ''but that's a matter for the Polish prime minister to discuss with the leaders of Germany and I believe they've come a long way. They are very, very close now - far closer than I think many of us would have predicted.''

Declining to exert public pressure on the Germans, Bush said of the two sides involved in the matter: ''Let them sort it out. It's going well. The mistrust, I think, that you sometimes read about between the parties is down.''

Bush said West German Chancellor Helmut Kohl, who has said the Poles need not fear claims against their territory ''either now or in the future,'' has ''come a long way'' in strengthening that public promise in recent weeks.

Mazowiecki has sought a key role for Poland in the ''two-plus-four'' negotiations on German unification involving East and West Germany and the four wartime Allies: Britain, France, the United States and the Soviet Union.

Poland last week was granted a limited seat at the bargaining table to be present for discussions of its borders. Bush, however, suggested that crucial issue to Poland might be settled outside the two-plus-four framework.

''We don't see this as the group that is going to determine the fate of all of Europe,'' he said.

Mazowiecki told reporters after meeting with Bush that ''there are no problems between us'' on the future presence of Soviet troops in Poland, despite earlier shades of disagreement over how quickly those forces should be removed.

Amid hints from some Polish officials that some of those 40,000 Soviet troops might remain until all security concerns related to Germany were

allayed, Mazowiecki reiterated his commitment to talks ''that will eventually lead to total withdrawal.''

No timetable was set. Nor did Mazowiecki echo the urgency other leaders in Hungary and Czechoslovakia have attached to the swift pullout of Soviet troops, the reminder of more than four decades of Soviet domination. All Soviet troops will be withdrawn from Hungary and Czechoslovakia by the middle of next year under recently signed agreements.

In taking a slower approach than the two other reform-minded Warsaw Pact allies, Mazowiecki indicated there could be a continued Soviet military presence in Poland as unification takes shape and moves toward implementation.

Bush, however, rejected the notion that Soviet troops could help keep Poland secure from a unified Germany.

''There isn't any need for Soviet troops in Eastern Europe,'' the president declared, ''and the sooner they get out of there, the better.''

#90081u1293 03/22/1990 ~United Press International

SPRING HILL, Tenn. (MARCH 22) UPI - The Saturn Corp., the new subsidiary of General Motors, began pilot production Thursday of the subcompact cars announced with great fanfare six years ago as America's answer to the Japanese challenge.

''We just started today. We're trying to make sure that from one end to the other, this process works right,'' Saturn spokeswoman Jennifer Schettler said from the corporation's state-of-the-art $3 billion factory.

Saturn will build 80 pilot cars before beginning commercial production in June or July, she said. GM is to start a teaser advertising campaign in September, open the first Saturn dealership in October and send cars to showrooms in November.

''We're doing great. We're right on schedule. We'll unveil the product in the fall as a 1991 model,'' Schettler said.

Saturn is scheduled to build 240,000 coupes, sedans and station wagons annually priced between $10,000-$12,000 to compete against Japanese imports.

About 2,000 of the eventual 3,000 employees are working at the factory, where Saturn is imitating Japanese automakers by employing the team concept. There are brightly colored cafeterias and fitness centers in each factory building and plans for a swimming pool.

Unlike other auto factories, the 2,400-acre Saturn plant will build entire cars from raw materials to finished product. Engineers will be stationed regularly on the shop floor to be available for questions.

The 80 pilot cars will be taken apart and studied by engineers and plant personnel, said Guy Briggs, vice president of manufacturing operations.

''It's on-the-job training. These won't be sold,'' he said. ''This is a testing procedure. We're using this period to tweak the system and the assembly procedures.''

#90081u1294 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Many government health goals for 1990 will not be reached, largely because the health of minorities and the poor is lagging behind that of other Americans, federal officials reported Thursday.

In its annual report to the president and Congress, the Health and Human Service Department said the nation's overall health is improving, with life expectancy staying at an all-time high of 75 years, infant mortality at a record low and progress continuing against heart disease, stroke and smoking.

But America trails many countries in life expectancy and preventing infant deaths, and is losing ground in other areas, jeopardizing many of the 1990 goals set by the Public Health Service in 1980, the report said.

The life expectancy of black men is falling because of increases in AIDS and homicide, the gap between white and black infant mortality is widening more women are dying from lung cancer, and mumps, measles, asthma, child abuse and sexually transmitted diseases are becoming more prevalent, the report said.

In issuing ''Health United States 1989,'' James Mason, assistant HHS secretary for health, said America's health failures ''have their roots in behavioral and social issues, not just biomedical ones.''

''These include teenage pregnancy, lack of prenatal care, low birth weight sexually transmitted diseases, black male homicide, illicit drug use and traffic fatalities,'' Mason said told a news conference.

On most of those points, there ''has been a failure to move our poor, our disadvantaged people, in the same direction that the majority population is going, and that is a summary of what we are going to have to do in the decade of the '90s.''

HHS Secretary Louis Sullivan stressed that 50 percent to 75 percent of premature deaths are linked to ''lifestyle'' decisions involving violence, drug abuse, smoking, diet, excercise and seat-belt use.

''America's health is good overall, and we are making excellent progress in many areas. But ... we need to do better. In particular, we need to encourage individual good health behaviors,'' he said.

Asked if greater government action is needed to reduce poverty, Sullivan said the ''fighting of poverty is not simply a federal function.''

''We need to emphasize that the best treatment, or cure, for poverty is a job. That means having a healthy economy, and that is also why our president is pushing very hard for capital gains tax reductions,'' Sullivan said.

The 291-page report includes the latest statistics and a triennial ''Prevention Profile'' on the 226 health goals the health service set as a means of ''management by objective,'' Mason said. President Bush is pursuing a similar effort with his education goals, and the heatlh service plans to issue goal later this year for 2000.

When a final report is issued next year on the 1990 goals it will say ''we have achieved or are moving forward'' on 50 percent of them, Mason said.

About a quarter of the goals were unlikely to be met fully, he said, and the rest were either set ''too broadly'' to be measured or could only be assessed on the basis of data that is too costly to collect.

Among the goals that will not be reached is lowering infant mortality to 9.0 deaths per 1,000 live births, Mason said.

Provisional data show the infant mortality rate in 1988 was 9.9, down from 10.1 in 1987, which was 22nd worldwide and about double that of Japan. The black rate in 1987 was 17.9, against 8.6 for whites.

Sullivan said mothers currently are no more likely to receive early prenatal care than they were a decade ago. Black teenagers are less likely to get prenatal care in the first three months of pregnancy, the report said.

The HHS report said life expectancy reached 75 years in 1987 - 71.4 for men and 78.4 for women - and provisional data indicates that was unchanged in 1988. Japan is the world's leader, with life expectancy in 1986 of 75.5 for men and 81.6 for women.

The life expectancy of black men in America dropped in 1988 to 65.1 years,

the report said. For black women it was 73.8.

The report said blacks had a higher rate of premature death for almost all major causes, with the greatest difference in homicide.

In 1987, blacks males ages 15 to 24 were seven times more likely to be victims of homicide than whites. The rate for young black females was four times higher.

Heart disease and cancer remained the first and second leading causes of deaths for Americans. Stroke was the third leading cause of death for women and accidents ranked third for men.

#90081u1301 03/22/1990 ~United Press International

LONDON (MARCH 22) UPI - Stock prices closed slightly higher in moderate trading Thursday on the London International stock exchange boosted by a favorable report on Britain's trade and several strong earnings reports.

The blue-chip Financial Times 100-stock index, which fell 9.4 points Wednesday, closed up 8.6 points at 2,258.9. The narrower top 30 industrial average gained 7.7 points to 1,779.1.

Volume amounted to around 497 million shares, compared with 445 million shares traded Wednesday.

On the economic front, the Central Statistical Office reported Britain's merchandise trade balance was in deficit by $2.24 billion in February on a seasonally adjusted basis, compared with a revised deficit of $3.25 billion in January.

Forecasters were expecting the trade report to show a deficit of around $2.43 billion.

The government agency said about 30 percent of the drop in the trade deficit was due to fewer imports of diamonds and precious stones.

''The figures were satisfactory without being sensational,'' said John Sheppard, an economist at the S.G. Warburg & Co. Ltd Investment Bank. The deficit figure ''actually shows a return to the real trend after the erratic figures in January rather than showing an actual improvement,'' he said.

Geoffrey Dennis, Chief International economist for James Capel Bankers Ltd., said the figures were reassuring, but warned that other economic indicators were gloomy.

Analysts said prices were also boosted by several favorable earnings reports, however, the sharp decline in New York trimmed the gains toward the close.

Among the most widely traded stocks, Cookson, a metals, ceramics and specialty chemicals company, plunged 43 cents to $3.34 after reporting its 1989 pretax profits rose only 2 percent.

RTZ Corp., the mining giant, rose 11 cents to $8.75 after reporting its pretax profits climbed to more than $1 billion.

In a strong breweries sector, Guinness gained 13 cents to $10.85 after reporting higher earnings, Bass gained 20 cents to $14.81, and Whitbread was up 8 cents to $6.08.

Among the day's other highlights, Hepworth eased 5 cents to $4.32, Booker gained 11 cents to $6.81 and United Biscuit added 12 cents to $5.32.

Elsewhere in Europe, prices closed lower in moderate trading on the Frankfurt Stock Exchange.

The German Stock Index fell 19.01 points to 1,918.98.

ALLENTOWN, Pa. (MARCH 22) UPI - Air Products and Chemicals Inc. said Thursday that Frank Ryan resigned as president and chief operating officer because of what a company official said were diffferences with chairman Dexter Baker.

Ryan, 58, also a member of the board of directors, opted for early retirement, effective Wednesday, the company said.

Baker, who is both chairman and chief executive officer, will assume the duties of president.

A company official, who declined to be identified, said, ''Mr. Ryan and Mr. Baker, for some time, have had cultural and philosophical differences regarding the management of Air Products.''

In a statement, Baker said, ''Frank Ryan has had a proud and successful career at Air Products. Over three decades, he has been a significant contributor to the company's impressive sales growth and profitability.''

The company, with headquarters in Allentown, produces industrial gases and specialty chemicals.

In the fiscal year ended last Sept. 30, Air Products posted records for sales and net income. Worldwide sales totaled more than $2.6 billion and net income was $222 million.

NEW YORK (UPI) - Robert W. Pittman has been named president and chief executive officer of Time Warner Enterprises, parent Time Warner Inc. said Thursday.

Reporting to the media conglomerate's co-chairmen and chief executive officers J. Richard Munro and Steven J. Ross, Pittman will be involved in the company's strategic and business development with responsibility for Time Warner Enterprises' entrepreneurial ventures.

Pittman, 46, an executive adviser at Time Warner since last September, worked from 1979 to 1985 at Warner Communications Inc., which has since been acquired by Time Inc. to form Time Warner Inc. During that time, he oversaw the creation of the MTV and VH-1 cable music networks and the Nick at Nite cable channel.

PALO ALTO, Calif. (UPI) - John Zarras has been appointed to the newly created position of vice president-system operations for Emery Worldwide, the Consolidated Freightways Inc. subsidiary announced Thursday.

Zarras, based in Dayton, Ohio, will be responsible for all aircraft, line-haul trucking and three U.S.-based hub operations for Emery, an overnight air-freight company.

He moves up from the position of Emery's vice president-freight operations.

#90081u1332 03/22/1990 ~United Press International

PEMBROKE PINES, FL (MARCH 22) UPI - A billboard near a state mental hospital that tells readers, ''Warning: Crazy People are Coming'' has outraged advocates for the mentally ill, who said the sign is in bad taste.

The bright yellow sign a few yards from the Florida State Hospital in Pembrokes Pines is advertising a new movie.

''I think it's terrible,'' said Ceil Israel, founder and president of Concerned Relatives Alliance for the Mentally Ill. ''It's very inappropriate to be near the hospital grounds.''

The sign advertises ''Crazy People,'' a Paramount picture starring Dudley Moore and Daryl Hannah. Moore stars as an advertising executive who decides to write the truth in ads and ends up in a mental hospital.

The billboard shows a cracked egg with arms that is sticking its thumbs in

its ears and wiggling its fingers.

Officials with Ackerley Communication of Florida, which owns the sign, said they plan to remove the ad.

''I will go down myself and make a change order,'' said Bernie Torra, director of public affairs for Ackerley. ''I think what happened here is an innocent oversight. We will certainly take that down. We're not insensitive.''

#90081u1344 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The Senate Judiciary Committee approved the nomination of Robert Sweet Thursday to head the federal juvenile justice office despite charges that he may want to eliminate its programs.

With the post vacant for 15 months, the committee recommended 9-5 that the Senate approve President Bush's nominee to head the Office for Juvenile Justice and Deliquency Prevention in the Justice Department.

''I am concerned that it is the administration's policy to conintue the policy of the Reagan administration - which is to get rid of the agency,'' said committee Chairman Joseph Biden, D-Del.

''It's a real close call for me,'' Biden said before voting against Sweet.

Three Democrats joined the committee's six Republicans in voting to approve Sweet. The other five Democrats voted against him.

Sweet, if confirmed by the Senate, will find himself in the unusual position of defending Bush's proposed large cuts in the juvenile justice office's budget while Congress tells him he is going to receive millions more than he is requesting.

Bush has proposed only $15 million for the office compared with the $72 million appropriated last year.

Sweet's opponents fear that his nomination is the latest effort in decade-long attempts to kill the office that began in 1981 when President Reagan asked Congress to stop funding the program.

Defending Sweet's commitment to the post, Sen. Gordon Humphrey, R-N.H., said he is ''sincere, decent and dedicated, above all things, to children and youth.''

#90081u1345 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - President Bush said Thursday he expects a date to be set soon for his summit meeting with Soviet President Mikhail Gorbachev in Washington.

Bush discussed the forthcoming summit and future plans to travel abroad at a news conference on the South Lawn following a tree planting ceremony.

White House aides have said they expect the meeting to be held in late June.

Bush said Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze had discussed the forthcoming summit and added, ''We should pin this down soon because you have many other meetings coming up.''

The president cited the North Atlantic Treaty Organization ministerial meeting this spring, the Economic Summit meeting in Houston, July 9-11 and his earlier bilateral meetings with British Prime Minister Margaret Thatcher in Bermuda, April 13-14 and with French President Francois Mitterrand in Florida on April 19.

''So the calendar is getting full on our side and their side,'' he said.

The president is hoping to be able to sign a preliminary Strategic Arms Reduction Treaty cutting in half superpower arsenals of long-range missiles by the time he meets with the Soviet leader.

He also told reporters that the U.S. and the Soviets are ''moving forward'' on talks to reduce conventional forces in Europe. Bush has proposed that both sides slash their troops to 195,000 each with another 30,000 permitted for the United States.

''I want that agreement done by the time I sit down with Mr. Gorbachev,'' he said.

Responding to questions, Bush told reporters that he will not attend the inauguration of President-elect Violeta Chamorra in Nicaragua but hopes to travel to the Central American country ''at some point.''

''We don't want to neglect our friends,'' he said, saying he wanted to travel ''south of the Rio Grande.''

There have been reports that Bush would journey to Latin America in September.

The president also put Australia on his future itinerary, saying he hoped ''to be able to do it before the end of the year.''

Asked if he would go to Australia after the elections, Bush said ''I have no immediate plans, but I've been invited'' by Prime Minister Robert Hawke. I'm dying to do it. The last thing I want to do is interfere in the Australian elections.''

As for whether he would include New Zealand in his Far Eastern swing, Bush said he would have to ''take a look at where things stood at the time'' and indicated that New Zealand's policy barring U.S. nuclear ships from its ports might be a stumbling block.

''We have to see how that evolved,'' he said, adding that ''we have a strong affection for New Zealand'' and that he had visited the country as vice president.

#90081u1360 03/22/1990 ~United Press International

VATICAN CITY (MARCH 22) UPI - The Vatican formally confirmed Thursday that Pope John Paul II will visit Malta May 25-27, setting the seal on restored cordial relations between the Holy See and the Mediterranean island.

A document issued by the Vatican Press Office confirmed the May 25-27 dates for the visit and listed the places the pope will visit in Malta and Gozo, a tiny adjacent island that forms part of the Maltese republic.

The dates for the visit were first announced in Malta Oct. 23 by Malta Archibishop Joseph Mercieca. It will be the first visit by a pope to the island, whose 358,000 inhabitants are more than 90 percent Roman Catholic.

Relations between the Holy See and Malta were severely strained early in the 1980s when the former socialist government of Prime Minister Dom Mintoff insisted that church schools should not charge fees.

The situation was straightened out by the present Nationalist Party government of Prime Minister Eddie Fenech Adami after the Nationalists ousted the Labor Party from power for the first time in 16 years in May 1987 elections.

Before the Malta visit the pope is scheduled to visit Czechoslovakia April 21-22 and Mexico and Curacao May 6-14.

#90081u1367 03/22/1990 ~United Press International

AUSTIN, TX (MARCH 22) UPI - Former Gov. John Connally called a new biography of Lyndon B. Johnson unfair and denied Thursday that either he or the late president urged anyone to ''stuff a ballot box'' to help Johnson win the 1948 Senate race.

Connally, 73, said author Robert Caro's ''The Path to Power'' and the recently published ''Means of Ascent'' are major biographies on Johnson, but he complained that Caro concentrated on LBJ's flaws while ignoring his achievements.

''In every opportunity he's had, he's painted the dark side of President Johnson as opposed to the bright side,'' said Connally, a longtime associate of Johnson and a key figure in his successful Senate campaign 42 years ago.

''President Johnson was a very complex man. Most of the things that Bob Caro says in his book you can't refute specifically because Johnson had some undesirable traits and mannerisms and behavior, but he also had some good ones. Up to now, at least, Caro has not given him credit for the good ones.''

The two books by Caro, which together record Johnson's life up through the 1948 Senate race, are part of a projected four-volume biography on the Texan who succeeded John F. Kennedy to the presidency and left the White House in January 1969.

According to Texas political lore, Johnson defeated Gov. Coke Stevenson in the 1948 Senate race with the help of several hundred mysterious votes in box 13 from a precinct in the Rio Grande Valley.

But in his second volume of the biography, Caro charges that the election was stolen with several thousand bogus votes when it appeared that Stevenson had won.

Connally, speaking to reporters after an appearance before a Texas Senate committee, said he did not know whether the vote was rigged.

''I don't know. You never know until you have an election contest,'' Connally said. ''Now historically and traditionally ... votes in South Texas in those years were in a sense controlled votes.

''Frankly, you know as much about the votes in box 13 as I do. All I know is what I read in the newspapers. I know what I said to those people in the Valley and as far as I know President Johnson said the same thing. We said, 'We want you to get every vote you can possibly get to the polls. This is going to be a close election. We want every vote we can get anywhere in Texas to go to the polls.' That we did say to them, no question about it. We said it in every county in Texas.

''Certainly, none of us told anybody to go and falsify votes or to stuff a ballot box. That's ridiculous. Of course we didn't.''

Connally agreed with other critics who charge that Caro built up Stevenson's reputation to make the alleged theft of the race appear a greater political tragedy.

Caro described Stevenson, who is hardly mentioned in Texas history books, as an ''old-style cowboy knight of the frontier.''

''I think he (Caro) built up Governor Stevenson and did almost everything but beatify him,'' Connally said. ''I have great respect for Governor Stevenson, but I thought Caro's treatment of him went overboard, and I think he did it in order to try to make Johnson look all the worse. I think he used Governor Stevenson as a foil, so to speak, to compare him to Johnson.''

Although he has not read either of Caro's books, Connally called them a major work and ''unquestionably one of the definitive pieces ever written about Johnson.''

#90081u1374 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The Food and Drug Administration expanded its recall of L-tryptophan Thursday to include even small dosages of the dietary supplements, which have been linked to a potentially fatal blood disorder.

''We are confronted with a major public health problem,'' said Health and Human Services Secretary Louis Sullivan in a statement announcing the expanded recall.

''EMS can cripple. It can cause great pain. It can kill. It has had long-term effects on some unfortunate individuals, and some patients are not responding to treatment. I urge everyone to stop taking these supplements immediately,'' he said.

On Nov. 17, the FDA recalled L-tryptophan products designed to be taken in daily doses of at least 100 milligrams after the amino acid was linked to a disorder called eosinophilia-myalgia syndrome, or EMS.

EMS symptoms include severe muscle pain, fatigue, breathing difficulties, cough, skin rashes, swelling of arms and legs, muscle weakness and fever. Some symptoms disappear while others persist or reappear. In some cases, patients have signs of heart failure and paralysis.

The expanded recall includes any dosage and applies to all L-tryptophan products in tablet, capsule, caplet, powdered or liquid form, along with multi-ingredient, non-protein supplements that contain L-tryptophan.

L-tryptophan, which occurs naturally in many foods including milk, has been long used to treat insomnia, premenstrual syndrome, stress reduction and other aliments.

The original recall came after health agencies reported EMS victims had taken L-tryptophan in doses ranging from 150 to 17,000 milligrams a day, the FDA said. Most were consuming 1,000 to 2,000 milligrams daily.

To date, there have been 1,411 cases of EMS reported and 19 deaths and there is at least one EMS case where the individual's intake was reportedly below 100 milligrams, the FDA said.

At the time of the original recall, 287 illnesses and four deaths had been reported.

''These numbers have increased every week since then, and there are now EMS cases in every state,'' Sullivan said. While the rate has slowed dramatically, ''some recent victims have apparently continued using L-tryptophan products since the recall began,'' Sullivan said.

The action follows a reassessment by FDA scientists, who concluded ''the risk of contracting EMS due to the consumption of any dietary L-tryptophan product far outweighs any perceived benefit that may be derived from the continued marketing of this product in any dosage form,'' the FDA said.

Investigators have failed to link EMS to a single lot, brand, manufacturer or supplier of L-tryptophan or identify any chemical or microbial contaminant in L-tryptophan preparations that could be responsible for the outbreak, the FDA said.

The only products not subject to the recall are some protein supplements, infant formulas and special dietary foods, intravenous and oral solutions in which small amounts of L-tryptophan are needed for nutrient fortification. There have been no reported cases of EMS associated with these products.

J.B. Cordaro, president of the Council for Responsible Nutrition, said his trade organization endorsed the FDA action.

#90081u1380 03/22/1990 ~United Press International

WARSAW, POLAND (MARCH 22) UPI - Parliament Thursday dissolved the massive media enterprise that controlled propaganda for 40 years and remained the last stronghold of the former Communist Party following the formation of the Solidarity government.

Polish legislators also voiced their support for the right of Lithuania to

be free and Solidarity leader Lech Walesa called on Hungarians and Romanians to dissolve their disputes in a peaceful way and refrain from violence.

The Sejm, or parliament, voted 279-26 with 41 absentions to dissolve the propoganda machine, known as RSW Prasa. The enterprise controlled 90 percent of 1,500 newspapers in the country, the majority of printing offices and press distribution points.

Some communist deputies said the Solidarity government of Prime Minister Tadeusz Mazowiecki intends to impose his own propaganda monopoly with the dissolution of RSW Prasa.

Andrzej Lapicki, a Solidarity parliamentarian, told the 460-member lower house of the Sejm that ''even American press magnate Hearst did not have so many privilages which RSW Prasa had.''

''It controlled the distribution of paper, collected all incomes and supported with them the (former) Communist Party.

RSW Prasa's income, as well as huge state subsidies, were pumped into the Communist Party, which disbanded itself in late January and assumed the name of the Social Democratic Party. Its membership has dropped from a peak of 2 million to 100,000 people.

Before the law was passed, the Social Democratic Party deputies attacked the Solidarity government for proposing the action without giving them enough time to study the draft.

''The law undermines the credibility of (Prime Minister) Mazowiecki,'' Izabela Sokolowska of the Social Democratic Party said.

Following the vote on Lithuania's right to be free, the deputies stood up and warmly applauded.

''We hope that the right aspirations of Liuthuania will be respected,'' said the resolution of the Sejm, approved by a 297-5 vote. Only 28 deputies abstained.

The resolution was approved one day after Soviet President Mikhail Gorbachev issued his first presidential decree on Lithuania, which announced its secession from the Soviet Union March 11. The decree urged Lithuania to rescind the declaration of independence and directed the Soviet secret police or KGB to tighten the control of the border.

In the northern seaport of Gdansk, Walesa issued a statement urging fueded ethnic Hungarians living in Romania and Romanians to refrain from violence after two days of rioting on Tuesday and Wednesday in the Romanian city of

Tirgu Mures. The violence has left six people dead and 300 wounded.

''We cannot build a united Europe based on violence and intolerence,'' Walesa said. ''I call on two nations to resolve their problems during peaceful negotiations but not in the streets.''

LIMA, PERU (MARCH 22) UPI - Suspected leftists terrorists assassinated a congressional candidate Thursday, the latest in a series of attacks less than three weeks before national elections.

Jose Dhaja del Castillo, a deputy candidate for the ruling Aprista Party, died from wounds suffered in the attack by gunmen believed to be members of the Maoist Shining Path guerrilla group, family members and a nurse said.

The 35-year-old politician was shot four times by the gunmen as he left his home in the city of Huancayo, 130 miles east of Lima. He was taken to a National Police Hospital by his wife but died from his wounds, a hospital nurse said.

Police, citing witnesses, said the attackers fled on foot.

Dhaja is the leading candidate of his party in the race for congressional representative of Junin, a department with nearly 1 million inhabitants.

The shooting is apparently the latest in a string of attacks by the mountain-based terrorist group to disrupt the April 8 elections.

Shining Path guerrillas are believed responsible for the recent killings of four other legislature candidates.

Since the Shining Path carried out its first public armed attack in 1980, some 17,500 people have been killed in political violence.

WASHINGTON (MARCH 22) UPI - President Bush said Thursday he is a part of a peace process.

Speaking at an outdoor news conference, Bush cited Israel's domestic economic problems and the drive for peace talks with the Palestinians as major issues that caused the political schism in Israel.

Bush created a furor in Israel recently when he referred to East Jerusalem

as one of the Israeli occupied terroritories along with the West Bank and the Gaza Strip.

Reporters asked Bush whether he thought his comments had contributed to the collapse of the government of Israeli Prime Minister Yitzhak Shamir and whether they will make the peace process more difficult.

''No, I think a president, when he reiterates the standing policy of the United States government, is doing the correct thing,'' Bush said.

''I do not think it contributed to the fall of the government. These are highly complex internal matters in the state of Israel. That is their ... who emerges, the Likud or Labor (party) is their problem, their right. And I will negotiate and deal openly with whoever and talk freely and openly with whoever emerges as the leader,'' Bush said.

The president said he did not believe he ''made a contribution'' to the collapse ''because I think if you look at the issues, both the domestic economy and the question of the peace talks, that those were the key issues in the campaign.''

Bush said he felt that ''most people in Israel understood that I was simply reiterating a standing United States policy, one that I feel strongly about.''

The United States has refused to recognize Jerusalem as the capital of Israel. East Jerusalem was annexed by Israel following the 1967 Israel-Arab war.

#90081u1397 03/22/1990 ~United Press International

NEW YORK (MARCH 22) UPI - Imelda Marcos, apparently concerned about how she's being portrayed in tabloid cartoons, Thursday took off her cape at her racketeering trial ''so I won't look so fat.''

The former Philippine first lady, on trial with Saudi arms dealer Adnan Khashoggi, took a bit of umbrage at the beefy representation of her physique in a New York Post cartoon.

The cartoon depicted Marcos walking by a shoeshine boy and an associate telling the shoe shiner, ''This may be your lucky day,'' in reference to Marcos's once-huge footwear collection.

As she sat down for the third day of jury selection in her trial, a smiling Marcos, eyeing the cartoon, said, ''I'm taking off my cape so I won't look so fat.''

Marcos, 60, is accused of plotting a $345 million racketeering scheme with her husband to siphon money from her native land's treasury. Prosecutors say Marcos, with Khashoggi's help, transferred more than $160 million from the Philippines and invested it in Manhattan real estate.

Twenty-four people have been selected for a pool of potential jurors to hear the case against Marcos and Khashoggi. A pool of about 60 people must be picked, from which a final panel of 12 jurors and six alternates will be selected to hear the case.

During Thursday's proceedings, an executive with a company that imports tunafish from the Philippines was picked for the pool of potential jurors after it was determined he was not prejudiced toward either side in the case. An A&P executive and a postal worker were also selected for the pool.

The full jury selection process was expected to take three weeks, with the trial continuing through the summer.

Meanwhile, the Daily News reported a government lawyer from the Phillipines said Imelda Marcos wrote President Bush offering to help track down the allegedly hidden fortune of her late husband, Philippine President Ferdinand Marcos, in a bid to ''weasel out'' of her racketeering trial.

Laguatan told the newspaper the former first lady had offered in the letter to cooperate, but only if any money uncovered was turned over to the Philippine poor and if her husband could be buried in the Asian nation.

''It's just another ploy to weasel out of this criminal trial,'' Laguatan told the News. ''She's done similar things in the past.''

Laguatan said Marcos was seeking an out-of-court settlement in the case through Bush. But Marcos lawyer Gerry Spence told the newspaper the letter had nothing to do with the trial and the White House said Bush would not respond.

#90081u1400 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - President and Mrs. Bush staked out opposing positions in a steaming broccoli flap Thursday as a caravan of 10 tons of the vegetable rolled toward the White House.

''I do not like broccoli and I haven't liked it since I was a little kid '' said Bush, who recently banned the sprigs from the presidential plate. ''I am president of the United States and I am not going to eat any more (broccolli).''

The first lady reiterated her love of the high-fiber vegetable, and said, ''If the caravan comes when I am available, I will be out there with open arms.''

The caravan from California growers is expected to arrive this weekend.

Mrs. Bush tried to turn down some of the heat on her husband by deflecting questions on whether the president was setting ''a bad example for children by refusing to eat his broccoli.''

''I am eating his, so don't worry about it,'' the first lady said. ''He ate broccoli until he was 60. Tell them to eat broccoli until they are 60.''

Bush's broccoli ban was disclosed in the current edition of U.S. News & World Report, triggering a tongue-in-cheek controversy at the White House and in the farm fields.

On Tuesday, California growers loaded up a truck with 10 tons of the vegetable and dispatched it to nation's capital. Two crates are to go to the White House, the rest to area soup kitchens and other groups for the needy.

''There there are truckloads of broccoli at this very minute descending on Washington,'' Bush told reporters when the issue arose at his news conference that touched numerous global events - and the vegetable.

''My family is divided,'' he said. ''My mother made me eat it. ... Barbara loves broccoli. She's tried to make me eat it. She eats it all the time herself.''

The president said, ''So she can go out and meet the caravan of broccoli that's coming in from Washington.''

''Thank you,'' he said.

In Guadalupe, Calif., Lisa Cork, marketing manager for Apio Produce, a distributor for 16 growers in the California's Santa Maria Valley, said: ''Our goal is to see if we can get the president to eat broccoli again and like it.''

At a state dinner Wednesday night, Bush described the brouhaha to Polish Prime Minister Tadeusz Mazowiecki, saying he had stated a longtime dislike only to find that ''the broccoli growers of America are up in arms with me.''

As for his wife's repeated efforts to persuade him to eat the vegetable, Bush said, ''Just as Poland had a rebellion against totalitarianism, I'm

rebelling against broccoli and I refuse to give ground.''

Bush insisted he had not banned it from Air Force One, but merely said, ''Don't you dare send me another sprig of this vegetable.'' Others can partake as they please, he said, but well outside his presence.

#90081u1406 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - With its controversial homeless count complete, the Census Bureau kicked the 1990 head count into high gear Thursday as the Postal Service limbered up to deliver forms to more than 90 million homes across the nation.

Census officials said the $2.6 billion effort is expected to find about 250 million people living in the United States on Census Day - officially April 1 - and 106 million housing units, 94 million of them occupied and 12 million vacant.

On Friday, the Postal Service will begin in earnest to deliver some 95 million census forms - including some 1 million in Puerto Rico - and Postmaster General Anthony Frank said he expects nearly all will be delivered by Tuesday.

''This joint effort is a especially appropriate because the role of both the Postal Service and the Bureau of the Census is to reach out to the American people,'' Frank said Thursday. ''We provide the means to deliver (mail) to every community and we ensure the confidentiality that is so vital to the census effort.''

Census Bureau Director Barbara Bryant said she expects the bicentennial census - the first national nose count was in 1790 - to be ''the best and most accurate census in history.''

The once-a-decade census is taken in two forms. About five of every six households will receive a short questionnaire and the others get a longer, 68-question form.

The short form asks such basic questions as age, marital status and race of people at the address and whether the housing unit is owner-occupied or rented. The more detailed form asks about about ancestry, employment, education, income, housing size and amenities such as bathrooms and telephones, automobile ownership and whether languages other than English are spoken at home.

Its first and most immediate impact will be felt early next year after the bureau's Dec. 31 delivery to the president of the population numbers that will be used to reapportion the 435 House seats.

As many as 18 states stand to gain or lose members of Congress as a result of the census and the population shift since 1980 that it will document. The numbers also will eventually affect state legislative districts.

In addition, census figures are used to allocate federal money for education, health and welfare programs at the state and local level.

The money and power at stake make every census controversial and this year's is no different, especially among cities and groups who fear minorities, the poor, and illegal immigrants will be undercounted, thus denying them representation and funds for assistance.

New York City has already announced its intention to sue and other cities, along with the U.S. Conference of Mayors, are considering similar action.

Census bureau officials and other experts estimate there was a 1 percent undercount in 1980 but among minority populations the undercount ran 6 percent or more.

The problems of counting everyone, especially those living on the margins of American society, were underscored by the bureau's unprecedented effort Tuesday to count the homeless.

While census officials pronounced the special project a success, they also acknowledged it missed some, perhaps many, of the homeless. Critics said that whatever numbers are published in late 1991 will be used to cut assistance programs.

The massive scope of the census effort is underscored in the Postal Service's relatively small, but not insignificant, piece of the action.

In addition to delivering the forms, the service also is reviewing the Census Bureau's mailing list, checking some 81.5 million addresses in 19,000 ZIP code areas.

Census is paying the Postal Service $71 million for its work.

Postal and census officials said they expect 70 million of the confidential questionnaires will be returned in the two weeks around April 1.

Housing units not returning forms will be visited by census takers beginning in April and officials said they expect all field work completed by October.

#90081u1413 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Ronald Reagan completed his videotaped testimony Thursday at John Poindexter's Iran-Contra trial, insisting he remembered very little about the worst scandal of his presidency.

The jury heard Reagan - whose familiar face was displayed on five television monitors in the courtroom - testify for eight hours over two days.

The former president often looked befuddled, but said he always told his aides to obey the law.

Poindexter's lawyer, Richard Beckler, said former attorney general Edwin Meese would be one of his next witnesses.

During the final portions of Reagan's videotaped testimony, Poindexter was joined in court by his wife, Linda, an Episcopal priest, and one of Poindexter's five sons - Mark, a 26-year-old Navy lieutenant. Poindexter hugged his son, who was wearing a uniform, during a recess.

Poindexter, 53, is accused of five counts of lying to Congress and obstructing its investigation of the scandal.

Reagan said at least 124 times that he could not remember key events about the scandal. The former president's testimony did not appear to bolster Poindexter's case.

Reagan said he still is not certain that money from secret U.S. arms sales to Iran was diverted to aid the Nicaraguan Contras. Reagan made the claim even after seeing a copy of his own Tower Commission report that made that conclusion in its official report in February 1987.

Reagan knew of the diversion even earlier, however - on Nov. 25, 1986, when Reagan appeared with Meese at a nationally televised news conference. Reagan made the opening remarks and then Meese dropped the bombshell - he had found a document showing that arms sales profits were transferred to the Contras.

Despite that, however, Reagan insisted that if he had known about the diversion, ''I would have given it back.'' He referred to the money created by charging inflated prices for missiles sold to the Iranians.

Special Iran-Contra prosecutor Dan Webb repeatedly showed Reagan clear explanations of the diversion from the Tower Commission report, stressing it was Reagan's own commission.

''This report - this is the first time that I have ever seen a reference that actually specified there was a diversion,'' Reagan responded.

Referring to Poindexter, Webb asked: ''My question is: If he knew about it you would have expected him to tell you about it. Is that correct?''

Reagan responded: ''Yes. Unless maybe he thought he was protecting me from something.'' Referring to the Tower report, Reagan added: ''But, no, I don't understand. This is very confusing to me about this.''

Webb also asked Reagan: ''Sir, my question to you is this: At any time in November of 1986, did you ever authorize or approve John Poindexter to make any false statements to any congressional committee concerning the Iranian initiative?''

Reagan: ''No, I would not and I did not.''

The jurors watched Webb's rapid-fire questioning of Reagan and one panelist smirked openly at Reagan's vague answers and inability to recall.

Reagan insisted he knew nothing about key parts of the scandal that rocked the final two years of his presidency. He also said he never ordered aides to lie, nor did he authorize the destruction or shredding of White House documents.

The seven hours and 40 minutes of testimony was recorded in Los Angeles on Feb. 16 and 17. While a transcript had been released, the videotapes had never been broadcast until Wednesday and Thursday.

#90081u1426 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - President Bush began a national tree planting campaign Thursday by planting a redbud on the South Lawn of the White House.

Bush planted an Eastern Redbud Tree on the lawn to start the campaign, which has a goal of 1 billion trees planted a year.

The American Association of Nurserymen donated the tree, which is approximately 25 years old and 14 feet tall. It was selected by first lady Barbara Bush to complement another redbud planted elsewhere on the grounds.

There are about 500 trees, some of which date back to one planted by President John Quincy Adams in 1826, and 4,000 shrubs on the White House grounds.

The Bushes used gold shovels to fill in the hole around the tree with dirt and invited several members of Congress to do the same.

Also at the ceremony where the Bushes' spaniel, Millie, had free reign, the president signed a proposal to Congress for The National Tree Trust Act of 1990 to establish a program of tree planting in urban and rural areas with a one-time grant of $175 million for a non-profit foundation to promote community participation through private sources.

''A tree planted today can enrich the lives of generations yet unborn,'' Bush told the gathering on the South Lawn.

#90081u1458 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The State Department said Thursday it is concerned that some SS-23 missiles - a class of weapon that was to have been destroyed in a U.S.-Soviet treaty - are in the hands of East German and Czechoslovak military forces.

State Department spokesman Richard Boucher said that if the missiles had been transferred after the December 1987 Intermediate-range Nuclear Forces treaty was signed, it would be a violation of the accord by the Soviets.

A senior administration official, talking to United Press International on the basis of no further identification, said the Soviets have informed the United States the transfer took place before the INF treaty went into effect.

But the fact that the Soviets did not mention that the intermediate-range missiles had been transferred is regarded by State Department officials as a puzzling omission on the part of the Soviets, suggesting that they had bargained in something less than good faith.

One theory being examined by the State Department, according to officials, is that the missiles were transferred to other Warsaw Pact forces by Soviet military high command as a ''parking place'' for such weapons, should they ever be required in the future by the Soviets.

The State Department official said that no nuclear warheads were apparently involved in the transfer.

The INF treaty was designed to destroy the whole class of missiles with a range between 600 and 3,000 miles.

Boucher said the United States has asked the Soviet Union for explanations and asked other Warsaw Pact countries if they have received INF class missiles from the Soviets.

Both Czecholosovkia and East Germany, since the virtual break-up of the Warsaw Pact military bloc, have announced that they were given SS-23

missiles by the Soviets.

Boucher said the United States regards the issue as ''a serious matter'' and the Soviets have been asked to explain the reasons for the transfer and the exact timing.

In another INF development, Boucher said that another dispute, involving the American use of industrial X-ray machines at a Soviet missile factory in the Urals, has been settled.

The Soviets at first refused to allow the machines to be used to X-ray missile cannisters leaving the factory. Technical experts were sent to the area and worked out details, Boucher said.

He said that a missile cannister was successfully X-rayed Wednesday and the incident appears to have been settled.

The United States insisted on the X-ray process because the factory, which formerly manufactured SS-20 INF missiles, also makes SS-25 strategic-range missiles. The cannisters for both weapons are identical, and the X-ray would reveal any violation of the treaty banning further manufacture of SS-20s.

#90081u1463 03/22/1990 ~United Press International

(MARCH 22) UPI - A Colombian presidential candidate was shot and critically wounded today. A spokesman for the leftist Patriotic Union Party say two gunmen shot presidential candidate Bernardo Jaramillo in the chest at the airport in Bogota. The spokesman says one of the gunmen was wounded by the candidate's bodyguards. News reports say the second gunman was arrested. An aide to Jaramillo says he is hospitalized in ''grave condition.''

Snipers fired on two Greyhound buses near St. Louis early this morning. NO injuries are reported in the shootings... the 16th and 17th incidents of gunfire directed at Greyhound buses since a nation-wide strike began March 2nd. The latest shooting took place in Illinois, about 15 miles east of of St. Louis. The bus driver told police a vehicle occupied by two people pulled alongside the bus and four or five shots were fired. Earlier, a bus south of St. Louis was hit by three bullets.

Secretary of State Baker met with several black leaders in Cape Town today. A black leader who went to prison with Nelson Mandela urged Baker NOT to ease pressure on South Africa until the white minority government dismantles apartheid in a way that the racial separation policies canNOT be restored. Baker is to meet with President Frederick de Klerk later today.

Jurors in John Poindexter's Iran-Contra trial will see more videotaped testimony from former President Reagan today. In videos played yesterday, Reagan was adamant in saying he did NOT know anything about key parts of the Iran-Contra scandal. The former president also said he never ordered his aides to lie or to destroy White House documents.

Jury selection for the New York trial of former Philippine first lady Imelda Marcos will resume today. She will stand trial with Saudi Arabian financier Adnan Khashoggi. Mrs. Marcos and her late husband were accused of plotting to siphon 345-Million dollars from the Philippine treasury. Prosecutors say Khashoggi helped them invest in Manhattan real estate.

#90081u1470 03/22/1990 ~United Press International

JERUSALEM (MARCH 22) UPI - Israeli soldiers killed two Palestinians who refused orders to halt and captured two others Thursday in Nablus, the West Bank town where the notorious Black Panther gang operates, the military said.

One of those captured was a member of the Black Panther gang, whose leader and three other gang members were killed in a December shooting in a Nablus barbershop, an army spokesman said. Palestinian sources said one of those slain Thursday also was believed to be a Black Panther.

The army has pledged to crush the group, said by the military to be responsible for the brutal slayings of at least 16 suspected Palestinian collaborators. Within days of the December slayings, however, the gang vowed to continue its campaign against informers.

The slayings occurred as Israel's Labor Party continued its effort to form a coalition, meeting Thursday with the three ultra-Orthodox religious parties that hold the key to resolving the present government crisis.

Labor Party leader Shimon Peres, who Tuesday was given responsibility to try to form a new government, said the differences between the religious, center and left-wing parties could be overcome to form a coalition.

''There is no doubt we can form a common camp on the diplomatic and religious issues between the different stands,'' Peres told Army Radio.

The government of Prime Minister Yitzhak Shamir, leader of the right-wing Likud Party, fell last week in a no-confidence vote spurred by his refusal to accept the peace proposal of U.S. Secretary of State James Baker. Two days before the vote, Shamir fired Peres from Cabinet, prompting the resignations of the other Labor Cabinet ministers and triggering the collapse of the Likud-Labor ''national unity'' coalition.

Shortly after Thursday's slayings in the Nablus Casbah, demonstrations erupted and at least one Arab was shot and wounded by Israeli soldiers, Palestinian sources said.

The military clamped curfews on Nablus and the surrounding refugee camps. In the Israeli-occupied Gaza Strip, at least eight Palestinians were shot and wounded during clashes with Israeli troops, Palestinian sources said.

Differing versions of Thursday's shooting in the Nablus Casbah emerged from Palestinian and military reports. The military said a patrol of Israeli soldiers confronted two suspects who refused to heed warning calls to halt.

One of the suspects ''appeared to be holding'' a grenade, which soldiers later found, while the other tried to attack the soldiers who opened fire, an army spokesman said. In subsequent searches, the military confronted and captured two additional suspects and confiscated a 9mm pistol.

Palestinian sources said the slain Palestinians were shot by soldiers in

civilian dress who ordered them to stop. Ibrahim Abu Ghadaib, 19, was shot after he stopped and raised his hands, Palestinian sources said, but the report could not be independently confirmed. The army said it had not positively identified Ghadaib.

The second slain Palestinian, Nasser Ka'nir, 28, had been sought by the security forces for ''a long list of attacks'' against suspected Palestinian collaborators, including a November 1989 slaying, an army spokesman said. Ka'nir also was suspected of planning to kidnap an Israeli soldier and attack Israeli public figures, the spokesman said.

While the army spokesman said the two slain Palestinians were not members of the Black Panther, Palestinian sources said residents believed Ka'nir was a Black Panther member.

One of the captured Palestinians also was a gang member allegedly involved in the murders of seven suspected collaborators, the army spokesman said.

Before the December shootout, the Black Panther had become one of the most notorious ''shock committees,'' which enforce general strikes and punish suspected informers in the Israeli-occupied West Bank and Gaza Strip.

At the time of the December slayings, the military said the gang was responsible for dozens of attacks on Palestinian residents, including the killing of 16 Arabs. The gang also attacked army outposts and patrols, the army said.

At least 647 Palestinians have been killed by Israeli soldiers or civilians in the 27-month-old Palestinian uprising. Another 200 have been killed by other Arabs who suspected them of collaboration or immoral behavior.

#90081u1509 03/22/1990 ~United Press International

MANAGUA, NICARAGUA (MARCH 22) UPI - The highest-ranking U.S. delegation to visit Nicaragua in nearly a decade arrived Thursday to discuss the resumption of U.S. aid in the wake of President-elect Violeta Chamorro's Feb. 25 election victory.

The team, headed by Under Secretary of State for Latin American Affairs Joe Sullivan, is making the highest-level official U.S. visit since the early 1980s, when former President Ronald Reagan began a campaign to isolate and undermine the ruling Sandinista National Liberation Front.

U.S.-Nicaraguan relations warmed up considerably after Chamorro's victory over President Daniel Ortega last month and after Ortega agreed to abide by the results.

President Bush lifted a long-standing U.S. economic embargo against Nicaragua and asked Congress to approve $300 million in emergency economic aid to the government, saying Washington needs to support the trend towards democracy in Central America.

Vice President Dan Quayle met Ortega in Chile and Brazil last week.

Sullivan and representatives of the Treasury Department and the Agency for International Development were scheduled to meet with officials of both Ortega's lame-duck government and Chamorro's incoming team during a two-and-a-half-day visit, Lee Johnson, a U.S. Embassy official in Managua, said.

Johnson said the Sullivan team wanted to get ''an on-site look'' at Nicaragua's aid needs in order ''to help shape the aid package proposed by President Bush.''

Chamorro's economic advisers have said Nicaragua needs at least $300 million in emergency aid this year in addition to $500 million to $600 million it would need to balance its accounts. The new government is also seeking aid from Europe and Japan.

Ortega has vowed to help in the search for desperately needed foreign aid, and the official Sandinista newspaper Barricada said Thursday that Sullivan's visit was in response to an invitation by Ortega last month.

''President Ortega's purpose in all these cases, including the visit of the North American functionaries, has been to obtain and get aid for Nicaragua and Nicaraguans, regardless of their political colors, ideological beliefs or social situation,'' Barricada said in an editorial. ''That is, a position completely opposed to that of COSEP and other extremist sectors during the Sandinista administration.''

COSEP is the Spanish acronym for the Private Council of Business Enterprise, a businessmen's group that is supporting Chamorro's government.

(MARCH 22) UPI - TODAY'S PEOPLE

THE COSBY SHOW: Just how much is Bill Cosby worth? Cosby and the Carsey-WernerCo., which produces ''The Cosby Show,'' asked NBC for a mind-boggling $100 million signing bonus to renew his highly rated sitcom for another season, says the Los Angeles Times. Sources say the producers also hired a consultant to estimate the network's profits on ''Cosby'' since it hit the air in 1984. ''It was a stickup,'' one network executive

said. Both sides since have made counter-proposals. Both NBC Entertainment chief Brandon Tartikoff and a spokesman for Carsey-Werner declined to discuss the negotiations other than Tartikoff's comment that a final agreement has not been reached and that money, of course, is the main sticking point.

MICHENER'S MONEY TO MIAMI: James Michener likes the University of Miami so much that he's giving the school $1 million. Michener, who has lived in the area for three years while writing ''Caribbean'' and teaching at the university, made the donation for a writing program for graduate students. The Pulitzer Prize-winning author asked that special consideration be given to students from the Caribbean. ''We are grateful for Mr. Michener's splendid generosity,'' said Edward T. Foote, university president. ''His commitment will support and inspire aspiring young writers who share his sense of adventure and love of creative writing. We are genuinely honored that the great name of Michener will forever be associated with literature at the University of Miami.''

ICEMAN CHILLS THE COMPETITION: Jerry ''The Iceman'' Butler is as big a hit in Chicago politics as he was a singer. Butler, whose biggest hit was ''For Your Precious Love,'' led the crowded field in the Democratic primary for Cook County commissioner, pulling in almost 223,000 votes to make him a sure bet for re-election in the November general election.

BALLET BONANZA: Spanish dance star Trinidad Sevillano and France's Patrick Armand are leaving the London Festival Ballet to join the Boston Ballet Company. The two new principal dancers will make their Boston debut when the company unveils its historic Soviet-American collaboration of Swan Lake this May at the Wang Center. Five Soviet dancers, Nina Ananiashvili and Alexei Fedeyechev of the Bolshoi Ballet and Konstantin Zaklinsky, Tatyana Terekhova, and Yulia Makhalina of the Kirov will pair up with American dancers in ''Swan Lake'' lead roles May 2-20.

GLIMPSES: Oliver North has a new platform. The former Marine, convicted for his role in the Iran-Contra scandal, was honored in Washington Wednesday night with a roast thrown by the conservative Media Research Center and announced that he will head the new Freedom Alliance to take on such problems as drugs, teenage pregnancy and divorce. The roast featured speeches by conservative activists and telegrams from Richard Nixon, Phyllis Diller and Bob Hope ... Tony Orlando, sans Dawn, now has a star on

the Hollywood Walk of Fame. The singer of ''Tie a Yellow Ribbon'' was joined by his mother, father, Jerry Lewis and some 300 fans for the unveiling Wednesday. ''Through the years, it has been difficult to look over this field of dreams,'' Orlando said as he pointed to the famous boulevard. ''Today, my dreams ... are fulfilled by getting a star on Hollywood Boulevard. There are a lot of people who sing better, dance better, tell better jokes. I'm fortunate to be here.''

#90081u1530 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The head of the Commodity Futures Trading Commission warned Thursday that suggestions to narrow its duties could weaken the agency's ability to regulate agricultural commodities.

The CFTC, which was created as the federal watchdog of the futures industry, is up for legislative reauthorization.

Critics fault the CFTC as a lax enforcer and there have been suggestions to abolish the CFTC, merge it with the Securities and Exchange Commission, which oversees stocks and bonds, or to give the SEC control of the stock index futures now regulated by the CFTC.

''The agency would be weakened in our ability to oversee the agricultural markets'' if index futures were transferred to another agency, CFTC chairman Wendy Gramm told a House Appropriations subcommittee.

''It would weaken the agency's staff. The question is one of expertise in the agency.''

The White House has requested a 21 percent increase in the CFTC budget for fiscal 1991, raising it to nearly $45 million. Gramm said the money is needed to upgrade computer equipment and to hire more workers to monitor traders.

Appropriations Chairman Jamie Whitten, D-Miss., expressed skepticism about the value of allocating more money, in view of events such as the disclosure last year of a long-running FBI investigation at the nation's two largest exchanges.

''It just looks like we've had a bad system for some seven years,'' Whitten said. ''It looks like we need to make some changes in method.''

Gramm pointed to newly issued rules to make it harder to cheat on trading records and the decision to devote more staff workers to floor surveillance of trading. The agency also is tightening its recordkeeping rules and seeking more authority to revoke the registration of traders who violate rules.

#90081u1571 03/22/1990 ~United Press International

TOLEDO, OH (MARCH 22) UPI - The Chrysler Corp. considers the Jeep Cherokee and its cousin, the Waggoneer, a success story that improves with each annual chapter.

The one millionth XJ Jeep in the model's seven-year history was driven off the line at the Toledo Assembly Plant Thursday morning amid employee applause, camera lights and a speech.

When introduced to dealers in June 1983, Chrysler planned to sell 40,000 XJ's a year.

Last year the plant shipped 160,000 Cherokees and Wagoneers, making it the most successful line in the 49-year history of Jeep vehicles.

But some of the shine Jeep put on the XJ will be dulled next month when Chrysler begins laying off several hundred workers, a move attributed to slowing sales due to increased competition and softer overall sales.

Ron Conrad, chairman of the United Auto Workers' Jeep unit, said Chrysler's success with the XJ should provide some assurance that Chrysler will keep the plant open beyond the commitment of 1992, when the labor contract expires.

''It's a great thing for the people here,'' said Conrad, who joined Marvin R. Levine, the Jeep-Eagle Division's general manager, in driving the $26,000 Cherokee in front of workers and television cameras.

At Toledo, where Chrysler's every blink is scrutinized for an indication of the company's plan for the aging plant, the XJ milestone was a positive sign.

''The company wouldn't be making such a big deal out of this thing if they thought they were going to close this place in a couple of years,'' said Conrad.

The union's Jeep chairman also expressed confidence Chrysler would choose Toledo as the assembly site for its planned JJ line.

''I'm confident because we made them money. I'm confident because that proves to Chrysler that the workers build quality products.''

Levine, however, was non-committal about Chrysler's plans for building the JJ, other than saying a decision was expected in 60 days. But he said the success with the Cherokee line could have some bearing on the decision.

''Without a doubt,'' Levine said. ''It's a real success story for Toledo and the workers.''

The Chrysler executive reiterated Chrysler's pledge to keep Toledo open for as long as Jeeps sell well.

''As long as consumers keep buying them in the numbers, the Cherokees will be the line in the distant future,'' Levine said.

Chrysler will be opening a new plant in Detroit by late 1991 that will build the Jeep ZJ model, which is a more modern version of the current Cherokee.

Last year, Chrysler made 1,015 XJ's a day during two nine-hour shifts to keep up with demand. The pace has slackened this year to 975 Jeeps daily. The assembly plant employs 5,317 hourly workers and 536 salaried employees.

The Cherokee with serial number 1J4FJ78L6LL238835 was given a final inspection before heading toward an unnamed California Jeep-Eagle dealer who purchased it.

#90081u1585 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The administration objected Thursday to a House bill raising the Environmental Protection Agency to Cabinet level, citing provisions in the measure to ensure an independent new Bureau of Environmental Statistics.

The adminstration expressed its opposition to the legislation in an official policy statement sent to Capitol Hill. It was released by House Democratic leader Richard Gephardt of Missouri, who voiced dismay over the White House's position.

''The White House has today informed the Congress that it cannot accept our legislation to raise the Environmental Protection Agency to Cabinet-level status,'' Gephardt said in a statement. ''I deeply regret

the administration's position on this issue.''

Gephardt's decision to release the memo further escalated the feud between Gephardt and President Bush, who took offense over remarks by the Missouri Democrat accusing him of timid, unimaginative leadership.

In its memo, the administration objected to provisions that seek to guarantee that the Bureau of Environmental Statistics created by the House bill would remain independent of the EPA or White House control.

Lawmakers said the bureau must be fully independent if it is to be regarded by Americans as an objective, unbiased source of information about the state of the environment.

The memo, issued by the White House Office of Management and Budget, said the administration strongly supported the elevation of the EPA from an indepedent agency to a Cabinet-level Department of Environmental Protection.

But the administration said the House legislation to achieve that goal contained ''highly objectionable provisions'' that would interfere with the president's authority to manage environmental policy-making.

''These provisions, which concern the new Bureau of Environmental Statistics, raise serious constitutional concerns and severely restrict executive branch oversight of the new bureau,'' the memo said.

''Unless these provisions are deleted or modified satisfactorily, the president's senior advisers, including the administrator of the Environmental Protection Agency and the attorney general, would recommend the bill be vetoed,'' it added.

The memo raised specific objections to provisions that would:

-Require the EPA to turn over to the Bureau of Environmental Statistics all responsibility for the collection and public release of environmental information.

-Prohibit EPA officials from seeking to control the bureau's efforts to collect, analyze and disseminate information. Executive branch officials would be barred from reviewing the substance of any bureau studies or reports.

-Limit the circumstances under which the director of the bureau could be fired.

The administration also objected to provisions requiring ''broad disclosure'' of the information the bureau collects.

''The administration strongly objects to this disclosure requirement and the absence of effective confidentiality safeguards for data to be collected by the bureau,'' the memo said.

''Without such safeguards it will be impossible for the bureau to collect the objective, high-quality data needed to analyze and describe the state of the environment.''

The administration also suggested the director of the bureau be a presidential appointee, not a career civil servant.

Lawmakers maintain all of the disputed provisions are necessary to ensure that EPA or White House officials cannot pressure the bureau into issuing only that information that conforms with administration environmental policies.

''It would be a sham and a shame to place another chair around the Cabinet table with a law that places a gag on the department's ability to protect the environment in an effective and non-partisan way,'' Gephardt said.

The administration policy statement did not comment on Senate legislation to elevate the EPA. The administration has expressed support for a bill recently reported out of the Senate Governmental Affairs Committee. That bill also creates a Bureau of Environmental Statistics.

#90081u1600 03/22/1990 ~United Press International
CHICAGO (MARCH 22) UPI - The grain supply agreement with the Soviet Union failed to have much of an impact on grain prices Thursday.

Grain and soybean futures were narrowly mixed at the close on the Chicago Board of Trade.

The new five-year agreement calls for the Soviets to buy a minimum of 10 million tons of U.S. wheat, feed grains and soybeans each year, 1 million tons more than under the current pact which expires in December.

While trade groups were happy with the news, the futures market was relatively quiet.

Soybeans continued to be supported by spillover from soybean meal. Active trading of meal and higher prices in Europe contributed to the strength in the meal. May soymeal was at its highest level in several weeks.

Corn rallied on short-covering and was higher across the board, but met limited resistance at the highs. Commercials were featured buyers.

Wheat was pressured by the lack of buyers and the absence of export

business.

Gains across the floor were limited by rain in some areas of the Midwest and predictions of more rain the rest of the week.

At the close, corn was up 1/2 to 1 1/2, soybeans up 2 3/4 to off 1/2, wheat off 1/2 to 1 1/2 and oats up 3/4 to 1.

#90081u1606 03/22/1990 ~United Press International

TIRGU MURES, ROMANIA (MARCH 22) UPI - Troops and tanks guarded the main square of Tirgu Mures Thursday, but life appeared to be returning to normal after two days of ethnic rioting that shook the Transylvania city.

Shoppers lined up to buy fresh bread as bakeries reopened for the first time in several days, and a number of stores also opened for business.

Clusters of ethnic Hungarians and Romanians continued to mill around the central square under the watchful eyes of government troops, but there were no reports of new violence.

The Hungarian news agency MTI said many Hungarians stayed off the job in a general strike affecting three Transylvanian counties. The Romanian news agency Rompres said other workers showed up at factories wearing arm bands.

The interim government revised downward the official death toll from Tuesday's ethnic clashes, saying three people were killed, not six as reported Wednesday.

''Two died in clashes and one was hit by a car on the city outskirts,'' Rompres said. It said 298 people were wounded, included 36 who remained hospitalized.

Thirty-eight people were arrested for their part in storming the headquarters of Tirgu Mures offices of the Hungarian Democratic Union on Monday, the incident that triggered Romania's worst ethnic unrest since World War II.

In an effort to ease tensions, the government brought together leaders of the Hungarian and Romanian communities in Tirgu Mures for talks on the root causes of the inter-ethnic conflict and what steps could be taken to end the unrest.

Relations between the governments of Hungary and Romania remained strained however. Budapest has sharply criticized the provisional government in Bucharest for failing to act sooner to stop what it described as a ''pogrom,'' or systematic persecution, against the Hungarian minority.

Budapest has appealed to the United Nations and various other international organizations to pressure Bucharest into reining in Romanian ultra-nationalists.

Hungary has also responded coolly to Romania's call for bilateral talks on the issue.

''So long as (Prime Minister) Petre Roman's government fails to guarantee legal order, there is no sense holding separate Hungarian-Romanian talks '' the Hungarian Foreign Ministry said in a statement carried by the official MTI news agency.

''The Hungarian government is prepared to settle relations, but for this, the Romanian side should create the conditions of civilized, legal order '' the statement said.

Wednesday, the provisional government moved to quell the unrest by acceding to several controversial demands by the country's 2 million ethnic Hungarians.

Deputy Prime Minister Gelu Voican, speaking to about 1,000 ethnic Hungarians in Tirgu Mures Wednesday night, promised separate schools for the minority along with street signs and newspapers in the Hungarian language. But some city residents predicted the concessions would anger Romanian nationalists and trigger more violence.

Army tanks rolled into Tirgu Mures, an industrial and cultural center in the picturesque upper Mures Valley about 200 miles northwest of Bucharest, on Tuesday following clashes between rival groups of demonstrators who battled with iron bars, axes and clubs.

The violence followed a week of escalating tension over Hungarian demands for cultural autonomy in Transylvania, where most of Romania's ethnic Hungarians live. The province, which borders Hungary, has seen a resurgence of nationalism since the December revolution that toppled communist dictator Nicolae Ceausescu and ended a decades-old policy of forced assimilation.

#90081u1611 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - The Bush administration appeared to change course Thursday on the idea of bipartisan budget negotiations with Congress, edging toward talks before the House and Senate pass budget resolutions sometime in April.

Although President Bush and his budget director, Richard Darman, said last

week they did not want to open talks with Congress until after both chambers approved fiscal 1991 budget frameworks, Darman hinted otherwise Thursday.

The resolutions, due by April 15, will lay out the budget priorities of Congress's Democratic majority. President Bush presented his 1991 $1.233 trillion budget proposal Jan. 29. Democrats generally want to see less military spending and more for social programs that Bush has sought.

The question of when a budget summit might start arose after Rep. Dan Rostenkowski, D-Ill., proposed a broad deficit reduction plan March 11.

It included new consumption taxes, higher income taxes on the wealthiest Americans, spending cuts, a one-year freeze in cost of living increases for Social Security and other federal retirement beneficiaries and deep Pentagon cuts.

Bush greeted the Rostenkowski plan with unexpected warmth, saying it was a good starting point for talks even though the administration opposes most of the specifics.

But because Rostenkowski was acting alone, Bush said he did not want to begin budget talks until Congress passed its budget resolutions.

But Darman, talking with reporters Thursday, appeared to embrace an earlier budget summit.

Following a meeting with about 20 members of the Senate's bipartisan Deficit Reduction Caucus, Darman said he detected ''frustration'' with the normal budget process.

''I do not believe that a serious deficit reduction package can be put together on anything other than a bipartisan basis,'' Darman said. ''I don't believe it will be possible politically.''

Darman said he thinks ''a large group'' of senators believes ''there's got to be something that's different from the normal process in order to get something serious done'' on the nagging deficit.

''There's a worry that if we just follow the normal process we'll end up with an extremely modest solution that really isn't a solution at all,'' Darman said.

''The budget committees so far haven't produced anything and it's not clear that they will be able to produce anything substantial,'' Darman said. ''If they can't, then we may need some special negotiating process to get something responsible moving.''

While he said doesn't like the ''budget summit'' tag, Darman said, ''Does there need to be some sort of special bipartisan negotiating mechanism? It may well be that there does.''

''We've always said we would be willing to participate,'' the budget chief said.

After the meeting, Sen. Robert Packwood, R-Ore., urged the 20 senators to send a letter to congressional leaders of both houses urging them to start budget talks quickly.

Sen. Pete Domenici, R-N.M., ranking Republican on the Senate Budget Committee, said he supported Packwood's idea because ''we are headed toward budget gridlock or worse.''

Both Senate Democratic leader George Mitchell of Maine and Senate Budget Committee Chairman James Sasser, D-Tenn., have resisted bids for a budget summit this year, still smarting from a political blistering by Bush over capital gains taxes after last year's summit.

A Sasser spokesman said Darman has not called Sasser expressing interest in talking.

Wondering if there is ''real seriousness'' on the administration side, Sasser spokesman Larry Stein said, ''We have to have some of those before sitting down. If they really want to talk, they ought to at least call.''

And, Stein said, unless Sasser is convinced a new summit will be more successful than last year's, ''he won't participate.''

Darman said without Mitchell and Sasser there can be no successful bipartisan budget talks.

#90081u1630 03/22/1990 ~United Press International

SPACE CENTER, HOUSTON (MARCH 22) UPI - Launch of the Hubble Space Telescope next month from the shuttle Discovery will revolutionize astronomy with the most significant ''quantum leap'' forward since Galileo first trained his spyglass on the heavens 400 years ago, the astronauts said Thursday.

The shuttle Discovery and its four-man, one-woman crew are scheduled for blast off from the Kennedy Space Center at 9:21 a.m. EDT April 12 to kick off the 35th shuttle mission, the third of nine planned for 1990.

Tucked inside the spaceplane's 60-foot cargo bay will be the $1.5 billion Hubble Space Telescope, the most powerful such instrument ever built to

operate above Earth's turbulent atmosphere.

''It should be a great source of national pride for the country,'' said shuttle skipper Loren Shriver.

Once on station, the boxcar-size observatory is expected to remain in operation for at least 15 years, allowing astronomers to peer deeper into the universe than ever before and with 10 times greater clarity.

''It's widely touted as ... the single greatest quantum leap in mankind's power of observation of his solar system and the cosmos that has occurred since Galileo's first (use) of the telescope,'' astronaut Kathryn Sullivan said in an interview.

She said the telescope would help scientists learn more about ''how did the universe come to be, what are the forces that created it, that govern it, that sustain it? What are the forces that drive the dynamics of planetary atmospheres? All of those things ... we should be able to get great new insights into and possibly even discover new processes and dimensions we hadn't expected.''

The costly telescope is scheduled to be transported to launch pad 39B at the Kennedy Space Center on Sunday for installation into Discovery's cargo bay.

If all goes well, Shriver, Sullivan, co-pilot Charles Bolden, Bruce McCandless and Steven Hawley will begin deploying the telescope about 24 hours after liftoff. Landing is scheduled for April 17 at Edwards Air Force Base, Calif.

NASA spokeswoman Lisa Malone said Thursday preparations for takeoff were running ahead of schedule, although work to fix or reseat an engine turbopump seal to eliminate a leak had not yet been completed.

''We've got to unbolt it, inspect the seal and if it needs replacing, we'll do it,'' she said. Otherwise, ''We are doing real good at the pad.''

The Hubble Space Telescope is the most expensive civilian cargo ever carried into orbit aboard and shuttle and one that promises some of the richest scientific dividends in the history of the manned space program.

''The fact that we'll be able to be above the atmosphere with a telescope that is so magnificently engineered ... it's hard to predict what sorts of discoveries we'll make,'' said Hawley, who holds a doctorate in astronomy.

For Sullivan, the instrument represents another sign of America's drive to explore.

''There is some fundamental characteristic of the American spirit that is ... always reaching outward, that is striving and questing, to go further, to know more, to get somewhere,'' she said.

''I think it's a fundamental energy that founded this country, expanded it across the continent and is now reaching out into the heavens.''

If problems develop during the deployment of the telescope, Sullivan and McCandless will be standing by, ready for an emergency spacewalk to attempt repairs.

''We're going to great extremes on this flight to take advantage of the manned space program,'' said flight director William Reeves. ''We're going so far as to have the crew check out the (space) suits on day one and begin some initial preparation on day 2 to be able to support (a spacewalk) if required.''

-30- 3970

#90081u1637 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - House Republicans accused Democrats Thursday of seeking a delay in the Supreme Court's ruling on the flag burning law until after the November election.

The law passed by Congress last year has been ruled unconstitutional by two lower courts in cases arising in Washington state and the District of Columbia,and the matter has been appealed to the Supreme Court.

A motion filed with the court by the House counsel suggested the court consider the case when it convenes for a new term in October, but Republicans complained they were not consulted on that action and said the court should be pressed for an earlier ruling.

House Republican leader Robert Michel of Illinois offered a resolution calling for the counsel's brief to be withdrawn and it was approved, 309-101, after about two hours of debate and parliamentary maneuvering. The Democratic leadership opposed Michel's motion, but lost a key vote, 276-233.

The court is not bound by the House request and is not expected to announce its plans for the case until at least the first week of April.

The 1989 law was passed in anger over a June 1989 Supreme Court ruling in a Texas case that burning the flag as a political protest is a constitutionally protected form of free speech.

The 5-4 ruling sparked a controversy that saw President Bush push for an amendment to the Constitution. Instead, Congress passed the Flag

Protection Act, although Republican backers of the amendment warned a law would not protect the flag. That law was quickly challenged in separate cases in Washington state, the District of Columbia and elsewhere.

Rep. James Sensenbrenner, R-Wis., said the brief filed recently by the House counsel was ''politically motivated'' and any delay in obtaining a ruling by the Supreme Court would leave the flag unprotected ''until after the elections'' in November.

The charge was later denied by House Speaker Thomas Foley, D-Wash., who said the counsel had not intended ''to present a political brief to the court.''

Foley and other Democrats said they were seeking as much time as possible to present the court with arguments in defense of the law passed by Congress.

Foley denied any effort ''other than to impress upon the court our conviction that it is constitutional and that the American people have a right through their Congress to enact such a statute and defend its constitutionality.''

Republicans declined to join in briefs defending the law when it was before the district court in Washington, D.C., and the House counsel assumed they did not want to join the briefs filed with the Supreme Court, said Democratic leader Richard Gephardt, D-Mo.

CAPE TOWN, South Africa (MARCH 22) UPI - Secretary of State James Baker said Thursday the leaders of the white-minority government of South Africa pledged they are on an ''irreversible'' course to end the apartheid system of racial domination.

Standing beside reformist President F. W. de Klerk and Foreign Minister Pik Botha, both in a diplomatic as well as literal sense, Baker said the two leaders are committed to peaceful change leading to a non-racial democratic South Africa and away from the repressive system that has made their country an outcast in the world community.

De Klerk said he can envision the day that a black may be president of South Africa, but that the minority whites will have to have some protections against a dominant black majority.

Baker met with the two leaders on a mission that has been criticized by black leader Nelson Mandela as an unnecessary blessing for de Klerk's initial efforts toward peeling back apartheid.

Baker, appearing with de Klerk at a brief news conference, had no doubts about de Klerk's intentions.

''May I repeat what you told me at the conclusion of our meeting when you said that we are engaged here in South Africa in an irreversible process and we will follow it to its logical conclusion,'' Baker said of de Klerk.

''As the minister (Botha) said ... it is the desire of the South African government to lift the state of emergency and to release political prisoners.''

These are the two major actions Baker wanted to press on de Klerk to show that his government is on that difficult course.

De Klerk ordered Mandela released in February after he had served 27 years in prison on conspiracy charges for his leadership of the black political movement. De Klerk also lifted an order banning the African National Congress. Baker praised both actions.

Baker's meeting of about one hour was the first between a secretary of state and the top leadership of South Africa since 1978.

Govan Mbeki, 69, who went to prison with Mandela for his opposition to apartheid, and eight other black leaders met with Baker at a palatial hillside U.S. diplomatic residence and told him his meeting with de Klerk is not helpful.

''We are not happy with the fact the secretary has come to consult with the South African government,'' Mbeki said.

''Our message to the American government and the American people is to continue to impose pressure on South Africa and not to relax at all until such time as the position of the South African government has no way of going back,'' Mbeki said.

Mandela's criticism came in a meeting with Baker in Namibia on Wednesday and officials said it was not harsh.

Baker came away from his meetings with de Klerk and Mandela ''convinced it (his mission) was the helpful thing to do,'' the official told reporters.

De Klerk, who Mandela has called a man of ''integrity,'' appeared almost jovial after his meeting with Baker, and said he did not view the secretary's trip as a ''reward'' for his actions.

De Klerk was cautious when he was asked if he can see the day in South Africa when blacks have equal political power at the ballot box and a black could serve as president of the mineral-rich nation. That equality will have to be conditioned, he said, to protect the rights of about 5 million whites in a nation of some 26 million blacks.

''All South Africans will have a vote, that vote will be of equal value,'' de Klerk said.

''And we will also have a situation of proper protection of minority rights so that there won't be domination built into the system, not minority domination, but also not just simple majority domination.''

The United States has economic sanctions in place against South Africa to protest apartheid. Those sanctions could be removed if de Klerk frees all political prisoners and ends the emergency laws that give authorities broad police powers.

By VERNON SCOTT

HOLLYWOOD (MARCH 22) UPI - Monday's 62nd annual Academy Awards, live from the Los Angeles Music Center, finally put an end to three months of speculation and folderol.

People who run the Academy of Motion Picture Arts & Sciences predicted 1 billion Earthlings would tune in to the ABC broadcast to watch the spectacle.

''Driving Miss Daisy'' won the most nominations last month with nine. ''Born on the Fourth of July'' was second with eight.

Two of the directors nominated, both Irishmen, never before directed a movie - Jim Sheridan for ''My Left Foot'' and Kenneth Branagh for ''Henry V.''

Should either Sheridan or Branagh win, he would be the fifth tyro director to do so. The others are Delbert Mann, Jerome Robbins, Robert Redford and James L. Brooks.

The British Isles were well-represented in this year's Oscar race in the major categories: Branagh, Sheridan, Daniel Day-Lewis, Pauline Collins, Jessica Tandy (born in England) and Brenda Fricker.

If Tom Cruise, 27, wins the Oscar for best actor he will be the youngest actor ever to win in that category. Incidentally, the star of ''Born on the Fourth of July'' was actually born on the Third of July.

Of the 20 actors and actresses nominated for best leading and supporting performances, only Martin Landau and Michelle Pfeiffer were repeaters from the 1988 nominations list.

Fully half the nominees in the acting categories received their first nominations.

Two of the most nominated industry figures in history were in the race this year: Marlon Brando and Woody Allen. Brando has been nominated eight times in all, seven for best actor, this one for best supporting actor. Allen has been nominated 14 times, five for best director, once for best actor and eight for writing.

If Brando wins for best supporting actor he would become only the fourth star ever to collect three Academy Awards for acting. Ingrid Bergman and

Walter Brennan won three each. Katharine Hepburn has won four.

Don't look for recluses Brando or Allen in the audience. They won't be there.

Should Branagh win for best actor (for Henry V) he would be only the second actor to win an Oscar for directing himself. The first was Laurence Olivier who won best actor for ''Hamlet,'' in which he directed himself in 1948.

Branagh, Morgan Freeman (Driving Miss Daisy) and Pauline Collins (Shirley Valentine) were nominated for roles they previously played on stage.

Nineteen Oscars have been won by performers repeating stage roles on film.

If both Tandy and Freeman win, they would become the sixth co-stars to capture Oscars.

Other screen pairs to turn the trick: Clark Gable-Claudette Colbert in ''It Happened One Night'' (1934); Jack Nicholson-Louise Fletcher in ''One Flew Over the Cuckoo's Nest'' (1975); Peter Finch-Faye Dunaway in ''Network'' (1976); Jon Voight-Jane Fonda in ''Coming Home'' (1978), and Henry Fonda-Katharine Hepburn in ''On Golden Pond'' (1981).

None of the performers nominated for best actor has ever won before.

Two movies were nominated this year for best picture but their directors were not. Nominated were ''Driving Miss Daisy'' but not director Bruce Beresford, and ''Field of Dreams'' but not director Phil Alden Robinson.

Conversely, two directors were nominated but not their films - Woody Allen but not ''Crimes and Misdemeanors'' and Kenneth Branagh but not ''Henry V.''

If Isabelle Adjani wins best actress for ''Camille Claudel,'' she would be only the third performer to win the award for a foreign language film appearance. The others were Sophia Loren in ''Two Women'' and Robert De Niro for his Italian-language performance in ''The Godfather Part II.''

None of the nominees for best actress have won the Oscar in that category.

Two performers among those nominated for best supporting actress have won in that category previously. Dianne Wiest (nominated for ''Parenthood'') won in 1986 for ''Hannah and Her Sisters'' and Anjelica Huston (nominated for ''Enemies, a Love Story'') won in 1985 for ''Prizzi's Honor.''

Not surprisingly, none of the nominated films were musicals or comedies.

#90081u1730 03/22/1990 ~United Press International
WASHINGTON (MARCH 22) UPI - Treasury Secretary Nicholas Brady Wednesday defended U.S. participation in the proposed European Bank for Reconstruction and Development to help Eastern Europe, while Republican senators advocated keeping out of the EBRD and beefing-up the World Bank instead.

Brady appeared before the Senate Foreign Operations Subcommittee to defend the Bush Administration budgetary request of $1.7 billion in cash for multilateral development institutions for fiscal year 1991, plus $6.9 billion in commitments for the organizations' capital.

The secretary noted that of the $1.7 billion, $268.2 million stems from shortfalls from previous requests, and $1.5 billion is ''to honor previously agreed payment schedules'' with institutions such as the World Bank.

Brady strongly advocated that the United States join the European Bank for Reconstruction and Development proposed last year by French President Francois Mitterrand to help the transition of Eastern bloc countries to democracy and market economies.

Wisconsin Sen. Robert W. Kasten, the ranking Republican member of the panel, said ''the United States should boycott'' the bank altogether if its charter allows any Soviet borrowing.

Brady said the administration is negotiating with the Europeans to limit any Soviet borrowings to $200 million, the same amount Moscow would contribute to the EDB's $10 billion capital.

Kasten contended that the EDB would be dominated by European policymakers ''who are indifferent, if not hostile, to growth economics'' and favor welfare economies with a strong government role.

Brady said the administration wants to minimize EDB's lending to governments, reserving only 40 percent of its resources for infrastructure and leaving 60 percent to support the private sector in Eastern Europe.

Kasten announced that he and Sen. Robert Dole, R. Kan., would introduce legislation to establish a special facility at the World Bank to provide loans, economic guidance and technical assistance to Eastern Europe, in an effort to forestall U.S. participation in the EBRD.

The World Bank facility should mainly provide financial aid to private sector activities, while public sector loans whould be used primarily to cover the transition costs from socialism to a free-market economy, Kasten

said.

''No loans would go to the Soviets,'' the senator emphasized, adding that the facility would be terminated after five years, time enough for the recovery of the Eastern European economies.

Kasten's position was supported by Sen. Alfonse D'Amato, R-N.Y., who insisted that the World Bank is an already functioning institution better able to tackle the Eastern European financial needs in a time of urgency.

Brady warned that keeping the United States out of the EBRD would send the wrong signal to East European countries which, in any case, can not possibly recover in five years.

Regarding the Soviet Union, Brady advocated bringing that country ''closer to the Free World, helping them make the move'' toward a market economy.

Brady warned that most likely a World Bank special facility for Eastern Europe would only be financed by a few countries rather than by all the bank's members.

''We would be falling back into the bilateralism (in financial help) from which we now want to get out,'' he said, noting that the World Bank already has promised $5 billion to help East European nations such as Poland, Hungary and Czechoslovakia.

Yet, Brady admitted that if the negotiations over the EBRD are not successful, the United States would end supporting a greater role for the World Bank in helping Eastern Europe.

U.S. participation at the EBRD, which would give Washington leverage in its operations, is projected at 8.5 percent to 10 percent of the organization's capital, with a ''$70 million contribution next year,'' the secretary said.

The Europeans would have more than 50 percent of the bank's capital.

#90081u1749 03/22/1990 ~United Press International

(MARCH 22) UPI - Police in Colombia say leftist presidential candidate Bernardo Jaramillo was shot and killed at Bogota's airport this morning by a gunman who was wounded by the candidate's bodyguards. Police say Jaramillo of the Patriotic Union Party was shot in the chest and died later at a Bogota clinic. Police blocked off the airport to search for a second man... apparently wounded in the shoulder... who accompanied the gunman.

Czechoslovakia's President Vaclav Havel says his country has stopped exporting the plastic explosive Semtex. It's used by terrorists, and investigators say it's probably the material that was used in the 1988 bombing of a Pan Am jet over Scotland. Havel told a news conference in London today that ''Semtex is a product of Czechoslovakia that does NOT have a good reputation.'' Havel is in the second day of a three-day visit to Britain.

Snipers fired on two Greyhound buses near St. Louis in the 16th and 17th such incidents since a nationwide strike against the bus line began three weeks ago. A Greyhound spokesman says NO injuries were reported in either shooting. Greyhound, the nation's largest intercity bus line, has hired more than one-thousand non-union replacement drivers, a move that angered the union. NO contract negotiations are scheduled.

President Bush today released federal recovery aid for Alabama, which was hit by severe storms and flooding earlier this month. Bush declared a major disaster exists in the state, making funding available to help affected people and local governments in Coffee County. The storms and flooding hit the southeastern part of the state beginning March 15th.

#90081u1757 03/22/1990 ~United Press International

NEW YORK (MARCH 22) UPI - U.S. electronics companies will lose ground to their foreign competitors in the $350-billion, high-technology market if they do not have access to cheaper financing for research, the American Electronics Association said Thursday.

''High capital costs are undermining the long-term competitiveness of U.S. companies, especially high-technology companies,'' the association said in a ''white paper'' released in Washington and New York.

''The key factor driving up real interest rates in the United States is the complicated interplay of restricitive monetary policy by the Federal Reserve, a massive federal deficit and a low U.S. savings rate,'' the report said.

The association, which represents about 30,000 manufacturers, urged the government to take measures and help U.S. electronics companies finance the development of new products in a highly competitive sector where Japanese companies are moving ahead agressively.

The worldwide electronics market is expected to top the $1 trillion mark by the end of the decade.

The AEA said it has drawn an ''agenda for action'' to help secure low-cost research capital for U.S. manufacturers operating in a sector where

technology and products become quickly outdated. The technology lead of an electronic product can be no longer than two to three years.

''High-tech companies, whether they are in Japan, Europe or the United States, face massive and increasing investments if they are to effectively compete internationally,'' the report said.

The AEA said it will actively lobby to seek a reduction of interest rates, new capital regulations favoring long-term investments, and changes in taxes and anti-trust laws to encourage joint research and production venture.

''Once thought as an impenetrable bastion for U.S. leadership, high-tech companies are experiencing eroding market shares and declining technological leadership,'' the report warned. ''After a period of extremely rapid growth in the 1970s, U.S. job growth in electronics has slowed dramatically in recent years.''

''Japanese companies can borrow roughly twice as much (as American companies) at roughly half the cost,'' the report stressed.

''This means that ... Japanese companies have roughly a 4-to-1 capital formation advantage over U.S. companies,'' the report said. ''Japanese companies can raise four times as many funds in equity markets.''

''In the early 1970s, high-tech companies were typically spending 1 or 2 percent of their sales on research and development. By 1987, they spent nearly 8 percent of each sales dollar ... and many electronics companies spend 15 to 20 percent of sales on next-generation technology.''

An independent industry survey recently released by the research firm of Ernst & Young had already voiced the concern mentioned by the AEA.

The firm said only 6 percent of all U.S. electronics companies have revenues of more than $300 million a year, and together control 81 percent of the U.S. output, which paves the way for a trend of merger and acquisitions in the current decade.

The AEA report mentioned that a machine to print computer chips, originally priced at about $35,000, now costs $1.7 million, with more sophisticated chips requiring complex manufacturing equipment.

Major U.S. electronics firms will have to raise as much as $78 million to finance research and might have to turn to foreign partners to raise capital, which would make U.S. technology further vulnerable to foreign competition, Ernst & Young said.

The firm said executives in the electronics industry favor federal actions

including financial incentives from tax breaks and grants, and increased protection of technology proprietary developments.

#90081u1767 03/22/1990 ~United Press International

DETROIT (MARCH 22) UPI - General Motors Corp. announced Thursday $1,000 rebates on its trio of new front-drive minivans until May 2 in efforts to undermine Chrysler Corp.'s stronghold on the market as well as trim rising inventories.

Models include Chevrolet's Lumina APV, Pontiac's TranSport and Oldsmobile's Silhouette introduced late last year, marking GM's first front-drive minivans ever that share aerodynamically shaped plastic bodies.

The offers came after Chrysler placed a $1,000 rebate on its front-drive Caravan, Voyager and Town & Country minivans last December under a program that expired Jan. 31.

Chrysler saw January sales of those already popular models soar 67 percent from the previous month because of the offer. But company spokesman Tom Jakobowski said Chrysler had no plans at this time to offer another rebate on its minivans.

''We still have a lot of demand for them,'' he said.

Chrysler may also find itself short of minivans as it closes its Fenton, Mo., and Windsor, Ontario, plants which build them for four weeks each this summer to change to a redesigned version that debuts this fall as a 1991-model.

GM may be concerned that it may have too many of its minivans on hand this spring as it increases production rates at its North Tarrytown, N.Y., plant.

Industry figures show the TranSport had a supply equal to 126 days as of Mar. 10, while the Lumina APV posted a 117-day supply and the Silhouette an 83-day supply, all above normal levels.

U.S. sales so far this model year through Mar. 10 are 5,510 Silhouettes, 7,559 TranSports and 17,822 Lumina APVs, GM figures show.

''GM built twice as many minivans as they sold so far,'' said industry analyst Michael Luckey, of The Luckey Consulting Group in Tappan, N.J.

''They may be too aggressive in production given the overall slower market '' Luckey said. ''They are also getting ready to get up to full speed, and may be worried about what their inventory will look like in next two months.''

GM's Oldsmobile and Pontiac divisions also doubled the $1,000 rebate on their new Cutlass Supreme and Grand Prix cars until May 2nd.

Chevrolet is offering a free V6 engine valued at $660 in its Lumina coupe or sedan in addition to the current $1,000 rebate.

All vans and cars are eligible for discount financing in lieu of the rebates, which range as low as 6.9 percent annually for 48-month loans.

A Ford Motor Co. spokesman said the No. 2 automaker would most likely amend its current buyer programs, which offer until Apr. 2 a $750 rebate on its Taurus and Sable cars, and a $500 rebate on its rear-drive Aerostar van.

''We have to make sure that we are still competitive,'' a Ford spokesman said.

Still, Luckey said the increased rebates may not do much to boost overall sales, and that manufacturers may be giving away too much money to buyers who might have bought a new vehicle anyway, which only depresses profits.

''More and more products keep being produced, but all the fundamentals we look at show demand for cars or light trucks is not very good,'' he said, adding that his analysis shows that instead of added sales, rebates simply shift purchases from one period to another.

''It's a tough market to sell anything, whether it's a hot new minivan or a six-year old sedan,'' Luckey said.

#90081u1771 03/22/1990 ~United Press International

WEST UNION, OH (MARCH 22) UPI - A man distraught over the breakup of his marriage terrorized an electric plant Thursday, killing his wife, wounding a security guard and then killing himself, police said.

The shootings at the Killen electric plant in southern Ohio left Russell Price, 49, and his wife, Shirley, 44, dead.

The security guard, Marvin Hanover, 44, was treated at a hospital for a gunshot wound. The gunman also took a guard hostage, but that man was able to flee unharmed.

Adams County sheriff's deputies said Russell Price followed his wife, who had recently filed for divorce, to work Thursday. When Shirley Price stepped from her car in the plant parking lot, Russell Price shot her dead with a .25-caliber pistol, deputies said.

Hanover, a plant security guard, came out to the parking lot to investigate and he was shot and wounded by Price, deputies said.

Price then took another security guard, Dennis Brooks, hostage and went inside the plant. The hostage escaped without injury and Price was left alone inside a room, where he shot and killed himself, deputies said.

The coal-fired electric power plant is owned by the Dayton Power & Light Co. and the Cincinnati Gas & Electric Co.

#90081u1778 03/22/1990 ~United Press International

MOSCOW (MARCH 22) UPI - Soviet President Mikhail Gorbachev sent Lithuanian President Vytautas Landsbergis a telegram Thursday giving him two days to stop the formation of civilian defense brigades in the Baltic republic.

Gorbachev followed his presidential decree late Wednesday ordering Lithuanians to turn in their firearms and tightening border restrictions with a terse personal message to Landsbergis as relations between Moscow and Vilnius worsened.

The decree culminated 10 days of mounting pressure since Lithuania's new nationalist-controlled parliament approved a declaration of independence March 11 at its first session after historic elections two weeks earlier.

Gorbachev threw down the gauntlet to Landsbergis, who said earlier that ''only force of arms'' could prevent Lithuania from seceding from the Soviet Union, the official Tass news agency said.

''Reports coming from Lithuania show that on the republic's territory volunteers are being recruited into so-called organizations of territorial protection, which are called upon to replace the activity of border troops and ... internal security bodies,'' Gorbachev told Landsbergis.

''I suggest that undelayed measures be taken to stop all actions at creating these and similar units,'' Gorbachev said in the message carried by the official Tass news agency. ''Please report fulfillment within two days.''

Landsbergis had sharply criticized Gorbachev's bid to stop his Sajudis nationalist movement's secesion drive, saying, ''We regret that the Soviet Union is meddling in our affairs.''

Tass said in a separate dispatch that Gorbachev's Wednesday presidential order was already being enforced in Lithuania.

''In fulfilling the decree of Soviet President Mikhail Gorbachev ... KGB border troops have reinforced frontier posts and other facilities," Tass said.

''Border troops are assisting customs officials in reinforcing the regime of the passage of cargo and people across the state border,'' it said. ''Control over the departure abroad of Soviet citizens from the republic's territory has been enhanced. Measures are being taken to restrict the entry of foreign citizens into Lithuania.''

In Washington, President Bush reiterated his call for a peaceful resolution of the conflict by negotiations between Lithuanian and Soviet officials, with no interference from the United States.

Soviet Foreign Ministry spokesman Gennadi Gerasimov warned earlier in Moscow of an escalation of tensions if Lithuanians fail to turn in their firearms and said those who refuse Gorbachev's decree will be subject to

arrest.

''If you are breaking the law, then you can be brought to trial,'' Gerasimov said at a news conference.

In his first presidential decree, Gorbachev gave Lithuanians one week to hand over any weapons in their possession and directed authorities to confiscate firearms not turned in on time.

Gerasimov, saying Gorbachev's order is unequivocal, told reporters that KGB intelligence agents will help collect the fireams in Lithuania and turn them over to the Defense Ministry.

''We are creating a government based on law,'' he said, adding that Lithuanians are still citizens of the Soviet Union and must obey its laws.

''If not, there will be an escalation'' of tensions, Gerasimov said.

Lithuanian leaders have said since their March 11 declaration of independence they do not feel bound by decrees from Moscow.

Armed resistance against Soviet rule continued in Lithuania for more than a decade following the annexation of the Baltic region in 1940.

Premier Nikolai Ryzhkov Monday ordered direct ministerial control of all federal enterprises in Lithuania and instructed KGB and MVD internal police to ensure customs control at its borders.

The decree from Gorbachev, whom the Congress of People's Deputies elected March 15 to a powerful executive presidency, also puts under close scrutiny the activities of foreigners in Lithuania.

Americans and other foreigners of Lithuanian descent have flocked to the Baltic republic and are openly helping the Sajudis nationalist movement that swept the Feb. 24 parliamentary polls.

The foreigners have been answering phones, providing translation and even acting as spokespeople for Sajudis. Gerasimov said Moscow has noticed their work.

WASHINGTON (MARCH 22) UPI - Defense Secretary Dick Cheney, rejecting claims he has failed to react to change, said Thursday he has ordered the military to plan for the 1990s based on ''a rosy scenario'' that has all Soviet troops out of Europe.

Speaking to the National Press Club, Cheney also lashed out at congressional critics who argue his 1991 military budget does not cut deeply enough, saying that ''every time I actually try to cut something, I have a fight on my hands.''

''Some of the members who are the biggest advocates of deep cuts yell the loudest when it comes time to cut something in their districts,'' Cheney said.

''What Congress gives me often times is complaints instead of solutions; politics instead of strategy,'' he said.

Noting he is known as ''a hard-liner, a conservative, a skeptic,'' Cheney said, ''I'm not here today to talk about the need for prudence and caution in our national security strategy.''

Cheney asked his audience to make the following assumptions for the rest of the decade: Mikhail Gorbachev is still in power in the Soviet Union, his domestic programs have been at least partially successful, and his foreign policy remains far less hostile to the West than his predecessors'.

Also, Cheney told the crowd to envision that the Americans and Soviets have implemented arms control agreements and are working on new ones, all Soviet forces are out of Eastern Europe and ''the Warsaw Pact is nothing more than a relic of history,'' and that Eastern Europe is governed by democratically elected, non-communist regimes.

''Now I would call that a rosy scenario,'' Cheney said. ''I have directed the military services to plan for the mid-1990s on exactly these assumptions.''

He said his five-year budget plan that will include these cuts will be ready to send to Congress in ''a few weeks.''

At the same time, however, Cheney defended his 1991 budget that includes billions of dollars of increases for major nuclear weapons and the ''Star Wars'' missile-defense system.

The United States must modernize its strategic nuclear forces to keep up with the Soviets, and it needs ''Star Wars'' to help defend against a possible future attack from Third World nations who obtain ballistic missiles, he said.

In addition, Cheney said U.S. defense policy must include maintaining strong alliances; stationing troops overseas; retaining naval superiority; having a capability to project power, as in Panama; and developing the best technological weapons in the world.

#90081u1801 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Senate Armed Services Committee Chairman Sam Nunn urged the administration Thursday to quickly fill in ''big blanks'' in long-term defense plans or risk being shut out of the defense budget process.

And Nunn, D-Ga., also warned his colleagues that demands for deep defense cuts in 1991 could come only at the expense of troops and training.

In a floor speech aimed both at the Pentagon and fellow senators, Nunn said the administration's $306.7 billion 1991 defense budget has five blanks in it and is ''based on a 1988 threat and a 1988 strategy.''

Within a few months, he said, his committee must write a defense bill and members ''will expect and demand that the committee (produce a bill) that is based on the world as it is today, one that looks forward and not backward.''

''If the Department of Defense wants to remain relevant in this process, they must begin filling in these big blanks in the defense budget,'' Nunn said.

The Pentagon - which so far has identified $70 billion of a projected $167 billion in reductions needed to produce a promised 2 percent annual decline in defense budgets - is working on a revised five-year defense plan for Congress and reviewing major programs such as the B-2 bomber.

One of the blanks to be filled in, Nunn said, is a revised view of the threat to national security in light of recent sweeping world changes. Other blanks, he said, include a long-term strategy, identification of the remaining cuts needed to hit the 2 percent reduction goal, a projected reduced structure of U.S. forces, and a long-term view of defense programs.

Defense Secretary Dick Cheney, speaking the National Press Club, said his five-year defense budget plan that will include deeper cuts will be ready to send to Congress in ''a few weeks.''

Cheney also lashed out at congressional critics who argue his 1991 military budget does not contain deep spending cuts, saying that ''every time I actually try to cut something, I have a fight on my hands.''

''What Congress gives me often times is complaints instead of solutions; politics instead of strategy,'' Cheney said.

The defense secretary said the criticism of Congress in his speech was written before Nunn's comments were made. ''But obviously if the shoe fits

wear it, Sam,'' Cheney said.

The senior Republican on Nunn's committee, John Warner of Virginia, agreed with some of Nunn's observations but came to the Pentagon's defense by saying many aspects of the defense budget were ''a moving target'' when it was drafted. He said the administration has promised to continue to give Congress ''updated planning and budget information.''

Nunn noted that much of today's defense spending is driven by the budgets approved in prior years. The Pentagon, even though it would get $306.7 billion in spending authority for 1991 and future years in the latest submission, would spend $303.3 billion in 1991's planned budget.

Killing off major weapons such as the B-2, the rail MX missile, the Trident submarine and its new missile, a new attack submarine, the C-17 transport, a new helicopter and all major current aviation programs, said Nunn, would save only about $3 billion in actual 1991 spending, even though the spending authority reduction would be $28.5 billion. ''The reason is most of these (weapons) programs spend out over a long period of time and money we're spending this year is based on previous year contracts,'' he said.

Senate Budget Committee Chairman James Sasser, D-Tenn., has suggested he might seek as much as $17 billion in spending cuts, but Nunn said cuts of that magnitude ''require very disruptive changes.''

''There would be severe disruption of personnel programs and operating activities'' with the depth of outlay cuts being suggested, he said. ''If you generate that kind of an outlay target the only thing you can do is take it out of people and operations'' by reducing the size of the armed forces and cutting steaming days and flying hours.

But he also said cutting back on troop strength both takes time and does not save much money in the first year. The Congressional Budget Office estimates that eliminating one more Army division, two Air Force tactical fighter wings and an entire Navy carrier battle group - some 66,750 personnel - would produce immediate cash savings of just $1.4 billion in 1991.

''To decide on the size of the defense budget without first going through this process (of filling in blanks) would be little better than just reaching up in the air and pulling out a number, and I think that's what's happening in a lot of places in town,'' said Nunn.

WASHINGTON (MARCH 22) UPI - The nation's major railroads and most of their unions have agreed to establish an emergency panel to resolve the thorny issue of health and welfare benefits, Richard Kilroy, president of the Transportation Communications Union, said Thursday.

Kilroy, who heads the 14-union coalition, the Railway Labor Executives Association, also said the White House, ''after some discussion,'' had approved the agreement to establish the emergency board.

He said he expects the emergency panel to be named within the next two weeks or so.

President Bush has vetoed legislation that would have established a similar board to settle the Eastern Airlines strike.

But Kilroy said the railroad situation is different because both labor and management had agreed to setting up the board.

Under terms of the agreement, an emergency board will be established by the National Mediation Board and the emergency panel will deal first with the difficult issues of health and welfare.

The panel will then take up wage and rules issues.

The railroads, facing spiraling costs in health care costs, are demanding that employees pay a larger share of the costs.

Both management and the unions agreed not to resort to ''self-help'' - strikes, lockouts or contract imposition - until after a statutory ''cooling off'' period of 30 days following the emergency board's report and recommendations on both health and welfare and wage and rules issues.

Both sides also agreed not to take any such actions while Congress is not in session ''so the mediation board will not be stuck with a nationwide rail strike with no legal method of stopping that strike.''

The Railway Labor Act tightly governs railroad union contract negotiations because a major strike would disrupt the nation's economy and the act gives the government wide powers to intervene in the negotiations.

Although the agreement between labor, management and the White House aims for a Sept. 15 report by the emergency panel, Kilroy said the unions have agreed to ''any reasonable request for an extension of time ... to allow ample time for hearings, mediation and formulation of recommendations.''

One union, the International Association of Machinists, is not participating in the agreement, Kilroy said.

The current contract went up for renegotation July 1, 1988, but talks have been sporadic at best and suspended since February.

All 14 of the unions in the association are covered by the same health and welfare plan but have separate contracts governing wages and rules.

Kilroy said the unions could engage in simultaneous ngotitations on wages and rules while the emergency board considers the health and welfare issues.

WASHINGTON (MARCH 22) UPI - Senate leaders and the White House, scrambling to preserve their clean air agreement, struggled Thursday to reach a compromise with Sen. Robert Byrd, D-W.Va., on his plan to help coal miners threatened by acid rain reduction.

After weeks of intensive lobbying - including personal visits with 25 senators - Byrd said he was ''very, very close'' to having enough votes to pass his proposal, which would provide special unemployment benefits to coal miners and other workers who lose their jobs because of clean air legislation.

The West Virginia Democrat, long the coal miners' champion in Congress, said his bill is necessary because an estimated 3,000 to 5,000 high-sulfur coal miners in Appalachia and the Midwest stand to lose their jobs because of pending acid rain control measures.

The clean air bill requires coal-burning power plants to reduce sulfur dioxide emissions linked to acid rain. Many utilities are expected to meet those requirements by switching from high-sulfur eastern coal to low-sulfur coal primarily mined in the West.

In an effort to gain further support for his proposal, Byrd late Wednesday broadened his plan to include workers other than coal miners.

Byrd said he was responding to objections from senators that it is unfair to help coal miners and not workers in other industries - such as steel and chemicals - also likely to be hard-hit by increased pollution control costs.

He also scaled back his orginal $700 million benefit plan for coal miners, reducing its overall cost to $500 million. Still, under Byrd's plan, coal miners would receive higher payments for a longer period than workers in other industries.

Byrd maintained coal miners deserved more because no other group of workers would be as adversely affected. He cited estimates that the clean air bill would eliminate 35 percent of current high-sulfur coal mining jobs by the turn of the century.

While welcoming Byrd's changes, Senate leaders said the White House still opposed his legislation as too expensive and a potential ''deal-breaker'' for their compromise clean air bill, worked out in three tortuous weeks of negotiations last month between senators and administration officials.

Senate leaders have warned that if the compromise is significantly altered the administration may pull out, jeopardizing overall prospects for the passage of clean air legislation.

Byrd has scoffed at such warnings, suggesting that President Bush would think twice about vetoing clean air legislation, which has been one of the administration's top legislative priorities.

Senate Democratic leader George Mitchell of Maine said White House officials were reviewing an alternative worker-aid proposal to be presented to Byrd on Thursday. Mitchell declined to give any details of the proposal.

As for the changes Byrd made to his legislation, Mitchell said: ''Clearly, Byrd is moving in the right direction. It moves in the direction I sought.''

Byrd appeared reluctant to compromise further, saying he had watered down his legislation twice in the past two weeks. ''I'm at the point of no further retreat,'' he told the leadership in remarks on the Senate floor.

Mitchell did not say whether he would seek a vote on Byrd's measure, but he clearly faced a difficult battle against Byrd, who has used all his considerable influence as chairman of the Senate Appropriations Committee to win votes.

Despite those powers, Byrd said he was ''amazed'' at the number of

senators supporting his plan, considering the pressure being brought to bear by Senate leaders to preserve the clean air compromise.

He noted many of his supporters were from states that had no coal mines and would not benefit from his original plan, but simply thought it was the right thing to do.

''They see in this amendment the element of fairness and justice so they are willing to do what in their conscience is right,'' Byrd said. ''They are willing to walk the plank and vote for this amendment.''

#90081u1835 03/22/1990 ~United Press International

NEWARK, NJ (MARCH 22) UPI - A federal judge is set to rule on a default judgment against Eddie Antar for his failure to answer Securities and Exchange Commission charges of illegal trading in Crazy Eddie Inc. stock, a magistrate said Thursday.

U.S. Magistrate Ronald Hedges also allowed Antar's lawyers to withdraw from the case. They said their client's behavior left them no way to represent him.

The SEC, which brought an insider-trading action against Antar and several former Crazy Eddie executives last year, has charged that he masterminded a scheme to inflate profits and thus the price of the stock of the consumer-electronics chain. The agency is seeking disgorgement of $54 million in alleged illegal profits and triple damages - a total of $216 million.

The magistrate, in a scheduling order last month, ordered Antar to appear for a deposition Mar. 16, warning him that he faced default if he did not show up. Antar, who has already been found in civil and criminal contempt for failure to appear in court and to turn over $52 million he transferred to Israel, disobeyed the order.

U.S. District Judge Nicholas Politan is scheduled to rule Monday on whether Antar's actions justify a default judgment. The judge can make the ruling on his own motion, SEC lawyer Richard Simpson said.

A default judgment would not leave Antar immediately liable for $216 million, Simpson said. Hedges split the questions of responsibility for the alleged fraud and damages and scheduled a trial this summer for the remaining defendants.

Antar's damages would be decided with any others after that trial, Simpson said.

Antar, who built Crazy Eddie from one discount-electronics store in the Coney Island section of New York, resigned as chief executive officer in late 1986, selling most of his stock soon after. The company, headquartered in Edison, N.J., filed for bankruptcy last year and was liquidated after a turnaround attempt failed.

A former Manhattan resident, Antar's whereabouts are unknown, although he has been reported to be in Brooklyn, Jerusalem and Buenos Aires. He has also been notified that he is the target of a federal grand jury investigation in New Jersey and has been sued by Crazy Eddie shareholders.

Antar made one brief court appearance last month after Politan found him in civil contempt and issued a warrant for his arrest. After surrendering to federal marshals, he was released on his own recognizance.

#90081u1889 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - President Bush reiterated Thursday his call for a peaceful resolution, with ''no fine tuning'' from the United States, of the crisis between secession-minded Lithuania and the Soviet Union.

At a news conference on the south lawn of the White House, Bush said repeatedly that ''the goal is to have a peaceful resolution'' of the strife with ''calm and peaceful discussions'' between the two parties.

Lithuanian President Vytautas Landsbergis has accused Soviet President Mikhail Gorbachev of ''meddling'' by ordering all citizens in the secession-minded Baltic republic to turn in their firearms and directing the KGB to increase control of Lithuania's border.

Gorbachev personally commanded Soviet authorities to confiscate weapons that are not turned in within seven days and to guarantee the upholding of the Soviet Constitution and the rights of all citizens in the Baltic republic.

Lithuania's Parliament declared its independence March 11 and demanded negotiations with Moscow on formal secession. The central government in Moscow later declared the independence resolution ''null and void,'' but Lithuanian leaders said they would go ahead with secession plans.

Bush told reporters, ''The United States' position is that we do not recognize the incorporation of Lithuania in the Soviet Union. However, there are certain realities in life. Lithuania recognizes what they are and they should talk to Soviet officials about these realities.''

The president expressed optimism that a peaceful solution would be found.

''I'm convinced that the answer is the peaceful ... discussions between the parties,'' he said.

''It is very important that force not be used but I believe that they can talk and work out these problems,'' Bush said.

Bush said the Soviets had exercised ''a great deal of restraint'' in Eastern Europe, permitting democracies to emerge peacefully, ''and I would like to say, 'Please, continue to exercise that kind of restraint and remember, no use of force.'''

The president appeared irritated at hypothetical questions on a future U.S. role if the Soviets cracked down on the dissident republic.

''I'm envisioning letting them sort it out any way they want to, and they don't need any help from the president of the United States to do that,'' Bush said.

''We are not here to say who in Lithuania ought to talk to whom in Moscow '' he said. ''How presumptuous and arrogant that would be for any president. So I say let them sort it out. They're on the right track. Lithuanians have got elected leaders and clearly the Soviets have a strong leader. They can figure that out without fine tuning from the United States.''

Bush said Wednesday night that he remained hopeful the standoff would end

without violence because Soviet Foreign Minister Eduard Shevardnadze had restated the Kremlin's views on ''peaceful resolution'' to Secretary of State James Baker.

''It is highly complicated. I'm not suggesting it's easy,'' Bush said, ''but I see no reason to question what they've said.''

At the State Department, spokesman Richard Boucher noted that the Lithuanians had pledged a peaceful series of changes.

''We're concerned by the order to have internal security and secret police troops seize private sporting guns unless they are surrendered,'' Boucher said. ''The Soviet move tries to suggest that there is a threat to public order from the Lithuanians. We believe, however, that the Lithuanians are committed to a peaceful resolution of their differences with the Soviet Union.''

Boucher added, ''The Lithuanian people have shown their commitment to non-violence and democracy. They pose no threat to the Soviet Union's security. They seek no confrontation.

''The order to tighten visa controls, which was also part of that, and the threat to expel foreigners, in our view contradicts the Soviet's commitment to a more open society and to contact between countries.''

On Capitol Hill, Assistant Secretary of State Raymond Seitz, testifying before a House subcommittee, was asked by Chairman Lee Hamilton, D-Ind., if the administration favored Lithuanian independence.

Seitz answered, ''Yes, but we don't want to do anything to make the process more difficult.''

#90081u1893 03/22/1990 ~United Press International

NEW YORK (MARCH 22) UPI - Surgeons Thursday implanted two steel rods into pop singer Gloria Estefan's back, broken when a tractor-trailer rig plowed into her tour bus on a snowy Pennsylvania highway.

''The surgery went very well,'' said Dr. Michael Neuwirth, one of two surgeons who performed the nearly 3 1/2-hour operation. ''I have every expectation she will make a normal recovery.''

Neuwirth said he expected no complications, such as bleeding or swelling, for the lead singer of the Miami Sound Machine as she recovered at the Hospital for Joint Diseases in Manhattan.

Neuwirth spoke to a huge crowd of reporters and cameramen in a hospital

auditorium banked with flowers from fans of the 32-year-old pop singer, whose Latin-influenced music catapulted to national prominence with the hit single ''Conga.''

Estefan kept two dozen white roses and asked that the others be given to other patients in the hospital.

Asked if she would make a full recovery, Neuwirth replied, ''I don't have a crystal ball, but I'm quite optimistic she'll be able to return to all her pre-injury activities.

''It's not as if she's been seriously neurologically injured,'' he said.

Estefan's husband, Emilio, 37, dressed in a white turtleneck and jeans, stood by as doctors described the operation.

''We're lucky she's able to walk. I don't care if she can't dance again,'' he said in a low monotone, gesturing with a hand bandaged from his own injuries, suffered Tuesday when the tractor-trailer rig hit the tour bus on snowy Interstate 380 in the Pocono Mountains in Tobyhanna, Pa.

''It's just lucky she's alive and that nothing happened to the baby,'' he said, referring to the couple's son, Nayab, 9, who suffered a broken collarbone.

Hospital authorities said the facility had been flooded with flowers, balloons, T-shirts, and phone calls from around the world. Singer Elton John sent flowers, and Diana Ross had called saying she wanted to visit Estefan, said hospital spokeswoman Mary Costello.

One reporter twice tried to sneak into the singer's hospital room by dressing up as a patient, said hospital security guard Miguel Almonte. The journalist, who worked for a New York television station, was spotted and stopped both times, he said.

Two 21-year-old fans brought bouquets of flowers for the singer they said was their ''favorite ever.''

''I like everything about her,'' said one woman, Wanda Pacheco of the Bronx. ''Her dancing, her singing, her personality, everything.''

Neuwirth said he and the other surgeon, John Sherman, had implanted two steel rods on the back on Estefan's spinal cord, attaching them with eight metal hooks.

He said a vertebra in Estefan's back had slipped out of position, compressing her spine into a position that could have severed crucial nerve fibers.

The compression had caused partial numbness in her left leg, Neuwirth said a condition that electrical monitoring showed substantial improvement during the operation.

Estefan was to remain in intensive care for another day, and in the hospital from seven to 10 days before beginning a three to six-month rehabilitation, he said.

She would undergo an extensive exercise program in New York or at her home in Miami, Neuwirth said.

He added, however, that she could be up and walking ''within a couple of days.''

Estefan was flown Wednesday by helicopter to New York from a hospital in Scranton, Pa., where she was taken after the crash.

Before she left the Scranton's Community Medical Center, Estefan received two phone calls from President Bush, who had met with the singer Monday at the White House.

Estefan and the band won the American Music Awards' 1989 favorite pop-rock duo award, and Estefan was a host on the 1990 awards show.

BONN, WEST GERMANY (MARCH 22) UPI - A West German businessman was charged with export violations in connection with allegations his firm helped design and build a Libyan plant suspected of making chemical weapons, officials said Thursday.

Juergen Hippenstiel-Imhausen, who resigned as chief of Imhausen-Chemie AG last March, was charged with breaking export laws by shipping equipment to Libya without necessary permits, said a statement issued by the public prosecutor's office in Mannheim, 125 miles southeast of Bonn.

Hippenstiel-Imhausen, who was arrested Oct. 5, has denied any illegal involvement with the Libyan plant in Rabta, 50 miles southwest of Tripoli.

Imhausen-Chemie is suspected of having helped design and build the factory.

''This seriously harmed West Germany's relations with other states,'' the prosecutor's office said.

The plant was heavily damaged by fire last week. Libyan leader Col. Moammar Gadhafi threatened to retaliate against West Germany if its agents had set fire to the plant. West Germany denied any involvement in the blaze.

The United States and West Germany have said the Rabta plant was producing

poison gas. Libya has said the factory was making pharmaceutical products.

The plant was built and planned solely to produce chemical weapons such as the nerve gas Sarin and mustard gas, the prosecutor's office said.

The United States alleged in December 1988 that Imhausen-Chemie was helping to build the chemical weapons plant in Libya.

Bonn initially denied the U.S. allegations, but later admitted the West German intelligence service had suspected West German involvement since 1980.

Stern magazine reported that starting early in 1988 Imhausen-Chemie removed files concerning the plant from West Germany after discovering the government suspected its involvement in the project, Stern magazine said.

The Reagan administration threatened to destroy the Rabta plant if it was found to be producing chemical weapons. White House spokesman Marlin Fitzwater denied an accusation by Libya's official new agency that the United States was responsible for last week's fire at the plant.

WASHINGTON (MARCH 22) UPI - Reacting to a new report that the Northeast and Midwest failed to receive an adequate amount of federal money in the 1980s, lawmakers called for greater investment Thursday to help solve critical problems in the two regions.

The report released by Northeast-Midwest Coalition said federal dollars flowed freely to the South and West during the past 10 years, while barely keeping pace in Mid-Atlantic and Midwestern states.

The report found that for every tax dollar paid to the Treasury during fiscal years 1981-1988, the federal government returned an average $1.13 to the South, $1.10 to the West and $1.01 to New England states.

Mid-Atlantic states lost 11 cents and Midwestern states lost 20 cents, the report said.

''The federal government is responsible for creating a $359 billion

deficit in our region and it's happened because our region shouldered 27 percent of the nation's tax burden during this period while receiving just 41 percent of federal expenditures,'' said Sen. John Heinz, R-Pa.

Heinz said the money not received by the two regions during the past decade is ''desperately needed'' to revitalize basic industries and public facilities, fight drugs and crime, and clean up the environment.

''Instead of continuing this drain, what we need is to recycle our fair share of the funds back to our region,'' Heinz said.

Heinz added that while he believed the massive defense buildup during the Reagan administration ''contributed to downfall of communism,'' it also prompted ''de facto industrial and economic poliices here in America, with clear winners and losers. Our 18 states have been losers.''

The report tracks the distribution of $5.7 trillion - approximately 81 percent of federal outlays during the 1980s. The Census Bureau data includes direct payments to individuals, such as Social Security and Medicare; procurement, of which three-quarters is defense spending; civilian and military salary and wages and grants to state and local governments.

The report indicates that because of increased defense spending during the 1980s and a disproportionate number of military and federal installations being located in the South and West, those two regions fared far better from federal dollars.

Rep. Howard Wolpe, D-Mich., said recent political changes around the world now make it possible to revamp federal spending priorities.

''For the first time in a decade, we have the opportunity to substantially alter the federal budget priorities which led to this $359 billion imbalance'' in the Northeast and Midwest, Wolpe said.

''We must seize the opportunity offered by the exciting changes taking place in the world to increase federal investment in environmental protection, public infrastructure and education and training,'' Wolpe said.

The Northeast-Midwest Congressional Coalition is a bipartisan organization of lawmakers from 18 states: Connecticut, Delaware, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

(MARCH 22) UPI - Colombian police say a gunman shot and killed a leftist presidential candidate at a crowded Bogota airport this morning. Police say the gunman was then shot and wounded in a gunbattle with the candidate's bodyguards. Bernardo Jaramillo, candidate for the leftist Patriotic Union party in the May 27th elections, was hit twice in the chest.

Poland's prime minister Tadeusz Mazowiecki is at the White House again today for more talks with President Bush on the formation of a new political order in Europe. The talks center on the future presence of Soviet troops in Poland and the consequences of German unification. Mazowiecki is on a three-day state visit.

In Cape Town, visiting U-S Secretary of State James Baker today urged South African President Frederik de Klerk to move forward in an ''irreversible process'' to abolish apartheid. Baker describes his talks with de Klerk as ''candid and constructive.'' It's the highest level contact between the United States and South Africa in 12 years.

Minneapolis officials say three Northwest Airlines' pilots accused of flying after drinking may face federal charges. The crewmen were arrested earlier this month after a flight from Fargo, North Dakota, to Minneapolis. City officials say the Northwest pilots fired last week could face a maximum of up to 15 years in prison.

A copyright story out of Dayton, Ohio says banned Cincinnati Reds manager Pete Rose is talking to federal prosecutors in an attempt to get a plea deal on his alleged failure to report income. Sources told the paper that Rose may enter pleas to two federal tax charges as early as next week. Rose was banished from baseball for life because of gambling.

#90081u1951 03/22/1990 ~United Press International

BOGOTA, COLOMBIA (MARCH 22) UPI - A leftist presidential candidate was shot and killed in a crowded Bogota airport Thursday morning by a gunman who was wounded by the candidate's bodyguards in a gunbattle, police said.

Bernardo Jaramillo, 35, candidate for the leftist Patriotic Union party in elections May 27, was hit twice in the chest and died at a Bogota clinic.

The wounded gunman was captured and brought to a Bogota hospital, where he was in ''favorable condition.'' A police agent said authorities were searching for an accomplice, apparently also wounded. Officials said they did not know his identity.

Radio reports said two others, a security police agent and a woman bystander, were wounded in the attack and gunbattle.

The assassination of Jaramillo, who was elected representative for Antioquia state in congressional elections on March 11, was the latest in a string of killings aimed at the leftist Patriotic Union, a political party formed by former guerrillas and communist poiticians five years ago.

Thousands of Jaramillo's supporters organized protests around the capital, while Bogota Mayor Andres Pastrana beefed up security in the city and announced a ban on alcohol sales to thwart potential disturbances.

Government and political party leaders roundly condemned the killing.

Jaramillo's assassination was ''a clear attempt by those who want to destabilize our democratic system and bring the country to the brink of chaos,'' Interior Minister Carlos Lemos Simmonds said.

Leaders of the Liberal and Social Conservative parties, as well as the April 19 Movement, a leftist rebel group that recently signed a peace pact with the government, all repudiated Thursday's bloodshed.

The April 19 Movement was especially outspoken in its condemnation of the killing and the government's inability to control right-wing hit squads. Observers say the now-unarmed Movement is particulary vulnerable to such attacks.

The government announced Thursday it would put together a special commission to investigate the killing. It is still not clear how the assassin managed to enter the heavily guarded airport terminal with a machine gun.

Jaramillo, described by one Patriotic Union member as "the most threatened man in Colombia,'' was shot as he entered the domestic terminal in Bogota's Eldorado International Airport to fly to the Caribbean coast for a vacation.

The politician's bodyguards fired their automatic weapons, and wounded the suspected assassin, tentatively identified as Jairo Restrepo Posada. A bodyguard told radio reporters Restrepo Posada was wearing a bullet-proof vest.

Jaramillo's wife, Mariela, threw herself onto her bleeding husband to protect him from further shots, a bodyguard said. She was not wounded.

Patriotic Union spokesman Boris Cabrera said the gunman ''was sitting reading a newspaper and when Jaramillo arrived at the entrance of the airport, he got up and uncovered a ... sub machinegun.''

Jaramillo was the second presidential candidate in the May 27 election to

be attacked in less than a year.

Liberal party candidate Luis Carlos Galan Sarmiento was killed last Aug. 18 during a surge of violence by drug traffickers, prompting President Virgilio Barco to declare war on the drug lords.

Right-wing death squads linked to drug traffickers and members of the army have killed more than 900 members of the 5-year-old Patriotic Union.

The Union says 80 members have been killed so far in 1990, and recently accused the government of ''negligence and complicity'' in the string of assassinations against the party.

On Wednesday the party called for the resignation of Interior Minister Lemos, who accused the party of cooperating with the country's leftist guerrillas.

The Patriotic Union's detractors say the group is the political arm of the Revolutionary Armed Forces of Colombia, which is waging a guerrilla war on the government. The party denies the charge.

In light of the government's apparent antipathy for the Patriotic Union, it is unlikely authorities will respond with a crackdown such as the one against the drug cartels that followed Galan's death.

Human rights workers and others have noted that the government's all-out offensive on the cartels only came when the drug traffickers openly threatened the small circle of political leaders by killing Galan.

WASHINGTON (MARCH 22) UPI - The House, after dropping some of the restrictions it attached last week, passed a bill Thursday aimed at encouraging rural economic development by getting ''more bang for the buck'' in federal funding.

The legislation affects about $1 billion in development programs run by the Agriculture Department and would create a Rural Development Agency within the department to coordinate the work.

The Senate passed a rural development bill of its own last year, so a House-Senate conference committee will have to be appointed to write a final version. The Senate bill would spend $300 million in grant and loan programs.

''The (House) bill ... offers real hope to rural America,'' said Rep. Glenn English, D-Okla, an author. ''We have to use those dollars more wisely.''

A key point in the bill is language that allows the government, in limited cases, to transfer money among programs in order to assure the most important project in a region receives money. Local officials would write development plans for their areas and state officials would assign priorities to projects.

Last week, the House sided with Rep. Charles Rose, D-N.C., who feared business development would be paid for with money siphoned out of rural water accounts. It voted against allowing any transfers.

Rose agreed to a compromise, which was adopted on a voice vote Thursday, that bars any transfers of money from rural water grant programs and limits transfers among direct loan programs to $90 million. There would be no restriction on transferring money among loan guarantee programs.

English said the final version of the bill contained 95 percent of what was in the bill originally.

''What it (the compromise) has done is capture what Mr. English and I were trying to do with our bill,'' said Rep. Tom Coleman, R-Mo., a co-author of the bill.

Afterward, English said large-scale transfers of money had not been anticipated, so the limits set by the compromise would cause no problem.

A benefit of the compromise, he said, was that it assured the House would be united in its negotiations with the Senate. Rose also said unity was a concern in his mind - ''We have a farm bill ahead of us. We ought to work together.''

''They listened better after my amendment passed,'' Rose said wryly to reporters. He said a key concern had been to make sure grant money remained available for poor rural Americans.

Looking toward the House-Senate conference, English said the two bills ''will dovetail.''

''I'd suggest we try to marry the two together,'' he said.

Coleman was more wary, warning the Bush administration ''is much closer to our position.''

The White House budget office has objected to two points in the House bill. Administration officials, however, have been much more supportive of the House bill than the Senate plan.

House Appropriations Committee Chairman Jamie Whitten, D-Miss., expressed objections last month to the possibility that rural water funds would be ''pooled'' and threatened to write language into appropriations bills to prevent it.

#90081u1985 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Defense Secretary Dick Cheney said Thursday he ''made the right call'' in refusing to alert the Pentagon's news media pool to the invasion of Panama in time for reporters to get there for the

action.

A report commissioned by the Pentagon, released Wednesday, said Cheney's ''excessive concern for secrecy'' prevented reporters from being in Panama during the first critical hours of ''Operation Just Cause.''

The ''pool'' system - which involves being able to take into combat several reporters representing wire services, newspapers, magazines, radio and television under strict secrecy rules - was agreed to by the Pentagon following the denial of news reporting access to Grenada during the in 1983 U.S. invasion.

The Dec. 20 American invasion of Panama was the first time the media pool has been used in an actual combat situation.

Asked about the report following a speech at the National Press Club, Cheney indicated one of the reasons he did not call in the media pool until 7:30 p.m. EST Dec. 19 - five and a half hours before the invasion - was lack of trust.

''Any premature disclosure, obviously, ran the risk of possibly compromising the security of the operation. ... I wanted to avoid that,'' Cheney said.

''And we then made the callout after the evening news cycle on Tuesday night,'' Cheney said. ''I wished it could have been otherwise. My own view though, is that given the responsibilities and obligations I have, is that I made the right call.''

''If I am faced with a choice that could affect the life of a single serviceman sent into combat by my instructions under those circumstances vs. taking care of the legitimate concerns of the press, I am always going to feel my first obligation is to protect the life of that serviceman,'' Cheney said.

#90081u1988 03/22/1990 ~United Press International

ATLANTA (MARCH 22) UPI - Alcohol-related deaths accounted for more than 1.5 million years of lost work life in 1987 - more productive years than smoking robbed, federal health officials said Thursday.

The national Centers for Disease Control said alcohol was responsible for the loss of 1,531,200 years of potentially productive life, a figure calculated by subtracting death age from the retirement age of 65.

By comparison, an estimated 950,000 years of work life were lost due to smoking-related fatalities in the same year, 1987, the last year for which

figures are available.

''The same is not true of the years of life lost before life expectancy,'' or age 75, ''because of the great number of smoking deaths between 65 and 75,'' said Jim Schultz, a medical professor at the University of Miami ande author of the CDC study.

Schultz said there are far more annual smoking deaths - some 390,000 last year - but alcohol leads to a great deal of ''adolescent and young adult death'' and therefore a higher number of years of life lost before 65.

Of the 105,095 alcohol-related fatalities in America in 1987, 25 percent occurred before the age of 34, the CDC report said.

''On average, each alcohol-related death was associated with 14.6 years of potential life lost before age 65 and 25.9 years of potential life lost before life expectancy (age 75),'' the report said.

The figures are listed in the first report by the federal health agency to closely examine ways people die from alcohol abuse.

Deaths due to alcohol-related unintentional injuries, including motor vehicle accidents, drownings and falls, and alcohol-related intentional injuries - homicides and suicides - accounted for 45 percent of the total.

The report said 19.3 percent of the alcohol-related mortality rate in 1987 - 20,282 deaths - was linked to traffic accidents.

Homicide and suicide ranked as the second-leading cause of alcohol-related death, with 8.7 percent and 8.1 percent of the total fatality rate attributed to those two ''intentional'' causes respectively.

Alcohol-related death caused by cirrhosis of the liver was next in line, accounting for 7.1 percent of the fatalities. Esophageal cancer caused by alcohol killed 6.5 percent of the total, making the cancer the sixth-leading cause of alcohol-related death.

Schultz said his study is the first in a series that will be conducted annually to help assess how deadly the alcohol problem has become.

''What we are trying to do is establish current levels of the problem to help make decisions about how large the alochol problem is and what sort of interventions are appropriate on the state level,'' Schultz said.

#90081u1993 03/22/1990 ~United Press International

(MARCH 22) UPI - Greyhound officials say NO one was injured early today

when snipers fired on two Greyhound buses near St. Louis. The driver of one bus told Illinois State Police that a passing vehicle pulled alongside the bus and fired four or five shots into the side of the bus and the windshield.

The latest shootings follow Greyhound's announcement that it has expanded passenger service to about half the routes it operated before some nine-thousnd workers walked off their jobs three weeks ago. Greyhound has reported 17 buses shot at since the strike began.

An annual report to the president and Congress shows continuous improvement in the overall health of Americans. The Health and Human Services Department report shows life expectancy remains at an all-time high of 75 years. But the report also says America trails many countries in life expectancy and infant mortality... and the gap between white and black infant mortality is growing.

For the first time in days shoppers lined up today to buy fresh bread in the Romanian city of Tirgu Mures. Government officials have revised the official death toll to three after two days of fighting between ethnic Hungarians and Romanians. The city remains under emergency rule and army troops guard the main square.

#90081u1998 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Lawmakers from New Jersey, boasting of their state's stringent ocean water testing rules, proposed legislation Thursday requiring coastal states to comply with uniform beach testing and monitoring.

''This addresses a national public health and safety problem,'' said the bill's author, Rep. William Hughes, D-N.J.

Under the bill, a 15-member Clean Coastal Beaches Council, under the auspices of the National Oceanic and Atmospheric Administration, would develop standardized criteria and protocols for testing and monitoring coastal recreational waters, closing and reopening beaches and punishing those responsible for beach closures.

States with approved coastal zone management programs would be required to develop testing and monitoring plans that comply with the criteria within two years.

The New Jersey lawmakers took on a ''we don't get any respect'' attitude. They said there is a perception that New Jersey beaches are not clean, when in fact ''no state up or down the East Coast is as diligent as New Jersey,'' Hughes said.

''Over the last two summers, New Jersey's tourism industry has taken a beating as the result of a few highly publicized beach closings. The impression has been created that the beaches and ocean waters in New Jersey are somehow less safe than those of other coastal states,'' Hughes said.

He said New Jersey tests its coastal waters weekly for fecal coliform bacteria and publishes the results. A beach is closed until subsequent tests show the bacteria - commonly found in the intestinal tract of warm-blooded animals - is lower than 200 parts per 100 milliliters of water.

On the other hand, competitive beach areas in Maryland just started testing their water throughout the season last year and Massachusetts and Virginia only test their ocean waters every few weeks, Hughes said.

''The key is the frequency of your testing ... not necessarily the type of test,'' Sen. Bill Bradley, D-N.J., said.

In 1989, 5.7 million people flocked to the New Jersey shores; in 1988, 4.8 million people vacationed at state beaches, but that was down considerably from 6 million in 1987.

#90081u2063 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - Former Attorney General Edwin Meese came to the defense of John Poindexter Thursday, testifying the former national security adviser never lied to him during the initial Iran-Contra scandal investigation.

Meese also sought to buttress the argument by Poindexter's lawyers that so much confusion surrounded the original testimony and revelations about secret U.S. arms-for-hostages deals that no one knew the whole truth.

''Yes, there was considerable confusion,'' Meese said of the weeks surrounding revelation of the Reagan administration's worst scandal in November 1986. He said ''different people had different recollections'' because the Iranian project was ''highly compartmentalized'' within high levels of the government.

Meese, however, said he realized the administration faced a much more serious problem than simple confusion after an aide discovered the ''diversion memo'' in White House files.

''Yes, the political implications and the policy implications were considerable,'' Meese said.

Meese, who then disclosed to the nation on Nov. 25, 1986, that proceeds from the Iran arms sales had been diverted to the Nicaraguan rebels, took the stand after eight hours of videotaped testimony by former President Ronald Reagan.

Questioned closely about a key meeting days earlier, at which Poindexter and other top administration officials reviewed the congressional testimony of former CIA Director William Casey, Meese said repeatedly there was no discussion of any cover-up effort to hide that U.S. officials

had been actively involved in a 1985 shipment of Hawk missiles to Iran.

''I'm sure that nothing like that was ever said in my presence at that meeting,'' Meese said.

Poindexter's lawyer, Richard Beckler, asked Meese if Poindexter was the first person to alert congressional oversight committees that there may have been prior U.S. knowledge of the missile shipment.

''That's my understanding,'' Meese said.

''And that was not a lie?'' Beckler asked.

''Certainly not, at least to the best of my knowledge,'' Meese said.

Meese, the third witness for the defense, was clearly trying to assist Poindexter, his Reagan administration colleague and the highest-ranking official tried on Iran-Contra charges.

Meese parried prosecution attempts to prove that Poindexter was a mastermind behind a Reagan administration effort to cover up White House involvement in the secret U.S. arms sales to Iran beginning in November 1985.

U.S. District Judge Harold Greene rebuked Meese, saying: ''I wish you would just answer my questions once in a while.''

Asked bluntly by Beckler if Poindexter ever lied to him, Meese replied: ''Not to my knowledge, no.''

Meese, who was accused of conducting a sloppy investigation as the scandal unfolded, resigned as attorney general in July 1988 in the throes of multiple investigations into his finances.

During the final portions of Reagan's videotaped testimony, Poindexter was joined in court by his wife, Linda, an Episcopal priest, and one of Poindexter's five sons - Mark, a 26-year-old Navy lieutenant. Poindexter hugged his son, who was wearing a uniform, during a recess.

Poindexter, 53, is accused of five counts of lying to Congress and obstructing its investigation of the scandal.

Reagan said at least 124 times that he could not remember key events about the scandal. The former president's testimony did not appear to bolster Poindexter's case.

Reagan said he still is not certain that money from secret U.S. arms sales to Iran was diverted to aid the Nicaraguan Contras. Reagan made the claim

even after seeing a copy of his own Tower Commission report that made that conclusion in its official report in February 1987.

Reagan knew of the diversion even earlier, however - when Reagan appeared with Meese at a nationally televised news conference. Reagan made the opening remarks and then Meese dropped the bombshell - he had found the diversion document showing that arms sales profits were transferred to the Contras.

Despite that, however, Reagan insisted that if he had known about the diversion, ''I would have given it back.'' He referred to the money created by charging inflated prices for missiles sold to the Iranians.

NEW YORK (MARCH 22) UPI - The dollar traded mixed in a quiet New York session Thursday as the British pound recovered on some good trade figures West German's mark firmed and the beleagured Japanese yen kept dropping.

Foreign exchange traders laid the dollar's spotty performance to a rumor that the Federal Reserve Board might adjust U.S. interest rate policy to help Japan stabilize the plummeting yen. But participants said it was unlikely the Fed would ease credit simply to prop up Japan's unit.

''I don't think the Fed is too terribly concerned about the dollar being too strong,'' said Frank Watson, head of corporate trading for the Swiss Bank Corp. in New York. ''The problem is the yen is weak.''

Also causing some jitters was a meeting set for Friday in Los Angeles between U.S. Treasury Secretary Nicholas Brady and Japanese Finance Minister Ryutaro Hashimoto. They are to discuss trade, but the subject is closely related to foreign exchange rates and could cause market ripples.

Said one trader: ''With the anticipated meeting between the Japanese finance minister and Mr. Brady, that gives way to all kinds of rumors.''

In New York mid-afternoon trading the dollar stood at 1.7025 German marks, down from 1.7120 marks Wednesday. In trading against the Japanese unit the dollar fetched 155 yen, up from 154.60 yen.

Foreign exchange vice president Earl Johnson of the Harris Trust & Savings Bank in Chicago said the dollar ''stalled out'' as participants tried to push it above the 1.71-mark level in quiet trading, then backed down.

Britain's pound rallied after the February current account deficit declined to 1.395 billion pounds from January's revised deficit of 2.02 billion pounds. A country's current account tallies its surplus or deficit in non-financial transactions, such as trade, with all other nations.

Dealers awaited results of a parliamentary by-election in Staffordshire which the ruling Conservative Party was expected to lose. Amid discontent over high British inflation and interest rates, and a highly unpopular poll tax, a severe Tory defeat could take the pound back down.

Other dollar rates: 1.5095 Swiss francs, off from 1.5250; 5.7425 French francs, down from 5.775; and 1,255.75 Italian lire, off from 1,260.

The British pound recovered to $1.6035 from $1.5950.

In Europe the dollar closed mixed. It was lower in Frankfurt at 1.7060 marks against 1.7070 Wednesday and also moved down in Zurich, to 1.5175 Swiss francs against 1.5195, and in Brussels, to 35.41 Belgian francs against 35.44.

In Paris and Milan the dollar closed higher, at 5.7740 French francs against 5.7550, and 1,261.50 lire compared with 1,257.80.

In London, the pound advanced to $1.60 from $1.5945 on strong trade figures. It might have risen more but for the expected result of the by-election.

Earlier in the global trading day, the dollar surged in Tokyo to a three-year high of 154.83 yen, against 153.65 Wednesday. Governor Yasushi Mieno of the Bank of Japan termed ''excessive'' the rise of the dollar, which gained despite massive intervention by his central bank.

Republic National Bank in New York closed cash gold at $394.25 an ounce, up from $392 Wednesday. The New York Commodity Exchange settled gold at $394 an ounce, ahead from $391.80. In Zurich, gold was unchanged at $392.50 an ounce but in London it rose to $393 an ounce from $391.75.

Republic closed cash silver at $5.11 an ounce, up from $5.075. Comex spot silver rose to $5.084 an ounce, against $5.055. Zurich silver rose to $5.07 an ounce from $5.04. It also climbed in London, to $5.09 an ounce from $5.07.

NEW YORK (MARCH 22) UPI - Howard W. Smith, Newsweek worldwide publisher, said Thursday he plans to retire at the end of 1990 after 25 years with the magazine.

Smith, 55, said Peter W. Eldredge will join Newsweek Apr. 2 as publisher of the U.S. edition. Eldredge currently is vice president, group sales, of Murdoch Magazines, a division of News America Publishing Inc.

''In the past 25 years, I've developed the greatest admiration and respect for all the people at Newsweek, and particularly the people who make up Newsweek's worldwide sales organization,'' Smith said.

Alan G. Spoon, Newsweek president, described Smith as ''one-of-a-kind,'' adding that, ''His contributions to Newsweek's success have been both far-ranging and of fundamental importance.''

Eldredge, 45, joined News America in 1984 as advertising director of New York magazine. He was publisher of Star magazine from 1985 to 1987, and publisher of Premier from its debut in 1987 until this year when he assumed his present post.

AMMAN, JORDAN (MARCH 23) UPI - Jordan banned publication Thursday of a Palestinian weekly newspaper owned by a dissident faction opposed to Palestine Liberation Organization Chairman Yasser Arafat.

The banning of the newspaper Al Quds, or Jerusalem, which has been sharply critical of Arafat, followed intense debates in Jordan's Parliament. A number of pro-PLO deputies argued the weekly was unlicensed.

The move was an apparent indication of the improvement in relations between Jordan and the leadership of the PLO. Jordan expelled Arafat and his fighters in the aftermath of the September 1970 Palestinian-Jordanian civil war.

It also coincided with reports that Syrian President Hafez Assad, a long-time opponent of Arafat, had asked radical Palestinian factions in Damascus to move closer to the mainstream Fatah group, apparently boosting Arafat's position.

''Jordan has banned the Al Quds newspaper because it was not officially licensed by the Jordanian government in the first place,'' government press and publications director Issa Jahmnani told reporters. He said the ban would be effective immediately.

The 11-year-old newspaper published by Atallah Atallah, known as Abu Zaim, was first established in Morocco and Lebanon before moving its base to Jordan in 1986.

Atallah, who leads the so-called ''Corrective Movement'' of the PLO, has openly stated that his aim is to oust Arafat as leader of the guerrilla organization. He served as the head of the mainstream Fatah's intelligence for many years before quitting the PLO over personal differences with Arafat.

Atallah said he would ''resume publication of the newspaper from Lebanon. I still have some of my offices there, in addition to a French-language edition which is published in Morocco.''

He described the Jordanian government decision to ban his newspaper as ''unfortunate.''

Deputies in the country's lower house attacked the newspaper's editorial line for taking a hostile stance toward Arafat and the PLO. They said the newspaper had been allowed to operate from Jordan only because of

Atallah's friendship with former Jordanian Prime Minister Zaid Rifai.

Rifai was ousted last April after riots in the southern parts of the kingdom. Rioters accused Rifai's administration of gross corruption, and seven former Cabinet ministers are due to be tried on a variety of offences, including the illegal sale of Jordan's gold reserves.

#90081u2193 03/22/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (MARCH 22) UPI - President Fernando Collor de Mello urged legislators Thursday to leave intact his drastic economic recovery plan designed to stop the country's hyperinflation.

''For the love of God, don't touch this plan,'' Collor de Mello told legislators in Brasilia, the inland capital. ''I didn't do it for personal vanity, but because it was neccesary.''

Collor met with leaders of the 19 political parties represented in Congress, seeking support for the plan aimed at putting the brakes on Brazil's hyperinflation that reached 2,751 percent over the past 12 months.

The 570 legislators that make up the Brazilian House of Representatives have submitted in the last week 1,037 requests for modifications on the severe economic plan, congressional sources said.

The president, inaugurated a week ago, also signed a decree authorizing Economic Minister Zelia Cardoso de Mello, at her discretion, to reduce the amount of time depositors must wait to withdraw money from frozen accounts. The decree did not establish a new period but was designed to reassure the savers that the period would not be extended and possibly would be reduced if the plan goes well.

The economic austerity plan imposed Friday bars depositors from withdrawing more than the equivalent of $1,600 from savings accounts and $800 from checking accounts for a period of 18 months.

When the plan was first launched a week ago, the ceiling was $700 for savings accounts and $350 for checking accounts, but those numbers more than doubled in dollar values because of the sharp drop in the dollar on the Brazilian foreign exchange markets.

Legislative sources said Collor's decision to allow a possible reduction of the time the balance of accounts will be frozen was an attempt to soften congressional opposition to his severe anti-inflationary plan.

The Brazilian constitution specifies that the economic program must be approved by Congress within 30 days, or it is automatically vetoed.

Among the measures imposed in the plan were cuts in government spending, increases in taxes and tax collection and a rollback that froze prices at March 12 levels.

The program also changed the name of the national currency from the new cruzado to the cruzeiro, as it was formerly called, and it included long-range plans to privatize state-owned companies and limit payment on the international debt, the largest in the third world at $112 billion, to 1.8 percent of the gross national product.

Collor also met Thursday morning with Ulysses Guimaraes, the former president of Congress and head of the largest political group in the country, asking him to support the plan, the sources said.

In the first week under Collor and the new economic measures, thousands of Brazilians trying to withraw their money daily lined up at banks while restaurants, movie theaters and retail shops stood empty.

(MARCH 22) UPI - Polish prime minister Tadeusz Mazowiecki says he is now satisfied that Poland will get a chance to make sure its security interests are protected during talks on German unity. Mazowiecki met with President Bush again today at the White House, and said he's confident Poland- quote- ''will take part in everything that will affect and concern'' the Polish people.

East Germany's liberal Social Democratic Party is reconsidering its decision NOT to talk about a possible coalition with the conservative Alliance for Germany that won last Sunday's elections. Social Democrat party deputy chairman Markus Merkel says the S-D-P stands by its decision NOT to participate in any coalition that includes the center-right German Social Union. But Merkel says the Socialists will join in informal talks with the Christian Democrats to search for common ground.

The jury at John Poindexter's Iran-Contra trial watched more of former President Reagan's videotaped testimony today... with Reagan saying he could NOT recall key events of the scandal. Judge Harold Greene says he expects the last Reagan tape to be finished before the jury breaks for lunch. In tapes the jury viewed today, Reagan says that to this day he is NOT certain money from secret U-S arms sales to Iran was diverted to Nicaragua's Contra rebels. Poindexter was Reagan's national security adviser.

Czech leader Vaclav Havel says Czechoslovakia will NO longer export the plastic explosive Semtex... which is used by international terrorists.

Havel told a London news conference that Libya likely has enough of the virtually UNdetectable substance to last for the next 150 years. He says Czechoslovakia's former communist government supplied one-thousand tons of Semtex to Libyan leader Moammar Gadhafi . Gadhafi is alleged to have supplied the explosive to the Irish Republican Army.

#90081u2221 03/22/1990 ~United Press International

SANTIAGO, CHILE (MARCH 22) UPI - New civilian President Patricio Aylwin publicly reprimanded former military dictator Gen. Augusto Pinochet Thursday for comments he made about the attempted assassination of a former member of the military junta.

Aylwin's statements marked the first time he has publicly criticized the commander of the powerful 60,000-member army since Pinochet gave up the presidency on March 14.

On Wednesday, Pinochet's former air force commander, Gen. Gustavo Leigh, was shot five times, including once in the head, by two gunmen at his real estate office. Another retired air force official, Gen. Enrique Ruiz Bunger, a partner in the real estate firm, also was wounded.

Pinochet, according to the newspaper Las Ultimas Noticias, said Wednesday the attack was ''going to (be) the first of a series. Others will follow.''

Aylwin, a 71-year-old opposition leader elected president in December, said Pinochet should have spoken to him before making such a public statement.

''It is strange to me that if he has the information to express such a thing publicly that he did not start by communicating it to me,'' Aylwin told reporters before visiting the two wounded former generals.

Several callers to Santiago news media have claimed responsibility for the attack. One caller to a radio station said it was the work of a communist guerrilla group. Another, who called a newspaper, claimed the attack was carried out by a far-right group because Leigh had been a traitor to the principles of the coup that brought Pinochet to power.

Leigh ordered the bombing of the presidential palace during the 1973 coup that ousted the elected government of Marxist President Salvador Allende. Leigh was a member of the ruling junta until he was ousted in 1978 in a bitter dispute with Pinochet, who by then was president.

Leigh, 70, remained in the military hospital Thursday, and his condition was described as stable by a spokesman.

Aylwin has called on Pinochet to retire from the army, but Pinochet has said he will remain as army commander as the constitution allows.

#90081u2242 03/22/1990 ~United Press International

BURBANK, Calif. (MARCH 23) UPI - Texas investor Harold Simmons, campaigning to replace the Lockheed board of directors, sought Thursday to reassure stockholders that he will build up the defense giant rather than dismantle it.

''I don't consider myself a corporate raider,'' said Simmons, speaking at a news conference at Burbank Airport, next to Lockheed's Aeronautical Systems plant. ''I consider myself a corporate builder.''

Simmons, who holds nearly 19 percent of Lockheed's stock, continued to portray himself as being interested in building up the value of the company, rather than as an investor wanting to recoup an estimated $100 million loss on his $530 million investment.

Simmons, who has acquired control of four other companies covering eight different industries since 1981, said his record shows that he has turned around those companies by forcing them to concentrate on profitability.

Lockheed, hit by nearly $500 million in cost overruns on two defense contracts, earned only $2 million on sales of $9.9 billion in 1989. ''That is an almost ridiculous return on investment,'' Simmons said.

Simmons bought his Lockheed stake at an average cost of $44 a share. The price of Lockheed's stock closed Thursday at $35.625 a share, up 25 cents, on the New York Stock Exchange.

''I''m not interested in getting $50 a share for my stock,'' Simmons said. ''I'm looking to get $500 a share five years from now.''

Simmons repeated his assertion Thursday that the performance of Lockheed, the nation's eighth-largest defense contractor, has been hampered because its management is too focused on diversification and sales volume.

Simmons continued to promise he will concentrate Lockheed on its core Aeronautical Systems and Space and Missiles businesses. He said the company should look for partnerships with commercial aircraft builders like The Boeing Co. and McDonnell Douglas Corp., which have racked up big backlogs in orders.

Simmons also said, as he has previously, that he would strongly consider selling off Lockheed's Technology Services and Eletronic Systems divisions without making a definite commitment to doing so. He called the 1986

purchase of Sanders Associates for $1.2 billion ''a terrible acquisition '' saying Sanders, which produces electronic defense equipment, was overpriced and has performed poorly.

Simmons also stated flatly that he will not raid the company's $5.7 billion pension fund. ''We do not intend to terminate, raid or touch the pension fund,'' he said.

Analysts have speculated that Simmons has launched the takeover attempt because the pension plan may be over-funded by as much as $1.5 billion. The issue has become crucial in the proxy fight since employees hold more than 18 percent of the stock.

Lockheed has denied that a surplus exists and, as part of its campaign against the Simmons' slate, its board has approved amendments that would prevent the plan from being terminated for two years after any change in corporate control.

Simmons also said that he does not plan to replace the current management, including Chairman Daniel Tellep, if he wins control of the board.

The news conference was the first of two Simmons scheduled for Thursday to present his plans for Lockheed, with the second set for Santa Clara, Calif. He also held similar events last week in New York and Boston.

Simmons has budgeted $6 million on the proxy fight, while Lockheed plans to spend $8 million.

#90081u2243 03/22/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (MARCH 23) UPI - Fierce fighting between leftist rebels and government troops reportedly left 14 people dead in northern El Salvador, officials said Thursday.

The forces clashed Wednesday as the U.S.-backed government said it was removing obstacles to stalled peace talks.

Separately, Americas Watch, a human-rights group, issued a report saying that after nearly $1 billion in direct U.S. military aid to El Salvador, the United States has failed to spur improvements in the Salvadoran military's human-rights performance.

''Twelve subversives and two soldiers died, and another 12 soldiers were wounded in fierce combat yesterday between units of Suchitlan battalion ... and elements of the Farabundo Marti (National Liberation Front),'' the Armed Forces Press Committee said Thursday in its daily combat report.

A spokesman for the military said the fighting began Wednesday morning when soldiers surprised rebel columns near Las Vueltas, a town located 33 miles north of San Salvador in the province of Chalatenango. Combat continued well into the night and then erupted again before dawn Thursday, he said.

There were no immediate reports of casualties in Thursday's fighting, which comes a day after a government spokesman announced that President Alfredo Cristiani was dropping conditions for resuming talks with rebels aimed at ending the decade-long civil war. The war has cost more than 72,000 Salvadoran lives, mostly of civilians.

Political observers say Cristiani's move could open the door for peace talks, which both sides claim to want. They say talks could begin as early as mid-April.

In a broadcast on clandestine Radio Venceremos, the FMLN declined to comment on the government's announcement, saying United Nations mediators should be the ones to announce a date and place for future talks.

A report by Americas Watch cited the Nov. 16 murder of six Jesuit priests, their housekeeper and the housekeeper's teenage daughter by members of the military as ''perhaps the central example of the failure of U.S. assistance to improve the Salvadoran military's human-rights performance.''

The report alleged that members of the U.S.-trained Atlacatl Quick-Reaction Battalion ''professionally obeyed orders from their officers to kill the Jesuits in cold blood.''

Several members of the Salvadoran military were arrested in connection with the murders and are facing trial.

During the past 10 years, the United States has provided El Salvador with $892 million in military aid and $2.8 billion in economic aid, the report said.

Americas Watch issued its report Thursday, two days before the 10th anniversary of the assassination of Archbishop Oscar Romero by a right-wing death squad.

''These two events - the murder of Archbishop Romero in 1980 and the slaying of the Jesuits in 1989 - stand as bookends to the decade, offering harsh testimony about what really rules El Salvador and how little they have changed,'' the report said. ''Ten years later, priest-killing is still a preferred option for those who simply will not hear the cries for change and justice in a society that has had too little of either.''

Cristiani ''probably does not exercise substantial control over the armed

forces,'' the report added.

Although focusing on abuses by the military, Americas Watch said that the FMLN also has carried out assassinations and that rebel land mines have inflicted heavy losses on civilians.

Working from data provided by Tutela Legal, the Catholic Church's human rights office, Americas Watch said government military and para-military forces were responsible for 55 civilian deaths during the first 10 months of 1989. Right-wing death squads took 38 lives, it said, while the FMLN killed 59 civilians, 25 of them with land mines.

#90081u2256 03/22/1990 ~United Press International

CODY, WY. (MARCH 22) UPI - Rescuers on snowmobiles reached six stranded snowmobilers in northwest Wyoming's rugged Beartooth Mountains near Yellowstone National Park Thursday and began leading them to safety.

Park County Sheriff Dan Hodge said communications indicate the six people, five of them from Ohio, appeared to be in good condition after spending two nights in the mountains.

However, he said it was important to get them to safety Thursday because blizzard conditions were approaching the area from the north. Once they reached safety they could face citations for illegal use of snowmobiles in a wilderness area.

Gallatin National Forest District Ranger John Logan said the area where the snowmobilers were found was deep inside the forest's Absorka-Beartooth Wilderness, where federal law prohibits using snowmobiles.

Logan said issuance of citations will depend on whether the snowmobilers entered the wilderness area deliberately.

Hodge said it was still uncertain how the snowmobilers became stranded near Granite Lake in the mountains near the Montana border, but the rescuers reported terrain made it impossible for them to leave the area the same way they entered it.

The six people left Cooke City, Mont., on rented snowmobiles Tuesday for a daylong outing and were reported missing when they did not return as expected.

A search was launched and a Civil Air Patrol plane spotted the stranded snowobilers late Wednesday. However, poor visibility made it impossible to fly a helicopter into the area to rescue them.

Hodge said his department took over the rescue effort when it was discovered the snowmobilers had traveled a few miles into Wyoming and a plane dropped supplies, including gasoline, to them early Thursday.

Rescuers using skis and snowshoes also reached them before the snowmobiles arrived later in the day.

Weather conditions were favorable during the two nights the snowmobilers were stranded, but Hodge said conditions were deteriorating rapidly to the north in Montana.

''I don't think they want to spend another day up there,'' he said.

(MARCH 22) UPI - Military officials say Israeli soldiers killed two Palestinians who the army says ignored orders to halt. Two other Palestinians were captured in the West Bank town of Nablus. Palestinian reports say the victims were shot by soldiers in civilian dress who ordered the men to stop. Israeli officials say one of those captured was a member of the Black Panther gang, whose leader and three other members were killed in a December shooting in Nablus. The Israeli army has pledged to crush the gang it blames for killing at least 16 Palestinian collaborators.

The United States and Soviet Union today agreed on terms for a five-year grain agreement that could be worth six BILLION dollars. The Bush administration says the agreement- quote- ''represents a welcome advance'' in U-S-Soviet relations. The accord requires Moscow to buy more grain than in the past but gives it flexibility in meeting the goal. Agriculture Secretary Clayton Yeutter says only a few technical issues remain before the agreement can be signed.

A senior Chinese official in Beijing says China's continuing austerity program has cost some three-point-five Million rural workers their jobs. The agriculture minister says one-Million of the workers were laid off because of a nationwide slowdown of construction. The rest, he says, lost their jobs when factories stopped production.

#90081u2289 03/22/1990 ~United Press International

(MARCH 22) UPI - A confused oil market paused for some soul-searching Thursday, with prices ending mixed after choppy trading in a narrow range.

''The market is trying to find out what is going on itself. ... It's one of those soul-searching moments,'' said Kevin Breslin of United Energy Inc. in New York.

Trading was ''choppy in a narrow trading range,'' Breslin said, with the market unable to coalesce on either upward or downward price movement.

On the New York Mercantile Exchange, the May delivery contract for the benchmark West Texas Intermediate crude edged up a mere 4 cents to $20 a barrel after trading as high as $20.18 and as low as $19.94 a barrel.

Trading volume was a light 68,213 contracts.

The June and July delivery contracts declined 1 cent to $20.19 and 11 cents to $20.25 a barrel, respectively.

On the U.S. Gulf Coast cash market, WTI for prompt delivery climbed 15 cents to $19.75 a barrel.

One market factor was a Vienna report of OPEC Secretary-general Subroto saying that cartel output was 23.7 million barrels a day in February and that production would rise in the future, said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. in New York.

The 13-nation Organization of Petroleum Exporting Countries, which pumps more than a third of the world's crude, has set a daily output ceiling of 22 million barrels for the first half of 1990.

There has been downward pressure on world crude prices since last weekend's Vienna meeting of OPEC oil ministers failed to address the overproduction issue and quota-cheating by Kuwait and the United Arab Emirates.

On the Merc, unleaded gasoline for April delivery declined 0.56 cent to 57.38 cents a gallon, while the May contract fell 0.47 cent to 61.98 cents a gallon. They had risen Wednesday by 0.63 cent and 1.24 cents, respectively.

On the New York Harbor cash market, unleaded gasoline skidded 0.35 cent to 56.30 cents a gallon after rising a total of 2.4 cents Wednesday and Tuesday.

The oil industry's American Petroleum Institute reported late Tuesday that gasoline inventories declined 2.5 million barrels last week to 241.2 million barrels, slightly higher than the 241 million barrels of a year ago.

April delivery No. 2 home heating oil, which also is used as diesel fuel, slipped 0.53 cent on the Merc, while losing 1.3 cents on the New York Harbor spot market to 57.75 cents a gallon.

On the European spot market, Britain's widely traded North Sea Brent barely rose 1 cent to $17.85 a barrel.

The UAE's Dubai light, the key OPEC crude from the Middle East shipped mainly to the Far East, duplicated Wednesday's increase by gaining 5 cents to $15.35 a barrel.

-30- 2930

#90081u2293 03/22/1990 ~United Press International

ANCHORAGE, AK (MARCH 22) UPI - Exxon Valdez Capt. Joseph Hazelwood was acquitted of three charges but found guilty of the least serious misdemeanor against him Thursday in his trial in the grounding of the tanker that caused the worst oil spill in U.S. history.

A jury found the fired skipper guilty of negligent discharge of oil, but acquitted him of a felony charge of criminal mischief and the two most serious misdemeanors he faced, reckless endangerment and operating the tanker while intoxicated.

The negligent discharge conviction carries a possible maximum sentence of 90 days in jail and a $1,000 fine. State Superior Court Judge Karl Johnstone set a meeting on sentencing for later in the day.

Hazelwood's wife burst into applause in the courtroom upon hearing the verdict, which came two days before the first anniversary of the catastrophic spill.

The Exxon Valdez grounded early March 24, 1989, on charted Bligh Reef in the pristine waters of Prince William Sound, causing an 11-million-gallon oil spill.

The gooey slick that resulted from the worst such spill ever in the United States coated 1,200 miles of shoreline along part of the extensive coast of southern Alaska and killed tens of thousands of sea birds, otters, seals and other animals.

After the jury's decision, Exxon Corp. issued the following statement from its offices in New York: ''We are pleased that the ordeal of the trial is over for Capt. Hazelwood and his family.

''The verdict would seem to confirm the view that the grounding of the Exxon Valdez was an accident,'' the statement said. ''In light of pending litigation, any other comment would be inappropriate.''

Hazelwood, 43, of Huntington, N.Y., was the only individual charged with crimes arising out of the spill, but the Exxon Corp. and Exxon Shipping Co. were charged in a five-count federal indictment last month and 150 civil suits have been filed against Exxon, many of them also naming Hazelwood.

The jury of six men and six women spent a total of 10 1/2 hours deliberating in Hazelwood's trial. The panel got the case late Tuesday but did not begin deliberations until Wednesday morning. It returned a verdict at 12:45 p.m. local time.

In closing arguments earlier this week in the eight-week trial, defense lawyers pointed out that 21 witnesses testified that Hazelwood acted

normally and no one testified he was impaired the night of the grounding.

Hazelwood's defense lawyers in the trial blamed the third mate and the helmsman for failing to execute turn orders - based on instructions from Hazelwood to return to tanker lanes after a detour around icebergs, thus causing the devastating grounding.

The defense lawyers further said that the Coast Guard radar watchstander should have seen the tanker headed for disaster and warned it.

Hazelwood had left the bridge of the ship and gone to his cabin about 15 minutes before the grounding shortly after midnight.

Prosecutors had blamed Hazelwood's vodka drinking the day before in Valdez for a series of judgments and actions that allegedly put the loaded tanker on a course for disaster.

Although Hazelwood declined to testify in his own defense, Johnstone cautioned the jury not to hold that against the skipper.

Jurors heard 60 other witnesses, including experts offering opposite conclusions about events.

The ex-skipper had faced up to seven years, three months in jail and a $61,000 fine if convicted of all charges.

To find Hazelwood guilty of drunkenness, the judge told the jury, ''The question is, what effect did any alcohol consumed by the defendant have on him'' when the Exxon Valdez sailed out of the Alaska oil port under his command.

Prosecutors used a controversial theory of backward extrapolation in an attempt to show that Hazelwood's blood alcohol content of 0.061 some 10 1/2 hours after the wreck was probably above the 0.10 legal driving limit at the time of the accident.

The defense charts requested by jurors weaken the prosecution extrapolation evidence, but jurors needed only to find that Hazelwood operated the tanker under the influence to convict him of that charge.

Witnesses were unanimous in testifying Hazelwood showed no sign of impairment because of drinking. In closing arguments, defense lawyer Dick Madson hinted that after the grounding the despondent skipper, seeing his career ruined, may have had enough to drink to establish the blood alcohol level in the only test taken following the wreck.

To find Hazelwood guilty of reckless endangerment, jurors would have had to conclude he created a substantial risk of serious physical injury to

others.

To be convicted of the felony, criminal mischief, jurors must find that Hazelwood used dangerous means to create recklessly a risk of more than $100,000 damage to Prince William Sound.

For Hazelwood to be found guilty of negligent discharge of oil, jurors had to conclude that the skipper's conduct was a substantial factor in the spill.

#90081u2320 03/22/1990 ~United Press International

(MARCH 22) UPI - Greyhound executives agreed to return to Washington to meet with federal mediators in an attempt to resolve the 3-week-old walkout by many of the bus line's 9,300 union employees, the company said Thursday.

P. Anthony Lannie, Greyhound's executive vice president and chief negotiator, accepted the invitation from the Federal Mediation and Conciliation Service to resume discussions, but Greyhound spokesman George

Gravley declined to speculate on where that meeting could lead.

Friday's meeting will be the first discussion since Lannie and his bargaining team walked out of contract talks Sunday in Tucson, Ariz., saying the union's financial demands were still too steep and accusing union leaders of encouraging violence on the picket lines.

While representatives of the nation's largest intercity bus line were asked to Washington, no such invitation had been extended to the bargaining unit of Amalgamated Council of Greyhound Local Unions, union spokesman Jeffrey Nelson said.

''We have not heard from the mediators, but obviously if they ask us to participate, we will,'' Nelson said. ''We are happy the company is agreeing at least to meet with the mediator if they can't find it in their hearts to meet with their own employees.''

Greyhound officials have said the two sides are far apart on wages and benefits. During the last talks, the union reduced its demands by $30 million to a total of $185 million over three years, but the company continued to say its $63 million offer was the most it could afford.

In an attempt to keep up service in the face of the massive walkout by most of the company's 6,300 drivers and 3,000 other union employees, Greyhound has hired more than 1,000 non-union replacement drivers, a move that has angered union members.

The latest incidents of strike-related violence were reported near St. Louis early Thursday morning, where two buses were struck by gunfire from passing cars, the 16th and 17th reports of shots fired at buses since the strike began March 2. No one was injured in either incident.

Joe Sedey, a dispatcher for Greyhound's St. Louis terminal, said there had been no specific threats against buses in the area, which has remained relatively calm during the strike.

''If you get out there and talk to the union people marching up and down, the first thing they'll tell you is it's a damn shame it happened, and it sure ain't none of them,'' Sedey said.

Another bus was hit by a bullet in San Antonio, Texas, Wednesday evening. No one was injured and the driver and passengers were unaware of the shooting until a scheduled stop 75 miles away in Austin, the Greyhound spokesman said.

''Apparently the driver thought a rock had hit the bus,'' Gravley said. An off-duty Travis County sheriff's deputy noticed a bullet hole in the outer pane of the passenger door window, but the bullet apparently did not

penetrate the inner pane of the double-paned window.

Union officials Thursday challenged the company's claim that its replacement drivers are ''safe, reliable and courteous,'' issuing a list of 59 reported injuries to picketing union members, some family members and one Newark, N.J., police officer.

The union said 49 of the 59 injuries involved people hit by buses while walking picket lines.

Late last year, Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year. Union members, citing a 22 percent pay cut they took when the company was sold to a group of Dallas investors in 1987, rejected the offer.

Greyhound carried 22 million passengers last year, primarily travelers living in smaller communities.

#90081u2332 03/22/1990 ~United Press International

CHICAGO (MARCH 22) UPI - A federal judge Thursday approved a settlement of a dispute involving equipment and site restrictions for abortion clinics, thwarting anti-abortionists who had hoped the Supreme Court would use the case to chip away at the 1973 court decree permitting abortions.

The ruling came in a case filed by Dr. Richard Ragsdale, a Rockford abortion clinic operator who contended the state's restrictions added unnecessary costs to abortions, made them prohibitively expensive in some parts of the state and turned abortion clinics into mini-hospitals.

Ragsdale won his challenge in federal district and appellate courts and the case had been scheduled for argument before the Supreme Court, which both sides of the abortion controversy expected would use it to further erode Roe v. Wade, the 1973 Supreme Court decision that gave women the right to an abortion.

U.S. District Judge John A. Nordberg said a consent decree worked out by Attorney General Neil Hartigan, the state Department of Public Health and the American Civil Liberties Union, representing Ragsdale, is ''lawful, fair, reasonable and adequate.''

Nordberg said opponents of the settlement are wrong in contending the Supreme Court would have upheld the restrictive regulations and also rejected arguments the settlement would endanger women's health, saying both sides had consulted with doctors in drawing up their agreement.

Victor Rosenblum, legal counsel for the Illinois Right to Live Committee,

called the ruling an ''absolute triumph of politics over law.''

''The question of how a state attorney general can modify the express will of the legislature of his state remains to be answered,'' Rosenblum said.

''We might as well dissolve the General Assembly in Springfield,'' said Richard O'Connor, executive director of the committee. ''If the attorney general of Illinois can arbitrarily veto regulations passed by the citizens' elected representatives and get away with it, we no longer have representative government.

''We live under a dictatorship.''

Hartigan said earlier the agreement would give the state the ability to regulate abortion clinics while preserving a woman's right to privacy.

''For every woman living in Illinois, I hope the effect of the agreement ... will soon result in the implementation of a set of regulations that guarantee that any abortion performed in this state must be performed under conditions that assure the health and safety of the woman,'' Hartigan has said.

ACLU attorney Colleen Connell said the agreement will pave the way for more doctors to open abortion clinics, making it easier for women throughout the state to obtain the procedure.

The agreement permits abortions to be performed in the offices of private physicians and allows doctors to determine whether the setting is appropriate to the individual patient.

It also permits abortions in clinics devoted entirely to the procedure and does not require those clinics to have special equipment or personnel on hand for abortions up to the 18th week of pregnancy. The procedure also can be performed in ambulatory surgical facilities.

Connell said the new regulations do away with unnecessary restrictions on the physical site.

NEW YORK (MARCH 22) UPI - The 1990 major league season, which is starting a week late because of a lockout, will be extended three days, allowing each team to play a 162-game schedule, the baseball commissioner's office announced Thursday.

One of the two series missed because of the delayed start of the season will be made up during each team's regular schedule, while the other

series will be played during the period from Oct. 1-3.

The National League playoffs will begin Thursday, Oct. 4 in the NL West, while the AL playoffs will open Saturday, Oct. 6 in the East. The World Series will start Tuesday, Oct. 16 in the National League.

''One of the major objectives was to preserve the full 162-game schedule, and I am pleased that we have accomplished that,'' Commissioner Fay Vincent said. ''I thank CBS and the Players Association for their cooperation in making this schedule adjustment possible.''

Detailed listings of the rescheduled games will be released by the league offices at a later date. Complete post-season schedules also will be announced later in the year.

WASHINGTON (MARCH 22) UPI - A House panel approved several changes in the food stamp program - America's major anti-hunger program - Thursday, including a larger deduction for housing, which could mean larger payments to some families.

The package of changes now goes to the full House Agriculture Committee for consideration. They constitute the first portion of the new farm policy law to be approved by a congressional subcommittee.

Agriculture Secretary Clayton Yeutter expressed concern, in view of pressure to reduce the federal deficit, about the additional cost the changes could entail.

Backers have estimated the changes would cost $600 million in the first year, rising to $900 million by the third year.

The changes include renewal of the Temporary Emergency Food Assistance Program and authorization of increased spending of at least $70 million a year. The program now spends $120 million a year.

Members of the nutrition subcommittee also approved continuation of the nutrition assistance program for Puerto Rico with gradual increases in funding through 1995. The White House has proposed transferring the program to the Department of Health and Human Services and running it as an $825 million grant.

About 19.4 million people receive food stamp benefits each month. Benefits are estimated to cost $14.7 billion this fiscal year.

The major change proposed by the subcommittee would be to allow families a

larger deduction for housing expenses when figuring their incomes, a key step in determining the size of benefits. The maximum deduction now is $177 a month.

The subcommittee approved a plan to gradually raise the size of the deduction before completely eliminating it.

According to experts, nearly two-thirds of poor people pay at least half of their income in rent.

The plan also would mandate an increase in food stamp benefits, based on the cost of food under the so-called thrifty food plan.

#90081u2442 03/22/1990 ~United Press International

SPACE CENTER, HOUSTON (MARCH 22) UPI - NASA engineers Thursday debated the possibility of a shuttle flight to repair or salvage a stranded $150 million communications satellite, and while no final decisions were made, such a mission would appear to be technically feasible, officials said.

Space agency engineers, officials with satellite-builder Hughes Aircraft Co. and the spacecraft's owner, the 118-nation International Telecommunications Satellite Organization, met all day Thursday to assess their options.

''Some of the issues raised included hardware development to accommodate the spacecraft, crew training requirements, orbiter configuration and weight constraints and safety factors,'' NASA said in a statement. ''While the discussions were very preliminary, no insurmountable technical issues were identified.''

But NASA officials said ''no decisions were made as to whether such a mission could be accomplished.'' Additional meetings are planned to ''further discuss aspects of the Intelsat 6 status and rescue options.''

The Intelsat 6 relay station was stranded in a precariously low orbit March 14 when a wiring problem prevented the spacecraft from separating properly from its Titan 3 launch rocket, a major failure for America's fledgling commercial space program.

Intelsat engineers in Washington had no choice then but to separate the satellite instead from an on-board rocket needed to boost the relay station to its operational altitude of 22,300 miles above the equator.

While the move separated the satellite from the Titan 3 second stage, the $150 million spacecraft remained in a dangerously-low orbit. Engineers were able to fire on-board liquid-fueled rockets last Friday to put the

solar-powered spacecraft into a higher orbit, saving it from a fiery plunge into the atmosphere.

Even so, the otherwise-healthy Intelsat 6 remains stranded thousands of miles below its operational altitude and useless as a communications station.

On Monday, Intelsat Director General Dean Burch sent a letter to NASA Administrator Richard Truly formally asking the space agency to consider the feasibility of a shuttle rescue mission - the only option for saving the satellite.

Engineers at the Johnson Space Center met Thursday to consider just that, and while at first blush such a flight would appear to be a long shot, NASA managers would not rule out the possibility.

NASA repaired or retrieved four satellites during three pre-Challenger shuttle missions but whether the agency can save Intelsat 6 remains to be seen. It would certainly be difficult.

The 10,000-pound Intelsat 6 is the largest commercial communications satellite ever built, measuring 18 feet long and 12 feet in diameter.

While it originally was built for launch from the space shuttle, it is not equipped with a ''grapple fixture,'' which would be needed for capture by a shuttle robot arm. In addition, it is not equipped with hardware that would allow it to be mounted in a shuttle cargo bay for return to Earth.

But it is not clear that the satellite needs to be returned to the ground. Its major problem is the loss of the solid-fuel booster and it is possible spacewalking astronauts could bolt on a replacement, allowing the satellite to continue its trip to ''geosynchronous'' altitude 22,300 miles up.

Another potential problem is the loss of the liquid propellants expended raising Intelsat 6's orbit after the initial failure. But during a pre-Challenger shuttle mission, astronauts Kathryn Sullivan and David Leestma successfully demonstrated orbital refueling techniques.

The first shuttle repair mission occurred April 9, 1984, when spacewalking astronauts James ''Ox'' Van Hoften and George ''Pinky'' Nelson repaired the Solar Maximum Mission satellite, a valuable solar observatory that needed a new attitude control system.

During the previous shuttle mission in February 1984, two Hughes-built communications satellites launched from the shuttle Challenger were sent into useless, lopsided orbits when their solid-fuel boosters misfired.

NASA then mounted a crash effort to rescue the costly relay stations and both spacecraft were successfully retrieved Nov. 11 and 13, 1984, when spacewalkers Dale Gardner and Joseph Allen used jet backpacks to latch onto the satellites and pull them on board the shuttle Discovery for return to Earth.

During a shuttle mission in April 1985, a Navy communications satellite launched from Discovery was stranded in a useless orbit when it failed to activate minutes after ejection from the space shuttle.

In another daring space rescue, van Hoften and astronaut William Fisher successfully ''hot-wired'' the big satellite during an August 1985 mission bypassing its faulty activation system.

In one of the most dramatic moments of the shuttle era, van Hoften, standing on the end of Discovery's 50-foot robot arm, literally heaved the 15,000-pound satellite away into space, imparting a slow, stabilizing spin. The satellite later was successfully fired to its operational orbit 22,300 miles up.

#90081u2462 03/22/1990 ~United Press International

WASHINGTON (MARCH 23) UPI - Western Union Corp. reported a loss for 1989 and said that it could be forced to seek Chapter 11 bankruptcy protection from creditors, according to a filing made public Wednesday.

In a March 13 filing with the Securities and Exchange Commission, the communications and information services company said that it suffered a net loss of $32.3 million last year, down from $1.1 billion in 1988. Fourth-quarter losses were $14 million, down from $245 million in the 1988 period.

The Upper Saddle River, N.J.,-based company admitted it was facing a serious financial crunch and suggested that it could be forced into Chapter 11 proceedings.

''Western Union is currently operating under significant constraints which limit its ability to meet its funding requirements,'' the filing said. ''Western Union has no available bank lines of credit and has pledged a substantial portion of its assets to secure existing senior indebtedness and pension plan obligations.''

The company warned that ''current cash levels and anticipated cash flows for 1990 will not be sufficient to permit Western Union to both fund its operations and meet its debt service obligations for the entire year.''

Unless it can restructure the terms of its debt, sell assets or sell new

securities, Western Union said it would be unable to make the June 15 interest payments on 19 1/4 percent notes and 16 percent notes due June 15 1991, for a total of $51 million.

Also, the company would not meet the minimum subordinated capital test under the terms for its 19 1/4 percent notes, possibly as early as the end of the first or second quarter. Such failure to make interest payments or offer to repurchase notes would result in a default and the inability to repay other debt due in 1991 or thereafter.

Noting that the is no assurance that efforts to overcome such difficulties will be successful, the Western Union filing said ''failure to effect a sufficiently favorable exchange (of debt) or to raise funds through the sales of assets could result in default and could force Western Union to seek protection under the U.S. Bankruptcy Code.''

Warren Bechtel, a Western Union spokesman, said the company ''is looking to restructure our debt. We will come out with a proposal and we will go to our bondholders and see what they think about our proposal.''

#90081u2482 03/22/1990 ~United Press International

WASHINGTON (MARCH 22) UPI - A House committee reached agreement Thursday on tougher measures to reduce urban smog, resolving one of the knottiest issues blocking quick House action on clean air legislation.

By vote of 38-2, the House Energy and Commerce Committee adopted a compromise crafted in backroom negotiations led by Rep. Henry Waxman, D-Calif., and Rep. John Dingell, D-Mich., chairman of the committee.

''I think we've come to a point now that we've all hoped we could reach over a 10 year period,'' Dingell said. ''I think it keeps faith with what all of us have said we wanted to achieve.''

''I think we have a proposal that all of us can stand behind,'' said Waxman.

The compromise lays out pollution control measures and compliance schedules for the 101 cities now exceeding federal health standards for ozone smog. Most of those cities would be required to attain the standards by the turn of the century while the nation's smoggiest city, Los Angeles, would have until 2010.

One key provision of the compromise would require the nation's most polluted cities to clamp down more tightly on smaller industrial sources of smog-causing emissions, with the exact level of regulation determined by the severity of an area's smog problem.

Current law generally calls for regulation of only those factories or businesses emitting more than 100 tons of pollutants each year.

Under the compromise, cities with ''serious'' pollution problems would have to regulate all sources above 50 tons per year while ''severe'' cities would have to go down to 25 tons and Los Angeles, the nation's sole ''extreme'' area, 10 tons.

Some cities already have imposed those lower limits on some categories of smaller sources.

Among other key elements, the compromise would:

-Impose tighter controls on new industrial or commercial sources of pollution.

-Set emission reduction ''milestones'' that cities would have to meet every three years to ensure steady progress toward compliance with federal health standards.

-Require manufacturers of certain polluting consumer products, such as paint and cleaning solvents, to make greater efforts to develop cleaner substitutes. Legislators said such products contribute 27 percent of the smog-forming emissions plaguing cities but they are not now subject to regulation.

While House deliberations moved forward, the Senate clean air debate slowed as Senate leaders and White House officials struggled to reach a compromise with Sen. Robert Byrd, D-W.Va., on his plan to help coal miners threatened by acid rain reduction.

Senate leaders and the White House oppose Byrd's legislation as too expensive and a potential ''deal-breaker'' for their compromise clean air bill, worked out in three tortuous weeks of negotiations last month between senators and administration officials.

Senate leaders have warned that if the compromise is significantly altered the administration may pull out, jeopardizing overall prospects for the passage of clean air legislation.

However, after weeks of intensive lobbying - including personal visits with 25 senators - Byrd said he was ''very, very close'' to having enough votes to pass his proposal, which would provide special unemployment benefits to coal miners and other workers who lose their jobs because of clean air legislation.

Byrd said his bill is necessary because an estimated 3,000 to 5,000

high-sulfur coal miners in Appalachia and the Midwest stand to lose their jobs because of pending acid rain control measures.

The clean air bill requires coal-burning power plants to reduce sulfur dioxide emissions linked to acid rain. Many utilities are expected to meet those requirements by switching from high-sulfur eastern coal to low-sulfur coal primarily mined in the West.

In an effort to gain further support for his proposal, Byrd late Wednesday broadened his plan to include workers other than coal miners.

Byrd said he was responding to objections from senators that it is unfair to help coal miners and not workers in other industries - such as steel and chemicals - also likely to be hard-hit by increased pollution control costs.

He also scaled back his orginal $700 million benefit plan for coal miners, reducing its overall cost to $500 million. Still, under Byrd's plan, coal miners would receive higher payments for a longer period than workers in other industries.

#90081u2486 03/22/1990 ~United Press International
(MARCH 22) UPI - A federal jury in Washington, D-C, finished watching Ronald Reagan's videotaped testimony in which the former president says he canNOT recall key events in the Iran-Contra scandal. The tapes were played at the trial of John Poindexter, once national security adviser under Reagan. During the final portions of Reagan's videotaped testimony, Poindexter was joined in court by his wife, Linda, and his 26-year-old son Mark, a Navy lieutenant. Poindexter is accused of lying to Congress about the Iran-Contra affair.

The chairman of the Senate Armed Services Committee says demands for big cuts in defense spending could come at the expense of troop strength and training. Georgia Senator Sam Nunn today asked President Bush to fill in what he calls five ''big blanks'' in the Pentagon's long-term plans. Nunn told fellow senators in a floor speech that the administration's 306-BILLION-dollar 1991 defense budget is ''based on a 1988 threat and a 1988 strategy.''

Moderate Democrats trying to move the party to the center and recapture the White House UNveiled new principles designed to convince voters that Democrats represent mainstream America. Top members of the Democratic Leadership Council will meet for three days in New Orleans. The group is made up of mostly conservative and moderate party officials. Georgia Senator Sam Nunn heads the group. He says the principles and the New Orleans conference should help stimulate discussion and move the

Democratic party more to the mainstream.

Idaho lawmakers are expected to take final action today on a measure that could give the state the most restrictive abortion law in the nation. The measure bans all abortions except in cases of rape, incest, profound fetal deformity or threat to the life or health of the mother. It has cleared the Idaho House of Representatives, and the state Senate is expected to vote by late this afternoon. Political observers predict the bill will pass by a narrow margin and be sent to Democratic Governor Cecil Andrus to be signed into law.

#90081u2493 03/22/1990 ~United Press International

NEW YORK (MARCH 22) UPI - Assets of the nation's 505 money market mutual funds increased $199 million to $391.23 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $637 million to $166.78 billion, assets of general purpose funds decreased $968.9 million to $132.57 billion and institutional fund assets increased $530.9 million to $91.88 billion.

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were up to 7.67 percent from 7.65, while 30-day simple yields rose to 7.65 percent from 7.64.

The average maturity of fund portfolios rose to 44 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mostly higher in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.08 percent, up from 6.07; Super-Now accounts 5.01 percent, unchanged; six-month certificates of deposit, 7.68 percent, up from 7.67; one-year CDs, 7.77 percent, up from 7.74; 2 1/2-year CDs 7.76 percent, up from 7.72; and five-year CDs 7.81 percent, up from 7.78.

The average rate for a one-year adjustable rate mortgage was 8.58 percent, up from 8.57.

The average rate on a 15-year fixed-rate mortgage rose to 9.95 percent

from 9.94 while the average rate on a 30-year fixed-rate mortgage was unchanged at 10.13 percent.

The average rate for a four-year automobile loan rose to 12.21 percent from 12.19.

#90081u2634 03/22/1990 ~United Press International

MINNEAPOLIS (MARCH 22) UPI - A Northwest Airlines pilot consumed 19 rum and coke drinks and was so intoxicated he fell out of his bar chair the night before a scheduled flight, federal authorities said Thursday in filing felony charges against the pilot and his crew.

Capt. Norman Prouse, 51, First Officer Robert Kirchner, 35, and Second Officer Joseph Balzer, 34, were charged with operating an aircraft while intoxicated. Local officials had filed misdemeanor charges against the three earlier in the day.

Under the federal charges, the three each face a maximum penalty of 15 years in prison and a $250,000 fine. The misdemeanor is punishable by up to one year in jail and-or a $1,000 fine.

The three were arrested the morning of March 8 after flying their jetliner with 91 passengers from Fargo to Minneapolis-St. Paul.

Authorities said the men had been drinking in a Moorhead, Minn., bar the night before the flight. Two blood tests were taken in Minneapolis, their licenses were revoked the next day and they were later fired.

Sources said Prouse, 51, had a blood alcohol concentration of 0.12 to 0.13 percent, while Kirchner and Balzer had concentrations of 0.06 or above. The Federal Aviation Administration sets 0.04 percent as a presumption of intoxication.

The federal complained, filed by U.S. Attorney Jerry Arnold, said the men ''began drinking heavily'' in a Moorhead, Minn., bar at 5:30 p.m. on March 7, the night before the early-morning flight.

Prouse, of Conyers, Ga., was accused of drinking ''approximately 19 rum and diet cokes during the evening,'' the complaint said. Kirchner, of Highland Ranch, Colo., and Balzer, of Antioch, Tenn., drank between five and six pitchers of beer between 5:30 and 10:30 that night, said Minneapolis City Attorney Robert Alfton.

The federal complaint said Balzer and Kirchner left the bar about 10:30 p.m. and ''both were visibly intoxicated.'' It said Prouse stayed until about 11:30 p.m. and ''shortly before leaving, he fell out of his chair

and had trouble getting up.''

Arnold said arrangements are being made for the defendants to turn themselves in voluntarily next week in Minneapolis.

Northwest fired the men last week but attorneys said the officers plan to appeal their license revocations before the National Transportation Safety Board next month and their dismissals through the Air Line Pilots Association.

On Wednesday, the Minneapolis city attorney decided to drop plans to prosecute the three crew members, deferring to federal officials.

#90081u2654 03/22/1990 ~United Press International

NEW ORLEANS (MARCH 22) UPI - An armed man suspected of committing a robbery at the Superdome shot and killed a police officer and was wounded in a shootout Thursday following a foot chase near New Orleans' City Hall, authorities said.

The incident began about 5 p.m. CST when security guards chased a robbery suspect from the Superdome, where the Georgia Tech team had just finished a practice session for Friday's NCAA Southeast Regional basketball game, police said.

The suspect, armed with a gun, dashed into City Hall, where city police officers joined the chase. The suspect led officers to the nearby warehouse district where he turned and fired, striking one officer. Other officers returned fire, wounding the suspect.

The injured officer was taken to Charity Hospital, where he was pronounced dead about 30 minutes after the shooting. The suspect was undergoing treatment at the same hospital, police said.

#90081u2725 03/22/1990 ~United Press International

(MARCH 22) UPI - A Philippine general says former first lady Imelda Marcos and a man who identified himself as a U-S Air Force officer were behind the December coup attempt in the Philippines. The U-S Embassy denies any American involvement in the mutiny and President Aquino's government says it accepts the U-S denial. The general made the statement in sworn testimony to the Philippine justice department.

President Bush says he's NOT going to try to tell each state how to write its abortion laws. Bush says his own position is that abortion is justified only in cases of rape and incest or when the pregnancy threatens a woman's life. But he says he'll let each state legislature debate and write its own laws.

Idaho's state senate is expected to approve the country's strongest anti-abortion law today. The bill would allow abortion only in cases of rape, incest, profound fetal deformity or threat to the life or health of the mother. The bill has already been signed by the state house and the Democratic governor supports the bill.

Snipers fired on two Greyhound buses traveling in the St. Louis area this morning, but authorities say NO one was injured. The shootings are the 16th and 17th times that Greyhound buses have been fired on since the company's bus drivers and other employees went on strike three weeks ago.

The Food and Drug Administration is expanding its recall of the dietary supplement L-tryptophan, which has been linked to a potentially fatal blood disorder. The recall now includes even tiny doses of the amino acid

in tablet, capsule, caplet, powdered, liquid or multi-ingredient form.

#90081u2732 03/22/1990 ~United Press International

MIAMI (MARCH 23) UPI - A federal judge Thursday gave conditional approval to a plea agreement involving charges that General Development Corp., one of Florida's largest and oldest real estate developers, bilked customers out of at least $100 million.

U.S. District Judge Lenore Nesbitt approved the agreement, pending arrangement of a 25-year restitution program that could cost the company at least $100 million.

Chairman Charles J. Simons was unavailable for comment.

Under the agreement announced last week, General Development agreed to plead guilty to one count of conspiracy and to pay a $500,000 fine, along with making restitution.

The plea agreement stems from a federal grand jury indictment returned March 14, charging General Development, former chairman David F. Brown and former president Robert F. Ehrling with seven counts of mail fraud, seven counts of interstate transportation of people to commit fraud and two counts of conspiracy to commit mail fraud.

Prosecutors were considering possible plea bargains with Ehrling and Brown who resigned March 9 as a result of the two-year investigation.

Under the restitution plan, people who bought more than 10,000 homes from the company between Jan. 1, 1983, and last January would be eligible for repayment in the form of company contributions to monthly mortgage payments.

The company and the officers were indicted for allegedly inflating the value of its homes and preventing prospective buyers, many from northern states, from checking the prices of competing properties.

The company has said it has eliminated the fraudulent practices.

A torrent of complaints were filed against the company in the mid-1980s, when interest rates plummeted and many homeowners tried to refinance their mortgages, only to find their homes were worth considerably less than they had paid for them.

In the complaints, customers said the company subsidized their trips to Florida to examine General Development's planned communities, structuring the trips so that they spent virtually every moment with a salesperson.

#90081u2761 03/22/1990 ~United Press International

ANCHORAGE, AK (MARCH 22) UPI - Exxon Valdez skipper Joseph Hazelwood, breathing a sigh of relief after being found innocent Thursday on charges of intoxication and recklessness, said he wants to return to sea because ''that's what I do.''

Hazelwood lawyer Michael Chalos said he planned to ask Exxon for back pay and to rehire the skipper fired a week after his tanker ran aground on Bligh Reef Mar. 24, 1989, causing the nation's worst spill.

''I'm not used to being in the limelight,'' Hazelwood said at an impromptu news conference a few hours after meeting with jurors who acquitted him of three charges but convicted him of the least serious charge.

Hazelwood, hugging his ''hero'' lawyers and surrounded by the media, said, ''I was a pretty anonymous character until a year ago.''

He said he wants to return to the life of a sea captain: ''I'd like to go back to sea. That's what I do.''

Hazelwood said, ''I just want to try to get along with my life now.''

At the first not guilty verdict, on the felony criminal mischief charge, Hazelwood said he heaved a big sigh and thought, ''Some of it's over.''

Two more not guilty verdicts followed, on charges of operating the tanker while intoxicated and reckless endangerment, before the judge read the guilty verdict for the fourth and final and least serious charge, negligent discharge of oil.

Hazelwood said jurors told him they didn't have much of problem reaching their verdicts. Hazelwood said he was glad they basically saw the case his way.

Keeping silent for the past year, Hazelwood said, ''wasn't easy ... I had to bite my tongue a few times.''

Speaking publicly for the first time, with a mob of media clustered around him in the lobby of the state courthouse, Hazelwood said he just wanted to resume his old life and return to sea. He declined to answer questions about his actions on the Exxon Valdez. He is named as a defendant in many of the 150 civil suits filed against Exxon.

Defense lawyer Chalos said he planned to fight for Hazelwood to keep his captain's license. Coast Guard license suspension proceeedings, initiated

after the grounding, were put on hold during the criminal case.

''It's his desire to go back to sea,'' Chalos said, adding that he planned to discuss this with Exxon. ''The only employer he ever had was Exxon. The only job he ever had was working on a tanker for Exxon.''

Chalos said he plans to ask Exxon for back pay for Hazelwood and for his job back.

Hazelwood, 43, of Huntington, N.Y., worked for Exxon for 20 years and became one of its youngest captains.

#90081u2773 03/22/1990 ~United Press International

NEW YORK (MARCH 23) UPI - The ongoing labor dispute at the Daily News fired up Thursday with the appearance of advertisements seeking replacements for workers in the event of a strike at the nation's largest metropolitan paper.

The ads, headlined ''No Experience Necessary,'' announced the tabloid was looking for ''a pool of unskilled applicants'' willing to replace potential strikers at the Pulitzer Prize-winning tabloid.

The campaign appeared to shore up the company's previously announced intention to continue publishing the News in the event of a walkout that could occur as soon as next week.

News management is negotiating with representatives for the 10 unions at the paper whose current contracts expire on March 30. The talks are considered crucial to the survival of the 71-year-old tabloid.

The ads, which appeared Thursday in several local newspapers and on radio stations, specifically targeted for replacement members of the mailers union, which last week voted to authorize a walkout.

Mailers bundle and tag newspapers and move them from the presses to the delivery trucks.

''We took this vote very seriously and therefore are seeking applicants to replace workers who go on strike,'' said John Sloan, the newspaper's vice president of labor relations.

''We consider this a direct threat against the New York Daily News,'' he added.

Sloan declined to say whether replacement staff would get the $19.96 hourly wage currently earned by mailers union workers but asserted the

company planned to offer ''competitive salaries'' with a ''generous benefits package.''

Mailers Union President George McDonald, who also heads the Allied Printing Trades Council, the unions' umbrella organization, was not immediately available for comment.

The ads, published Thursday in the News, The New York Times and The Amsterdam News, among other papers, were scheduled to run three more consecutive days, Sloan said.

One paper that declined to accept the ad was the New York Post, apparently because Post executives feared it might disrupt the tabloid's relationship with its own unions.

Sloan said the newspaper intends to interview applicants for all three of its production facilities in Brooklyn, Kearny, N.J., and Garden City, Long Island.

The interviews are scheduled to take place on Monday and Tuesday at the News's 42nd Street offices, he said.

#90081u2821 03/22/1990 ~United Press International

LOS ANGELES (MARCH 23) UPI - In a major victory for shareholders, Occidental Petroleum has agreed to meet twice a year and reveiw its strategy with representatives of the California Public Employees Retirement System, a spokesman for the pension fund said Thursday.

The agreement may be among the first instances in which a major corporation has agreed to meet regularly with an institutional shareholder, said Richard Koppes, general counsel for CalPERS, which holds about 0.6 percent of Occidental's outstanding common stock.

Koppes said Occidental has also agreed to consider including other institutional shareholders after the first meeting.

The agreement arose out of dissatisfaction by CalPERS over decisions by the Occidental board, headed by Armand Hammer, the company's 91-year-old chairman and chief executive officer. Some investors have been particularly rankled by the company's investment in the controversial Armand Hammer Museum and Cultural Center, which is under construction near Oxy headquarters in Westwood.

CalPERS and several other institutional investors have been challenging a proposed settlement of a shareholder suit filed in Delaware, where Occidental is incorporated, over that investment.

The agreement calls for CalPERS officials to meet twice a year with Occidental President Ray Irani, Senior General Counsel Gerald M. Stern and two outside directors. Both Irani and Stern are directors.

In exchange, CalPERS has agreed to drop a proposal that it had planned to make to Occidental shareholders at the annual meeting in May to form a shareholders advisory committee to the Occidental board.

#90081u3013 03/22/1990 ~United Press International

ALBANY, NY (MARCH 22) UPI - In a precedent-setting case, an appeals court ruled Thursday that it is not outlandish to claim that the damaging effects of the pregnancy drug DES might be passed to a third generation.

In its 4-1 decision, the Appellate Division of the state Supreme Court granted a trial to Patricia Enright, 30, of McDonough, N.Y., who argued that her child was born with brain damage as a result of DES ingested by her own mother 30 years ago.

DES, or diethylstilbestrol, a morning-sickness drug, was banned 29 years ago after studies determined it could cause cancer and infertility in the children of mothers who took the drug. The children have become known as ''DES daughters.''

Enright, a DES daughter, gave birth to a premature baby girl in August 1981 after a number of miscarriages.

The baby was born with severe brain damage and is confined to a wheelchair a situation Enright said was caused by deformities in her uterus caused by the DES her mother was prescribed during her pregnancy.

On behalf of her daughter, Karen, Enright filed a product liability suit against several drug companies, including Eli Lilly & Co. of Indianapolis and E.R. Squibb & Sons Inc. of Princeton, N.J.

The state Supreme Court in Chenango County had denied Enright a trial, dismissing her claims and attempt to recover damages. But the Appellate Division said, ''We see no sound basis for denying plaintiff (Karen) her day in court along with her mother.''

Enright's lawyer, Leonard Finz of New York, said the decision marks the first time in the nation that a third-generation challenge to DES has reached the appellate level.

Marie Abbott, a spokeswoman for Eli Lilly, said the company would appeal. Tamar Halper, a lawyer representing Squibb, said she had not seen the

decision and would not comment.

#90081u3021 03/22/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 23) UPI - U.N. Secretary-General Javier Perez de Cuellar, whose peace-keeping troops guided Namibia to independence, pledged Thursday to help the new government obtain the massive foreign aid it needs to become a ''model'' for the developing world.

As heads of government and other foreign delegations continued to leave Namibia after independence celebrations at midnight Tuesday, Perez de Cuellar said the world's 160th nation ''needs all the help it can get.''

''The fact that it's a newborn country means (it has) the opportunity to build a prosperous country,'' Perez de Cuellar said. ''I would like Namibia to be a kind of model of what all African and developing countries should be.''

The new government signed agreements of cooperation Thursday with the U.N. Development Program and the World Food Program, paving the way for the start of formal U.N. post-independence assistance.

''For the immediate future, Namibia needs all the assistance it can get from other countries,'' Perez de Cuellar said. He said a conference of donor nations would be convened in June to secure aid.

Soviet Foreign Minister Eduard Shevardnadze, who left Namibia Thursday, pledged Soviet aid for development of the mineral-rich country and said independence ''opens the door to normal trade links'' with Moscow.

In an emotional ceremony earlier Thursday, the South African-appointed administrator general of Namibia, Louis Pienaar, left for home after a five-year term that included managing the independence program with the U.N. peace-keepers.

Shortly before boarding his aircraft for the flight back to South Africa, Pienaar joked on the airport tarmac with Namibian President Sam Nujoma: ''You've got to look after this country, otherwise I'll come back.''

''I will certainly do that,'' Nujoma told Pienaar, whose departure signaled another step in the South African withdrawal from the territory it ruled since 1915 and for more than four decades in defiance of world opinion.

A police band played the South African national anthem as Pienaar boarded his plane. His eyes moist with tears, Piennar gave a small crowd on the tarmac a final wave goodbye.

South Africa's departure from the territory, under a U.S.-brokered deal that also included the withdrawal of some 50,000 Cuban troops supporting the Marxist government in neighboring Angola, leaves Namibia with a projected $200 million budget shortfall this year.

#90081u3072 03/22/1990 ~United Press International

(MARCH 22) UPI - More videotaped testimony from Ronald Reagan in John Poindexter's Iran-Contra trial... President Bush says he hopes Moscow will use restraint in dealing with Lithuania... and the F-D-A expands its recall of the diet supplement L-tryptophan... U-P-I has these top stories and more, next.

The Kremlin is keeping up the pressure on Lithuania with tough talk of arrests of people who refuse to turn over their firearms.

Yesterday, Mikhail Gorbachev gave Lithuanians one week to surrender all weapons.

Today, Gorbachev sent Lithuanian President Vytautas Landsbergis a terse personal messge in the form of a telegram giving him two days to stop the formation of civil-defense brigades in the Baltic republic.

Foreign Ministry spokesman Gennadi Gerasimov warned that tensions between Moscow and the independence-minded republic will worsen if Lithuanians doN'T comply with the crackdown.

Gerasimov says Lithuanians are still citizens of the Soviet Union and must obey its laws. He says Gorbachev's order is UNequivocal... warning that those who refuse to follow the presidential decree will be subject to arrest and trial.

Gerasimov says K-G-B agents will help collect the firearms, which will be delivered to the Defense Ministry.

In Washington, President Bush today repeated his hope that the crisis will be resolved with ''calm and peaceful'' discussions.'' The United States has NEVER recognized Lithuania's inclusion into the Soviet Union.

Gorbachev has directed authorities to confiscate any weapons NOT turned in by the deadline. His order also directs Soviet officials to control customs, monitor visas and keep tabs on foreigners entering Lithuania.

#90081u3075 03/22/1990 ~United Press International

GUATEMALA CITY (MARCH 23) UPI - Suspected leftist guerrillas attacked several homes in western Guatemala, killing a former town mayor and injuring the governor's daughter, police and government officials said Thursday.

No group claimed responsibility for the attacks, which were thought to be part of a rebel campaign to draw attention to the country's civil war before peace talks begin next week in Oslo, Norway.

Police said three homes in the twin cities of San Marcos-San Pedro Sacatepequez, including the governor's house, were damaged in grenade attacks.

''There were several attacks ... it was definitely the insurgency,'' a police spokesman said by telephone from San Marcos, about 90 miles northwest of the capital in Quezaltenango province.

Danilo Solorzano, an activist of the ruling Christian Democratic Party and former mayor of the nearby town of San Pablo, was reportedly killed in a hail of machine gunfire during the attacks.

Freddy Guerra, a police spokesman in Guatemala City, said Quezaltenango Governor Carlos Godinez Martinez's house was attacked and heavily damaged.

''Fragmentary grenades were launched against his residence at 1:20 a.m. Wednesday. His daughter, Alba Godinez Lopez, was injured during the attack '' Guerra said. A spokesman at San Marcos Hospital said Godinez Lopez, 24, was treated Wednesday and later released.

''Lilian Chang Ochoa also reported an attack against her house in San Pedro. She said that two men approached ... about 2:30 a.m. Wednesday and threw several grenades,'' Guerra said.

The residence of Alfonso Villagran, a former mayor of San Marcos, also was targeted by the attackers.

Victor Hugo Miranda, a legislator for the right-of-center Christian Democratic Party, said by telephone from San Marcos that at least seven houses were attacked Wednesday morning. He said most of the property belonged to party members.

''About seven or eight houses were attacked. We heard the explosions. The people here were awake all night, waiting to see what would happen,'' Miranda said.

''We're not sure who did it. The rebels have been around. It could be the rebels or possibly rival parties, knowing the bombings would be blamed on the guerrillas,'' Miranda said.

Interior Minister Gen. Carlos Augusto Morales warned Tuesday that rebels linked to the leftist Guatemalan National Revolutionary Union, or URNG, were likely to step up their attacks within the coming days.

Morales said the URNG hoped to focus international attention on the rebel movement before March 27-29 talks in Oslo between rebel leaders and a non-governmental negotiation team.

#90081u3102 03/22/1990 ~United Press International

(MARCH 22) UPI - Ronald Reagan is defending his nearly eight hours of videotaped testimony shown to the jury at John Poindexter's Iran-Contra trial yesterday and today.

The former president told reporters in Boston he maintained the integrity of executive privilege, despite agreeing to testify on tape in a Los Angeles courtroom last month.

The Poindexter jury watched the final hours of Reagan's court appearance on five television monitors this morning. During much of it, the former chief executive looked befuddled, saying at least 124 times he didN'T remember key details of the scandal. Reagan said he always instructed his top aides to obey the law.

Today, he visited with 20 children at Boston's Dana-Farber Cancer Institute. Asked whether he was embarrassed by his failing memory, Reagan said- quoting now- ''Well, I just had to say I doN'T remember so many times and it was easy to say that.''

Poindexter's lawyer says the defense may call former Attorney General Edwin Meese as a witness.

Polish Prime Minister Tadeuz Mazowiecki says he still wants a treaty with Germany guaranteeing Poland's post-World War Two borders, despite promises of Warsaw's inclusion in talks on German unification.

Mazowiecki met today with President Bush at the White House for a second day of talks. Bush assured him Poland would have a say in German reunification, but Bush said a ''nuance of difference'' stands in the way of a treaty.

The president says the matter of German land acquired by Poland after the war is a matter for the Poles and Germans to resolve... and he declined to put any public pressure on Germany to sign a treaty with Poland.

Bush said- quote- ''Let them sort it out.''

-30- 1888
#90081u3139 03/22/1990 ~United Press International
(MARCH 22) UPI - Secretary of State Baker braved the criticism of black leaders and met with South African President de Klerk today in Cape Town. It was the highest-level meeting between South Africa and the United States since 1978.

Black leaders earlier warned Baker he should NOT be meeting with de Klerk until the white government began an ''irreversible process'' to end apartheid. They worry that the meeting could be interpreted as a ''reward'' for steps already taken by Pretoria.

Both Baker and de Klerk denied the meeting was a ''reward'' and Baker said he is satisfied that de Klerk is pushing forward with an ''irreversible process'' to abolish apartheid.

Baker and de Klerk discussed the two main obstacles to the lifting of economic sanctions against the white minority government. The United States wants Pretoria to end a 45-month state of emergency and release all political prisoners.

Baker described the talks as ''very interesting, candid and constructive.''

-30- 1147
#90081u3196 03/22/1990 ~United Press International
(MARCH 22) UPI - The government today expanded its recall of the dietary supplement L-tryptophan to include even small doses of the substance.

The amino acid occurs naturally in some foods, including milk, but its use as a supplement has been linked to E-M-S, a blood disorder Health Secretary Sullivan says can cripple, cause great pain and even kill.

Last November, the Food and Drug Administration recalled L-tryptophan products intended to be taken in daily doses of at least 100-milligrams. But today's recall goes far beyond that to any dosage in tablet, capsule, powdered or liquid form.

Sullivan calls use of L-tryptophan ''a major public health problem.'' The F-D-A says more than 14-hundred cases of E-M-S have been reported and 19 deaths, including one of an individual who was taking under 100-milligrams.

Symptoms of E-M-S include muscle pain, fatigue, breathing difficulties, cough, skin rashes, swelling of arms and legs, weakness and fever.

The United States did NOT pass its annual physical with flying colors this

year.

The Department of Health and Human Services says the good news is, the nation's overall health is improving... with life expectancy staying at an all-time high of 75 years. In addition, infant mortality is at a record low... and progress is continuing against heart disease, stroke and smoking.

But the bad news is... that doesN'T apply to all Americans. Government health goals for 1990 will NOT be reached... largely because minorities and the poor are NOT so healthy.

The department's annual report says the life expectancy of black men is falling because of increases in AIDS and homicide. The gap between white and black infant mortality is widening. More women are dying from lung cancer. Mumps, measles, asthma, child abuse and sexually transmitted diseases are becoming more prevalent.

Department Secretary Louis Sullivan says up to 75 percent of premature deaths are linked to ''lifestyle'' decisions involving violence, drug abuse, smoking, diet, exercise and seat-belt use.

#90081u4301 03/22/1990 ~United Press International
(MARCH 22) UPI - Former Exxon tanker captain Joseph Hazelwood is acquitted of the most serious charges against him in the nation's worst oil spill... that story and other top news of the day from the wires of

United Press International.

Exxon Valdez tanker Captain Joseph Hazelwood left an Anchorage, Alaska, courtroom today acquitted of the three most serious charges stemming from the 11-Million-gallon oil spill of almost a year ago.

While Hazelwood said he was ''just relieved,'' his defense team of lawyers called the verdict a ''total victory.''

Hazelwood was acquitted on the felony charge of criminal mischief and the misdemeanors of reckless endangerment and operating a tanker while intoxicated.

He was convicted only of negligent discharge of oil, a misdemeanor that carries a maximum penalty of 90 days in jail and a one-thousand-dollar fine.

The Exxon Corporation issued a statement in New York saying the verdict- quoting here- ''would seem to confirm the view that the grounding of the Exxon Valdez was an accident.''

The jury seemed to agree, and if it was an accident that could have been prevented, at least one juror blamed NOT Hazelwood but the Coast Guard for the worst oil spill in U-S history. The juror called the Coast Guard's 70-Million-dollar monitoring system ''a joke.''

-30- 1485

#90081u4380 03/22/1990 ~United Press International

(MARCH 22) UPI - Relations between the Soviet government and its rebellious republic of Lithuania continue to deteriorate rapidly.

Lithuania has issued an urgent ''appeal to world's nations''... asking for help to stop what it says are preparations by the Soviets to use force against the small Baltic republic.

Lithuanian radio reported the presence of about 15 armored personnel carriers on the streets of Vilnius. However, residents of the capital interviewed by United Press International say they have NOT seen such vehicles.

Earlier today, Soviet President Gorbachev gave Lithuanian President Landsbergis two days to stop the formation of civilian defense brigades in the republic.

Gorbachev did so in a telegram- the most direct communication yet in a mounting exchange between the two leaders.

Landsbergis has said ''only force of arms'' can keep the republic from seceding from the Soviet Union.

Former Attorney General Edwin Meese took the stand today in defense of former national security adviser John Poindexter. Poindexter is charged with masterminding the secret sales of U-S weapons to Iran and diverting the proceeds to the Nicaraguan Contras.

Meese said there was so much confusion surrounding the arms-for-hostages deal that NO one knew the whole truth.

U-S District Judge Harold Greene told Meese at one point- ''I wish you would just answer my questions once in a while.''

Asked bluntly by Beckler if Poindexter ever lied to him, Meese replied- ''NOT to my knowledge, NO.''

The court finished with videotaped testimony from President Reagan today in which the former president said 124 times that he couldn't remember key parts of the scandal.

Reagan said he still is NOT certain that money from secret U-S arms sales to Iran was diverted to aid the Nicaraguan Contras.

-30- 2009

#90081u4414 03/22/1990 ~United Press International

(MARCH 22) UPI - Idaho's legislature today passed a sweeping anti-abortion law that would prohibit 95 percent of the abortions currently performed in the state.

President Bush says he's NOT going to tell Idaho or any other state how to write it's abortion laws. He says the laws should be debated in each state capital.

The Idaho law would allow abortions only in cases of rape or incest, in cases in which the pregnancy threatens the life or health of the mother, or in cases when the fetus shows evidence of ''profound deformity.''

After four-and-a-half hours of debate, the bill passed the Senate 25-17 this afternoon. The bill goes to the desk of Democratic Governor Cecil Andrus... who's an opponent of abortion. Both sides expect court tests of the law.

In Maryland, the state Senate agreed tonight to end an eight-day filibuster over abortion legislation and let the voters decide the issue in a referendum.

Lawmakers who bickered for a week over a bill intended to guarantee that abortions remain widely available say they cannot resolve the issue on their own and will let voters choose between two abortion laws.

The government of Panama today ordered the expulsion of the Cuban ambassador... giving him five days to leave the country but stopping short of breaking diplomatic ties with Cuba.

Panama's Foreign Minister Julio Linares said it's expelling Cuban Ambasssador Lazaro Mora because of the Cuban government's displays of ''harassment and hostility'' toward the government of President Endara.

Linares says Cuba has refused to recognize the Endara government and has constantly referred to it as ''illegitimate'' and a satellite government of the United States.

He said the decision to expel Mora is due to the position of the Cuban government toward Panama and is NOT related to Mora's conduct as ambassador.

Linares also hinted that Panama may sever diplomatic relations if Cuba does NOT recognize the Panamaniam government.

-30- 2161
#90081u4439 03/22/1990 ~United Press International
(MARCH 22) UPI - Violence shook Colombia's political system today.

An assassin working for Colombia's Medellin cocaine cartel gunned down the leftist presidential candidate of the Patriotic Union Party at Bogota's international airport today.

Bernardo Jaramillo was pronounced dead two hours after the attack. Jaramillo's assassin was shot by bodyguards and captured. He's reported hospitalized in what's termed ''favorable condition.''

The killing triggered violent protests in the poorer sections of Bogota. The mayor of the Colombian capital increased security and banned alcohol sales.

While all political parties denounced the assassination, the left was especially vocal. Right-wing death squads linked to both the military and drug traffickers are blamed for the deaths of some 900 members of Jaramillo's party since it was formed five years ago.

Astronaut Kathryn Sullivan says the launch of the Hubble Space Telescope from the shuttle Discovery will be the most important ''quantum leap'' forward in astronomy in 400 years... since Galileo first looked to the

heavens through his telescope.

The Discovery is to carry the one-point-five-BILLION-dollar telescope into orbit April 12th. The boxcar-size observatory will remain in operation for at least 15 years... allowing astronomers to peer deeper into the universe than ever before... and with 10 times greater clarity.

If problems develop during the deployment of the telescope, Sullivan and the other astronauts will be standing by... ready for an emergency spacewalk to attempt repairs.

Preparations for the shuttle's launch are running ahead of schedule, but crews still have to complete some repairs.

-30- 1867

#90081u4503 03/22/1990 ~United Press International

(MARCH 22) UPI - Last March's Exxon oil spill apparently harmed Alaska's fish and game more than previously expected. The state's fish and game commissioner, Don Collinsworth, told a House subcommittee today that herring, salmon and rockfish suffered reproductive damage.

NASA officials say a shuttle mission to rescue a stranded communications satellite is possible, but they add they still are debating whether such an operation will take place. The Intelsat-6 relay station improperly separated from its Titan-3 launch rocket.

In New York today, a judge released a former Black Panther member after he served 19 years in prison for shooting two police officers. The conviction of Dhoruba Bin-Wahad was overturned because the prosecution did NOT disclose evidence that could have helped him.

An Israeli army spokesman reports one of two Palestinans captured today is a member of the Black Panther gang. The gang operates in the West Bank town of Nablus. The army has pledged to crush the group, suspected of killing 16 alleged Palestinian collaborators.

Japan deported 491 Chinese nationals today. A foreign ministry spokesman says the Chinese refugees fled to Japan for economic-related purposed and NOT because they were suffering under political suppression.

A senior Chinese official says three-and-a-half-Million rural workers lost their jobs last year. The agriculture minister says the layoffs are part of a nationwide austerity program that includes a slowdown of capital construction.

#90081u4526 03/22/1990 ~United Press International
(MARCH 22) UPI - A Greyhound spokeswoman says a sniper fired on a bus tonight... this time in southwest Louisiana as it traveled west along Interstate Highway 10, just east of Lake Charles. The bus was headed for Dallas and was NOT carrying any passengers.

The Soviet republic of Estonia now has a parliament dominated by supporters of independence for the tiny Baltic state. But Estonian leaders say they will NOT follow the same path as Lithuania where tensions continue to mount.

A West German businessman has been charged with violating his country's export laws. His firm also faces allegations it helped design and build a Libyan plant suspected of making chemical weapons. Officials say the businessman shipped equipment to Libya without acquiring necessary permits.

Officials at Atlanta's national Centers for Disease Control say alcohol-related deaths accounted for more than one-and-a-half-Million years of lost work life in 1987. Health officials say alcohol robs more working years then smoking.

British and Czechoslovak researchers say they have identified a genetic defect that appears to be caused by smoking and is associated with lung cancer. They say the discovery could lead to better treatment therapies.

The Vatican says Pope John Paul will visit the Mediterranean island of Malta May 25th May 27th. The Holy See and Malta have had a strained relationship since the early 1980's when the former socialist government insisted that church schools NOT charge fees.

-30- 1669

#90081u4648 03/22/1990 ~United Press International
(MARCH 22) UPI - Alaska's fish and game commissioner says the oil spill from the Exxon Valdez may have done far more long-term harm to fish and wildlife than previously suspected. There's evidence some species of fish and wildlife may lose their ability to reproduce, either because of lost habitat, loss of food and prey or reduced sexual fitness. Officials have NOT been able to find salmon eggs and up to 90 percent of eggs from other species of fish appear to be deformed.

An Alaska jury has found Exxon Valdez skipper Joseph Hazelwood innocent of the three most serious charges against him. But he faces sentencing tomorrow for a conviction of negligent discharge in the nation's largest oil spill. Jurors did NOT doubt that Hazelwood had a few vodkas before sailing his loaded tanker into Prince William Sound. But they said there was NO proof that he was impaired or that he operated the tanker while intoxicated.

The new civilian president of Chile is publicly reprimanding military leader General Pinochet. President Aylwin says Pinochet should NOT have made comments to the media predicting more political assassinations without informing the government that he had such information. Pinochet has given up the presidency of Chile, but he refuses to relinquish control of the army.

A U-S government financial team is making the highest-ranking visit to Nicaragua since former President Reagan began trying to isolate the government of Daniel Ortega in the early 1980's. The team headed by Under Secretary of State for Latin American Affairs Joe Sullivan will meet with officials of the out-going and in-comming governments to assess the country's economic needs.

-30- 1857

#90081u4665 03/22/1990 ~United Press International

(MARCH 22) UPI - Secretary of State Baker today was in South Africa, where he said he received promises from President de Klerk that the country is on an ''irreversible'' course to end apartheid. But while de Klerk said he can foresee a day when a black man can become South Africa's president, he added that the country's white citizens still require protection against a dominant black majority.

Federal lawyers say the government's 166-BILLION-dollar bailout of the savings-and-loan industry is on the verge of chaos. The Justice Department is working to halt an appeals court decision that former thrift regulator Danny Wall was appointed unconstitutionally. Attorneys say if the ruling sticks, the 200 thrifts taken over in the federal bailout could file appeals, arguing they were seized improperly.

Surgery to repair the broken back of singer Gloria Estefan went ''very well,'' in the words of New York doctors who say they expect her to make a ''normal recovery.'' Estefan was injured when a tractor-trailer rig collided with her tour bus on a snowy Pennsylvania highway earlier this week. Doctors implanted two steel rods in her back today to aid proper healing.

President Bush made it clear today, telling the nation's nutritionists- both amateur and professional- to read his lips... he won't eat broccoli. Bush said he has been forced to eat broccoli since he was a child, but that- in his words- ''I am president of the United States and I am NOT going to eat any more.'' California broccoli producers are sending a 10-ton shipment of the vegetable to Washington, and they say the presidential ban has actually been good for business.

SANTA CLARA, CA (MARCH 23) BUSINESS WIRE - RasterOps (Proposed NASDAQ:ROPS) announced Friday that on Thursday it filed a registration statement with the SEC for an initial public offering of its common stock at an estimated price of $9 to $11 per share.

Of the 1,520,000 shares to be offered, 1,200,000 are being offered by RasterOps and 320,000 by selling shareholders. The offering is being made through an underwriting group managed by Robertson, Stephens & Company and Donaldson, Lufkin & Jenrette Securities Corp.

RasterOps designs, manufactures and markets photorealistic color imaging products primarily for the graphic arts, printing, publishing and related industries. The company offers more than 25 graphics and imaging subsystems for Apple Macintosh, Sun SPARCstation and IBM-compatible desktop computers with suggested retail prices ranging from $495 to $12,495. The company's products consist of complex graphics controller boards incorporating the company's proprietary VLSI circuits and image processing software and, in many cases, high resolution displays.

Photorealistic color imaging systems enable graphic arts professionals to display an image on the computer screen that is essentially indistinguishable from the original color photograph, manipulate the image electronically and produce printed output that is virtually identical to the image displayed on the screen.

Photorealism is important for prepress applications such as graphics design, page layout, color retouching, and image processing in the production of magazines, newspapers, print advertising, packaging, labeling, product brochures, annual integration of video images with computer generated text and graphics for graphic arts design, video production and multimedia applications.

The company also offers standard color, gray scale and monochrome graphics and imaging products for use primarily in desktop publishing and presentation applications where photorealistic color is not a requirement.

A prospectus relating to these securities may be obtained from Robertson, Stephens & Company at One Embarcadero Center, Suite 3100, San Francisco, Calif. 94111, 415/781-9700, or Donaldson, Lufkin & Jenrette Securities Corp., 140 Broadway, New York, New York, 10005, 212/504-4525.

A registered statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective.

LOS ANGELES (MARCH 23) BUSINESS WIRE - Corporate Data Sciences Inc. (NASDAQ:CODS, PSE:CDS) Friday announced updated information concerning the restructuring of the company.

As was announced in early September 1989, the company is in the process of restructuring its business operations.

In order to accomplish this restructuring, CDS intends to sell to the ARIL Group Inc. (NASDAQ:ARIL) substantially all of its non-paper-related assets, which consist primarily of the shares of its wholly owned subsidiaries, Medallion Kitchens Inc. and Medallion Kitchens of Minnesota Inc. (collectively referred to as Medallion) for 16.9 million shares of ARIL (the ''exchange'').

CDS will then own, including its current ownership position, 22,119,256 shares of ARIL representing approximately 81 percent. The exchange requires the prior approval of two-thirds of the unaffiliated shareholders of ARIL at a special shareholders' meeting now scheduled for that purpose during April 1990.

Subsequent to the exchange, CDS will spin-off its 22,119,256 shares of ARIL pro-rata to CDS shareholders of record on Jan. 22 on the basis of 1.63 shares of ARIL for each one share of CDS held. As part of the restructuring plan, ARIL sold its telecommunications operations to NEC America Inc., which transaction closed on Dec. 1, 1989.

The spin-off and therefore the CDS shareholders' right to receive the shares of ARIL, is contingent on the consummation of the exchange. In connection with the exchange, ARIL was required to file a proxy statement with the Securities and Exchange Commission for review by such regulatory agency prior to its submission to ARIL shareholders.

As a result of such regulatory review, clearance of the proxy statement has been delayed in the ordinary course of the review process. ARIL has now received what it hopes to be the final comments of the commission with respect to the proxy statement and ancitipates it becoming effective within the near term, although no assurances may be given as to the exact date of clearance.

Assuming that the commission's clearance is shortly forthcoming, ARIL has advised the company that it will hold its special shareholders' meeting for purposes of approving the exchange, in addition to other matters, on or about April 30.

ALBANY, NY (MARCH 23) BUSINESS WIRE - Lawrence Insurance Group Inc. has announced a 9 cents per share dividend to stockholders for the first quarter of 1990.

The dividend payment was approved by the board of directors of Lawrence Insurance Group Inc. at the March 22, 1990 board meeting in Albany. The announcement of the dividend payment was made by Floyd N. Adams, chief financial officer.

Lawrence Insurance Group Inc. will pay a total of $1,270,933 on May 16, 1990 to stockholders of record as of April 17, 1990. This total represents a 29 percent increase compared to the dividends declared during the fourth quarter of 1989.

The increase of 2 cents per share over the fourth quarter of 1989 reflects the Lawrence Insurance Group Inc.'s continued growth through diversification, geographic expansion, and product development.

Through its subsidiaries, Lawrence Insurance Group Inc. is currently licensed in 45 states and Washington D.C. with applications in process in the remainder. The company's common stock is traded on the American Stock Exchange under the symbol LWR.

The group is comprised of United Community Insurance Co.; United Republic Reinsurance Co.; Senate Insurance Co.; Senate Syndicate Inc.; and Commercial Resources Insurance Co. Executive offices of Lawrence Insurance Group Inc. are located at 770 Broadway, in New York City, while operating headquarters is at 33 Elk Street, Albany, N.Y.

BEVERLY HILLS, CA. (MARCH 23) BUSINESS WIRE - John E. Preston has been elected a Litton corporate vice president and associate general counsel.

For the past 11 years, Preston had been a vice president and group counsel for Litton's Advanced Eletronic Systems divisions. Earlier he was associate counsel for Litton's Defense group. Preston joined Litton in 1971 as a division counsel.

From 1964 to 1971 Preston served with the U.S. government, including staff assistant to former Sen. Thomas Kuchel (R-Calif.), attorney in the Office of the General Counsel of the General Accounting Office and as a member of the regulations study group for the Commission on Government Procurement.

Preston earned a bachelor of arts degree in history and government from Ohio University, Athens, Ohio, and a bachelor of laws degree from George Washington University Law School, Washington, D.C.

Preston wrote the General Accounting Office's Manual on Government Contracts and is a frequent writer of professional articles and lecturer on government contracting.

Preston is a member of the American Bar Association, Federal Bar Association, California and District of Columbia Bars, National Contract Management Association and American Society of International Lawyers.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

GLENDALE, CA. (MARCH 23) BUSINESS WIRE - GLENFED Inc. (NYSE:GLN), the parent company of Glendale Federal Bank, Friday announced that as part of its strategic program to improve the capital ratios of Glendale Federal Bank, it has successfully eliminated a significant amount of the recourse obligation on approximately $1 billion of loans previously sold.

This restructuring and reduction of the recourse obligation was accomplished by transferring it to an unaffiliated third party, and is believed to be the first transaction of this type by a financial institution.

The completion of this transaction has increased the bank's excess risk-based capital by $24 million. Glendale Federal Bank continues to exceed the federal requirement for risk-based capital as well as the requirements for tangible capital and core capital.

''Glendale Federal Bank exceeds all current capital requirements and is aggressively positioning itself, through a number of strategic steps, to meet all future federal capital requirements as they are fully phased-in

over the next four years,'' said Norman M. Coulson, president and chief executive officer of GLENFED.

Other actions taken to improve Glendale Federal Bank's capital position, to focus the bank on its core consumer and real estate lending businesses and to position the bank as a strong competitor in the 1990s include:

-- The previously announced sale of $350 million of purchase accounting loans.
-- The placement of primary mortgage insurance on more than $1.5 billion of single-family mortgages with loan-to-value ratios of 80 percent or more.
-- Retaining the investment banking firm of Salomon Brothers to sell the company's real estate development subsidiary, GLENFED Development Corp.
-- Retaining the investment banking firm of Goldman Sachs to sell the company's commercial finance subsidiaries, GLENFED Financial Corp. and GLENFED Capital Corp.
-- Continued streamlining of the company's organizational structure to reduce operating costs and increase efficiencies at all levels. Operating expenses for the quarter which will end March 31, 1990, are projected to be approximately $5 million less than operating expenses for the quarter ended Dec. 31, 1989.

''This is a time of both challenge and opportunity for the thrift industry especially for firms like Glendale Federal Bank which exceed and will continue to exceed the tough new capital requirements,'' said Coulson. ''GLENFED will continue to undertake bold, positive steps in order to ensure our future profitability, growth and stability, while maintaining shareholder value and return.''

GLENFED Inc. is a diversified financial and real estate services corporation and is the parent company of Glendale Federal Bank, the nation's fifth-largest savings bank, which operates 239 branch offices in California, Florida and Washington.

#90082b0053 03/23/1990 ~Business Wire

SANTA CLARA, CA (MARCH 23) BUSINESS WIRE - National Semiconductor's Quadram Products Group has introduced CheckPoint, an advanced security and virus detection technology that brings a new level of protection to personal computers (PCs) with access to sensitive mainframe information.

The CheckPoint hardware/software system for IBM PCs and compatibles guards against unauthorized access and detects modifications and virus attacks. The CheckPoint technology is being introduced in conjuction with MainLink

II, and offers greater security than other software-based PC systems by implementing system access control and virus detection through hardware rather than software.

The CheckPoint technology, in combination with the MainLink II micro-to-mainframe 3270 emulation capabilities, offers a systems approach to PC access security and virus protection. With the system, the same type of security measures used for mainframe terminal access can now be extended to PCs.

But Checkpoint also solves many additional security problems that are unique to the PC terminal-emulation environment.

The CheckPoint technology prevents unauthorized users familiar with PCs from accessing and destroying confidential data or downloading and copying the data to a diskette that can be easily stolen. In addition to this protection, the system can check critical DOS files for virus infection before the boot process.

CheckPoint can also be programmed to restrict access to authorized users, and to blank the PC screen and lock the PC keyboard during periods of user absence.

CheckPoint's SecureLock feature uses three types of passwords to control access to the PC: Supervisor, User and Keyboard. Each of the password types provides different access privileges.

SecureAudit, another CheckPoint module, tracks all log-on access to the PC by maintaining an access log or audit trail. The access log also indicates invalid log-on attempts. When SecureAudit detects an excessive level of password entry attempts, the software renders access increasingly more difficult through programmable, intelligent escalated defense. In addition, a series of tone alerts is triggered in order to discourage further attempts and alert others.

For virus detection, the FileSafe module provides an integrity check of critical system data areas and files before booting the system and loading DOS. If the integrity check fails, users can boot from a special recovery disk that replaces potentially infected or corrupted system and data files.

FileScan, a companion to FileSafe, provides an integrity check and modification alert for additional user-defined critical files.

The final element of CheckPoint, SecureUse, protects PC applications from unauthorized use through automatic and hot key screen blanking and keyboard locking techniques. Once the screen has blanked, the keyboard locks until a proper password is used.

CheckPoint can be programmed through easy-to-use menu-driven software to provide varying levels of security for individual usage. The Supervisor feature of the CheckPoint system can also be used by managers to control security for a large group of PCs that have access to sensitive information.

CheckPoint, combined with Quadram's MainLink II technology, is the only secure terminal emulation available with a high level of PC security. The Mainlink II family of 3270-emulation products offers users complete IBM and IRMA compatibility at significant cost savings.

#90082b0068 03/23/1990 ~Business Wire

SAN DIEGO (MARCH 23) BUSINESS WIRE - Researchers at Vical Inc. and the Waisman Center at the University of Wisconsin-Madison medical school have discovered a new gene therapy approach that uses genes in a novel manner to deliver therapeutic proteins.

The research, detailed in a paper published in the March 23 issue of Science, is unique because it involves a simple procedure for administering genes that temporarily produce gene expression ''in vito'' without permanently altering an organism's genome (the total genetic content of all chromosomes), according to Wick Goodspeed, president of Vical.

''A major barrier to the commercialization of traditional gene therapy has been that it is non-reversible and permanently alters the genome, sometimes causing dangerous mutations,'' Goodspeed said. ''In light of this discovery, the beneficial applications of gene therapy can be reinvestigated. This new gene therapy approach will also be easy to administer through direct injection into muscle.''

Targets of gene therapy that could benefit from this new discovery include the delivery of peptides and proteins to treat diseases such as muscular dystrophy, diabetes and osteoporosis. The results of the research also imply novel approaches to regulation of the immune system for diseases such as cancer, AIDS and rheumatoid arthritis.

Research that led to the discovery began when Dr. Philip L. Felgner, director of product development at Vical, and Dr. Jon A. Wolff, assistant professor of pediatrics and medical genetics at the University of Wisconsin-Madison medical school and director of biochemical genetics at the university's Waisman Center, held in-depth discussions into the

feasibility of gene therapeutics.

In early 1989 Vical funded a research project in Wolff's laboratory in the Waisman Center. The objective of the research was to determine the feasibility of direct expression of DNA and RNA ''in vito,'' without use of retroviruses.

The research involved direct injection of genes in the form of messenger RNA or plasmid DNA into different tissues in a living mouse. Several genes were selected that produced enzymatic gene products that could be sensitively measured. The experiments detailed in Science demonstrated reversible ''in vito'' gene expression in muscle. Further research has also demonstrated the secretion of therapeutic peptides and proteins into the circulation from the muscle tissue.

The benefits of reversible expression are twofold. First, it means that genes, as a vehicle to deliver therapeutic proteins, can be easily and repeatedly administered on an as-needed basis in the same manner as conventional therapeutic agents are administered today. In addition, once gene therapy is stopped, the effects of gene expression decline over several days, while cell function returns to normal.

Plasmid DNA was also shown in these studies to result in ''in vito'' expression of longer duration (greater than six months). However, no indication of potentially deleterious insertion into the human genome could be detected.

A wide variety of proteins could benefit from gene delivery including erythropoietin, which can be used to treat anemia; calcitonin, which is used to treat osteoporosis; and soluble CD4, which has been shown to block the CD4 receptor making it useful as a treatment for AIDS.

Up to this point, Vical's and Wisconsin's research has focused on optimizing gene expression in muscle tissue where the initial results were strongly positive. Positive results have also been obtained in lung, brain and skin tissues. However, the level of expression obtained was much lower. As formulations leading to higher levels of expression in alternative tissues emerge, additional therapeutic targets may become apparent.

Vical will continue to fund further research into this area at Wolff's laboratory at the University of Wisconsin-Madison's Waisman Center. Vical is currently reviewing 1990 and 1991 fund allocations for this research, said Goodspeed.

The Waisman Center at the University of Wisconsin-Madison is devoted to research, patient care and training of professionals in the field of mental retardation and other developmental disabilities.

Vical Inc. is a three-year-old biopharmaceutial company with headquarters in San Diego. The company is focusing on the development of novel lipid-modified drug compounds to provide improved pharmacokinetics, decreased toxicity and increased potency benefits to a broad range of drugs.

In August 1989 Vical signed a substantial multiyear research and development agreement with Burroughs Wellcome Co. to develop lipid-modified AZT compounds, utilizing Vical's proprietary Prosome technology.

SEATTLE (MARCH 23) BUSINESS WIRE - Aleutian Enterprise Ltd. Friday released the names of the eight crewmen and one fisheries observer who are still missing after the capsizing of the 162-foot Aleutian Enterprise Thursday afternoon in the Bering Sea.

The crewmen are Mate Nello Marciel, 55, San Deigo; Chief Engineer John A. Dieterich, 31, Seattle; Foreman Matthew J. Schneider, 22, Issaquah, Wash.; Joseph J. Alaimo, 45, Yakima, Wash.; Robert W. Davis, 26, Renton, Wash.,; Jeffrey A. Houston, 21, Warren, Ore.; Javier Martin V. Castro, 27, Seattle; and David J. Jefferies, 19, Fontana, Calif. The fisheries observer is Robert McCord, 35, Englewood, Colo.

The 22 survivors are in good condition and are returning to their families. Vessels in the area are continuing the search for additional survivors today. Details as to the cause of the accident are not available. Company and Coast Guard investigations are under way.

The vessel was owned by Aleutian Enterprise Ltd., a limited partnership, and operated under a management contract by Arctic Alaska Fisheries Corp. of Seattle.

#90082b0105 03/23/1990 ~Business Wire

MILPITAS, CA (MARCH 23) BUSINESS WIRE - Adaptec Inc. (NASDAQ:ADPT) Friday brought affordable, high-performance connectivity to the Macintosh II platform with the introduction of the EtherMac II family of NuBus add-in cards, linking the computers to thin Ethernet or 10BaseT Ethernet.

Fully compatible with Apple Computer Inc.'s EtherTalk card, the EtherMac II (thin Ethernet) and EtherMac II/10T (10BaseT Ethernet) boards provide 32-bit networking connectivity for Macintosh II computers and take advantage of the open architecture with which the Macintosh II was designed.

Both are priced $100 to $200 below most of the competing products on the market.

Adaptec also announced today support for the IEEE 10BaseT networking standard in the Nodem LAN interface unit (LIU). Nodem is an external unit that connects Macintoshes to Ethernet networks through the computers' Small Computer Systems Interface (SCSI) ports. With 10BaseT support, Nodem-10T now enables Macintoshes to connect to Ethernet over twisted pair cabling according to the IEEE standard. Nodem is compatible with Farallon's StarController EN.

Targeted at corporate and university computing environments, both the EtherMac II/10T and Nodem-10T brings low cost and integrated 10BaseT to the Macintosh II platform, while Nodem-10T provides the same benefits in an external form to all Macintoshes with SCSI ports.

By expanding its product offerings to incorporate the full spectrum of networking solutions -- thin Ethernet, thick Ethernet, SynOptics twisted pair and now 10BaseT twisted pair, and with internal and external interfaces -- Adaptec is clearly demonstrating its commitment to Macintosh connectivity.

The EtherMac II family sets a new price, reliability and performance standard for NuBus.

Low cost and high reliability in the EtherMac II cards are assured through the surface-mount technology (SMT) manufacturing methods. The 32-bit bus interface guarantees a steady upgrade path. (The EtherMac II cards will be made at Adaptec's wholly owned manufacturing subsidiary in Singapore). Each carries a one-year limited warranty.

The EtherMac II/T and Nodem-10T address a common limitation in computer connectivity: cabling in buildings where only twisted pair, or telephone line, is feasible for networks. In many older structures, cabling with

conventional Ethernet methods is prohibitive, due to the high cost of cable installation. With the EtherMac II/T or Nodem-10T, Macintoshes in such environments can be quickly and easily connected to a 10BaseT concentrator through the existing phone lines.

''Twisted pair Ethernet fits the Macintosh community well because of its simple, snap together cabling,'' Phil Belanger, general manager of Adaptec's Communication Products Operation, said. ''We are endorsing the 10BaseT standard because we feel it will accelerate the acceptance of Ethernet in the Macintosh market.

''Adaptec has always been committed to standards. NuBus and 10BaseT are consistent with our focus on standards and provide significant benefits to Macintosh Ethernet customers.''

PHOENIX (MARCH 23) BUSINESS WIRE - N-W Group Inc. Friday announced that it will hold its annual meeting of stockholders on Wednesday, June 6, at 8:30 a.m. EST in New York.

The record date for the meeting will be the close of business on April 18.

The board of directors of N-W Group will be presenting a variety of proposals to the stockholders for their approval. As previously announced one proposal would authorize a one-for-200 reverse split of the company's common shares to be followed immediately by a 100-for-one forward split of whole common shares. Holders of fractional shares resulting from the reverse split would receive a cash payment for their fractional shares. Approximately 6,000 of the company's 6,500 registered stockholders hold less than 200 shares, representing approximately 300,000 shares or 4 percent of the total shares outstanding. If approved by stockholders, this proposal would eliminate these shares, which would provide substantial savings to the company in stockholder administrative costs.

Stockholders will also be asked to authorize the creation of a new class of preferred shares of the company.

In addition, stockholders will be asked to approve amendments to the certificate of incorporation to, among other things, classify the board of directors, eliminate action by written consent without a meeting and elimate the ability of stockholders to call special stockholder meetings.

If the proposal to classify directors is approved by stockholders, the board of directors will be elected in three classes at the 1990 annual meeting.

The company expects to mail proxy materials by the end of April 1990.

N-W Group Inc. common shares trade over-the-counter through the NASDAQ National Market System (symbol NWGI).

IRVINE, CA. (MARCH 23) BUSINESS WIRE - Diceon Electronics Inc. (NASDAQ:DICN) announced Friday that it had reached a settlement with the Los Angeles County District Attorney's Office of the charges filed on Oct. 31, 1989, against the company, two senior officers of the company, and a former employee alleging violations of California Health and Safety Code, Section 251895 (B) dealing with disposal of hazardous waste.

All charges against one senior officer were dismissed. Diceon has agreed to plead ''nolo contendere'' (no admission of guilt) to three felony violations and to pay a fine of $600,000 and be on probation for three years.

The other senior officer and former employee have agreed to plead ''nolo contendere'' (no admission of guilt) to one misdemeanor violation. At the end of the one-year probation period for the individuals, all charges are subject to expungement.

The complaint resulted from discharges at the company's Chatsworth, Calif. plant in late 1988 and early 1989 which was the subject of hearings before the Los Angeles Department of Public Works in the spring of 1989.

After satisfying the Department of Public Works that the company had taken sufficient corrective action at this facility, in August of 1989, the department closed out the enforcement action against the company and returned the Chatsworth, Calif., facility to routine inspection and monitoring.

Joel Moskowitz, partner of Gibson, Dunn & Crutcher represented Diceon and its two senior officers. Moskowitz was formerly head of the California Toxic Substance Control Program and formerly Deputy, California Attorney General.

Moskowitz stated that the company had made significant investments in

equipment and personnel in the environmental area prior to the filing of this case and had taken precautions for continued compliance.

Moskowitz stated the company and the individuals entered into the plea bargain arrangement in order to avoid the time, expense and distraction from the business of the company that a lengthy trial would have entailed. With the conclusion of the proceeding, senior management will now devote all of its efforts to improving the performance of the company.

SAN RAFAEL, CA. (MARCH 23) BUSINESS WIRE - Wordstar International Inc. (NASDAQ:WDST) Friday announced revenues of $9,109,000 and a net loss of $1,417,000 (10 cents per share) for its second quarter ended Feb. 28.

In the like quarter of the preceding year, the company reported net earnings of $166,000 (1 cent per share) on revenues of $10,326,000. Cash and equivalents totaled $14,827,000 on Feb. 28, as compared to $15,694,000 on Feb 28, 1989.

For the six months ended Feb. 28, the company reported revenues of $17,511,000 and a net loss of $4,243,000 (31 cents per share). For the first six months of fiscal 1989, WordStar reported revenues of $19,982,000 and a net loss of $2,441,000 (18 cents per share).

Second quarter fiscal 1990 results reflected a 24 percent growth in North American sales, substantially reversing the first quarter decline in North American sales of 36 percent. International sales did not change significantly in the second quarter after the 17 percent growth in international sales in the first quarter.

''The second quarter was a time of positive action. We released three products in North America which have been well received and demonstrate our dedication to adding new technology to our current product line,'' said Gari Grimm, president and chief executive officer of WordStar.

In addition, during the quarter the company announced reorganization plans that included general downsizing and the decision to use subcontractors for certain functions previously performed internally. The reorganization represents a 16 percent reduction in headcount and a second quarter expense of $781,000 for severance and related expenses.

WordStar International Inc., headquartered in San Rafael, is a leading developer of business productivity software products. WordStar word

processing products are among the largest selling microcomputer software programs in the world with 14 different language versions and an installed user base of more than 3.5 million.

PARAMOUNT, CA. (MARCH 24) BUSINESS WIRE - Calnetics Corp. (OTC:CALN), of Paramount, and Morehouse Industries Inc., of Fullerton, Calif. (OTC:MIXS), have entered into a Letter of Intent for the acquisition of Morehouse Industries by Calnetics, it was announced Friday by Clinton G. Gerlach, chairman of Calnetics and Dale H. Morehouse, chairman of Morehouse Industries.

Consummation of the acquisition is subject to the execution of a definitive agreement, approval by directors and shareholders of both companies and appropriate administrative and regulatory agency review.

It is expected that the acquisition will be structured as a merger between Morehouse Industries and a subsidiary of Calnetics. Under the terms of the Letter of Intent, each share of Morehouse Industries would be converted into the right to receive 45 cents cash and one-fourth of a Calnetics share upon closing.

Twenty percent (20 percent) of the Calnetics shares issued would be subject to an escrow arrangement to satisfy certain indemnity obligations. At Feb. 28, Morehouse Industries has 3,890,981 shares outstanding, excluding shares issuable upon exercise of outstanding stock options. Calnetics had 2,753,799 shares outstanding at Dec. 31, 1989.

Calnetics is a manufacturer of molded plastic components and acrylic, polycarbonate and polystyrene plastic sheets utilized in the lighting and decorator industries.

Morehouse Industries' business includes the design, manufacture and sale of industrial process machinery. At Dec. 31, 1989, Calnetics had total assets of approximately $6.6 million and total stockholders' equity of approximately $3.6 million.

Calnetics had net income of approximately $213,000 for the six months ended Dec. 31, 1989. Morehouse Industries had assets of approximately $3.8 million at Nov. 30, 1989 and total stockholders' equity of approximately $3.3 million. Morehouse had a net loss for the three months ended Nov. 30, 1989 of $120,900.

HANNOVER, WEST GERMANY (MARCH 23) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME), a global producer of mass data storage devices and accessories Friday announced seven mass storage solutions which are compatible with IBM's new SCSI-based PS/2 Model 80's and Model 65 SX which were announced Tuesday.

The SCSI-based hard disk subsystems are being developed in capacities of 60-, 80-, 120-, 160- and 250- Mbytes. The company currently offers 325- and 650-Mbyte subsystems which are compatible with the new IBM machines. The 60- to 250-Mbyte subsystems are internal, 3-1/2-inch and the 325- and 650-Mbyte are 5-1/4 inch internal and external configurations. The company's existing 150- and 250- Mbyte tape backup systems also support IBM's new machines.

Available in external and internal configurations, the CMS Enhancements hard disk subsystems come complete with cables software, user's manual and a one-year warranty. The 325- and 650-Mbyte PREVAIL subsystems carry a two-year warranty.

''We are very excited about IBM's new releases. Our companies have been working in parallel on products to meet the requirements of IBM's new SCSI-based products. As a result, we can deliver some of these products today,'' said Robert Wagoner, IBM product manager for CMS Enhancements. ''IBM's participation in the non-proprietary SCSI technology arena will help stabilize the technology and ultimately set a standard for the industry,'' added Wagoner.

Suggested retail pricing of the 60- to 250-Mbyte subsystems ranges from $1,150 to $2,750. These subsystems will be available Q2. Available immediately, the 300- and 625-Mbyte subsystems retail for $3,845 and $6,295, respectively. The company said it will continue to offer enhancement products for all existing IBM systems.

CMS Enhancements Inc., is a $200 million public company producing mass data storage devices and accessories for computers manufactured by Apple, IBM, Compaq, Digital Equipment Corp., Epson, NEC, Toshiba, Tandy, AT&T, Sun Microsystems, Commodore, AST and many others. The firm, with headquarters in Southern California, ships more than 50,000 hard disk and tape drives per month to 1,500 dealers and distributors in the United States and 60 other nations.

Additional information is available from Robert Wagoner, product marketing manager, CMS Enhancements Inc., 1372 Valencia Ave., Tustin, Calif., 92680, telephone 714/259-5948, 714/549-4004.

GREENWICH, CT (MARCH 23) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLTF) and Astra C.A.P.S.A. of Buenos Aires, Argentina, have announced the formation of an Argentine joint venture, ASTRASTOLT, and the sale of the parcel tanker M/T STOLT SEA to an Astra affiliate.

The ship has been renamed M/T ALTAIR and registered under the Argentine flag. M/T ALTAIR is 23,100 metric deadweight tons and was built 1971.

Astra and Stolt-Nielsen will coordinate the operation of M/T ALTAIR in the international parcel tanker trade through their joint venture company ASTRASTOLT, and will cooperate in other shipping-related fields.

This venture will bring together Stolt-Nielsen's expertise in the parcel tanker trade and experience in the international distribution of chemicals and vegetable oils, with Astra's established position in the Argentine economy.

Astra is an Argentine oil company with activities within exploration, production and marketing of petroleum. The company is traded on the stock exchanges in Buenos Aires and Geneva, Switzerland.

Astra is a pioneer in maritime transportation among the private Argentine petroleum companies.

The company owns a fleet specializing in domestic and international traffic of crude oil, petroleum products, and liquified petroleum gases. In this field, through the increase of its own efficiency in investments and continuously expanding business, Astra has constantly kept abreast of technological progress, and has updated its fleet.

Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company specializing in the distribution of bulk liquids, both by land and sea.

The company operates worldwide, with 21 offices in 12 countries. Stolt-Nielsen provides total distribution services with its combination of more than 55 transoceanic and 30 coastal parcel tankers, totalling about 1.7 million deadweight tons; 2,500 intermodal tank containers in door-to-door service; five regional storage and distribution tank terminals in the United States, Northwest Europe and Brazil; as well as barges, railcars and tank trucks.

Stolt-Nielsen pioneered the development of the parcel tanker trade in Latin America in the early 1960's, and has been a leading participant ever since.

The company has its own office in Buenos Aires. Its parcel tankers connect Argentina with other Latin American countries, Japan and the Far East, Europe and the United States. The new agreement with Astra will further enhance Stolt-Nielsen's ability to serve its customers doing business in Argentina.

LOS ANGELES (MARCH 23) BUSINESS WIRE - Carolco Pictures Inc. (NYSE:CRC) has extended its exchange offer for all of the outstanding depositary receipts representing limited partnership interests (''partnership units'') in The Vista Organization Partnership L.P., a Delaware limited partnership (the ''Vista Partnership'').

The exchange offer is now scheduled to expire at midnight, Eastern Daylight Time, on April 2, 1990.

The exchange offer provides that Carolco will offer to exchange $2.45 (or $2.55 in the event that certain lawsuits against the Vista Partnership and its affiliates are settled) in Carolco units for each validly tendered partnership unit.

Each Carolco unit consists of a $1,000 principal amount 14 percent Senior Note due 1993 of Carolco and a certain number of Carolco Warrants, in most circumstances, to be determined on (and not later than) the seventh business day prior to the expiration date of the exchange offer.

Holders of partnership units need take no further action if they have previously tendered and do not wish to withdraw their tender. As of March 21, 1990, 6,861,873 partnership units, or approximately 60 percent of outstanding partnership units, had been tendered for exchange pursuant to the exchange offer.

The exchange offer is conditioned upon, among other things, a minimum of 8,050,000 partnership units (70 percent of the partnership units outstanding) being validly tendered.

The exchange offer is subject to the terms of, and is being made only by means of, a prospectus and supplement thereto, copies of which can be

obtained from Carolco.

Carolco is a diversified entertainment company engaged in the financing, production and leasing of motion picture properties worldwide. The Vista Partnership was formed to engage in the production and exploitation of feature-length theatrical motion pictures.

SEATTLE (MARCH 23) BUSINESS WIRE - Immunex Corp. (NASDAQ: IMNX) announced in Friday's issue of the the scientific journal ''Cell'' that its scientists have cloned the gene encoding the human Interleukin-7 (IL-7) Receptor, and indentified a naturally occurring soluble form of the molecule.

Soluble, or circulating receptors are a new class of immune system regulators that Immunex scientists believe the body uses to shut down an overactive immune response or turn off a normal immune response once the need to fight a foreign organism has passed.

The IL-7 Receptor -- the third cytokine receptor gene cloned by Immunex scientists, and the second for which a naturally occurring soluble form has been discovered -- is potentially a new treatment for such autoimmune disorders as organ transplant rejection and diabetes.

A soluble version of the IL-1 Receptor engineered by Immunex has been shown in preclinical studies to inhibit immune responses similar to those that cause arthritis and other autoimmune disorders. A soluble version of the IL-4 Receptor engineered by Immunex has been shown in preclinical studies to inhibit immune responses similar to those that cause allergies and asthma. Immunex scientists announce they had cloned the IL-1 Receptor gene in July 1988 and the IL-4 Receptor gene in October 1989.

Receptors and the Immune System

The immune system protects the body from infection and disease through a variety of means, including the interaction of white blood cells that recognize and destroy foreign organisms. These white blood cells are controlled and coordinated by proteins called cytokines, such as IL-7, which direct the growth and function of these cells. Cytokines perform their tasks by binding to structures called receptors, on the surface of cells. When bound, the receptor transmits the cytokine's message to the cell instructing it to divide or produce antibodies, enzymes or other cytokines.

A soluble receptor retains its ability to bind to a cytokine, but lacks the portion of the receptor normally attached to a cell. Research continues in investigating receptors' therapeutic potential at neutralizing misdirected or inappropriate immune responses that cause inflammatory or autoimmune diseases.

SAN FRANCISCO (MARCH 23) BUSINESS WIRE - AIFS Inc. (ASE/PSE:AIF), a San Francisco-based international educational services company, announced Friday that the management buy-out group led by Roger O. Walther and Cyril Taylor had received a financing commitment from Security Pacific National Bank for the group's proposed acquisition of AIFS.

Under the terms of such commitment, Security Pacific has agreed to lend to Marina Holdings Corp., the corporation formed and to be capitalized by the management group (''Marina''), the sum of up to $14 million to fund the merger buy-out of the public stockholders of AIFS at $6.50 per share in cash and to pay merger-related expenses.

Walther indicated that the $14 million bridge facility to Marina to Marina is intended to be repaid out of a secured seven-year term loan of $6 million, also to be made by Security Pacific, to AIFS, as the corporation surviving the merger of Marina into AIFS, and out of up to $8 million in cash reserves presently held by AIFS.

A representative of the company noted that the financing commitment is subject to, among other things, the negotiation and execution of definitive loan agreements. It is expected that the definitive agreements will contain financing and other payments and capital expenditures customary in similar financing.

Walther stated that he was pleased that the principal terms of the financing has been agreed upon. However, he emphasized that other important conditions to the acquisition still existed, including receipt of required approvals from holders of the company's senior subordinated debentures, and approval of the acquisition by a majority of the company's public shareholders at a meeting to be held in July or August.

The company also operates 20 language centers throughout the United States

and 20 abroad for intensive English language training for foreign students.

RICHMOND, BRITISH COLUMBIA (MARCH 23) BUSINESS WIRE - HeadQuarters Office Supplies Warehouse (OTC:HQOIU, Units; HQOIA, Class A Common Stock; HQOIW, Class A Warrants; HQOIZ, Class B Warrants), Canada's first warehouse-style office supplies and equipment superstore company will celebrate the grand opening of its premiere location in the Greater Vancouver area, at 8240 Granville Ave., Richmond, B.C., with a ribbon-cutting ceremony at 9 a.m. on Thursday, March 29, according to HeadQuarters Office Supplies Warehouse President and Chief Executive Officer George J. Handgis.

Operating hours at the new store will be 7 a.m. to 9 p.m. Monday to Friday; 8 a.m. to 6 p.m. Saturday; 10 a.m. to 6 p.m. Sunday. The location covers approximately 24,000 square feet and will employ more than 45 people at the outlet under the management of Brian Avery.

George J. Handgis, president and chief executive officer, said: ''We have developed a one-stop resource for small- to medium-sized businesses and individual consumers. HeadQuarters Office Supplies Warehouse will offer over 7,000 business-related products at discounts of up to 70 percent.

HeadQuarters Office Supplies Warehouse will expand into Canada the successful warehouse format established by HQ Office Supplies Warehouse Inc. (OTC: HQOSA, Class A Common Stock; PSE:HQO), based in Long Beach, Calif., under a special licensing agreement with HQ Office Supplies Warehouse Inc. HQ Office Supplies Warehouse is one of the leading office supplies and equipment chains in the Western region of the United States, with 13 stores currently in operation.

Founded on a unique merchandising strategy based on direct shipment from manufacturers, rapid inventory turnover and centralized control of purchasing, replenishment and pricing, HeadQuarters Office Supplies Warehouse will maintain deeply discounted prices and excellent service. HeadQuarters Office Supplies Warehouse was founded in July 1989 and plans to open 8 to 12 locations in Canada by the end of 1990.

#90082b0647 03/23/1990 ~Business Wire
IRVINE, CA (MARCH 23) BUSINESS WIRE - Photoplex Broad Spectrum Sunscreen Lotion is the only nationally available sunscreen product which has been clinically proven to protect against ultraviolet A (UVA) radiation.

Herbert Laboratories, the skin care division of Allergan Inc. (NYSE:AGN) issued this statement Friday to clarify recent controversy and potential confusion regarding general claims by a wide variety of sunscreens regarding their ability to provide ''broad spectrum'' and UVA protection.

An article appearing in the March 12 issue of the F-D-C Reports ''The Pink Sheet'' (T&G 14) reported that the U.S. Food and Drug Administration had issued feedback letters to several sunscreen manufacturers and researchers stating that sunscreen claims of ''broad spectrum'' or UVA protection without appropriate FDA review are considered unsubstantiated and potentially misleading, and products so labeled may be subject to regulatory action.

Photoplex Sunscreen did not receive such a letter, since it is the only nationally available sunscreen to have successfully completed the FDA's New Drug Application (NDA) process and therefore can include UVA protection statements in the product's labeling. Photoplex Sunscreen is a true broad-spectrum sunscreen. It contains Parsol 1789 (avobenzone), which absorbs throughout the UVA spectrum and was previously unavailable in the United States.

Confusion was created, however, by the erroneous inclusion in ''The Pink Sheet'' of Photoplex Sunscreen in a listing of other sunscreens that are making unsubstantiated claims of ''broad spectrum'' and UVA protection.

A correction of this error was made in the March 19 issue of ''The Pink Sheet'' (''In Briefs'').

Allergan Inc., based in Irvine, employs more than 6,800 people. A worldwide health care company concentrated in eye and skin care, Allergan supplies prescription and over-the-counter ophthalmic and dermatological pharmaceuticals, contact lenses and lens care products, and ophthalmic diagnostic products.

RALEIGH, NC (MARCH 23) BUSINESS WIRE - GoodMark Foods Inc. (NASDAQ/NMS:GDMK) Friday announced that the board of directors has authorized the purchase of 100,000 shares of common stock at the closing market price on March 21, 1990, from H. Hawkins Bradley, a director and retired chairman of GoodMark.

The purchase will be made with internally-generated funds and existing bank credit facilities. The purchase is being made pursuant to a general authorization approved by the shareholders at the company's annual meeting in September, 1989. The company currently has 4.4 million shares outstanding.

Commenting on the announcement, Ron E. Doggett, chairman and chief executive officer, said: ''We believe this planned purchase of shares represents a sound investment for the company at current price levels and allows us to accumulate additional shares for future use for our employees or for acquisitions.''

GoodMark Foods is the nation's leading producer and marketer of meat snacks.

The company is also a regional producer of packaged meat products, cookies crackers, brownies and other snacks. Its principal brands include Slim Jim, Penrose, and Pemmican meat snacks; Jesse Jones packaged meats; A Whale Of A Snack cookies and crackers; and Andy Capp's snacks.

BEAVERTON, OR (MARCH 23) BUSINESS WIRE - Tektronix Inc. (NYSE:TEK) announced a loss of $25,494,000, for its third fiscal quarter which ended March 3, 1990.

These results include reserves of $12,200,000 related to the company's recently announced expense reduction steps. In the prior year's third quarter, earnings were $6,380,000. The loss per share this quarter was 88 cents, compared with earnings per share of 22 cents last year.

Sales in the quarter were $421,781,000, down 3 percent from $434,102,000 in the prior year.

The total number of employees at the end of the third quarter was 14,826, down from 15,708 at the end of the previous fiscal year.

The company has already announced plans to reduce employment by a further 600 people by the end of the fiscal year on May 26. After the impact on profit share expense, the $12,200,000 in charges for the company's cost-reduction steps reduced earnings by $8,800,000 in the third quarter.

The loss excluding the charges would have been $16,694,000 or 57 cents per share. In addition to the employment reductions, the company has announced the reduction of excess manufacturing capacity through the closure of plants in Clark County, Washington and on the island of Guernsey.

Customer orders in the quarter were $434 million, up 3 percent from last year's $420 million. The backlog of unfilled orders at the end of the quarter was $249 million, compared with $237 million at the beginning of the quarter and $232 million at the end of last year's third quarter.

Operating income in the quarter was $4,342,000 when the cost-reduction charges are excluded. That is well above the forecast which the company made on February 21.

The decline in the company's sales for the quarter was concentrated in the Test and Measurement Group, and a substantial part of the planned expense reductions are concentrated there. Test and Measurement sales in the quarter were 12 percent below the level recorded in last year's third quarter.

Communications sales were 3 percent above last year. Visual Systems sales were 23 percent above last year. U.S. sales were flat compared to the prior year, and made up 53 percent of the total. International sales were up 6 percent below last year.

Tektronix' third quarter is 16 weeks long; the first, second, and fourth quarters are 12 weeks long.

RICHMOND, VA (MARCH 22) BUSINESS WIRE - Cadmus Communications Corp. (NASDAQ: CDMS) Friday announced that Jerry L. Marler, chief executive officer of American Graphics Inc., will retire from active management of the Cadmus subsidiary on June 30, 1990.

C. Kenneth Lester, president of American Graphics, will assume Marler's position as CEO of the Atlanta-based company.

Marler, 56, who founded American Graphics in 1970, is expected to remain associated with American in a consulting capacity and as a member of the Cadmus board of directors.

Cadmus Chairman Wallace Stettinius stated: ''Mr. Marler has been instrumental to the success of American's business. We have been pleased with American's performance under his leadership and are fortunate that Mr. Marler will remain affiliated with the company after his retirement. We expect that Mr. Lester's promotion to CEO will enable us to accomplish a smooth management succession because of his long association with American.''

Lester, 49, joined American Graphics as general manager in 1972 and served in that capacity until being named president in 1984. He began his graphic arts career in 1959, and has been active in Atlanta's printing industry since then.

American Graphics became the third principal subsidiary of Cadmus Communications Corp. in June 1986. A producer of high-quality, sheetfed promotional printing, American specializes in creating point-of-purchase advertising materials for manufacturers, retailers and wholesalers nationwide.

Headquartered in Richmond, Cadmus is a graphic communications holding company specializing in financial and promotional printing, point-of-purchase advertising, full service direct marketing, and complete production services for publications. Cadmus common stock is traded through the NASDAQ National Market System, Symbol CDMS.

#90082b0674 03/23/1990 ~Business Wire
STAMFORD, CT (MARCH 23) BUSINES WIRE - EnviroSource Inc. (formerly NEOAX Inc.) (NASDAQ:ENSO) Friday announced that the maturity date on its $160 million issue of extendible reset senior subordinated notes (the ''notes'') has been extended to April 1, 1998, and the interest rate on the notes has been reset at 14 percent per annum for the life of the issue.

The notes, issued in connection with EnviroSource's 1988 acquisition of IU International Corp., were designed to mature on April 1, unless EnviroSource exercised an option to extend the maturity of the notes to April 1, 1998.

The notes were initially issued with a 14 percent coupon. EnviroSource's election to exercise the extension option also required the interest rate on the notes to be ''reset.''

The notes originally designated Drexel Burnham Lambert Inc. to advise the company as to the reset rate, but in light of Drexel's departure from the marketplace, EnviroSource has amended the notes to substitute Salomon Brothers Inc.

The company completed certain other amendments to the notes and related indenture, effective March 19, including the following: on April 15, EnviroSource will be required to issue 500,000 shares of its common stock to noteholders of record on April 14.

By April 15, the company will be required to offer to purchase $10 million of the notes at a price equal to 103 percent of principal amount.

EnviroSource will be required to issue an additional 500,000 shares of its common stock to noteholders on May 15 of each of 1991, 1992, and 1993, unless, on or prior to April 1 of such years, it shall have offered to purchase $10 million, $30 million and $30 million of notes, respectively, at a price equal to 103 percent of prinicpal amount.

Certain covenants in the indenture were also modified or added, including a new provision entitling noteholders to ''put''their notes to the company under certain circumstances upon a ''change in control'' of EnviroSource, as defined in the indenture.

Louis A. Guzzetti Jr., president and chief executive officer of EnviroSource stated, ''In 1988, along with the financial community and most issuers of subordinated debt, we did not foresee the turmoil that has developed in the high yield securities markets in recent months. We would have preferred not to have improved the terms of the notes in order to

achieve an acceptable ''reset rate''; but under the circumstances, we are pleased with the outcome. We have extended the maturity of the notes on terms that will not increase our cash interest costs and will provide us with the opportunity at future dates to determine whether it will be more advantageous to retire additional notes or to grant noteholders increased equity in EnviroSource.''

EnviroSource supplies industrial customers with long-term, specialized services, primarily the recycling, handling, stabilization or landfilling of environmentally sensitive wastes or by-products.

WILMINGTON, MA (MARCH 23) BUSINESS WIRE - Kevlin Microwave Corporation (NASDAQ National Market System:KVLM) Friday announced that effective April 1, 1990 Arthur Williams, age 53, will succeed E. Joseph Simmons as its President and Chief Operating Officer.

Mr. Simmons resigned from those positions and his position as a member of the Company's Board of Directors to pursue other business interests.

Mr. Williams has served on Kevlin's Board since July 1988. Before accepting his new position at Kevlin, Mr. Williams headed his own management consulting firm. Earlier he was corporate vice president of international operations for Keene Corporation, a manufacturer of laminates and composite materials serving the electronic and microwave industries, based in New York City.

A native of Pittsburgh, Pennsylvania, Mr. Williams is a graduate of Penn State University where he earned a bachelor of science degree in mechanical engineering. Mr. Williams is a member of the American Association of Mechanical and Petroleum Engineers, The Metal Society and The Society for Materials and Process Engineers.

Commenting, Ernest W. Lattanzi, Chairman stated, ''We wish Joe Simmons the very best in his future endeavors. As a director, Art Williams became thoroughly knowledgeable of our business. Now as an officer, we will have the benefit of his extensive experience in the microwave marketplace, including international marketing and distribution.''

Kevlin Microwave Corporation is a leading supplier of microwave rotary

couplers and high frequency connectors and components which are sold to the major manufacturers of modern radar and communications systems.

POUGHKEEPSIE, NY (MARCH 23) BUSINESS WIRE - The Poughkeepsie Savings Bank, FSB (NASDAQ:PKPS) announced Friday that it had reached an agreement to end litigation with members of a shareholder group which conducted proxy contests at the 1988 and 1989 annual meetings.

Pursuant to the agreement, Richard Morash will resign his claim to a seat on the bank's board of directors. Howard Curd and Jonathan Bulkley will be seated on the bank's board of directors on April 1.

A new director to replace Morash will be nominated by Poughkeepsie's board of directors. The candidate will not be affiliated with Poughkeepsie's present board and management and will be agreed to by the group.

In accordance with the bank's bylaws, it is expected that the candidate will be submitted to Poughkeepsie's shareholders for election at the 1990 annual meeting of shareholders which is currently scheduled to held on April 27 at the Hellenic Community Center in Poughkeepsie.

Because of the agreement and the need to select a nominee for the board of Poughkeepsie stated that it might decide to delay the annual meeting for a period not to exceed 30 days.

Poughkeepsie said it would announce the new meeting date within the week. The record date will not be affected. All litigation between the bank and members of the shareholder group will be dismissed and the bank will pay $250,000 to the group in connection with the settlement.

The agreement also provides that the shareholder group intends to dissolve itself and that the bank will not object to such dissolution.

Christoph Schmidt, Poughkeepsie's board chairman and chief executive officer said he welcomes Curd and Bulkley to the board and expected that they would be a constructive addition to the bank's board of directors.

Bulkley and Curd joined Schmidt in stating ''we are pleased to have

reached an amicable and constructive resolution to the issues that have demanded so much of the bank's attention over the last few years.

Poughkeepsie Savings Bank, with total assets of $1.7 billion is a community banking, mortgage banking and retail financial service institution. It has branches in the Mid-Hudson Valley of New York, as well as North Carolina and South Carolina, and loan production facilities in Florida, Georgia, Pennsylvania, New York and Virginia.

DALLAS (MARCH 23) BUSINESS WIRE - American Telecommunications Corp. (NASDAQ:AMTTF) announced Friday that it had achieved a net profit of $59,598 on sales of $995,000 for the month of February 1990.

This follows a net profit of $14,679 on sales of $1,039,841 for the month of January 1990.

Kerry R. Fox, ATC's president, noted that this improved profit performance for the first two months of 1990 greatly increases the company's confidence in achieveing both a profitable quarter for the period ending March 31, 1990 and for the last half of ATC's fiscal year ending June 30, 1990.

The company also announced that it is presently in active negotiations with three separate hotel groups which together comprise a total of 75 hotels with some 24,000 rooms and 2,200,000 billable minutes per month, which would produce an increase in ATC's revenue of some $700,000 monthly. Decisions are expected on each of these potential new customers within 30-45 days.

American Telecommunications Corp. provides telecommunications management services to hotels and motels throughout the Continental United States, including a full line of long distance services, operator and billing services and the installation of maintenance of specialized call accounting equipment.

GARDEN CITY, NY (MARCH 23) BUSINESS WIRE - The board of directors of Esselte Business Systems Inc. (NYSE:ESB) Friday approved an amendment to the merger agreement among Esselte Business Systems, Esselte AB and a subsidiary of Esselte AB.

Pursuant to the revised agreement, each share of common stock of Esselte Business Systems not owned by Esselte AB would be exchanged for an amount in cash equal to $47.64 per share plus interest at 9 percent per annum for the period commencing May 16, 1990 to the effective date of the merger, if the merger has not occurred by that time.

The board also set a record date of April 9, 1990 for a special meeting of stockholders to vote on the proposed merger. The date for the special meeting will be announced as soon as it is set. It is expected to take place by the beginning of June, 1990.

Esselte Business Systems is the American holding company for Esselte AB's office supplies, graphic arts supplies, and retail supplies and equipment operations.

Esselte AB's shares are listed on the Stockholm and London Stock Exchanges. Esselte Business Systems' shares are listed on the New York and Stockholm Stock Exchanges.

HAUPPAUGE, NY (MARCH 23) BUSINESS WIRE - Beauty Labs Inc. (NASDAQ Symbol:LABB) Friday announced that it has filed a current report on Form 8-K which states the following:

''On May 10, 1989, the Company filed a Form 8-K stating that on May 1, 1989, the Company received a regulatory letter from the U.S. Food and Drug Administration (''FDA'') regarding the product Overnight Nail Miracle. The letter stated that, in FDA's opinion, due to the labelling of the product, the product was considered a drug within the meaning of Section 201(g) of the Food, Drug and Cosmetic Act (''FDCA''). The FDA requested a reply from the Company stating what action it will take to discontinue the labelling and marketing of Overnight Nail Miracle as a drug.

"The Company made several modifcations
of the labelling of Overnight Nail Miracle to ensure compliance with the FDCA. On March 14, 1990 the FDA by letter to the company stated that at

the present time it had not objections to the revised labelling for Overnight Nail Miracle. The Company believes that this action resolves, amicably and successfully, the matter of determining the proper labelling to be used for any future manufacturing of Overnight Nail Miracle. Sales of Overnight Nail Miracle comprised approximately 13 percent of the company's sales for fiscal 1989.''

Beauty Labs Inc. manufactures, markets and distributes beauty products, hair care and hair related accessory products primarily to mass volume retail outlets.

ADA, OK. (MARCH 23) BUSINESS WIRE - Pre-Paid Legal Services Inc. (ASE:PPD) an Oklahoma corporation which markets legal-expense plans in 34 states that enables individuals to prepay costs of certan legal services, announced Friday the appointment of a new chief operating officer and chief financial officer.

Chief Executive Officer Harland C. Stonecipher announced current company officer Glen Hyden will assume the chief operating officer's position and Randy Harp, the chief financial officer of Ratex Resources, Oklahoma City, will fill the CFO.

''We believe these talented young men will compliment each other and greatly assist the company to position itself for a period of growth,'' Stonecipher said.

Harp and Hyden are both graduates of East Central Oklahoma State University.

Hyden has been with the legal-expense plan company for three and a half years, where he has worked in the customer service, claims and shareholder relations departments. In June 1987 he was promoted to assistant vice president of claims and investigations. He became executive vice president of administration June 1989.

Hyden is a former journalist and special assistant to the Oklahoma Attorney General.

Harp was a senior staff accountant with Peat Marwick, Mitchell & Co. from 1978 to 1981. He was licensed as a certified public accountant (CPA) in Oklahoma in 1981.

Harp is the former controller of Great Western Energy Co., an Oklahoma City oil and gas exploration company.

He has been with Ratex Resources Inc., a publicly traded (OTC) oil and gas company, the past seven years. He held the positions of president, treasurer and CFO and director.

Stonecipher said Hyden will direct the operations of the company's service and marketing divisions, while Harp will manange the financial, accounting and information service areas.

ROWAYTON, CT (MARCH 23) BUSINESS WIRE - Yves F.M. Hentic, president of Emphatic Mergers Inc. (a public Nevada corporation) and Jay N. Torok, chairman and chief executive officer of First National Realty Associates Inc. (a private Delaware corporation) jointly announced an agreement in principle had been reached to merge the two corporations, subject to a definitive agreement and stockholder approval at special meetings to be held on Tuesday, April 3, 1990.

First National Realty Associates Inc., (''First National'') currently owns and operates six residential real estate companies in five states, with 32 offices and approximately one thousand sales agents.

First National intends to acquire additional residential real estate companies in various markets throughout the United States. Torok stated that the merger would allow First National to grow and meet its objective of becoming one of the largest national residential real estate companies with representation in many diverse markets.

Speaking for Emphatic Mergers Inc., Hentic noted that the merger would benefit the stockholders by increasing greatly the company's asset base and broadening the company's investment appeal.

ENGLEWOOD, CO (MARCH 23) BUSINESS WIRE - Electromedics Inc. (NASDAQ:ELMD) chairman and chief executive officer, F. James Lynch, Friday announced that ''sales for the fourth quarter and year ended Dec. 31, 1989, continued to accelerate at record levels, and 1989 proved to be a profitable year.

''However, we did not reach our expectations as we experienced a marginal loss in the fourth quarter. This was due primarily to increased manufacturing costs in gearing up operations to accomodate future sales growth, as well as unexpected costs associated with first-time implementation of off-shore manufacturing.

''Increased operating costs have been contained and are behind us. We believe that higher sales volume in both domestic and international markets will enable us to achieve record sales and operating profits in 1990 and in the forseeable future,'' stated Lynch.

''Important steps have been taken to adjust our operations and implement the sales and support mechanisms necessary to insure a solid foothold in the world marketplace where there is increasing demand and oportunity for Electromedics' blood recovery systems,'' Lynch added.

For the three months ended Dec. 31, 1989, Electromedics had record revenues of $6,833,000 compared with revenues of $6,269,000 for the same three month period in 1988. There was a net loss for the quarter of $66,000, or ($0.007) per share, vs. net income of $405,000, or $0.044 per share in the same quarter last year.

For the twelve months ended Dec. 31, 1989, Electromedics had record revenues of $25,545,000, a 14 percent increase over revenues of $22,324,000 in 1988. Net income for the year was $583,000, or $0.064 per share, compared with $967,000, or $0.106 per share in 1988.

In Dec. 1989, Electromedics issued $10 million of 12-year convertible subordinated debentures at an interest rate of 10 percent. The proceeds were used to repay a bank borrowing of $2,345,000 (which bore interest at 1.5 percent plus prime) and to repay $2,471,000 of outstanding 12 percent convertible subordinated debentures in Jan. 1990, while the balance of the proceeds will be used for general working capital purposes.

Electromedics Inc. develops, manfuactures and markets a proprietary line of autotransfusion equipment and related medical supplies which enables the purification and recirculation of a patient's own blood during surgery. The company also manufactures cardiovascular disposal products, as well as a line of digital electronic temperature monitoring devices and disposable probes.

ROCHESTER, NY (MARCH 23) BUSINESS WIRE - Eastman Kodak Co.'s management is looking to 1990 as a year of improved financial performance, according to the company's annual report for 1989, soon to be mailed to shareowners.

''Many of the major discontinuities which marked 1989 are behind us and we face the future with an improved business portfolio, a better overall cost position and a process for better asset management,'' Colby H. Chandler, chairman, and Kay R. Whitmore, president, stated in their management comments.

''We look forward to higher sales, better earnings from operations, and improved cash flows, especially in later quarters when benefits of initiatives put into place last year are more fully realized,'' the report says.

The theme of this year's annual report is ''Champions of Customer Success.'' Highlighting the descriptive sections of the report within each of the four business sectors are profiles of unique customer applications for a range of Kodak products.

The report outlines five strengths that will significantly add value to the company's business in the 1990s:

Kodak's unparalleled reputation for quality -- demonstrated again in early 1990 with a number one ranking by consumers in an independent research study,
its excellence in both chemical and electronic imaging,
recent company moves to reduce its cost base, combined with organizational changes aimed at improving effectiveness in each of its business sectors,
its commitment to research and development, and
its global reach, recently strengthened with the establishment of new international headquarters in London.

A special section of the report highlights the company's four business sectors in imaging, information systems, chemicals, and health with a listing of key products in each. Supporting and unifying these four sectors are the company's strengths in its people, its manufacturing and technology base, and its marketing prowess.

''For the longer term, our four-sector vision is clear, as is our commitment to be the very best where we choose to compete in each,'' Chandler and Whitmore noted. ''Our strategic intentions are well defined. And we are dedicated to managing in a way that creates additional value for customers, employees, shareowners and others who have a stake in the results we produce.''

Kodak is mailing the 52-page, full-color report to more than 170,000 shareowners around the world. Included with the report is the company's notice of the 1990 annual meeting and proxy statement, proxy card, and request for admission form to the May 9 annual meeting of shareowners in Orlando, Fla.
